# Floating Photovoltaic System on Kranji Reservoir – Environmental Impact Assessment (EIA)

Volume 3 – Appendix 7.1

Version 1.0 (Final)

May 2024

Project No.: 0566575

*Sustainability is our business*

ERM

1. This Report has been prepared exclusively for the use and benefit of Environmental Resources Management (S) Pte Ltd's ("ERM") Client, the Renewable Energy User selected by EDB ("Client"), to assist in determining the technical feasibility and environmental impact of the potential deployment of a large-scale floating photovoltaic system to generate renewable energy for private sector consumption in Singapore ("System"). A Developer/ Owner (to be selected and appointed) will own, design, install, operate and maintain the System.

2. This Report has been prepared by ERM in accordance with generally accepted consultancy principles and is subject to the scope, materiality, guidelines, qualifications, methodology and assumptions that are set out or otherwise referenced in the Report and the terms of reference agreed between ERM and the Client, and is published on the express condition that ERM, the Client and their respective affiliates, officers, employees, agents, representatives and advisors ("Disclaiming Parties") each fully disclaims all liabilities or responsibilities whatsoever for any use of or reliance on this Report by any third party. The Disclaiming Parties (a) make no representations or warranties (express or implied) to any third party as to the accuracy, reliability, currency, adequacy or completeness of the Contents or with respect to the use of or reliance on any Contents disclosed in this Report and (b) assume no liability whatsoever with respect to or arising from any error, omission, inadequacy, incompleteness or mis-statements in the Contents and/or the use of or reliance on any Contents disclosed in this Report. Any use of or reliance on this Report by any third party is solely at its own risk and the Disclaiming Parties are fully released from any and all liabilities for direct, indirect, consequential or special loss or damage whether arising in contract, warranty, express or implied, tort or otherwise, and irrespective of fault, negligence and strict liability.

3. Following the completion and approval of the Environmental Impact Assessment by the relevant statutory authorities, none of the Disclaiming Parties assume any obligation (expressed or implied) to update, correct or supplement any assumption, finding, statement, recommendation, method or information contained in this Report ("Contents") or to inform any third party of any revisions to or corrections of the Contents or any facts, events, matters or circumstances occurring after the date of this Report which may invalidate, affect or qualify any part of the Contents.

4. This Report includes forward-looking statements, plans or information. These forward-looking statements, plans or information reflect, amongst others, ERM's views as to how the implementation of the Project will affect Kranji Reservoir (as identified in the Report) ("Site") and are based on certain assumptions made by ERM based on consultations with and input from public stakeholders, nature groups and government agencies as well as assumptions with respect to certain future events projected as of the date of this Report. These forward-looking statements, plans or information are subject to, without limitation, future economic condition, future condition or intended use of the Site and other risks, events or factors and uncertainties that may arise during the course of the System's deployment, development and operation to be undertaken by the Developer/ Owner. Actual condition of the Site and impact of the Project on the Site could therefore differ materially from those set forth in such statements, plans or information.

5. This Report further includes recommendations, findings and plans made or proposed by ERM based on consultations with and input from public stakeholders, nature groups and government agencies. Nothing in this Report shall impose any obligation or duty on any of the Disclaiming Parties to implement (or procure any person to implement) any such recommendations, findings and/or plans and the Disclaiming Parties undertake no duty nor accept any responsibility to any third party with respect to the same.

6. Reproduction and redistribution of this Report without the prior written permission of ERM and the Client is strictly prohibited. No third party shall obtain any right or interest in or to the Report, or utilise, refer or otherwise use this Report for any purpose other than the sole purpose of understanding and reviewing the potential environmental impact of the System on the Site. By accessing or downloading this Report, the recipient acknowledges and agrees that it understands, accepts and agrees to the disclaimers and qualifiers herein.

# APPENDIX 7.1 TERRESTRIAL BIODIVERSITY BASELINE REPORT

# CONTENTS

**1. INTRODUCTION ..... 1**

**2. METHODOLOGY ..... 1**

2.1 BIA Desktop Assessment ..... 3
2.1.1 Land Use History ..... 3
2.1.2 Nomenclature and Taxonomy ..... 3
2.1.3 Species of Conservation Significance ..... 4
2.2 Field Assessment ..... 5
2.2.1 Floristic Field Assessment ..... 5
2.2.2 Faunistic Field Assessment ..... 8

**3. SURVEY FINDINGS ..... 29**

3.1 Land Use History ..... 29
3.2 Habitat Types ..... 31
3.2.1 Scrubland ..... 33
3.2.2 Urban Vegetation ..... 34
3.2.3 Freshwater Marsh ..... 35
3.2.4 Abandoned-land Forest ..... 36
3.2.5 Exotic-dominated Secondary Forest ..... 37
3.2.6 Mixed Forest (Coastal and Abandoned-land Forest) ..... 38
3.2.7 Cleared Area and Infrastructure ..... 38
3.2.8 Native Clusters ..... 39
3.2.9 Man-made Waterbodies ..... 39
3.3 Floristic Baseline Finding ..... 40
3.3.1 Overview ..... 40
3.3.2 Species of Conservation Significance ..... 41
3.3.3 Large Specimens ..... 47
3.3.4 Other Specimens of Value ..... 47
3.4 Faunistic Baseline Findings ..... 49
3.4.1 Terrestrial ..... 49
3.4.2 Reservoir ..... 74

**4. SUMMARY ..... 132**

**5. REFERENCES ..... 133**

## APPENDICES

Appendix A: Flora Species List

Appendix B: List and Location of Species of Conservation Significance

Appendix C: List and Location of Large Specimens

Appendix D: List of Probable and Recorded Faunal Species

Appendix E1: Faunal Survey Data

Appendix E2: Bat Activity Survey Data

Appendix E3: Stationary Bat Detection Survey Data

Appendix F: Camera Trap Data

Appendix G: Vantage Point Survey Data

Appendix H: Bird Usage Maps (Additional Information)

## List of Tables

# 1. INTRODUCTION

Terrestrial biodiversity surveys have been conducted to establish the existing terrestrial biodiversity conditions within the Biodiversity Impact Assessment (BIA) Study Area to inform the Environmental Impact Assessment (EIA) of the Floating Photovoltaic (FPV) System on Kranji Reservoir. Over a course of 20 months, between October 2020 and May 2022, various terrestrial baseline surveys were carried out.

Camphora Pte Ltd (Camphora) were commissioned by Environmental Resources Management (S) Pte Ltd (ERM) to carry out the comprehensive terrestrial baseline surveys. The presentation of the findings of the terrestrial baseline surveys have been led by ERM, with support from Camphora.

The terrestrial baseline surveys covered terrestrial flora and fauna, including:

- Aculeate hymenopterans (bees and stinging wasps);
- Odonate (dragonflies and damselflies);
- Butterflies;
- Herpetofauna (amphibians and reptiles);
- Birds;
- Non-volant mammals; and
- Bats.

The coverage and methodologies of the terrestrial baseline surveys were discussed and agreed with relevant Government agencies (e.g. NParks) and other stakeholders (e.g. Nature Groups). Where appropriate the nature and extent of the surveys were updated following these engagements, particularly after feedback in January 2021 received from Nature Groups.

Following this introduction, this Report sets out:

- Survey methodologies;
- Baseline findings; and
- Summary.

A number of Appendices are attached to this Report containing the raw data collected through the baseline surveys.

# 2. METHODOLOGY

This Section outlines the agreed survey methodologies. The BIA Study Area, see *Figure 2-1*, was delineated to include:

i) Potential Project Site boundary (i.e. Reservoir Project Site, and the proposed temporary Staging/ Launching Area and integrated Project Substation);

ii) Terrestrial habitats within 250m of the Kranji Reservoir edge, including those that may potentially be impacted by the proposed temporary Staging/ Launching Area and integrated Project Substation worksite; and

iii) Bird Vantage Point Survey (VPS) locations outside of the Reservoir Project Site (i.e. to the north in Sungei Buloh Wetland Reserve (SBWR), and in-reservoir south of the Reservoir Project Site) to provide relative comparison to findings within the Reservoir Project Site.

All terrestrial and boat-based surveys were subject to health and safety considerations, actual site conditions and relevant Government approvals (including related to COVID-19).

All survey approaches are in line with those principles as set out in the NParks BIA Guidelines (NParks, 2020b).

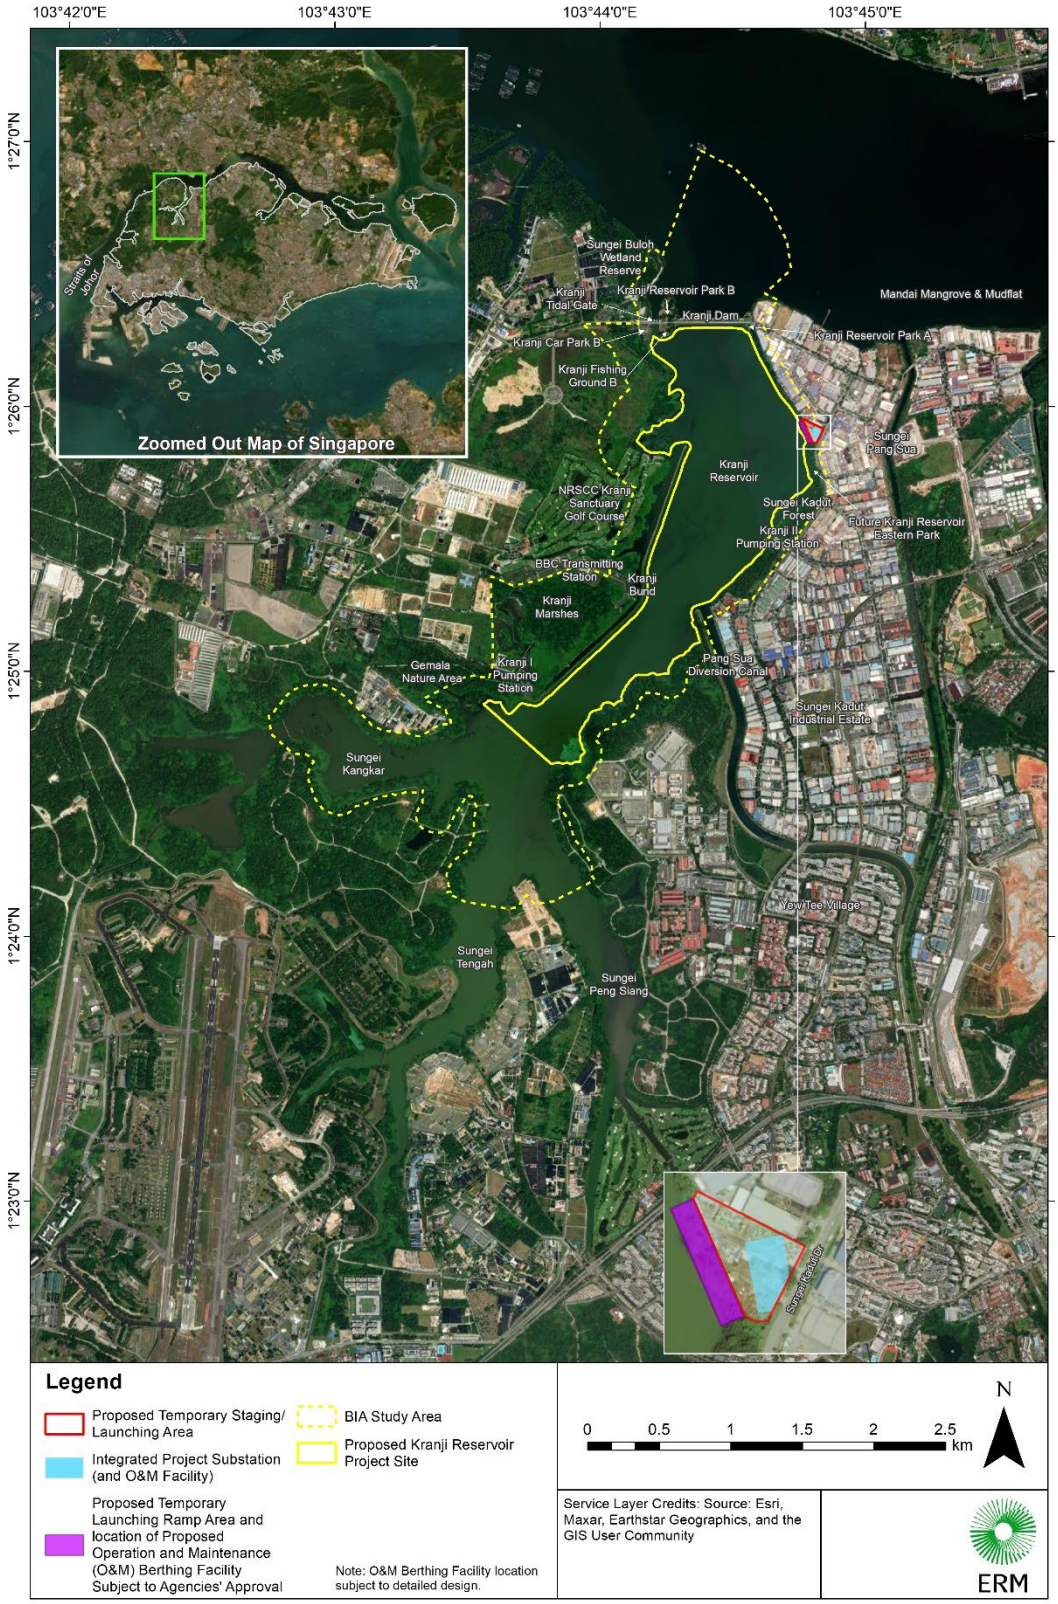

**Figure 2-1: BIA Study Area and Main Project Areas**

## 2.1 BIA Desktop Assessment

### 2.1.1 Land Use History

Historical and present-day land use of the BIA Study Area were reviewed. Information on land use history was primarily gathered from old maps in the online collection of the National Archives of Singapore (NAS) as well as historical maps on the OneMap and the National University of Singapore (NUS) Libraries portals. This allows for the generation of a preliminary vegetation map and a list of fauna species that may potentially exist in the BIA Study Area. This list considers faunal species previously documented within and around a 2-km radius of the BIA Study Area which, based on past project experience, are expected to occur based on the habitats present. Other information sources included reviewing other online databases, existing literature, technical reports, and consulting specialists. The vegetation map and species list were subsequently updated with findings from the field surveys. Main terms used include Sungei Buloh Wetland Reserve (SWBR), Kranji Marshes, Kranji Reservoir and Neo Tiew.

### 2.1.2 Nomenclature and Taxonomy

Past and present floristic as well as faunistic species composition were examined using relevant references that included books, scientific publications, unpublished literature, and online databases. Sources of databases include: The Biodiversity of Singapore by the Lee Kong Chian Natural History Museum (LCKNHM), Flora and Fauna Web by the National Parks Board and iNaturalist. Other references include the Singapore Red Data Book (Davison et al., 2008; NParks, 2021) and its recent updates to 2023, Biodiversity Records under Nature in Singapore, an online journal of LCKNHM (LCKNHM, 2021), Singapore Biodiversity Records Archives by LCKNHM (LCKNHM, 2021), an encyclopaedia on Singapore's biodiversity by Ng et al. (2011) and the database of flora and fauna records compiled by Camphora Pte Ltd (unpublished).

The nomenclature and taxonomy for each taxonomic group that were studied are summarised in *Table 2-1* below.

**Table 2-1: References for the Nomenclature and Taxonomy for Each Taxonomic Group**

| Taxon | References |
|---|---|
| Plants | Chong et al. (2009); NParks (2023) |
| Aculeate hymenopterans | Soh and Ngiam (2013); Ascher and Pickering (2018); Soh and Ascher (2020), Ascher et al. (2022) |
| Odonates | NParks (2023) |
| Butterflies | NParks (2023) |
| Birds | Gill and Donsker (2023) |
| Herpetofauna (amphibians and reptiles) | NParks (2021b) |
| Non-volant Mammals | |
| Bats | |

#### 2.1.2.1 Flora Classification system

Species of flora were first classified as native, exotic, or cryptogenic. Native species were then further classified as nationally Extinct or Extant, i.e., still surviving. Extant native species were additionally classified as Common, Vulnerable, Endangered, or Critically Endangered. Exotic species were classified as Cultivated Only, Casual, or Naturalised (see *Table 2-2*). Cryptogenic species are species with no evidence of being exotic. The definition of each status was adapted from Chong et al. (2009).

**Table 2-2: Classification System for Flora Species BIA**

| Origin | Status | Definition |
|---|---|---|
| **Native** | Species that have originated in an area without human intervention or have arrived there without intentional or unintentional intervention of humans | |
| | Extinct | Native species that have not been seen or collected locally from the wild in the last 30 years |
| | Extant | Native species classified as critically endangered, endangered or vulnerable as defined by Davison (2008). Species with more than 1,000 mature individuals are considered common. |
| **Exotic** | Species that are present in an area as a result of intentional or unintentional human involvement | |
| | Cultivated Only | Exotic species that persist locally as a result of cultivation or other direct human care |
| | Casual | Exotic species that persist locally by repeated introductions or limited asexual reproduction and do not form self-replacing populations |
| | Naturalised | Exotic species that persist locally without direct human intervention and are self-replacing, usually through sexual reproduction |
| **Cryptogenic** | | Species with no historical or biogeographical evidence of being exotic, yet are restricted to only habitats modified or disturbed by humans |

#### *2.1.2.2 Fauna Classification system*

Species of fauna were classified as native, non-native or indeterminate, where available, according to local references stated in *Table 2-2*. Native species were then further classified as nationally Extinct or Extant, i.e. still surviving. Extant species were then additionally classified according to their global and national conservation status described in *Table 2-3* below.

### *2.1.3 Species of Conservation Significance*

The assessment of whether certain species are of conservation significance is important for highlighting the need and priorities for conservation.

Threatened species of flora, i.e. listed in NParks (2023) and Chong et al. (2009) as nationally Vulnerable, Endangered, Critically Endangered, or Presumed Extinct (which indicates a rediscovery) (see *Table 2-3*), were assessed to determine whether they are of conservation significance. While the national conservation status of threatened species is true of wild populations that originate in an area without direct or indirect human intervention, some populations may be relics that persist from past cultivation or escapees from present-day cultivation that do not belong to native genetic stock. Species determined to be of cultivation stock, i.e., does not belong to native genetic stock, would not be regarded as species of conservation significance. The assessment of whether a threatened species is of conservation significance is based on, but not limited to, information on the following: 1) land use history; 2) presence of large parent tree(s)/ flora; 3) commercial availability; 4) data from previous environmental impact assessments; 5) reforestation/ replanting efforts; 6) natural range; and 7) importance for associated fauna. If the origin of a threatened species population is disputable or difficult to determine, findings from field surveys of flora are typically corroborated and/or adoption of a more conservative approach is taken by considering them of conservation significance.

Threatened species of fauna are native species listed as globally or nationally Vulnerable, Endangered, Critically Endangered, or Extinct. The global conservation status follows the Red List of Threatened Species by the International Union for Conservation of Nature (IUCN, 2012) (*Table 2-3*). The national conservation status references the Singapore Red Data Book (SRDB3; NParks, 2010b and updates, and NParks 2023) and other more updated local checklists, where available, such as Ascher et al.

(2022) for aculeata hymenopterans (*Table 2-1*). In the circumstance where a species has both global and national conservation status, the conservation significance presented is based on whichever is higher.

**Table 2-3: Definition of Each Global and/or National Conservation Status following the IUCN Red List and Singapore Red Data Book**

| Global/ National Conservation Status | Definition |
|---|---|
| **Data Deficient (DD)** | Inadequate information to make a direct or indirect assessment of its risk of extinction. |
| **Least Concern (LC)** | Species does not qualify for Critically Endangered, Endangered, Vulnerable or Near Threatened. |
| **Near Threatened (NT)** | Species does not qualify for Critically Endangered, Endangered or Vulnerable now, either globally or nationally, but is likely to qualify for a threatened category in the near future. |
| **Vulnerable (VU)** | Species facing a high risk of extinction in the wild/in Singapore |
| **Endangered (EN)** | Species facing a very high risk of extinction in the wild/in Singapore |
| **Critically Endangered (CR)** | Species facing an extremely high risk of extinction in the wild/in Singapore |
| **Presumed Nationally Extinct (NE)[a]** | There is no reasonable doubt that the last reproductively capable individual within Singapore has died or disappeared in the last 50 years (fauna) or 30 years (vascular plants). |
| ***Notes:*** *(a)* ***it is presumed Nationally Extinct is a National Conservation Status (i.e. not in IUCN Red List).*** | |

## 2.2 Field Assessment

### *2.2.1 Floristic Field Assessment*

The floristic field assessment consists of: 1) vegetation mapping; and 2) floristic surveys. Vegetation mapping and floristic surveys were carried out for the following locations, see *Figure 2-2*. Floristic surveys targeted areas potentially affected by the Project, particularly land surrounding the Reservoir Project Site and the proposed temporary Staging/ Launching Area and integrated Project Substation, such as.

1. One linear stretch within 5 m inland around the reservoir edge of approximately 7.7 km (inaccessible edges were surveyed via boat-based visual surveys);

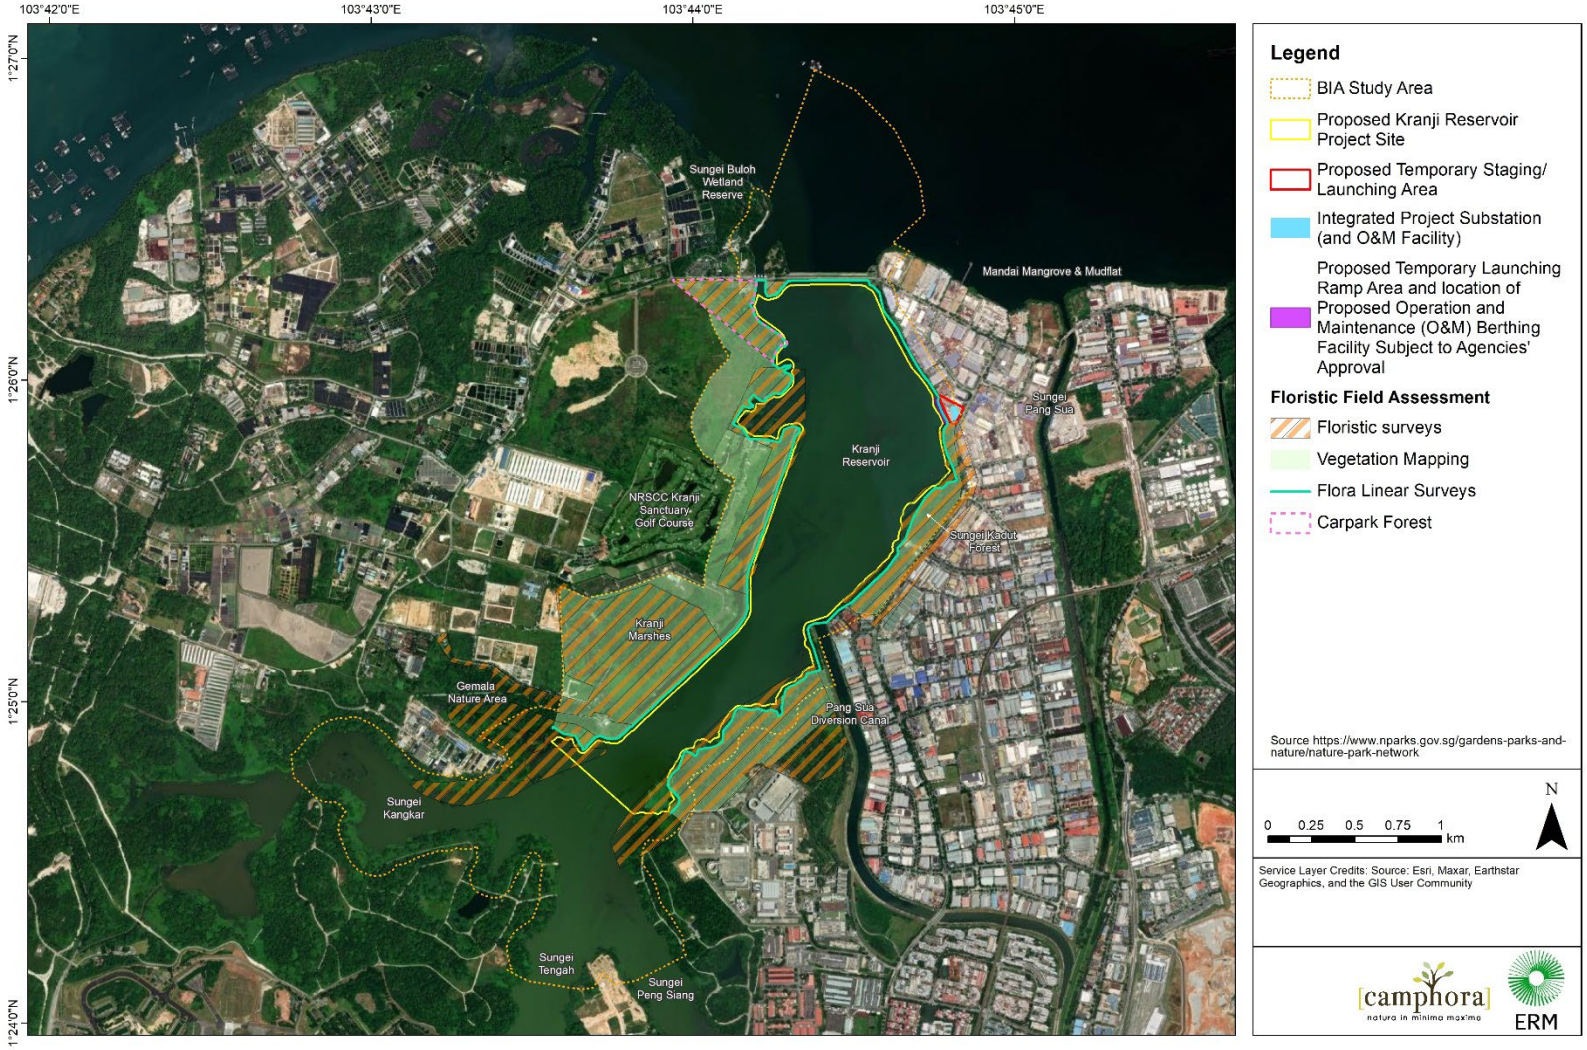
2. Forest patch of approximately 14.9 hectares (ha) adjacent to the proposed temporary Staging/ Launching Area and integrated Project Substation (hereafter termed “Sungei Kadut forest”);

3. Kranji Reservoir Park forest patch (hereafter termed “Carpark forest”) (6.70 ha).

Additional vegetation mapping was carried out for the following two locations below to characterise habitats within which fauna surveys and camera traps were undertaken:

4. Core Conservation Area of Kranji Marshes (16.4 ha), and

5. Areas within 250 m landward of the reservoir edge (including littoral areas) adjacent to the Reservoir Project Site.



*Note: O&M Berthing Facility location subject to detailed design*

**Figure 2-2: Map Indicating Location of Vegetation Mapping and Floristic Surveys**

### 2.2.1.1 Habitat Mapping

A preliminary vegetation map was first drawn based on visual interpretations of satellite images from Google Earth Pro 7.3.3.7786 (Google Inc. 2020). Preliminary classification of the vegetation types, for example, forest, grassland, or urban vegetation, was determined using visual features, such as textures and colours, observed in the satellite images. Adjustments were then made to the preliminary maps according to actual observations during ground truthing. Ground truthing was conducted throughout the BIA Study Area with the aid of a handheld Global Positioning System (GPS) receiver (Garmin GPSMap® 64s) and photographs. The boundaries of each vegetation type were tracked on the GPS receiver and mapped out on Google Earth Pro 7.3.3.7786. The classification of the vegetation types reference NParks (2020b) “Main Habitat Types in Singapore”.

### 2.2.1.2 General Floristic Surveys

Surveys were conducted on a boat to document flora present within 5 m from the reservoir edge, as well as on foot within the Carpark forest and Sungei Kadut forest. At least two flora specialists were present to record all flora species encountered. All plants observed during floristic surveys were identified to species level, whenever possible. A list of all the plant species recorded from the floristic surveys was compiled.

For plants that could not be identified with certainty in the field, photographs using a digital camera and/or cut specimen were taken. These species were identified using identification keys, taxonomic descriptions, and online plant photo databases, with the help of taxonomic experts, and/or by matching the pressed and dried collected specimens with existing specimens from the Singapore Botanic Gardens’ Herbarium.

For very tall unidentifiable trees with leaves that are unable to be photographed, dried leaves matching of these trees were collected from the forest floor and used to aid in species identification.

#### Species of Conservation Significance

Threatened species of flora, i.e., listed in Chong et al. (2009) as nationally Vulnerable, Endangered, Critically Endangered, or Presumed Extinct (which indicates a rediscovery), were assessed to determine whether they were of conservation significance (*Table 2-3*). The geographic coordinates of plants of conservation significance were marked using a GPS, which recorded the locations with accuracy of ± 4 m. Where there were clusters of plants of conservation significance – i.e. more than one individual occurring within 5 m or less of another individual, the geographic coordinates of the approximated centre of the area was marked using the GPS.

#### Large Plant Specimens

The GPS was used to record locations of all trees of $\geqslant$ 3.0 m girth, as well as bamboo clusters and strangling Ficus species of $\geqslant$ 3.0 m spread. Individuals were identified to species level, whenever possible. Girth (for trees) and spread (for bamboo clusters and strangling Ficus species) were measured and estimated, respectively. The height of the specimens were also estimated and recorded.

#### Other Plant Specimens of Value

Locations of other specimens that did not meet the minimum size requirement detailed above but were of value, were also recorded using GPS. Examples of such specimens include bamboo clusters of < 3 m spread that may be important refugia for rare bamboo bats, amongst others, as well as exotic trees with active raptor nests. Other specimens of value considered also includes keystone species. These are species that are considered of great importance to the ecosystem and can fall under the categories mentioned above (i.e. species of conservation significance and large specimens) and trees and/ or strangling species of ≥ 1.0 m girth.

### 2.2.2 Faunistic Field Assessment

The faunistic field assessment was conducted covering two areas: (1) terrestrial, particularly surrounding the Reservoir Project Site and the proposed temporary Staging/ Launching Area and integrated Project Substation site); and (2) Kranji Reservoir, including Reservoir Project Site as well as south of the Reservoir Project Site (to supplement findings within the Reservoir Project Site).

The objective of the terrestrial field assessment was to obtain biodiversity data of terrestrial habitats (including reservoir edge, the littoral zone). This was done via a combination of methods: (1) transect surveys and point counts (land-based and boat-based), (2) camera trapping for non-volant mammals, (3) roost emergence surveys for bamboo bats, and (4) stationary bat detection surveys.

The objective of the boat-based field assessment was to establish usage by main reservoir users, i.e. birds, otters, monitor lizards and bats. This was done via a combination of methods: (1) transect surveys (boat-based), (2) Vantage Point Surveys (VPS) for focal birds, and (3) acoustic point counts (bat activity surveys). Focal birds are those that depend on Kranji Reservoir and its water edges for foraging. The list of focal birds are provided under Vantage Point Surveys in *Section 2.2.2.2*.

The survey methods for each faunal group are summarised in *Table 2-4* and detailed in following sections below.

**Table 2-4: Summary of Survey Methods, Timing and Frequency for Each Targeted Faunal Group**

| Faunal group | Survey time (h) | Land-based surveys | Boat-based surveys | Technique |
|---|---|---|---|---|
| Terrestrial | | | | |
| Aculeate hymenopterans | 0900–1200 | Transect | - | Visual |
| Odonate (dragonflies and damselflies) | 0900–1200 | Transect | Point count | Visual |
| Butterflies | 0900–1200 | Transect | - | Visual |
| Birds | 0700–1000 | Transect | Transect, point count | Visual, auditory |
| | 2000–0000 | Transect | Transect | Visual, auditory |
| Herpetofauna (amphibians and reptiles) | 0700–1000 | Transect | Transect | Visual, auditory |
| | 2000–0000 | Transect | Transect | Visual, auditory |
| Non-volant mammals | 0700–1000 | Transect | Point count | Visual, auditory |
| | 2000–0000 | Transect | Transect | Visual, auditory |
| | 24 hours | Camera trapping | - | Infrared motion sensing |
| Bats | 2000–0000 | Transect | Transect | Visual and acoustic |
| | 1830–2100 | Roost emergence surveys for bamboo bats | - | Visual and acoustic |
| | 1830–0630 | Stationary recorders | - | Acoustic |
| Reservoir | | | | |
| Birds | 0700–1000 | Transect | Transect, point count | Visual, auditory |
| | 2000–0000 | Transect | Transect | Visual, auditory |
| | 0700–1900 | Vantage-point survey | | Visual |
| Monitor lizards | 0700–1000 | Transect | - | Visual |
| Otters | 0700–1000 | Transect | - | Visual |
| Bats | 1930–2100 | - | Point count | Acoustic |

### 2.2.2.1 Terrestrial

#### Transect Surveys and Point Counts

Surveys were carried out for the following taxa: (1) aculeate hymenopteran (bees and stinging wasps), (2) odonates (dragonflies and damselflies), (3) butterflies, (4) herpetofauna (amphibians and reptiles), (5) birds, (6) non-volant mammals, and (7) bats. These taxa were chosen because they are of general interest to mainstream conservation, well-documented locally, have an established survey protocol, have important ecological roles in the ecosystem, and serve as ecological indicators. All fauna, whether threatened or not threatened, were recorded in the surveys. Surveys were conducted between 22nd October 2020 to 19th October 2021 (see *Appendix E1* for detailed fauna survey log).

Transect surveys were conducted for all terrestrial fauna along terrestrial sampling routes within the BIA Study Area to provide a representative coverage of the major habitat types observed. There were four terrestrial sampling routes (T01–T04) which amount to ~8.04km of transect routes *(Table 2-5; Figure 2-3).* Both day and night surveys were conducted for each terrestrial sampling route, with the exception of T03, which was only carried in the day due to the potential risk of encountering crocodiles at night. The area that is located east of the National Service Resort & Country Club (NSRCC) golf course was not accessible on foot as it is freshwater marsh, and therefore, no transect was feasible. However, this area was covered from the adjacent reservoir via part of the boat transects, as illustrated in *Figure 2-3*. The terrestrial transect surveys were conducted over 12 months (Oct 2020 to Oct 2021, monthly diurnal and nocturnal).

In addition, odonates, birds, herpetofauna, non-volant mammal and bats were surveyed along boat sampling routes fringing the Kranji Reservoir (*Table 2-5; Figure 2-3*). There were two boat sampling routes which amounted to ~2.44 km. The boat was steered as close to the shoreline as possible. Monthly diurnal and/or nocturnal surveys were conducted over 6 months (Dec 2020 to Apr 2021). Diurnal surveys comprised five-minute point counts for odonates, birds and non-volant mammals at 12 boat sampling points. Nocturnal surveys for herpetofauna as well as birds and non-volant mammals were carried out at the same points and frequency.

Each survey was performed by at least two surveyors. All fauna encountered were identified to species, or to the next lowest taxonomic level possible, and the location of each individual was recorded using a GPS. The number of individuals observed was also documented.

**Table 2-5: Description and Length of Four Terrestrial and Two Boat Sampling Routes**

| Type of sampling route | Route reference | Length of sampling route (km) | Description | Habitat |
|---|---|---|---|---|
| Terrestrial | T01 | ~0.81 | West of Kranji Reservoir; Kranji Reservoir Park | Exotic-dominated secondary forest, scrubland |
| Terrestrial | T02 | ~1.31 | Kranji Marshes | Urban vegetation, freshwater marsh, abandoned-land forest, scrubland |
| Terrestrial | T03 | ~2.20 | Kranji bund bordering Kranji Marshes and NSRCC | Urban vegetation |
| Terrestrial | T04 | ~1.46 | East of Kranji Reservoir | Abandoned-land forest, mixed forest, urban vegetation |
| Boat | B01 | ~1.21 | West of Kranji Reservoir flanking NSRCC and Kranji Bund | Littoral habitat |
| Boat | B02 | ~1.23 | East of Kranji Reservoir fringing Sungei Kadut, south eastern shore of Reservoir Project Site | Littoral habitat |
| *Note: One of the boat sampling routes (B01) was modified to include more of the NSRCC section and less of the PUB bund. The rationale for the modified transect is that the habitat along the PUB bund is homogenous, and typically survey transects are designed to target as many habitats as possible to maximise species detection. Additionally, modifications in fauna group coverage for diurnal boat surveys were advised by specialists due to less-than-optimal conditions in surveying those faunal groups from the boat. These boat surveys were conducted monthly for 5 months from December 2020 to April 2021.* | | | | |

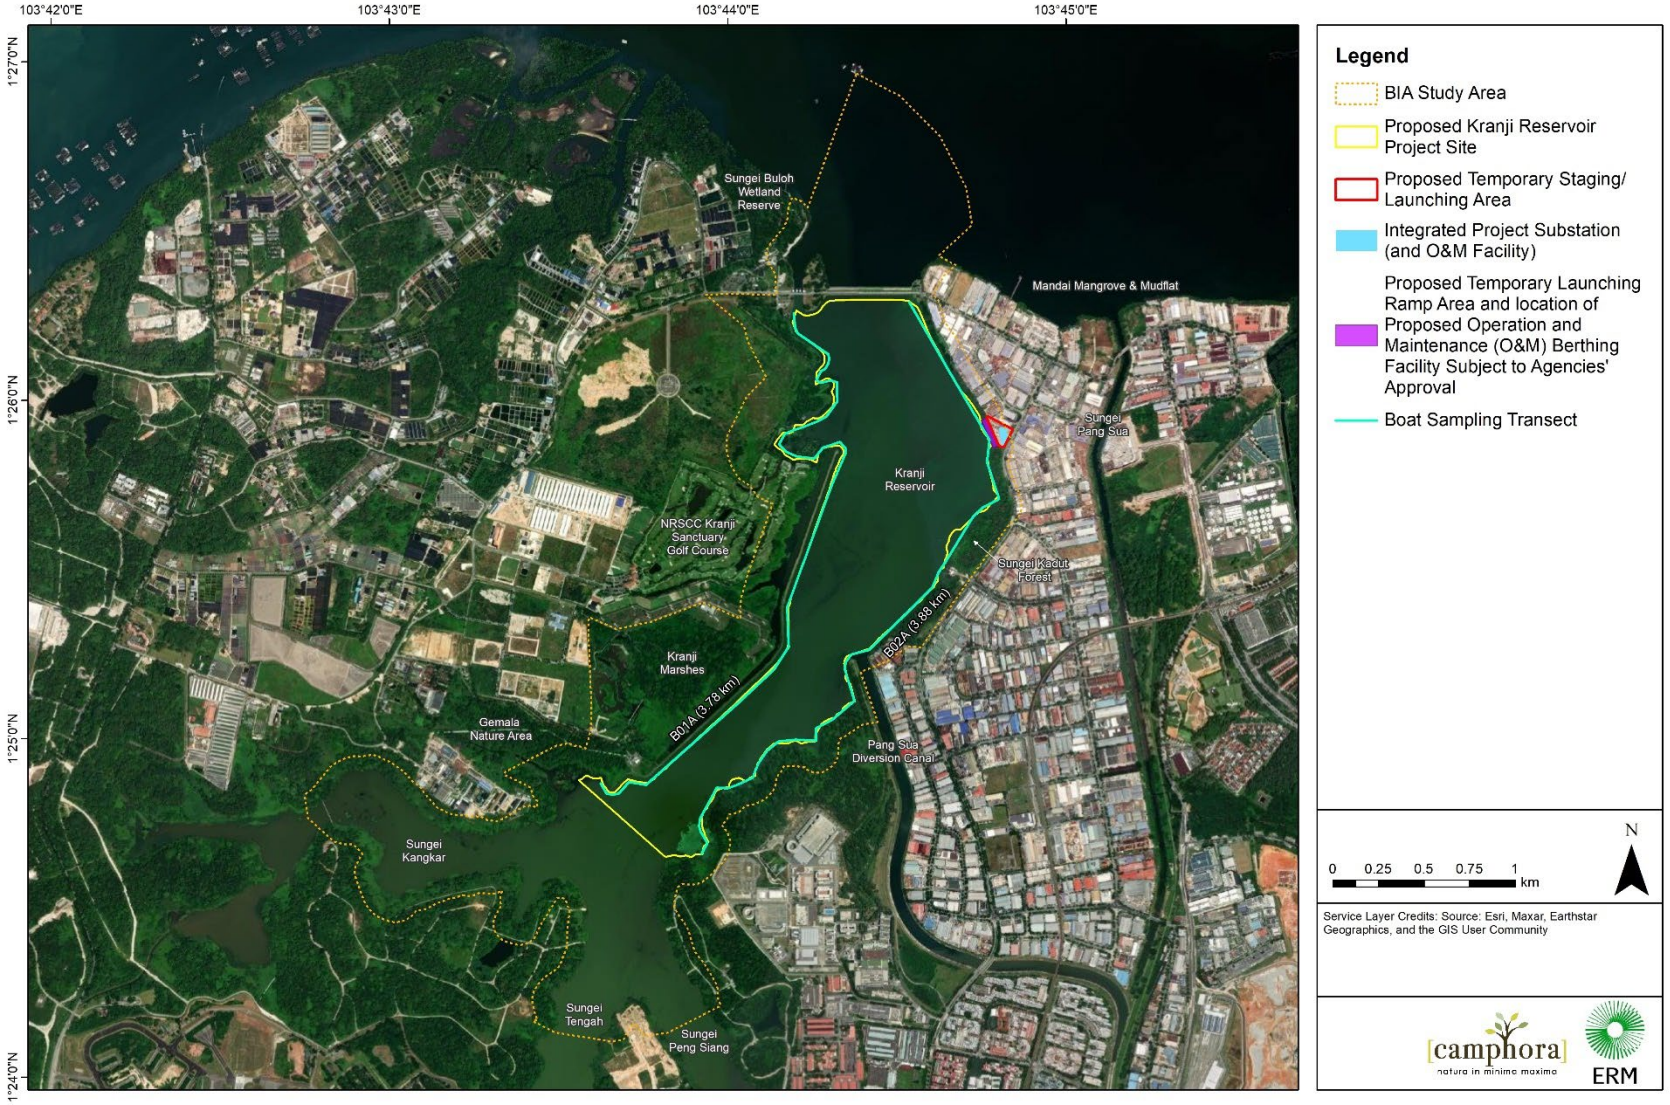

**Figure 2-3: Terrestrial and Boat Sampling Routes within the BIA Study Area**

**Aculeate hymenopterans**

Diurnal transect surveys were conducted for adult bees and stinging wasps, nests, and food plants along terrestrial sampling routes. Surveys were conducted between 0900–1600h. Bees and wasps were identified by sight or photography whenever possible. Otherwise, they were captured using handheld insect nets. Individuals were released immediately after identification. When identification in the field was not possible, live specimens were collected and examined *post-hoc* under microscope. The specimens were identified to the lowest taxonomic level possible using relevant references, identification keys, or in consultation with taxonomic experts.

**Odonates (dragonflies and damselflies)**

Diurnal transect surveys were conducted along terrestrial sampling routes and diurnal point counts were conducted at boat sampling points. Surveys were carried out between 0900h–1600h. Owing to the difficulties in sampling and identification, aquatic larvae and exuviae were not surveyed. Adults were identified by sight (with the aid of binoculars where necessary) in flight or while perched. Specimens were also photographed or caught with insect nets for the purpose of species identification. Individuals collected were released immediately after they have been identified. Five-minute point counts were also conducted at the 12 boat sampling points along the reservoir edge.

**Butterflies**

Diurnal transect surveys were carried out for adult butterflies, caterpillars, pupae, eggs, and host plants along terrestrial sampling routes between 0900h–1600h. Butterflies were identified by sight (with the aid of binoculars where necessary), photographed, or captured using insect nets. All individuals were released post-identification.

**Herpetofauna (amphibians and reptiles)**

Diurnal (0700h–1600h) and nocturnal (2000h–0000h) transect surveys were performed along both terrestrial and boat sampling routes. As herpetofauna occupy a wide range of habitat types, both surveys involved searching for individuals on the ground, below rocks, logs, leaf litter and debris, in the water, and on vegetation. For nocturnal spotlighting surveys, torches were used to elicit eyeshine. For species that are capable of quick retreats and escapes, the individuals were also captured by hand, or using hooks, tongs, or dip nets for identification. Vocalising geckos and frogs were also located or identified by call recognition, whenever possible.

**Birds**

Surveys comprised diurnal (0700h–1000h) and nocturnal (2000h–0000h) transect surveys along terrestrial sampling routes, as well as diurnal point counts (0700h–1000h) at boat sampling points. All birds were identified by sight (with the aid of binoculars and cameras where necessary) and/or through call recognition. Nocturnal birds (e.g. owls and nightjars) were detected using torches to elicit eyeshine and through call recognition. When any roosts or nests are sighted, the locations and number of birds were recorded.

**Non-volant Mammals**

Surveys comprised diurnal (0700h–1000h) and nocturnal (2000h–0000h) transect surveys along terrestrial sampling routes, as well as diurnal point counts (0700h–1000h) at boat sampling points. Mammals were searched for on the ground, on vegetation, in burrows and tree holes. Mammals were identified by sight (with the aid of binoculars or photography where necessary). Squirrels were also identified through call recognition. Nocturnal mammals were detected using torches to elicit eyeshine. In addition, tracks and scats were also recorded as they could aid in species identification. Since the smooth-coated otters (*Lutrogale perspicillata*) have been recorded in the Kranji Reservoir (Otterwatch, 2017) and Sungei Buloh Wetland Reserve (Theng & Sivasothi, 2016), signs of otters (spraints, footprints and holts) were searched for during transect surveys (see Transect Surveys under *Section 2.2.2.2*).

### Bats

In light of COVID-19 prevailing during the survey period, bat live trapping was not conducted. However, acoustic surveys along boat sampling routes were conducted using a handheld bat detector (Echo Meter Touch 2 Pro) to record the ultrasonic vocalisations of insectivorous bats. In addition, roost emergence surveys were also conducted to survey for bamboo bats. Stationary bat detection surveys were conducted to supplement information on bat community using the BIA Study Area. These are described later in this Section.

## Camera Trapping

A total of 10 camera traps (*Figure 2-5*), Browning Strike Force Explorer BTC EXP (*Figure 2-4*), were deployed to detect non-volant ground-dwelling mammals, particularly medium- to large-sized mammals, such as the wild pig (*Sus scrofa*), Sunda pangolin (*Manis javanica*) and leopard cat (*Prionailurus bengalensis*). The camera traps were distributed across the Terrestrial Biodiversity Study Area. They were equally distributed across the site with one camera trap per 6.25 ha (i.e. 250 m by 250 m grids). The habitat type at each camera trap location is listed in *Table 2-6.*

Each camera trap was deployed at approximately 20–30 cm above ground, and at strategic locations with obvious animal signs. They were programmed to operated 24 hours a day and to record a 10-sec footage per motion trigger with a 10 second quiet period following each trigger.

In order to strike a balance on understanding the presence of rarer species within the broader terrestrial landscape and their use of the shoreline (where potential Project interaction is most likely to occur), each camera trap was deployed for at least 60 nights, accounting for a total effort of 727 trapping nights. This was determined following consultation with Nature Groups, adapting from the recommended minimum 40 trap-nights by Si et al. (2014) that was also adopted as a guideline by Chua (2016) in his study of leopard cats on Pulau Tekong.

**Table 2-6: Habitat Type at Each Camera Trap Location**

| Camera trap location | Habitat |
|---|---|
| CT01 | Scrubland |
| CT02 | Urban vegetation, freshwater marsh |
| CT03 | Urban vegetation, freshwater marsh |
| CT04 | Abandoned-land forest |
| CT05 | Exotic-dominated secondary forest |
| CT06 | Abandoned-land forest |
| CT07 | Abandoned-land forest |
| CT08 | Exotic-dominated secondary forest |
| CT09 | Scrubland, abandoned-land forest |
| CT10 | Native cluster |

**Figure 2-4: A Camera Trap Setup**

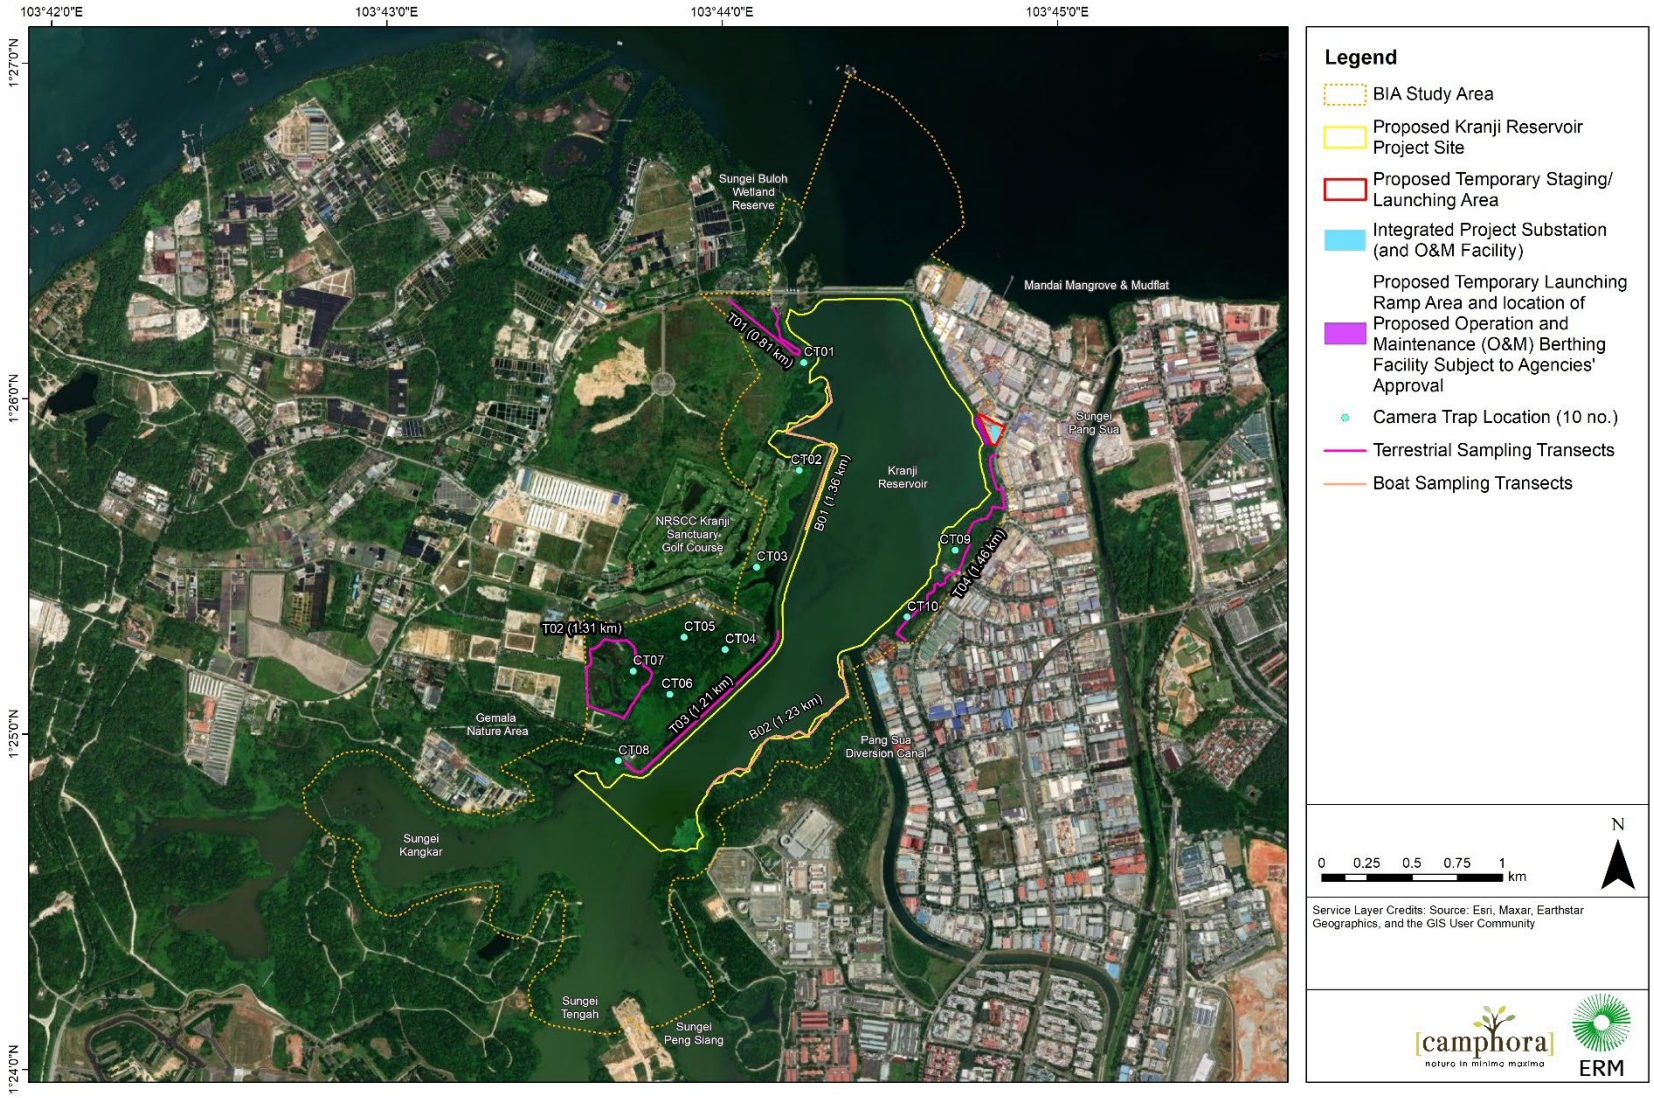

**Figure 2-5: Location of Camera Trap within the BIA Study Area**

## Roost Emergence Surveys for Bamboo Bats

Roost emergence surveys were conducted at all six bamboos within the Sungei Kadut forest (*Figure 2-6*). The surveys aimed to ascertain the possible residency of two bamboo bat species, the lesser bamboo bat (*Tylonycteris fulvida*) and greater bamboo bat (*Tylonycteris malayana*), both of which are nationally Vulnerable. Both species are known to roost in bamboo internodes and are especially susceptible to injury or mortality if their roosts are removed/damaged during developments.

Surveys were conducted between 1830 h to 2100h, during which two to three personnel were stationed around the bamboo to observe for bats flying out from or towards the bamboo and identify potential slits of at least 1 cm by 1 cm that bamboo bats may use. If present, active slits and the number of individuals residing within each slit were documented. An acoustic detector was also used to obtain acoustic recordings.

## Stationary Bat Detection Surveys

To supplement mobile transects and in-reservoir bat point count data (see *Section 2.2.2.2* below), six unattended stationary bat detectors (Song Meter Mini Bat) were equally distributed along the reservoir edge within the BIA Study Area (*Figure 2-6*). The objective was to obtain a more accurate representation of the bat community using the open waters of the reservoir within the BIA Study Area (Braun de Torrez et al., 2017). They were deployed close to the water edges as much as possible and away from flat surfaces as well as vegetative clutter to reduce acoustic echoes (Britzke et al., 2013). Three detectors were deployed along the Kranji bund on the western bank of the reservoir, one was deployed at Kranji Reservoir Park A and the remaining two were deployed on the edge of Sungei Kadut forest. They recorded from 30 minutes before sunset to 30 mins before after sunrise. Each recorder was deployed for 30 nights at each location.

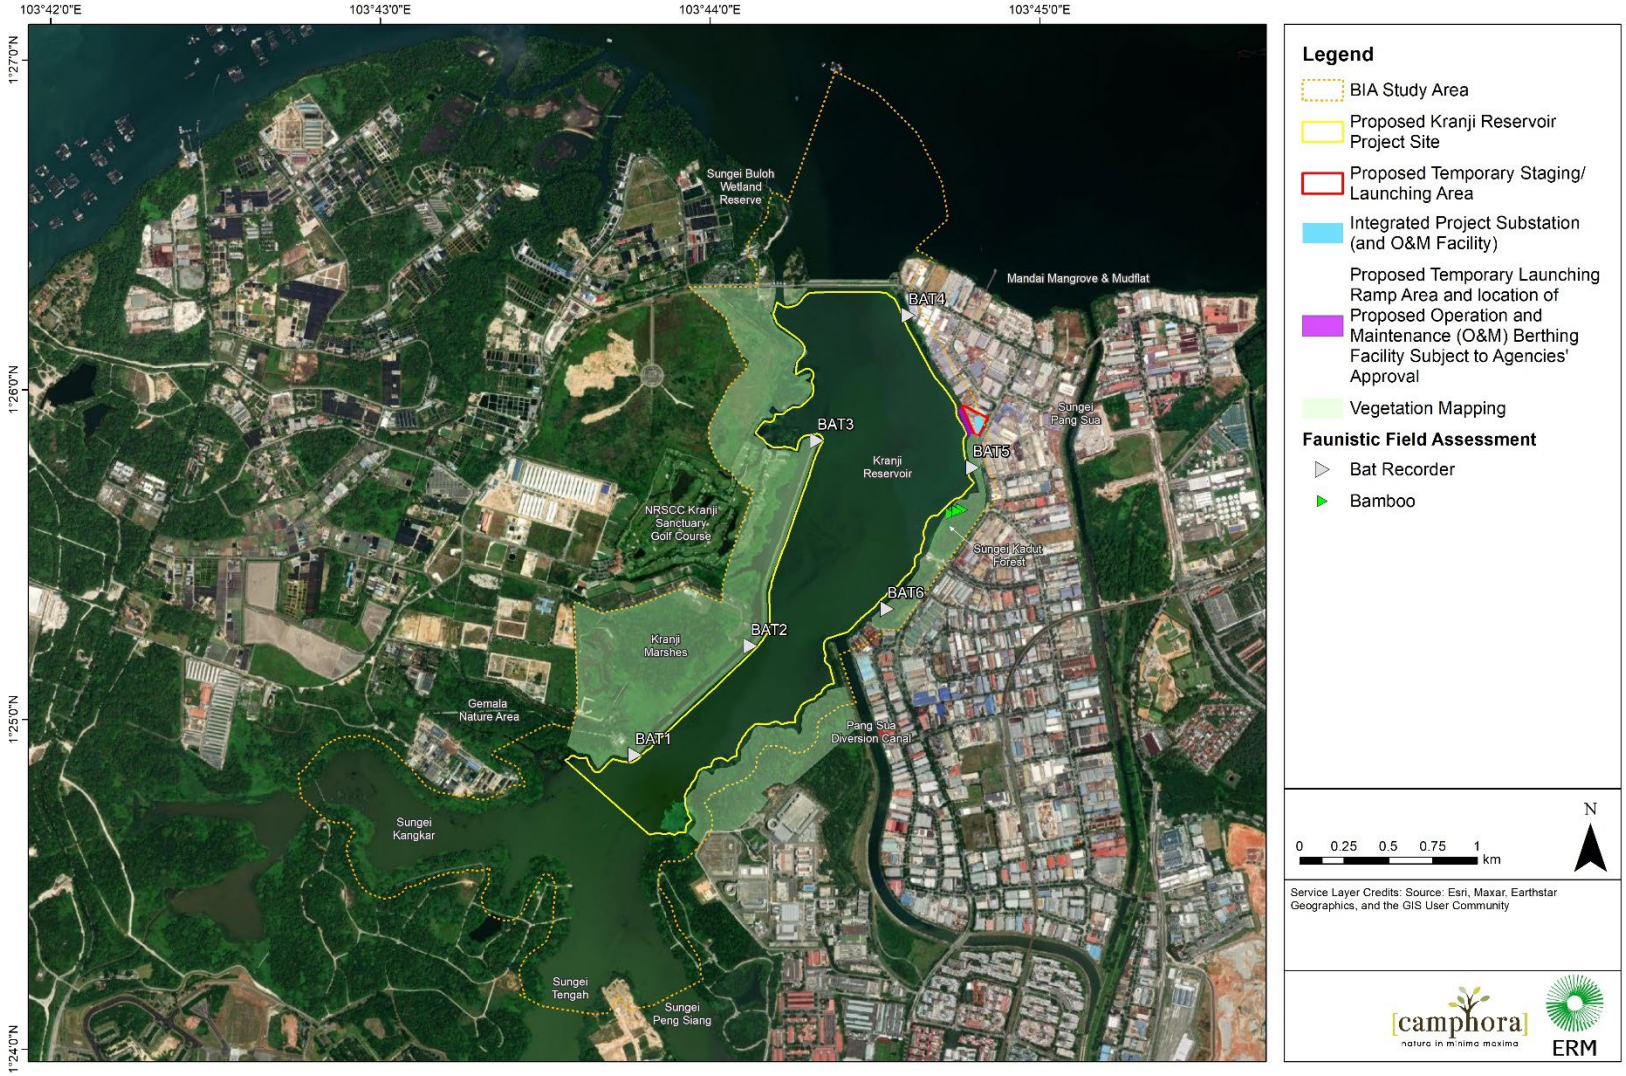

**Figure 2-6: Location of Bat Detectors and Bamboos for Roost Emergence Surveys Within the BIA Study Area**

### 2.2.2.2 Reservoir

To understand the potential impacts of the FPV deployment on terrestrial biodiversity reservoir users, it is vital to understand the current usage of Kranji Reservoir and adjacent habitats by main terrestrial biodiversity reservoir users, which includes birds, bats, otters and monitor lizards.

#### Vantage Point Surveys (VPS)

Vantage Point Surveys (VPS) were conducted to understand the distribution, occurrence and activity of waterbirds and raptors that utilise Kranji Reservoir and its water edges. VPS' provide additional information on flight paths, airspace usage over the reservoir and functional uses (i.e. roosting and foraging). By understanding how these birds are using the reservoir, it helps predict the impacts of the FPV on these birds. VPS' can also provide insights with regards to the connectivity of the site with adjacent sensitive biodiversity sites, namely the Sungei Buloh Wetland Reserve, and the southern portion of Kranji Reservoir (outside the Reservoir Project Site). The 16 focal birds[1] are listed in *Table 2-7*. The methodology is adapted from protocol of Scottish Natural Heritage (SNH, 2014) to inform impact assessment of onshore wind farms.

**Table 2-7: List of 16 Focal Bird Species for Vantage Point Surveys**

| No. | Scientific name | Common name | Global conservation status | National conservation status | Primary native status |
|---|---|---|---|---|---|
| **1** | *Haliaeetus leucogaster* | White-bellied sea eagle | LC | LC | Resident breeder |
| **2** | *Haliaeetus ichthyaetus* | Grey-headed fish eagle | NT | VU | Resident breeder |
| **3** | *Haliastur indus* | Brahminy kite | LC | LC | Resident breeder |
| **4** | *Pandion haliaetus* | Western osprey | LC | LC | Non-breeding visitor |
| **5** | *Ardea purpurea* | Purple heron | LC | EN | Resident breeder |
| **6** | *Ardea cinerea* | Grey heron | LC | LC | Resident breeder |
| **7** | *Ardea alba* | Great egret | LC | VU | Winter visitor |
| **8** | *Ardea intermedia* | Intermediate egret | LC | LC | Winter visitor |
| **9** | *Egretta garzetta* | Little egret | LC | LC | Winter visitor |
| **10** | *Ardeola* sp. | Pond heron | - | - | Winter visitor |
| **11** | *Bubulcus coromandus* | Eastern cattle egret | LC | VU | Winter visitor |
| **12** | *Butorides striata* | Striated heron | LC | NT | Resident breeder |
| **13** | *Ixobrychus sinensis* | Yellow bittern | LC | VU | Resident breeder |
| **14** | *Chlidonias hybrida* | Whiskered tern | LC | LC | Winter visitor |
| **15** | *Chlidonias leucopterus* | White-winged tern | LC | EN | Winter visitor |
| **16** | *Sternula albifrons* | Little tern | LC | EN | Resident breeder |

VPS were conducted at six locations (VP01–VP06) along the reservoir edge of the BIA Study Area (*Figure 2-7*). The locations were selected to minimise human disturbance to birds as well as maximising visibility across the survey area. Good international practice for VPS (SNH, 2014) allows for radius

[1] Focal birds are those that depend on Kranji Reservoir and its water edges for foraging.

coverage of up to 2 km from each VPS location, however a more conservative 1 km radius was adopted wherever possible. A small percentage of viewshed has been extended beyond this 1 km limit, to allow coverage of the whole BIA Study Area. Based on on-site experience, this distance of 1 km viewshed (and beyond) is practicable where highly experienced avian specialists were able to determine species through binoculars, telescopes, flight pattern recognition and photographs. The VPS also covered up to 100 m inland. There is no overlap in viewshed coverage between each VPS location for the quantitative data analysis (see *Figure 2-7).*

Three of the VPS locations (VP01–VP03) were designated on the shoreline of the Reservoir Project Site, while the remaining three VPS locations (VP04–VP06) were designated in the larger BIA Study Area outside of the Reservoir Project Site boundary. The purpose of VP04–VP06 were to allow comparison of bird usage within and outside of the 25 m offset work boundary and broader Reservoir Project Site.

During the migratory season from September to February, surveys were undertaken twice monthly at each VPS location. This was reduced to once a month during the non-migratory season of March to August. To ensure a comprehensive representation of bird occurrence and activity throughout a day, VPS' were conducted in four 3-hours blocks per survey (i.e. early morning 0700h to 1000h, mid-day 1000h to 1300h; 1300h to 1600h and late afternoon to early evening 1600h to 1900h). Surveys for VP01–VP03 were conducted over October 2020–October 2021, while surveys for VP04–VP06 were subsequently added and conducted over March 2021–March 2022 (allowing some overlap with the migratory season).

During a VPS, a single surveyor would scan the viewshed outwards using binoculars/ scopes until a waterbird or raptor was detected after which it was followed until it ceased flying (i.e. landed) or lost from view. The route followed, and the take-off and landing points were plotted in the field onto maps, georeferenced and compiled into a GIS database. Other detailed information was also collected to populate a database of bird activities. Parameters included:

- Weather conditions (wind strength, cloud cover, precipitation) as well as any significant changes during the survey period;
- Species observed (at lowest possible taxonomic level);
- Number of individuals;
- Flight height in relation to tree canopy height (i.e., below or above canopy);
- Flight behaviour (mating display, territory display, commuting, hunting, etc.);
- Foraging events; and
- Prey species, whenever possible.

Additionally, a range of tidal conditions were recorded to ensure that groups of birds foraging or roosting in response to tidal conditions were adequately documented. Special attention was given to flocks of birds foraging or flying across the survey area airspace to effectively determine the most frequent bird flyways. Surveys were conducted in a range of weather conditions to ensure a representative sample of bird activity throughout changes in weather. Surveys were not carried out during inclement weather which resulted in poor ground visibility (<1 km).

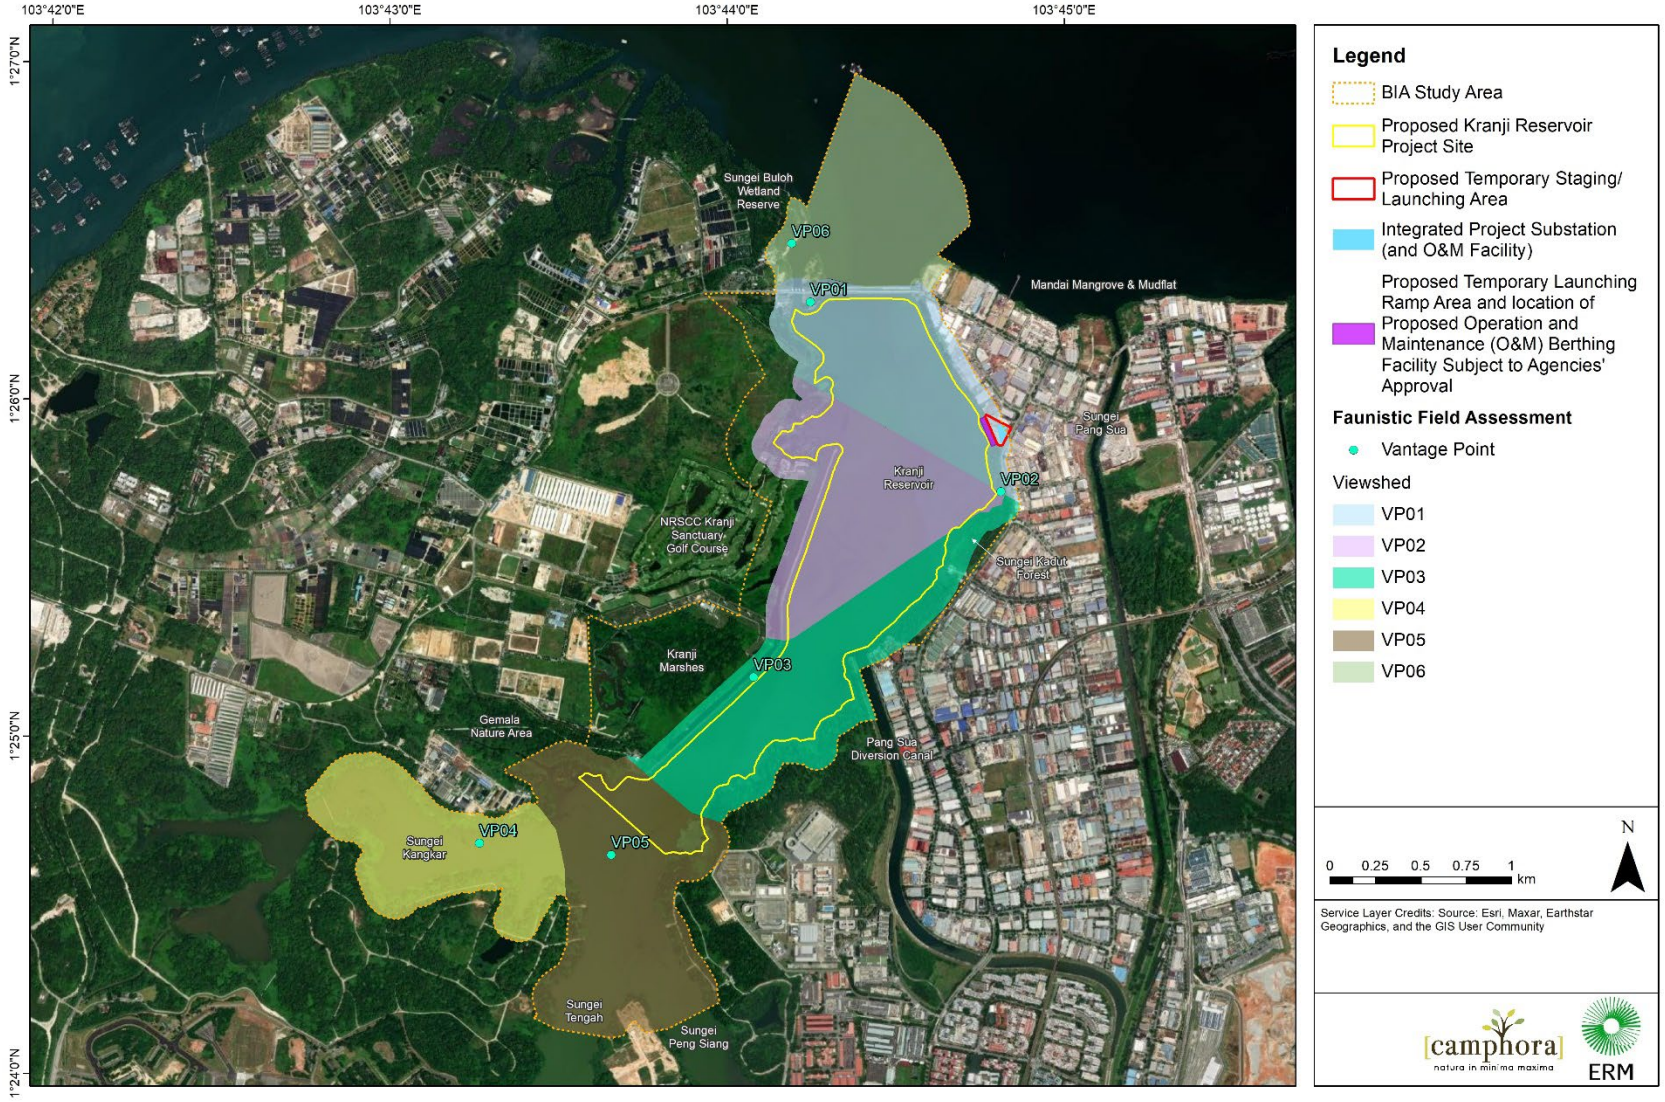

**Figure 2-7: Vantage Points and their Corresponding Viewsheds**

## Bird Density Surveys

In order to to understand the distribution, occurrence and activity of birds along the edge of Kranji Reservoir (up to 50 m from the boat transect), birds were surveyed along boat sampling routes fringing both the entire length of the Reservoir Project Site and further south into the tributaries, which totalled 15.14 km of transects (*Figure 2-8*). The boat transects within the Reservoir Project Site totalled 7.66 km. This helped to understand the density of birds along the reservoir edge and was used to generate a density map along the reservoir edge. This will serve as the baseline data to allow the assessment and quantification of physical displacement of birds in response to the construction and operation of the FPV. It will also serve as a baseline for providing quantitative comparison on changes in bird density along the reservoir edge resulting from construction activities (including but not limited to migratory/ breeding). Six replicates of diurnal and/or nocturnal surveys were conducted. However, for the transects outside of the Reservoir Project Site, only six diurnal surveys and one nocturnal survey were conducted, as health and safety concerns limited the nocturnal surveys. Despite this shortcoming, the results and conclusions of the baseline are not expected to be significantly impacted.

## Black-Crowned Night Heron Verification Survey

A black-crowned night heron (*Nycticorax nycticorax*) roost was identified on the eastern bank of the Reservoir during the initial bird density mapping surveys. Given this is a species of conservation concern in Singapore, follow-up surveys were carried out to enable the validation of this roost in terms of frequency of occupancy and number of individuals using it. These surveys comprised two rounds of dawn and dusk surveys that were conducted between February and April 2022.

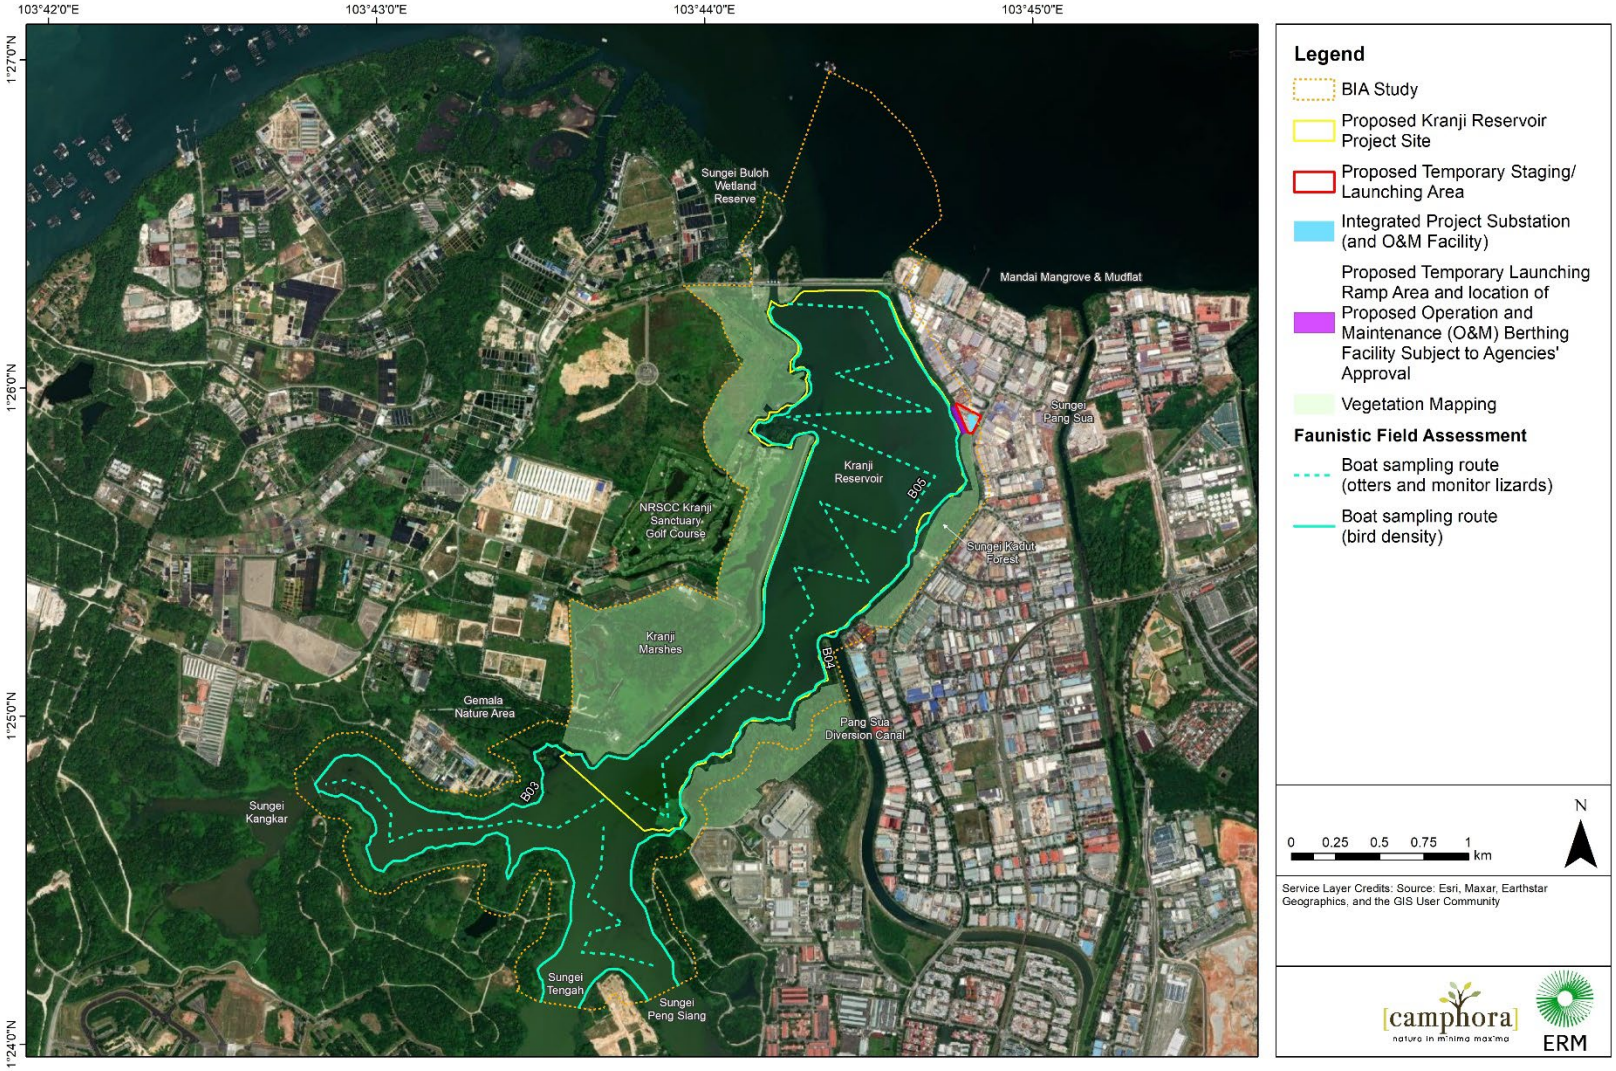

**Figure 2-8: Location of Boat Sampling Routes for Bird Density Surveys and Transect Surveys (Otters and Monitor Lizards)**

## Flight Initiation Distance Surveys

In order to determine the distance at which each focal bird species and other birds were being displaced by boats, flight initiation distance (FID) was recorded during boat surveys. If a stationary bird was observed being flushed out from vegetation or its perching spot upon the approach of the boat, the distance to which it was observed being displaced from its spot was recorded.

## Bat Activity Surveys

To better understand usage of the reservoir by bats, boat-based 5-minute point counts were conducted across Kranji Reservoir using a hand-held bat detector to obtain bat activity data and identify areas of high activity within the reservoir (*Figure 2-9*). There were 34 sampling points within the Reservoir Project Site and 10 sampling points outside of the Reservoir Project Site (to the south). The points were equally distributed across the BIA Study Area. Six replicates were conducted for each point between 1900h to 2200h, after sunset.

Bat echolocation calls were used as an index of bat activity in the airspace directly above water bodies. Furthermore, echolocation buzz calls recorded in the airspace directly above water provided evidence of foraging.

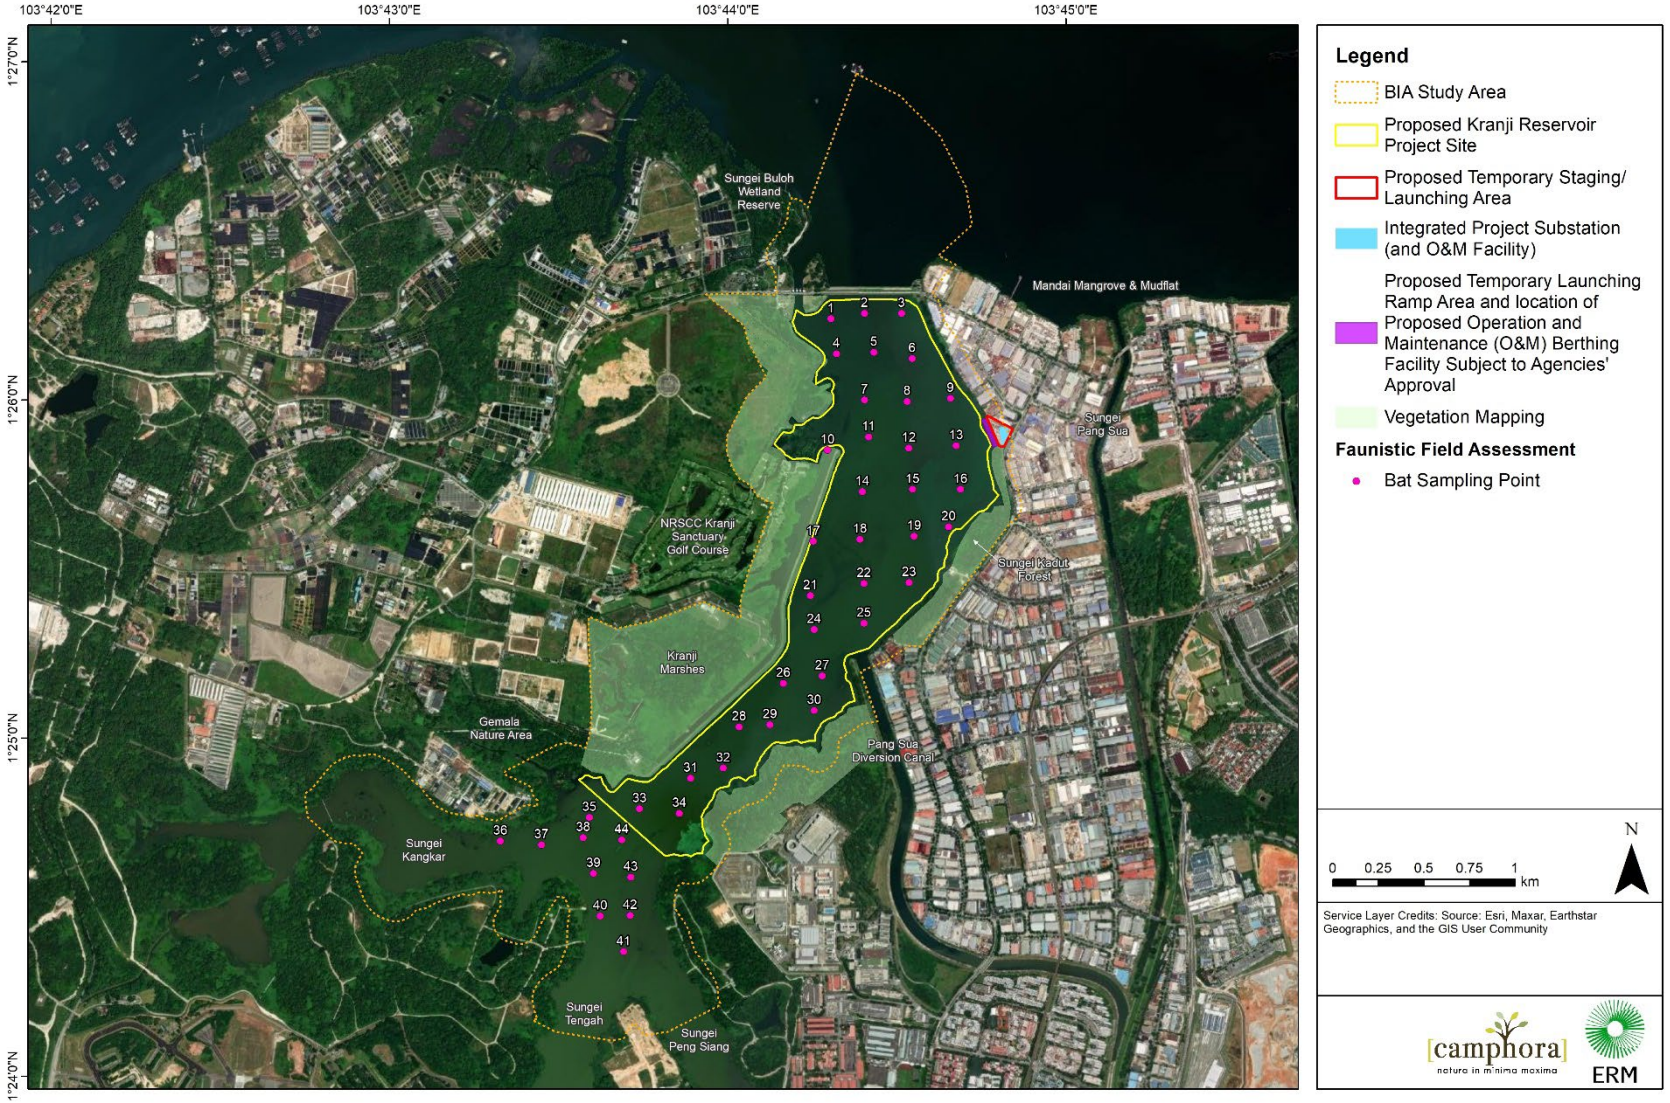

**Figure 2-9: Bat Sampling Points within the in-reservoir BIA Study Area**

### Transect Surveys (Otters and Monitor Lizards)

In order to understand the occurrence of reservoir users of interest, i.e. the smooth-coated otters (*Lutrogale perspicillata*) and Malayan water monitor (*Varanus salvator*), visual surveys were conducted along an approximately 11 km boat sampling route traversing the open waters of the Kranji Reservoir *(Figure 2-8).* Diurnal surveys were conducted for 6 months. Incidental observations of otters and monitor lizards from other boat surveys were also recorded.

## *2.2.2.3 Data Analyses*

## Terrestrial

### Camera Trapping

Camera trap location, species identity, and the number of individuals were recorded for each video with a positive capture of fauna. An independent detection constitutes video of one or a group of individuals of the same faunal species occurring within 60 minutes at each camera trap. The number of independent detections were used to calculate the detection rate of each mammal species.

### Taxon Sampling Curves

Taxon sampling curves were plotted for the transect and point count surveys (i.e., excluding stationary bat detection survey, bird density survey and bat activity surveys). It is presented in *Section 3.4.1.1* for selected taxa with sufficient occurrences as large sample sizes are required for the estimation of sample coverage to be robust (Chao & Jost, 2012). The observed sample of incidence data was used to estimate sample coverage and species richness. Species richness was plotted against sample coverage, as opposed to survey effort, to estimate sample completeness/ survey adequacy, i.e., how extensively that species in the community have been sampled. Sample coverage refers to “the proportion of the total number of individuals in a community that belong to the species represented in the sample” (Chao & Jost, 2012). The curve was extrapolated to provide an estimation of species richness and sample coverage if sample size was doubled. The associated standard error and 95% confidence interval were also computed. Standard error represents the range of uncertainty of the estimate, while 95% confidence interval is the interval in which there is a 0.95 probability of containing the estimated true species richness. As some species will always remain undetected, total species richness had to be estimated via extrapolation. This was done using the Chao estimator. All statistical analyses were carried out in the statistical programming environment R version 3.4.3 using the “iNEXT” package 2.0.20 (Hsieh et al., 2020).

### Stationary Bat Detection Survey

Bat sound files were collected from transect surveys and unattended bat detectors. They were processed using Kaleidoscope v.4.5.4 (Wildlife Acoustics, Inc.) to separate extraneous noise from files with bat echolocation calls. The signal parameters for recognising a potential bat echolocation call were configured as follows: frequency range of 20–200 kilohertz (kHz), duration of 2–500 milliseconds (ms), maximum inter-syllable gap of 500 ms and a minimum of 2 pulses. These files were then visually processed to identify bat species based on call structures, peak frequency, minimum frequency and call duration (Pottie et al., 2005). They were identified with reference to those in Pottie et al. (2005), which provides echolocation signatures for bats in Singapore, and other relevant references (Collen, 2012; Hughes et al., 2011). The findings contribute to the species list for the BIA Study Area, and species of conservation significance were plotted out on a map, if any.

Prior to processing, bat sound files from unattended bat detectors were first sub-sampled using Kaleidoscope v.4.5.4 (Wildlife Acoustics, Inc.). Due to the large amount of data collected, stratified random sub-sampling was conducted. Sub-sampling is a common method used as an attempt to increase cost effectiveness when there is an enormous amount of data collected, since there may be diminishing returns from exhaustively processing large datasets (Meyer et al., 2015; Cook & Hartley, 2018; Levin & Robertis, 2019).

Within each half-hour block, a 5-minute block of data was randomly selected and processed. In total, a total of 24 5-minute data blocks were pooled for each sampling night and subsequently across 15 randomly selected sampling nights.

Efforts were made to identify rare bat species or those of conservation significance. The only two bat species of conservation significance were the bamboo bats. They were both recorded in the BIA Study Area. It is also important to note that bat acoustic databases or libraries are not publicly available locally, and therefore, efforts to identify other rare bat species may be limited.

**Species Distribution Map**

Locations of species of conservation significance were presented on maps to shows their distribution within the BIA Study Area.

## Reservoir

**Species Distribution Map**

Locations of the smooth-coated otters and Malayan water monitor were also presented on maps to shows their distribution within the BIA Study Area. The reservoir edge was subdivided into 50 x 50 m grids.

**Bird Usage Map**

A bird usage map was generated to understand the foraging usage by focal species across the open waters of the Kranji Reservoir. Focal species are birds that depend on Kranji Reservoir and its water edges for foraging. Species not observed foraging within the Kranji Reservoir were excluded from the list. It also excludes the black-crowned night heron (*Nycticorax nycticorax*) that is a nocturnal bird. However, this species was observed during nocturnal boat transect and was reported under bird density surveys in *Section 3.4.2.2* and bird baseline study in *Section 3.4.1.8.*

The open waters of Kranji Reservoir were subdivided into 50 x 50 m grids. The usage for each of these grids was calculated based on the total number of foraging events, normalised by the total observation hours for each grid. The data was categorised based on “Natural Breaks” function in QGIS[2]. The spatial extent of important breeding or roosting areas were also be overlaid, where applicable.

**Bird Density Map**

A bird density map was generated to understand the density of birds using the edge of Kranji Reservoir. Only those birds in contact with the land or water are counted in order to consider birds that are directly using the reservoir. Contact with water can include active aerial feeding, but not transits.

The reservoir edge was subdivided into 50 x 50 m grids, which includes 50 m within and outside of Reservoir Project Site. Average bird density for each of these grids were calculated based on the total number of birds counted on all boat surveys, divided by the number of survey months (this includes one day and one night survey). The data was categorised based on “Natural Breaks” function in QGIS.

The average densities were mapped to reflect relative importance of each grid across the BIA Study Area. Monthly or seasonal foraging events of birds was also plotted for selected species. Species that make a substantial contribution to the assemblage in terms of overall numbers, or are of high conservation value, were also mapped.

**Flight Initiation Distance**

All observations of FID were compiled. The average FID was then calculated for each bird and focal species.

[2] QGIS (Quantum Geographic Information System) is a free, open-source software that allows users to create, edit, visualize, analyse, and publish geospatial information. https://www.qgis.org/en/site/ (accessed 27 August 2022)

**Bat Activity Survey**

All bat sound files were processed using Kaleidoscope v.4.5.4 (Wildlife Acoustics, Inc.) and followed the processing method as described in Stationary Bat Detection Surveys under *Section 2.2.2* to supplement the species list for the BIA Study Area as well as understand their usage (feeding activity) on the reservoir.

In order to determine the feeding activity of bats, the bat sound files were further analysed to look for feeding buzz which is defined as as a series of calls the bat emits when approaching its prey, it is characterised by pulse repetition rate increase and, pulse duration and interpulse interval decreases during the approach phase, reaching extreme values immediately prior to capture (Griffin et al., 1960). Feeding activity is calculated by the total number of feeding buzzes per min per sampling point. These data were represented on a map.

# 3. SURVEY FINDINGS

## 3.1 Land Use History

In 1819, the Project Area was characterised with mangrove forest that lined the edges of the then Kranji river, as well as the northern coastline (Yee et al., 2010). The surrounding vegetation was characterised by lowland dipterocarp forest with small patches of freshwater swamp forest (Yee et al., 2010). The mangrove habitat at Kranji was originally gazetted as a nature reserve by the colonial government (Ho, n.d.; Omar, 2016) and remained uninhabited (NUSLHMSG, 2021). The Project Area also previously lay adjacent to Kranji Beach, where the Battle of Kranji occurred during the Japanese invasion in 1945, suggesting possible use by military activities (NHB, n.d.).

Maps dating from 1953 and 1958 show the presence of freshwater or tidal habitats along the edges of present-day Kranji Reservoir, as well as mangroves and mudflats (*Figure 3-1A*; NUSLHMSG, 2021). On the other hand, along the western bank of the Kranji River, roads, buildings or structures were present around the approximate location of today's Kranji Marshes and Kranji BBC radio transmitting station. On the eastern bank, trails or tracks were also present in the forest on the south eastern shore of Reservoir Project Site, suggesting early signs of human use. By 1958, more trails and tracks were established within this area (NUSLHMSG, 2021).

Since independence, two major reclamation and development works have taken place in the area. The first took place at the eastern foreshore of Kranji River mouth in 1965 for the creation of a sawmill estate (*Figure 3-1B*; Saparudin & Omar, 2007), which was subsequently developed into the present-day Kranji and Sungei Kadut Industrial Estates. For this endeavour, the mangroves on Kranji River's east bank were cleared, and map records show that this was completed by 1969 (*Figure 3-1C*). Second, the mouth of Kranji river was dammed in 1972 to create the Kranji Reservoir (*Figure 3-1C*). The conversion of Kranji River into a freshwater habitat caused the mangroves of Kranji River's western bank to be converted into a swampland by 1975, and the riverbed was subsequently dredged with the dredged materials used to fill up the swamp area (The Straits Times, 1972). This resulted in a widening of the river channel that took place between 1978–1998 (*Figure 3-1D*).

The damming of the river flooded low-lying areas within Kranji Reservoir and formed freshwater marshes which attracted and provided habitats for wildlife (Ho, n.d.). In recent years, the development of a NSRCC golf course (2002) along the freshwater marsh of Kranji Reservoir's western bank has also caused a 72% reduction (60 ha) in the size of the original freshwater marsh (Ho, n.d.). Engagement between the Nature Society Singapore (NSS) and NSRCC resulted in a compromise, with a 60 m stretch from the edge of the marshes being retained as a buffer for the wetland birds (NSS, 2009).

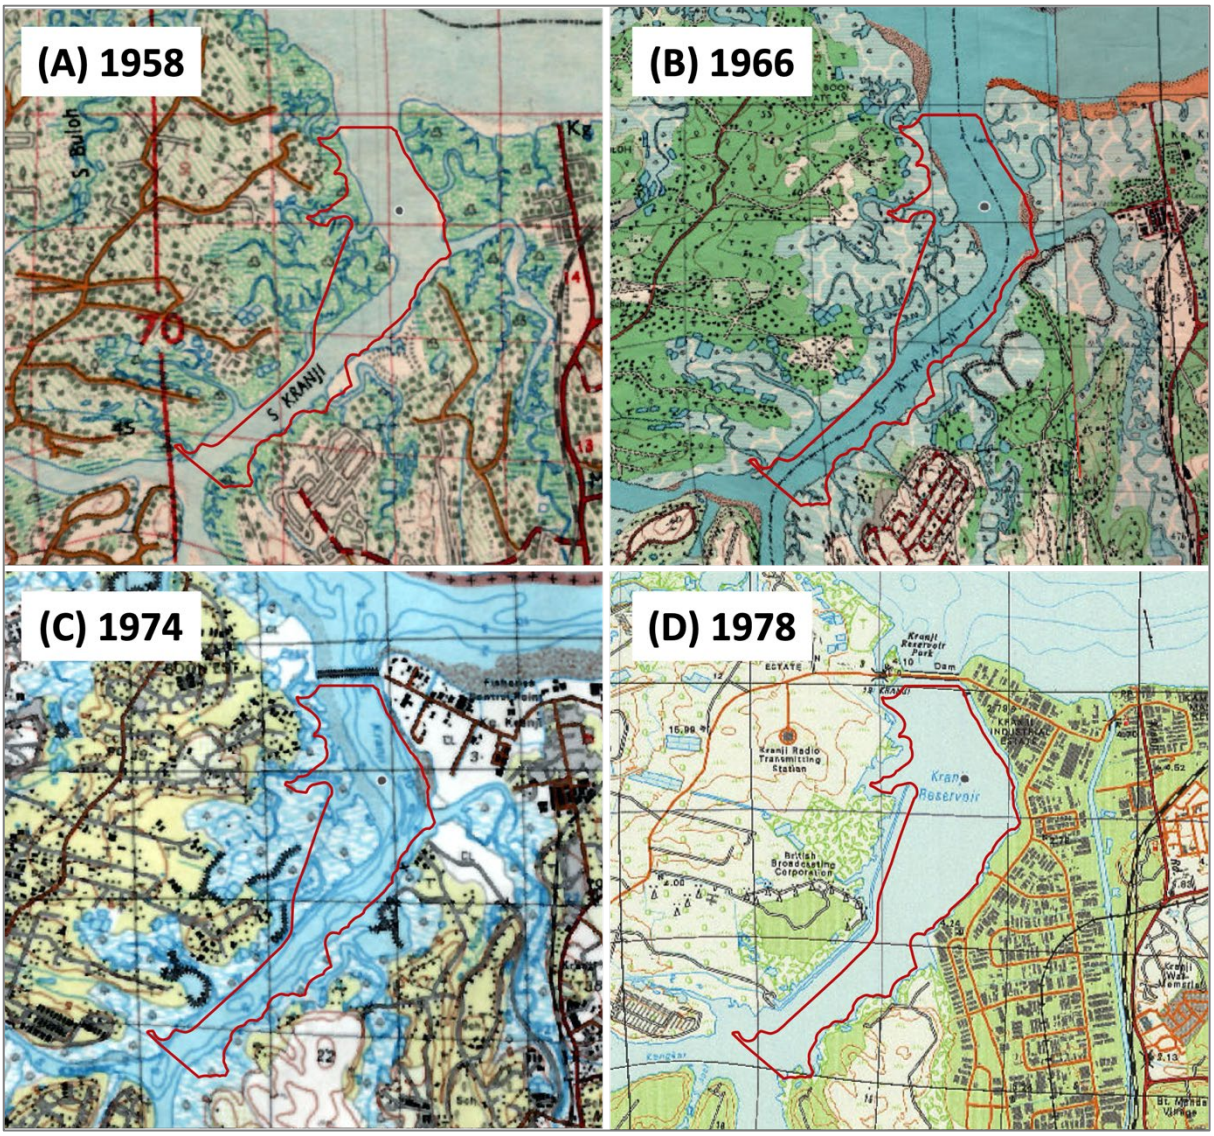

**Figure 3-1: Historical Maps of Project Area Showing:(A) Freshwater or tidal habitats along Kranji River in 1958; (B) Land reclamation works in Kranji River's eastern foreshore in 1966; (C) Clearing of mangroves from Kranji River's eastern foreshore and subsequent damming across the river mouth in 1974; and (D) widened channel of Kranji Reservoir in 1978.**

Currently, the site is surrounded by various ecological features. Sungei Buloh Wetland Reserve, a nature reserve gazetted in 2002, which sits on the north-western edge of the BIA Study Area. Since 2002, it has expanded from 130 ha to 202 ha of mangroves, mudflats, ponds and forests. It is also recognised as an important site for migratory birds (NParks, 2022). Mandai Mangrove and Mudflat that lies to north-east of the BIA Study Area, is 3km east of the SBWR. The 72.8 ha area was announced in 2018. Like SBWR, it is identified as being home to an extensive mangrove forest, and is an important habitat for mangrove, mudflat and wetland species, including shorebirds, seagrasses and horseshoe crabs (NParks, 2018).

The 56.8 ha Kranji Marshes is one of the largest freshwater marshlands in Singapore. It sits along the western edge of the BIA Study Area and provides a rich flora and fauna diversity (NParks, 2021). Adjacent to the Kranji Marshes is the NSRCC golf course that was established in 2000s, with a 60 m wide marshland retained along the shoreline as a buffer for wetland birds (NSS, 2009). The Kranji BBC radio transmitting station is comprised largely of scrubland and grassland vegetation.

The eastern reservoir edges are lined by the Sungei Kadut forest, as well as southern forest patches that are retained by MINDEF and are not accessible. The drainage of the Kranji Reservoir also includes the Kangkar River and Tengah River tributaries in the south.

## 3.2 Habitat Types

There are seven habitat types identified within the flora sampling area (See *Section 2.2.1*), including the reservoir edge (Figure 3-3). Scrubland (36.4 ha; 28.1%) forms the largest habitat type within the BIA Study Area, followed by freshwater marsh (22.6 ha; 17.5%), abandoned-land forest (18.1 ha; 14%), exotic-dominated secondary forest (8.7 ha; 6.7%), mixed forest (2.4 ha; 1.9 ha), and native clusters (1.8 ha; 1.4%). Other non-vegetated areas such as urban vegetation (34.2 ha; 26.4%), cleared areas (2.3 ha; 1.8%), infrastructure (2.2 ha; 1.7%), and man-made waterbodies, such as drains and ponds (0.8 ha; 0.6%) were also observed within the flora sampling area. *Table 3-1* shows the breakdown of absolute and relative size of each habitat and vegetation type within the flora sampling area.

Macrophytes, which is largely made up of water hyacinth (*Eichhornia crassipes*), *Persicaria attenuata* and water lotus (*Nelumbo nucifera*), were frequently observed along the reservoir edge as seen in *Figure 3-2*. However, its distribution and extent appears to be random as it is influenced by various factors – rainfall, water flow, as well as regular maintenance (i.e., vegetation removal) by PUB (see this *Appendix 7.1*, *Appendix A* for further details on flora species lists). Water birds, such as egrets and herons were frequently observed perching on or foraging on macrophytes (see Bird Usage under *Section 3.4*).

**Figure 3-2: (A) Clusters of Water Hyacinth (Eichhornia crassipes) along Sungei Kadut Forest Patch; (B) Clusters of Water Lotus (Nelumbo nucifera) Growing Amongst the Water Hyacinth**

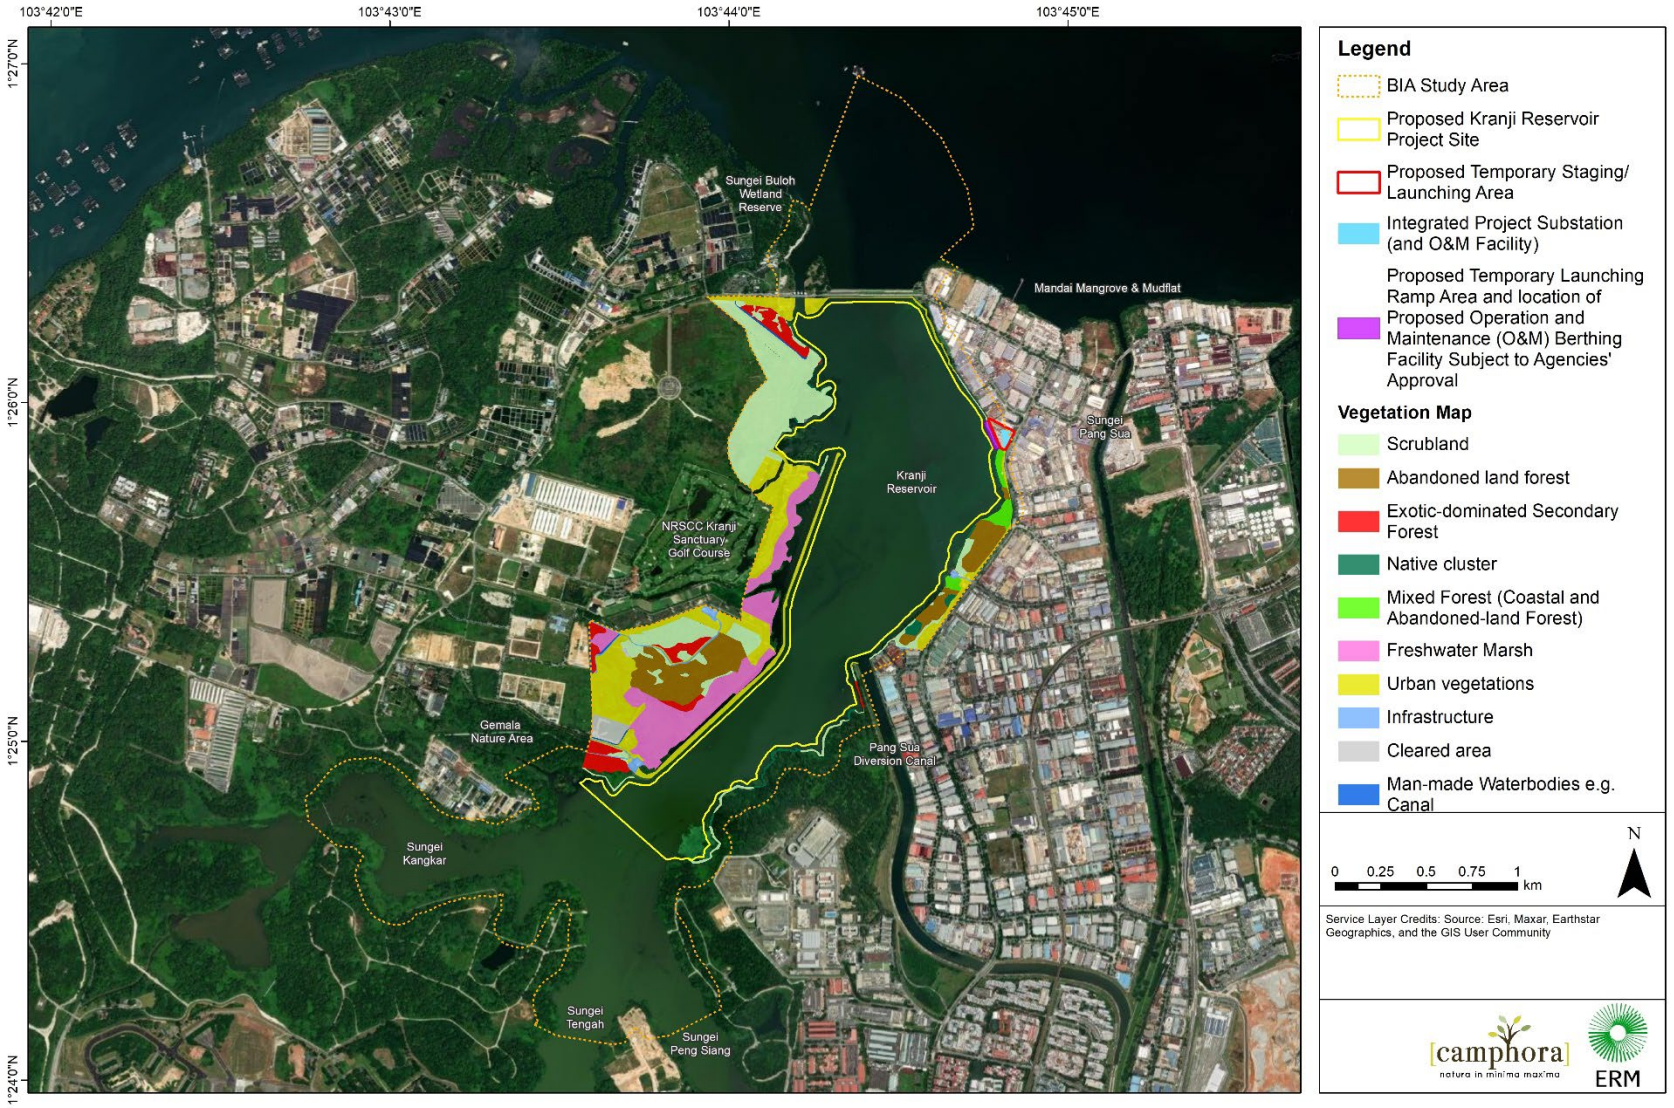

**Figure 3-3: Distribution of Habitat and Vegetation Types in the Flora Sampling Area**

**Table 3-1: Absolute and Relative Size of Each Habitat and Vegetation Type within the (Terrestrial) Flora Sampling Area**

| Habitat and Vegetation Type | Absolute Size (ha) | Relative Size (%) |
|---|---|---|
| Scrubland | ~36.4 | 28.1 |
| Urban vegetation | ~34.2 | 26.4 |
| Freshwater Marsh | ~22.6 | 17.5 |
| Abandoned-land forest | ~18.1 | 14.0 |
| Exotic-dominated secondary forest | ~8.7 | 6.7 |
| Mixed forest | ~2.4 | 1.9 |
| Cleared area (non-vegetated area) | ~2.3 | 1.8 |
| Infrastructure (non-vegetated area) | ~2.2 | 1.7 |
| Native cluster | ~1.8 | 1.4 |
| Man-made waterbodies (non-vegetated area) | ~0.8 | 0.6 |
| **Total** | **~129.5** | **100.0** |

### 3.2.1 Scrubland

This habitat type is typically made up of shrubs, climbing/creeping plants, and grasses as a result of any tree fall, which encourages the colonisation of sun-loving herbaceous plants, resulting in formation of scrubland vegetation (Yee et al., 2016). This habitat type can be found in almost all flora sampling areas (*Figure 3-3*).

Prominent plants that exist within this habitat type includes exotic herbaceous species such as *Asystasia gangetica* subsp. *Micrantha, Mikania micrantha*, ferns such as *Nephrolepis (Figure 3-4A*) and grasses, such as *Ischaemum ciliare*, and Guinea grass (*Megathyrsus maximus*). In certain areas, small specimens of African tulip (*Spathodea ampanulate*) *are* interspersed within these scrubland patches. Along forest edges or at areas where it was waterlogged, *Dillenia suffruticosa* dominated these scrubland patches.

The scrubland recorded along the reservoir edges comprised of grasses such as elephant grass (*Pennisetum purpureum; Figure 3-4B*), *Scleria ciliaris*, and lalang (*Imperata cylindrica*). Along the edges where water levels are shallow, *Ipomoea sp.* were seen creeping along the surface of the waterbody and on the scrubland.

Some species of conservation significance were also recorded within this habitat type. Clusters of nationally Vulnerable nipah palm, *Nypa frutiscens,* were recorded along the reservoir edges, which was believed to have persisted on the Reservoir Project Site, owing to the history of Kranji Reservoir (see *Section 3.1*). On the terrestrial areas, clusters of Vulnerable shrub species, *Premna serratifolia*, were recorded within multiple locations such as Kranji Carpark B and Sungei Kadut forest.

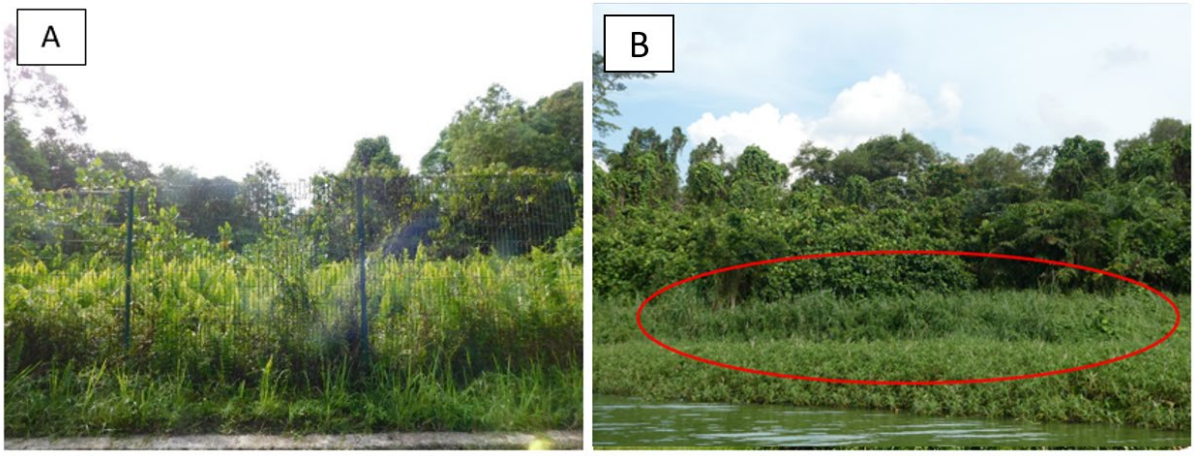

**Figure 3-4: (A) Scrubland Habitat that is Dominated by *Nephrolepis biserrata*; (B) Scrubland Habitat Along the Reservoir Edges that Consist of Elephant Grass (*Pennisetum purpureum*) Indicated by the Red Oval**

### 3.2.2 Urban Vegetation

This habitat generally consisted of vegetation that are either situated within the urban areas and/or are periodically managed by humans for aesthetic or maintenance purposes (NParks, 2020b). Within the BIA Study Area, these habitat type occur along roadsides of Sungei Kadut Drive and Kranji Way, as well as places designated for recreational purposes such as Kranji Carpark B, Kranji Reservoir Fishing Ground B, NSRCC golf course, and a large section of the Kranji Marshes that is accessible to public, which includes a large area of freshwater marsh habitat that are maintained regularly (*Figure 3-3*).

Along the reservoir edge, the vegetation that lies within Kranji bund (*Figure 3-5A*), as well as those that exists along Kranji Reservoir Fishing Ground A were also managed as part of providing access for the maintenance of Kranji Reservoir. The floristic composition is similar to that listed above in the scrubland section which comprise of mostly grasses and less of shrub species.

Vegetation that occurs within the BBC radio transmitting towers area that were located between the south of the NSRCC golf course and north-east of Kranji Marshes, comprised of mainly cow grass (*Axonopus compressus*), with trimming occurring regularly (*Figure 3-5B*).

Despite growing in a habitat that is mostly managed, a herbaceous plant species *Philydrum lanuginosum*, was re-discovered in wet and grassy area located in the vicinity of Sungei Kadut Industrial Estate (*Figure 3-12*). More details are discussed in *Section 3.3.2.*

**Figure 3-5: (A) Kranji Bund that is Managed for Reservoir Maintenance; (B) Cow Grass (*Axonopus compressus*) that Occurs Within the BBC Radio Transmitting Towers were Trimmed Regularly**

### 3.2.3 Freshwater Marsh

Freshwater marsh is typically a wetland area that is covered by water and comprises of flora species that can tolerate flooding (NParks, 2020b). Within the BIA Study Area, this habitat stretches from the south-east section of Kranji Marshes and along the NSRCC golf course boundary. These marsh areas were once known as Kranji Bund Marshes, which was eventually separated into North and South Bund Marsh by a strip of urban vegetation prior to the development of the NSRCC golf course and BBC radio transmitting towers (Ho, 2002). A small strip of the former North Bund Marsh was retained along the edges of the NSRCC golf course (*Figure 3-6A* below). This current strip of marsh consists of plant species adapted to soggy conditions such as *Acrosticum aureum*, *Nephrolepis biserrata*, *Scleria ciliaris*, *Stenochlaena palustris*, and *Neptunia plena*.

The marshes that stretch along the south-east to north-east of Kranji Marshes forms the largest patch of marsh present within the vicinity of the Reservoir Project Site (*Figure 3-6B*). Its floristic composition is similar to that mentioned above, with water hyacinth observed on areas where the water level is higher *(Figure 3-6C).* On the edges of the scrubland where there was less inundation, shrubs such as simpoh air *(Dillenia suffruticosa*), *Senna alata* and sea hibiscus *(Talipariti tilaceum)* were observed.

This habitat type is an important habitat for birds, such as herons and egrets as they utilise the areas within and around the marsh for foraging and resting (*Figure 3-6D*; and *Section 3.4.1.8*).

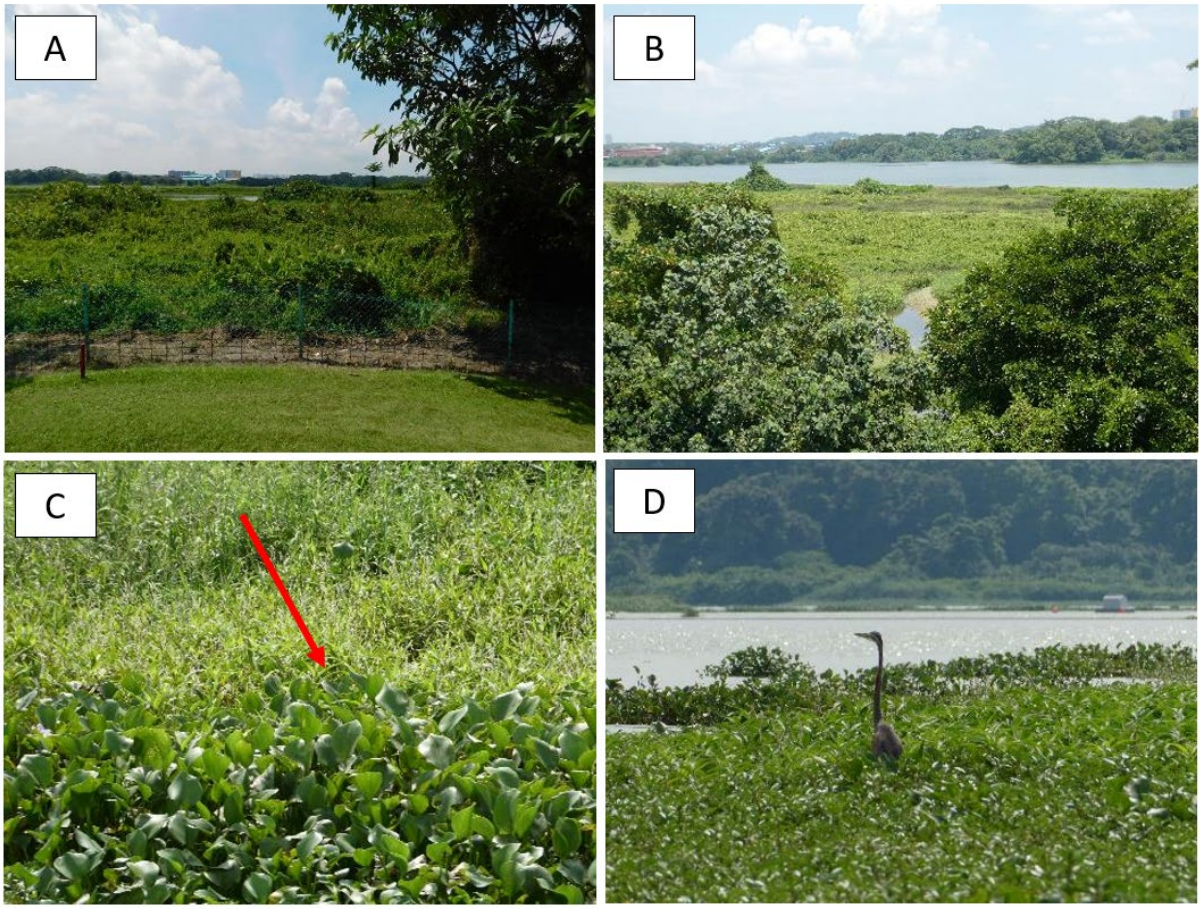

**Figure 3-6: (A) Strip of Marshes that was Retained Along the Edges of NSRCC; (B) Overview of the Marsh of Kranji Marshes; (C) Water Hyacinth (*Eichhornia crassipes*) Observed Within the Marsh; (D) Purple Heron (*Ardea purpurea*) Utilising the Freshwater Marsh**

### 3.2.4 Abandoned-land Forest

Abandoned-land forest is characterised by fruit trees and other crop plants that have persisted from past cultivation. Although abandoned-land forests are generally dominated by exotic cultivated species, existing and recruited native forest species can establish themselves over time[3]. This habitat type can be found within the Sungei Kadut forest and Kranji Marshes. The Sungei Kadut forest comprised common native species, such as wild cinnammon (*Cinnamomum iners*) and simpoh air. The canopy stratum is interspersed with exotic species such as *Acacia auriculiformis* with few specimens of albizia (*Falcataria moluccana*) (*Figure 3-7A*).

The abandoned-land forest at Kranji Marshes comprised numerous large Malayan banyan (*Ficus microcarpa*) that dominates the canopy stratum (*Figure 3-7B*). Coconut (*Cocos nucifera*) were also prevalent across this habitat type within Kranji Marshes owing to its historical land usage where it was once a village surrounded by coconut plantation (NUSLHMSG, 2021).

[3] Based on land use history of Kranji site in 1975, the areas identified as 'abandoned-land forest' in BIA Study Area were once used as both a plantation (defined in NParks BIA guideline as abandoned plantation) and a village (defined as abandoned kampong in NParks BIA guidelines) within the same region. As such, it is difficult to narrow down the exact habitat type as the floristic composition of these two habitat types usually overlaps.
According to Yee et al. 2016, this is typical observation in Singapore as both subtypes can often be observed within the same patch of forest. To note: The term 'abandoned-land forest' has also been used in Yee et. al 2016, which is used as a reference for NParks BIA Guideline.

In both locations, the understorey of this habitat type consists of common native species such as *Caryota mitis*, simpoh air and wild cinnamon, alongside fruit trees, such as rambutan *Nephelium lappaceum,* Indonesian bay leaf (*Syzygium polyanthum)* and *Aphanamixis polystachya*.

**Figure 3-7: (A) *Acacia auriculiformis* (left arrow) Recorded at Canopy of Forest, with wild cinnamon (*Cinammomum iners*) (right arrow) within Understorey Stratum; (B) Malayan Banyan (*Ficus microcarpa*) Dominating the Canopy of Forest Patch of Kranji Marshes**

### 3.2.5 Exotic-dominated Secondary Forest

Exotic-dominated secondary forest is characterised by a canopy dominated by exotic, and even invasive, fast-growing species that can quickly establish themselves on poor soils of recently cleared areas (Yee et al., 2016).

This habitat type was mostly recorded within the Kranji Reservoir Carpark B Forest, Kranji Marshes and a short strip along the edge of Kranji Reservoir. Exotic-dominated secondary forest are generally established following the formation of scrublands, as tree propagules from surrounding areas colonise the scrublands. The canopy comprised exotic species such as albizia (*Figure 3-8A*), and the understorey comprised African tulip (*Spathodea campanulata),* interspersed with few native species such as sea almond (*Terminalia catappa),* fishtail palm (*Caryota mitis*) and wild cinnamon.

Along the reservoir edge, this habitat type comprised exotic species, namely the *Acacia auriculiformis* (*Figure 3-8B*), African tulip and *Leucaena leucocephala* that grew in clusters.

Large and tall specimens of albizia trees common in this habitat type may be used by raptors such as the white-bellied sea eagle (*Haliaeetus leucogaster*) and the uncommon resident, changeable hawk eagle (*Nisaetus cirrhatus*), as a breeding ground (Kok, 2015). Specimens with raptor nests are often found in this habitat type and are considered of importance for the survival of such raptor species, as discussed in *Section 3.3.4.*

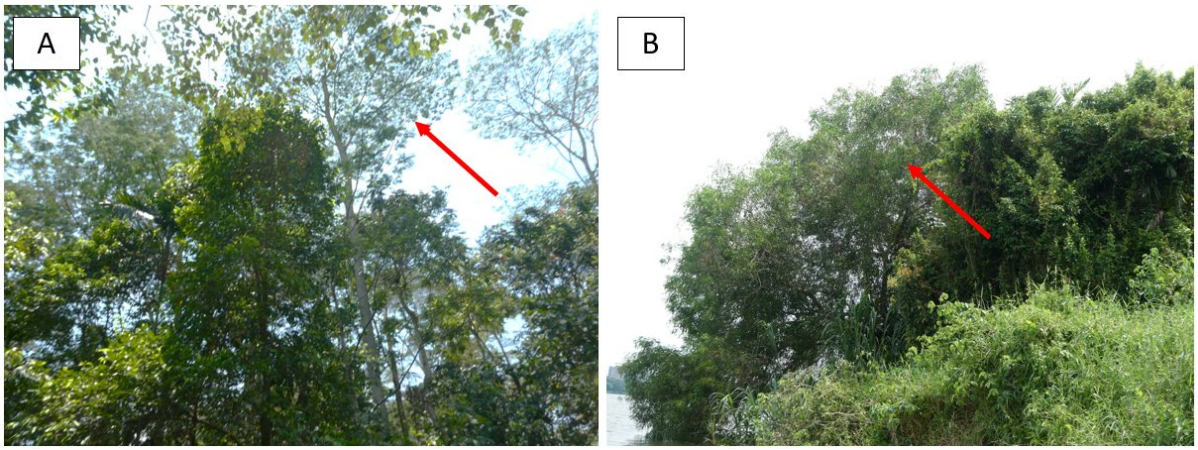

**Figure 3-8: (A) Exotic-dominated Secondary Forest Dominated by Albizia (*Falcataria moluccana*) Indicated by the Red Arrow, in the Canopy Stratum; (B) *Acacia auriculiformis* (Indicated by the Red Arrow) Recorded Within the Exotic-dominated Secondary Forest Patch Along Reservoir Edge**

### 3.2.6 Mixed Forest (Coastal and Abandoned-land Forest)[4]

This habitat comprises of species that are usually found in coastal areas and flora species that usually occur in an abandoned-land forest, such as fruit trees (*Figure 3-3*). It is located on the northern portion and the centre of the Sungei Kadut forest and is dominated by the common and native seashore species, sea hibiscus (*Talipariti tilaceum*; *Figure 3-9A*). Coastal climbers, such as *Derris trifoliata* and *Caesalpinia crista,* were also found growing in abundance within this habitat type (*Figure 3-9B*). At the understorey, the floristic composition resembled that of those described in the abandoned-land forest section above.

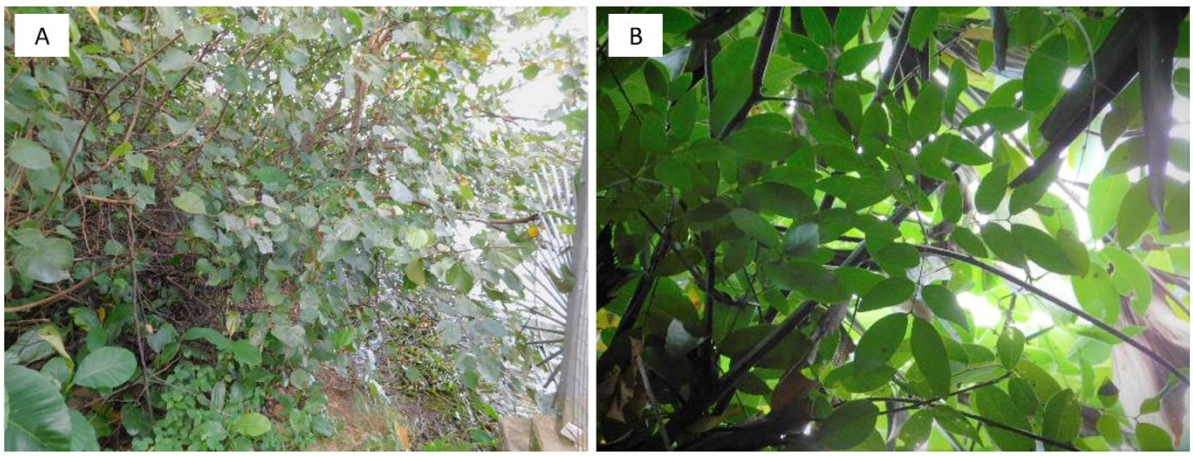

**Figure 3-9: (A) Sea hibiscus (*Talipariti tilaceum*) Dominates this Forest Type; (B) Coastal Climber *Caesalpinia crista* Found Clustering at the Canopy of This Forest Type**

### 3.2.7 Cleared Area and Infrastructure

A small portion of land located on the south-west of Kranji Marshes was recently cleared for future development.

Other infrastructure that lies within the vicinity of the Reservoir Project Site include Turut Track and BBC radio transmission station, PUB Kranji I Pumping Station at the end of Neo Tiew Lane 2 (on the

[4] The floristic composition does not fit those listed in NParks BIA Guideline. As such these habitat are represented distinctively, and a short description is provided for each habitat type.

western reservoir shoreline) and PUB Kranji II Pumping Station which was located on the eastern reservoir shoreline in the middle of Sungei Kadut forest (*Figure 3-3*).

### 3.2.8 *Native Clusters*[5]

Strips and patches of native clusters were recorded mostly along the boundary of the south eastern shore of the Reservoir Project Site and Sungei Kadut forest patch. These patches have distinctively more native species dominating and recruiting within the region. Along the reservoir edges of the south eastern shore of Reservoir Project Site, clusters of sea hibiscus (*T. tilaceum*), simpoh air (*D. suffruticosa*) and shrub species, such as *Ficus grossularioides* var. *grossularioides* were observed (*Figure 3-10A*), while clusters of sea hibiscus that were also interspersed with Malayan banyan (*F. microcarpa*) were recorded along the edges of Sungei Kadut forest.

Clusters of native species, such as *Macaranga gigantea*, *M. hypoleuca* and tembusu (*Cyrtophyllum fragrans*) were also observed at the canopy stratum of the native forest patch that occurs within the abandoned-land forest of the Sungei Kadut forest patch *(Figure 3-10B*).

**Figure 3-10: (A) Native species such as simpoh air (*Dillenia suffruticosa*) and *Ficus grossularioides* var. *grossularioides* observed along reservoir edge; (B) *Macaranga gigantea* recorded within the canopy stratum of Sungei Kadut forest.**

### 3.2.9 *Man-made Waterbodies*

A concrete drain separates Kranji Carpark B Forest from the scrubland area, and are also located within the BBC radio transmitting station (*Figure 3-11A*). Rows of exotic trees which comprise of mainly African tulip, were also observed growing along the drain. Concrete drains were also recorded in Kranji Marshes of which water that was collected from these drains were channelled into the freshwater marsh habitat *(Figure 3-11B*). Other waterbodies such as man-made ponds were also recorded, mainly within NSRCC golf course (*Figure 3-11C*).

[5] The floristic composition does not fit those listed in NParks BIA Guideline. As such these habitat are represented distinctively, and a short description is provided for each habitat type.

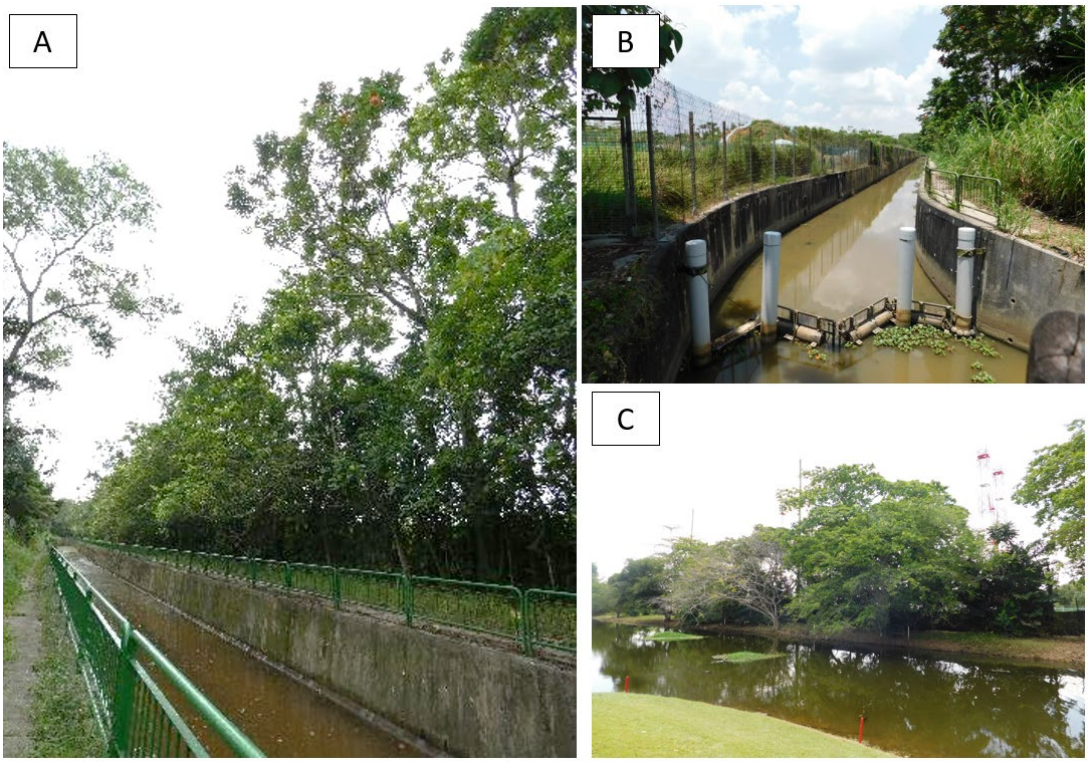

**Figure 3-11: (A) Concrete Drain with Rows of Exotic Trees Growing Beside It; (B) Drain within Kranji Marshes; (C) Man-made Ponds Within NSRCC.**

## 3.3 Floristic Baseline Finding

### *3.3.1 Overview*

A total of 222 species (including two species groups, i.e., plants that could not be identified to species with certainty) were recorded within all flora sampling areas and the reservoir edge (see *Appendix A* of this *Appendix 7.1*). The majority were native (112 species; 50.45%), with 92 species (41.44%) being exotic and the remaining 18 species (8.11%) categorised as cryptogenic, i.e., of unknown or uncertain origin.

The two species group that could not be identified with certainty are *Livistona* sp., which was recorded in Kranji Carpark B and *Tetrastigma* sp., recorded within the Sungei Kadut forest. The species identification of *Livistona* sp. was unable to confirm its species as the specimen was a young sapling and lacked distinctive characteristics to distinguish it. All *Livistona* sp. are considered exotic that were cultivated for ornamental purposes. Hence, this species group is included in *Table 3-2* as 'Cultivated only'.

As for *Tetrastigma* sp., the species was unable to be determined without the presence of any reproductive specimen. According to the latest Singapore Red Data Book (NParks, 2023), the status of all *Tetrastigma* sp. recorded in Singapore are listed as 'Critically Endangered'. Accordingly, the *Tetrastigma* sp. recorded was listed as 'Critically Endangered' in this report.

In total, the number of native threatened species makes up 10.36% (23 species) of the total flora species count. For these overall findings, a distinction is not made as to whether these threatened species are from native wild populations or are cultivated locally and/or are relics from past cultivation. Species belonging to the latter category may therefore not be of conservation significance even though they have been accorded with a threatened conservation status. This is discussed in further detail in *Section 2.1.3* and *Section 3.3.2.*

**Table 3-2: Tabulation of Number of Flora Species Recorded within the Entire Flora Sampling Area along with their Status**

| Origin | National Status | Global Status | Number of Species | Percentage (%) |
|---|---|---|---|---|
| **Native** | | **Total (Native)** | 112 | 50.45 |
| | Common | | 88 | 39.64 |
| | | Least Concern | 34 | |
| | | Not Assessed | 54 | |
| | Vulnerable | | 12 | 5.41 |
| | | Least Concern | 8 | |
| | | Not Assessed | 4 | |
| | Endangered | | 3 | 1.35 |
| | | Least Concern | 3 | |
| | Critically Endangered | | 8 | 3.60 |
| | | Least Concern | 2 | |
| | | Not Assessed | 6 | |
| | Data Deficient | | 1 | 0.45 |
| | | Data Deficient | 1 | |
| **Exotic** | | **Total (Exotic)** | 92 | 41.44 |
| | Cultivated Only | | 10 | 4.50 |
| | | Near Threatened | 2 | |
| | | Least Concern | 1 | |
| | | Not Assessed | 7 | |
| | Casual | | 16 | 7.21 |
| | | Vulnerable | 1 | |
| | | Least Concern | 7 | |
| | | Not Assessed | 5 | |
| | | Data Deficient | 3 | |
| | Naturalised | | 65 | 29.28 |
| | | Least Concern | 21 | |
| | | Not Assessed | 43 | |
| | | Data Deficient | 1 | |
| | Not Assessed | | 1 | 0.45 |
| | | Least Concern | 1 | |
| **Cryptogenic** | | **Total (Cryptogenic)** | 18 | 8.11 |
| | | Least Concern | 12 | |
| | | Not Assessed | 6 | |
| | | **Total (Flora Species)** | 222 (220 species + 2 species group [(a)]) | 100.00 |

*Note:*
*(a) Species group are plants that could not be identified to species with certainty (two in total).*

### 3.3.2 Species of Conservation Significance

Of the 23 nationally threatened species found in the BIA Study Area (see native vulnerable, endangered and critically endangered in *Table 3-2*), 16 were considered as species of conservation significance (*Appendix B* of this *Appendix 7.1*), with locations of species recorded visualised in *Figure 3-12*. This is because although listed as nationally threatened, six species are most likely either escapees from present-day cultivation, relics that had persisted from past cultivation and/ or were cultivated for roadside planting. These species are:

1. *Bouea oppositifolia;*
2. *Calophyllum inophyllum;*
3. *Carallia brachiata;*
4. *Gnetum gnemon* var. *gnemon;*
5. *Peltophorum pterocarpum;* and

6. *Syzygium myrtifolium*

The national statuses of six plant species were revised in the updated Singapore Red Data Book (NParks, 2023). Previously, these plant species were either assessed as exotic species or common native species but are now considered to be species of conservation significance. These six species are:

1. *Angelesia splendens*
2. *Digitaria bicornis;*
3. *Cyperus brevifolius;*
4. *Eleocharis dulcis;*
5. *Lygodium salicifolium;* and
6. *Trema tomentosum.*

As the revisions were only published in 2022 and 2023, the locations of specimens of these species were not recorded during the field surveys in 2020–2021. They are, therefore, not accounted for in *Figure 3-12*.

*Table 3-3* and *Figure 3-12* shows the breakdown of the remaining 16 plant species of national conservation significance for each status and the species richness of species of conservation significance recorded within each flora sampling area respectively.

**Table 3-3: Species of Conservation Significance Recorded within Each Flora Sampling Area**

| Location of Flora Sampling Area | VU | EN | CR | Total[(a)] |
|---|---|---|---|---|
| **Sungei Kadut** | 6 | 3 | 5 | 14 |
| **Kranji Reservoir Edge** | 3 | 1 | 0 | 4 |

***Note:***
*(a)* ***Total does not take in account of the abundance of each species of each site.***
*(b)* ***VU – Vulnerable; EN – Endangered; CR – Critically Endangered.***

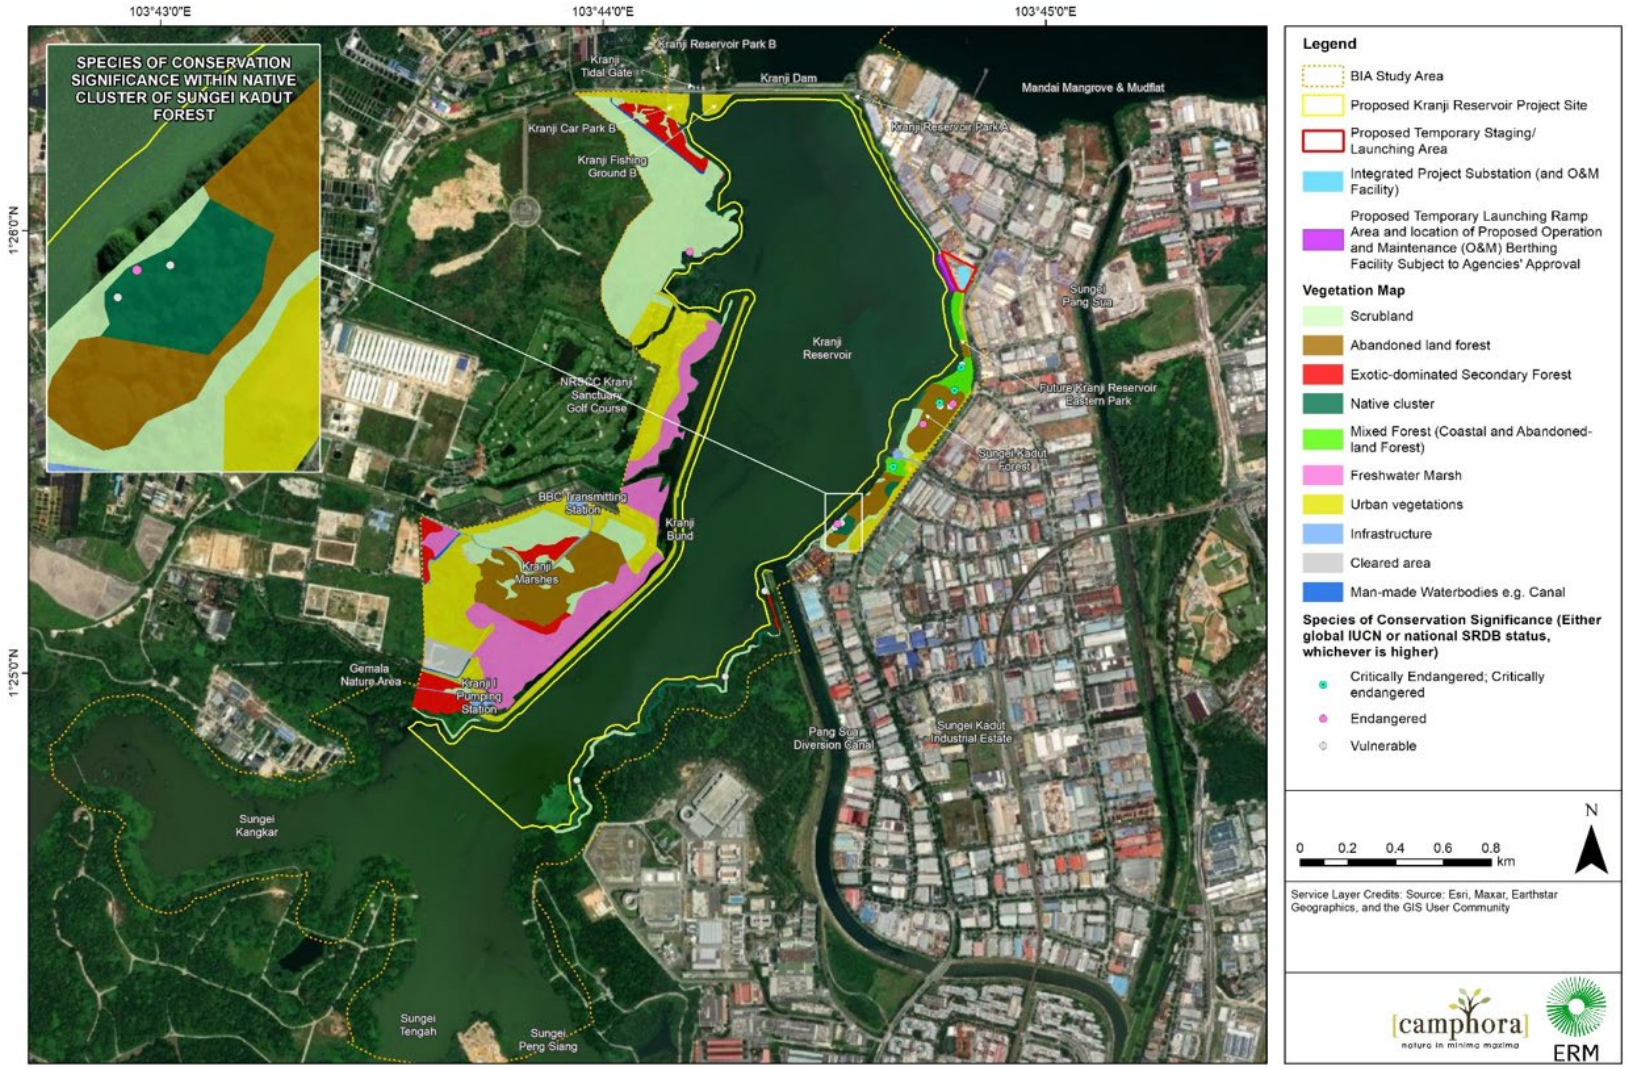

**Figure 3-12: Distribution of Plant Species of Conservation Significance Across the BIA Study Area**

Clusters of species of conservation significance were also recorded within the native clusters in the south-west of Sungei Kadut forest (*Figure 3-12*). This includes a large tree specimen of Vulnerable *Sandoricum koetjape* with a girth size of 2.2m (*Figure 3-13A).* Species that are associated to coastal habitats such as Endangered *Garcinia celebica* (*Figure 3-13B*) was also recorded, owing to the proximity to the coast further north.

**Figure 3-13: (A) Large Specimen of *Sandoricum koetjape* of 2.2m girth; Two Coastal Species of Conservation Significance: (B) *Garcinia celebica*.**

The *Philydrum lanuginosum,* was found in the vicinity of Sungei Kadut Industrial Estate on 29th January 2021 (*Figure 3-12; Figure 3-14A*). The only known record of this species was documented in 'The flora of Singapore' by Henry Nicholas Ridley of which the locality of the specimen was recorded to be in Bedok, Singapore (Chen et al., 2021 and Ridley, 1855). Generally, this species can be found in specialised habitat that are often wet and sandy or near freshwater ponds and marshes (Chen et al., 2021 and Saunders, 1995). The status of this species is nationally Critically Endangered in the recently updated Singapore Red Data Book (NParks, 2023).

The specimen was flowering during the point of encounter, which eased the process of identification (*Figure 3-14B).* There were also cuts on the leaves which could have been caused by grass cutting (*Figure 3-14C*).

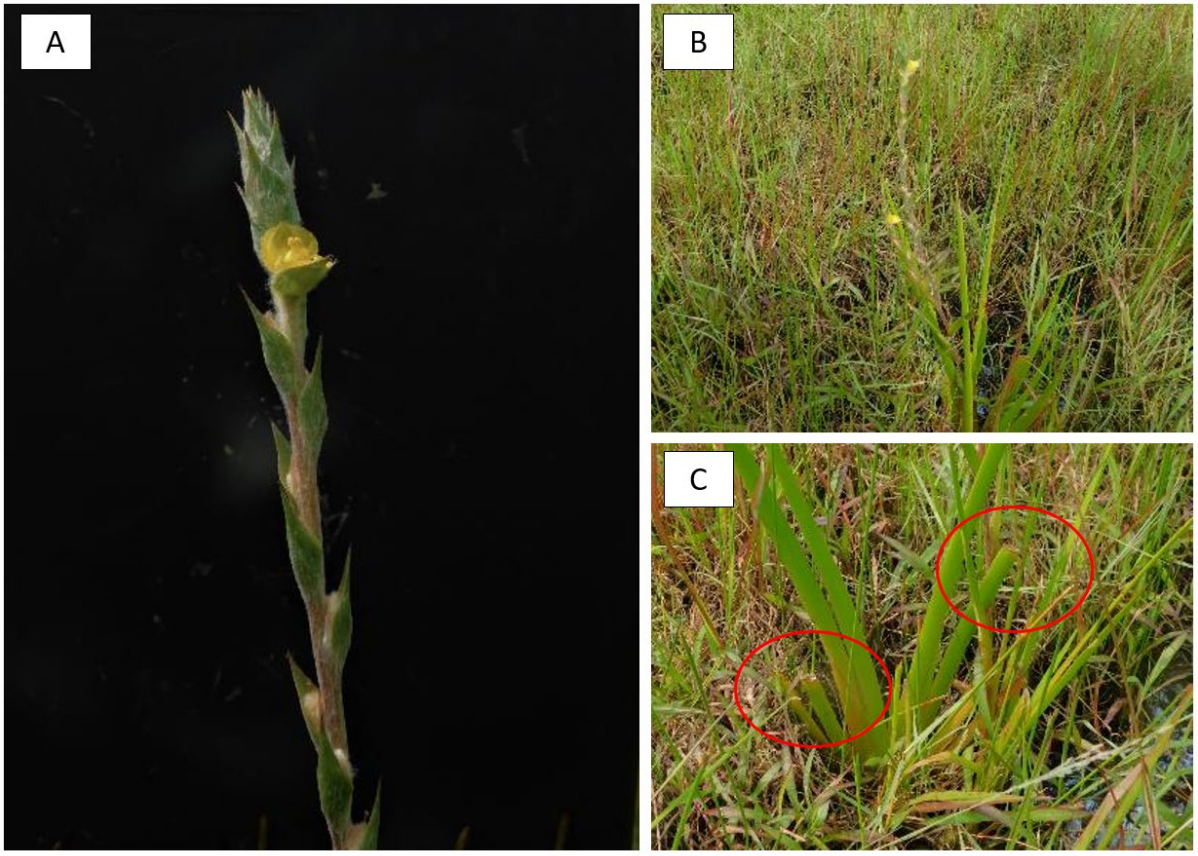

**Figure 3-14: (A) Close Up of the Flowering Specimen of *Philydrum lanuginosum*; (B) Wet and Grassy Habitat of Where it was Found; (C) Signs of Mechanical Injury on the Leaves Due to Leaf Cutting**

Two individuals of *Tetrastigma* sp. were recorded within the mixed forest habitat at the northern portion of the Sungei Kadut forest. This genus is often overlooked by many as its vegetative specimens are often not attractive to collectors (*Figure 3-15*). Reproductive specimens are also rarely encountered which limits conducting further studies of this genus. Since this species is dioecious (i.e., bearing male and female reproductive parts on different plants), it is vital to maintain varied genotypes of both sexes to ensure the viable population of these species (Ang et al., 2012).

**Figure 3-15: Specimen of Vegetative Specimen of *Tetrastigma* sp.**

Numerous clusters of Nipah palm *(Nypa fruticans)* were recorded along the reservoir edge (*Figure 3-16*). This species was listed as Vulnerable in Chong et al., 2009. This could have been contributed to by the commercial usage of this palm for various purposes. Known for its durability, the fronds were commonly used as roofs for 'attap' huts and daily items such as hats and bags in the past. Today, the fruits of this palm species are still being enjoyed as a delicacy. The seeds which area also known as 'attap-chee', are used in numerous local desserts.

**Figure 3-16: Cluster of *Nypa fruticans* Found Within Kranji Reservoir**

*Nypa fruticans* are naturally found in areas with shallow lagoon where there is permanent flow of freshwater. In the past, this species is often seen in huge clusters along the tidal rivers (Ang et al., 2013). Hence, it is anticipated that specimens of this species recorded during the survey were remnants from the former freshwater and tidal habitats that occurred within Kranji Reservoir.

Most areas where these palms can be found today are found within unprotected areas in Singapore. Hence, the population of this species is exposed to the risk of being extinct in Singapore by the accelerating rate of urban development (Ang et al., 2013).

### 3.3.3 Large Specimens

Eight large specimens of Malayan banyan (*Ficus microcarpa*) and one large specimen of *Bambusa vulgaris* were recorded within the floristic survey terrestrial sites and along the reservoir edge (*Figure 3-17*; *Appendix C* of this *Appendix 7.1*). The largest specimen of *Ficus* Malayan banyan recorded was of 15m spread. The details of these specimens are reflected in *Figure 3-17* and *Table 3-4*.

**Table 3-4: Large Specimens Found Along the Kranji Reservoir with their Recorded Spread and Height**

| Habit | Species | Spread (m) | Height (m) | Location |
|---|---|---|---|---|
| **Strangler** | *Ficus microcarpa* | 15 | 10–15 | Edge of Kranji Reservoir |
| **Strangler** | *Ficus microcarpa* | 12 | 8 | Edge of Kranji Reservoir |
| **Strangler** | *Ficus microcarpa* | 12 | 12 | Edge of Kranji Reservoir |
| **Shrub** | *Bambusa vulgaris* | 12 | 12 | Edge of Kranji Reservoir |
| **Strangler** | *Ficus microcarpa* | 9 | 15 | Sungei Kadut |
| **Strangler** | *Ficus microcarpa* | 8 | 20 | Kranji Carpark B |
| **Strangler** | *Ficus microcarpa* | 4 | 10 | Sungei Kadut |
| **Strangler** | *Ficus microcarpa* | 3 | 20 | Sungei Kadut |

This strangler species is able to produce figs all year round, providing an endless supply of diet for fauna species such as fruit-eating bats and other frugivores. Three large specimens of Malayan banyan were also recorded along the reservoir edge. According to Keng (1990), it was a common sight for specimen of this species to grow naturally along coastal and riverine sites in the past. This species has since been heavily cultivated as ornamental trees in the urban landscape (Ng et al., 2010).

### 3.3.4 Other Specimens of Value

Six clusters of *Bambusa vulgaris* were recorded within the northern portion of Sungei Kadut forest in close proximity to each other (*Figure 3-17*). Although no bamboo bats (*Tylonycteris spp.*) were recorded during the roost emergence surveys, these bamboo clusters are regarded to be specimens of value as they are potential habitats for the nationally Vulnerable bamboo bats (see Bats under *Section 3.4.1.10*).

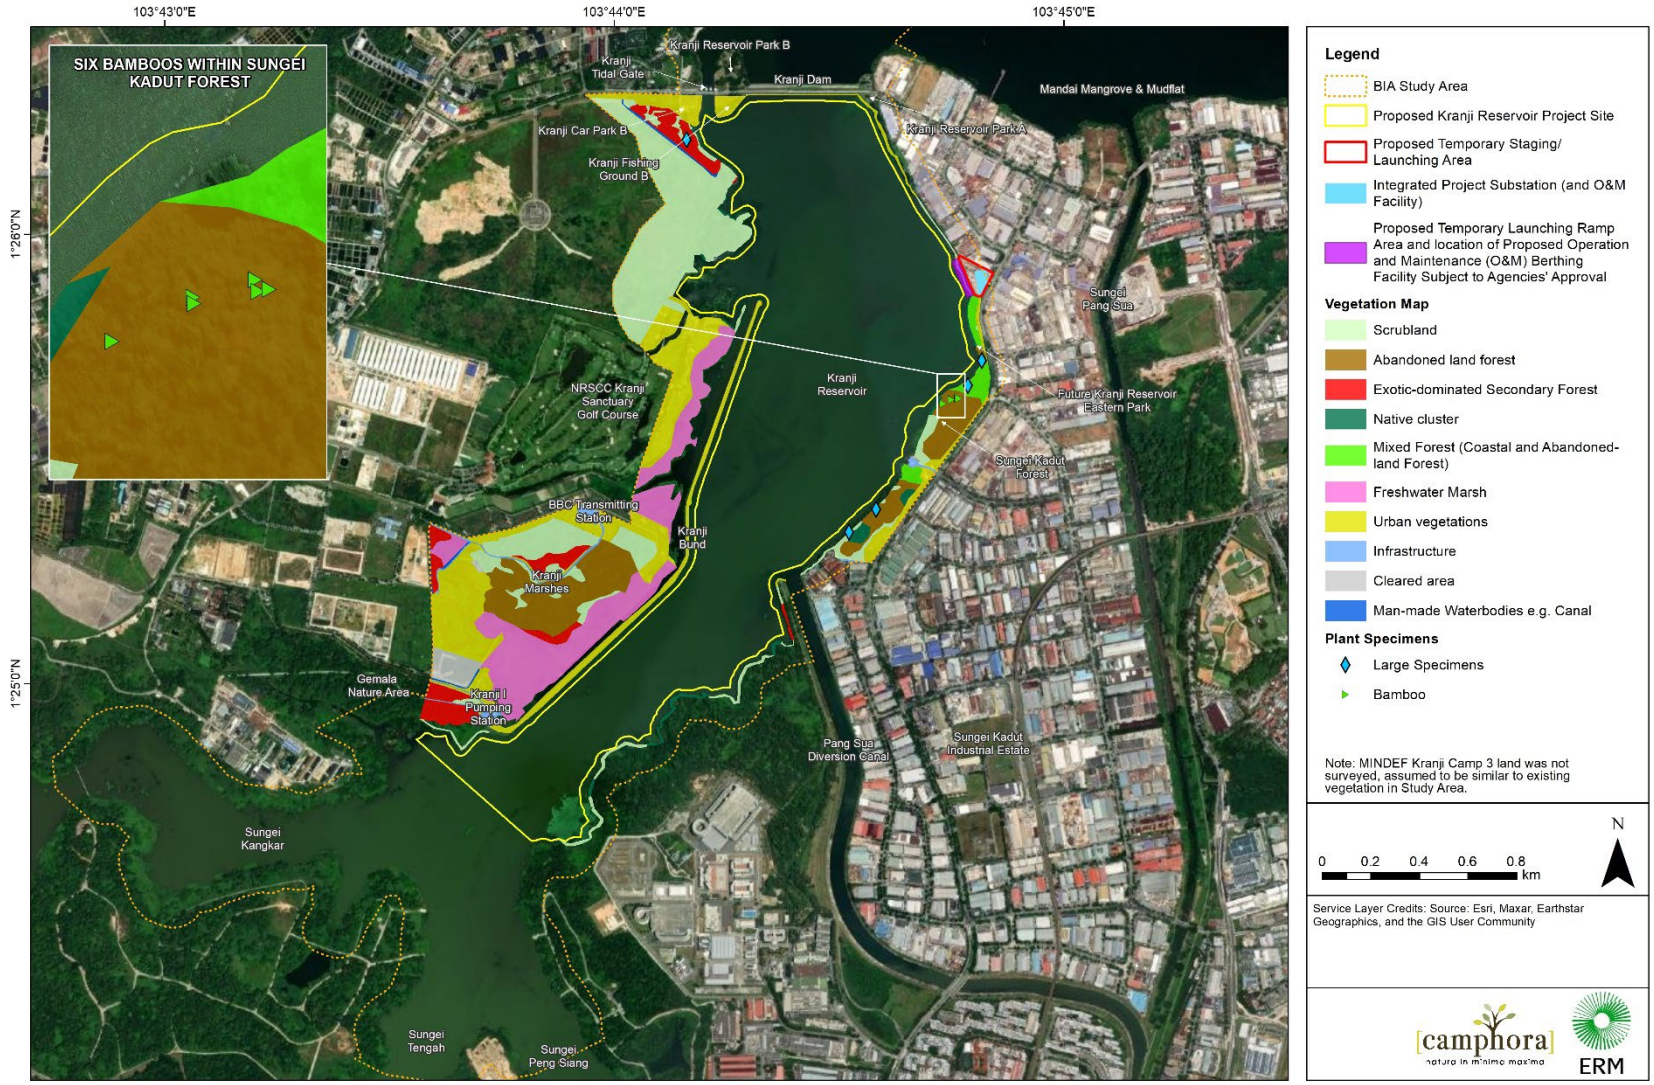

**Figure 3-17: Distribution of Large Specimens and Bamboos Across the BIA Study Area**

## 3.4 Faunistic Baseline Findings

### *3.4.1 Terrestrial*

#### *3.4.1.1 Taxon Sampling Curves*

Along terrestrial sampling routes (T01, T02 and T04), the sample coverage for the faunal groups were high—above 90%. Terrestrial sampling route, T03, was not included in the analysis as no night surveys were conducted along this route (*Table 3-5*; *Figure 3-18*). Amphibians and bats were excluded from the analysis as the data was deemed not suitable, for example due to insufficient sample size. Along the boat sampling routes (B01 and B02), the sample coverage for odonates, reptiles and birds were above 90% except for reptiles at 77.1% (*Table 3-5*; *Figure 3-19*). Amphibians, non-volant mammals and bats were excluded from the analysis due to insufficient sample size. While these taxa are considered to have been comprehensively surveyed on site, the low observed richness is likely attributed to poor habitat suitability, therefore contributing to insufficient sample size. Camera traps obtained a high coverage of 99.2% (*Figure 3-20*). The sample coverage obtained shows that the surveys conducted can be considered adequate representation of the BIA Study Area.

**Table 3-5: Result Summary of Taxon Sampling Analysis**

| Faunal group | Sample coverage (%) | Observed richness | Estimated richness (± s.e) | 95% confidence interval) |
|---|---|---|---|---|
| **Terrestrial sampling route (T01–T04)** | | | | |
| Aculeate Hymenopterans | 93.8 | 37 | 43 ± 5.1 | 38.6–62.2 |
| Odonates | 97.3 | 38 | 68 ± 37.6 | 42.6–239.1 |
| Butterflies | 94.3 | 21 | 88 ± 6.37 | 80.9–108.6 |
| Reptiles | 93.7 | 28 | 39 ± 10.2 | 30.8–78.8 |
| Birds | 97.2 | 25 | 136 ± 12.1 | 122.6–174.5 |
| Mammals | 97.1 | 10 | 10 ± 1.8 | 10.1–20.6 |
| **Boat sampling route (B01–B02)** | | | | |
| Odonates | 96.0 | 17 | 89 ± 9.1 | 17.3–34.5 |
| Reptiles | 77.1 | 4 | 5 ± 3.5 | 4.2–24.4 |
| Birds | 94.2 | 74 | 89 ± 9.1 | 79.0–119.1 |
| **Camera trap (CT01–CT10)** | | | | |
| Mammals | 99.2 | 8 | 11 ± 4.5 | 8.4–32.9 |

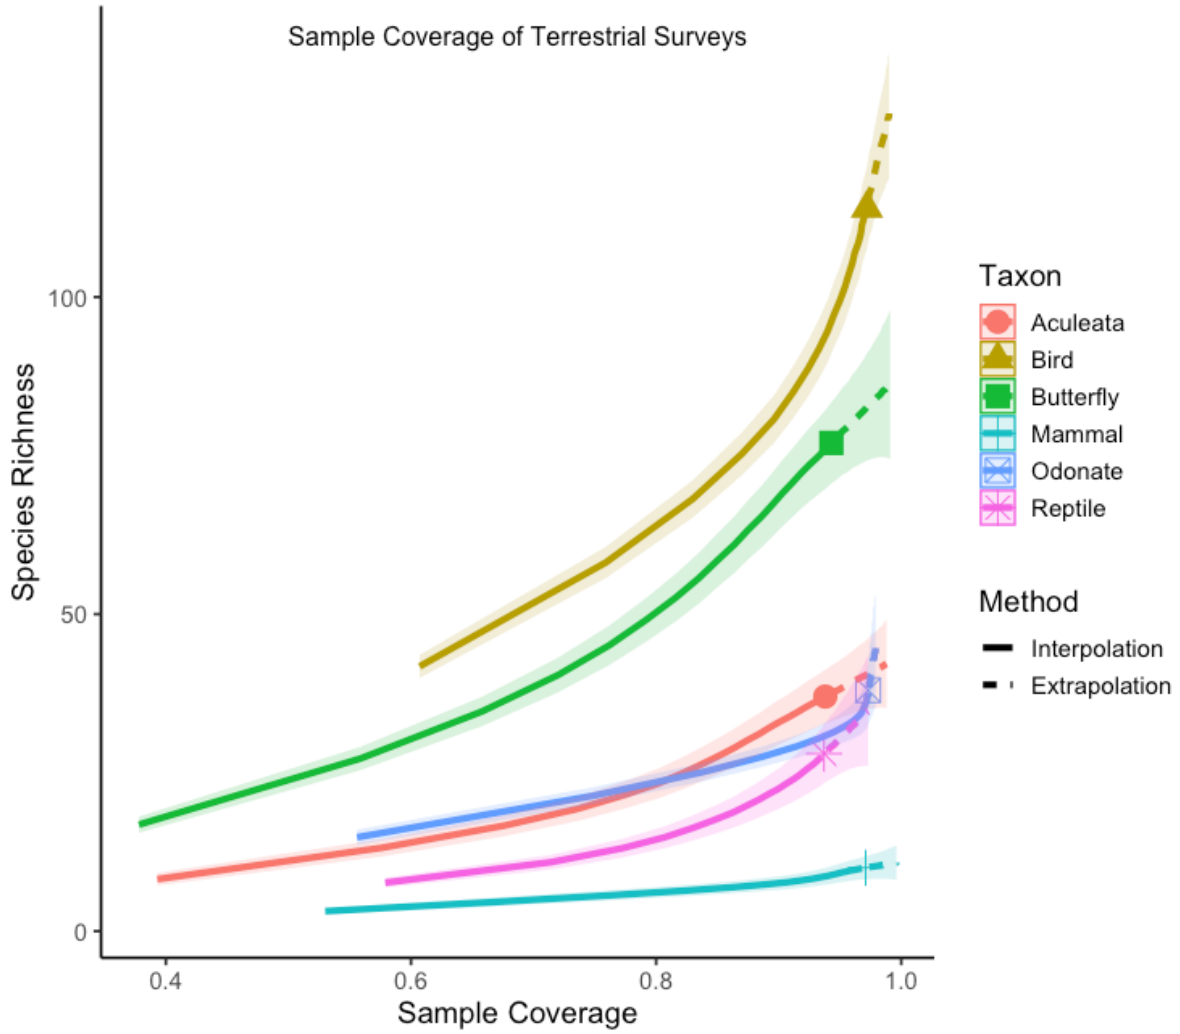

**Figure 3-18: Taxon Sampling Curves across Faunal Groups for Terrestrial Sampling Routes**

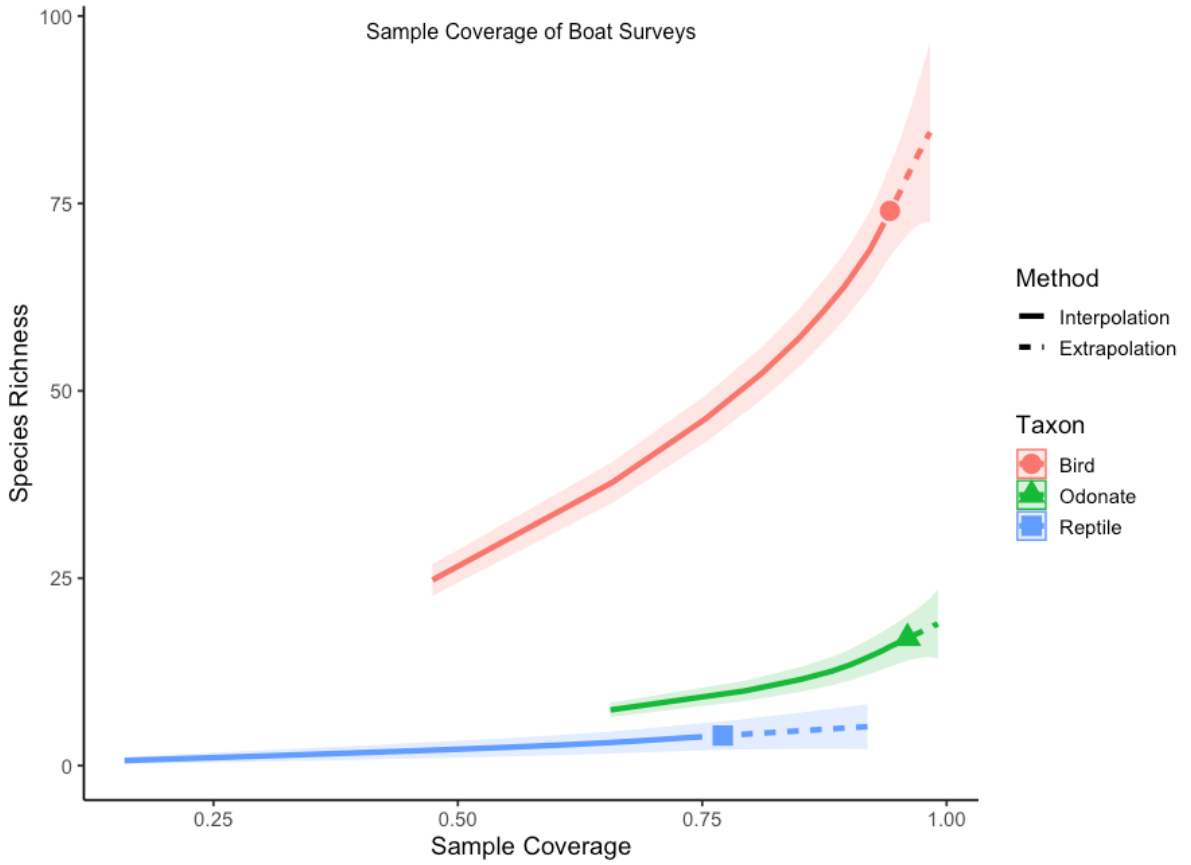

**Figure 3-19: Taxon Sampling Curves across Faunal Groups for Boat Sampling Routes**

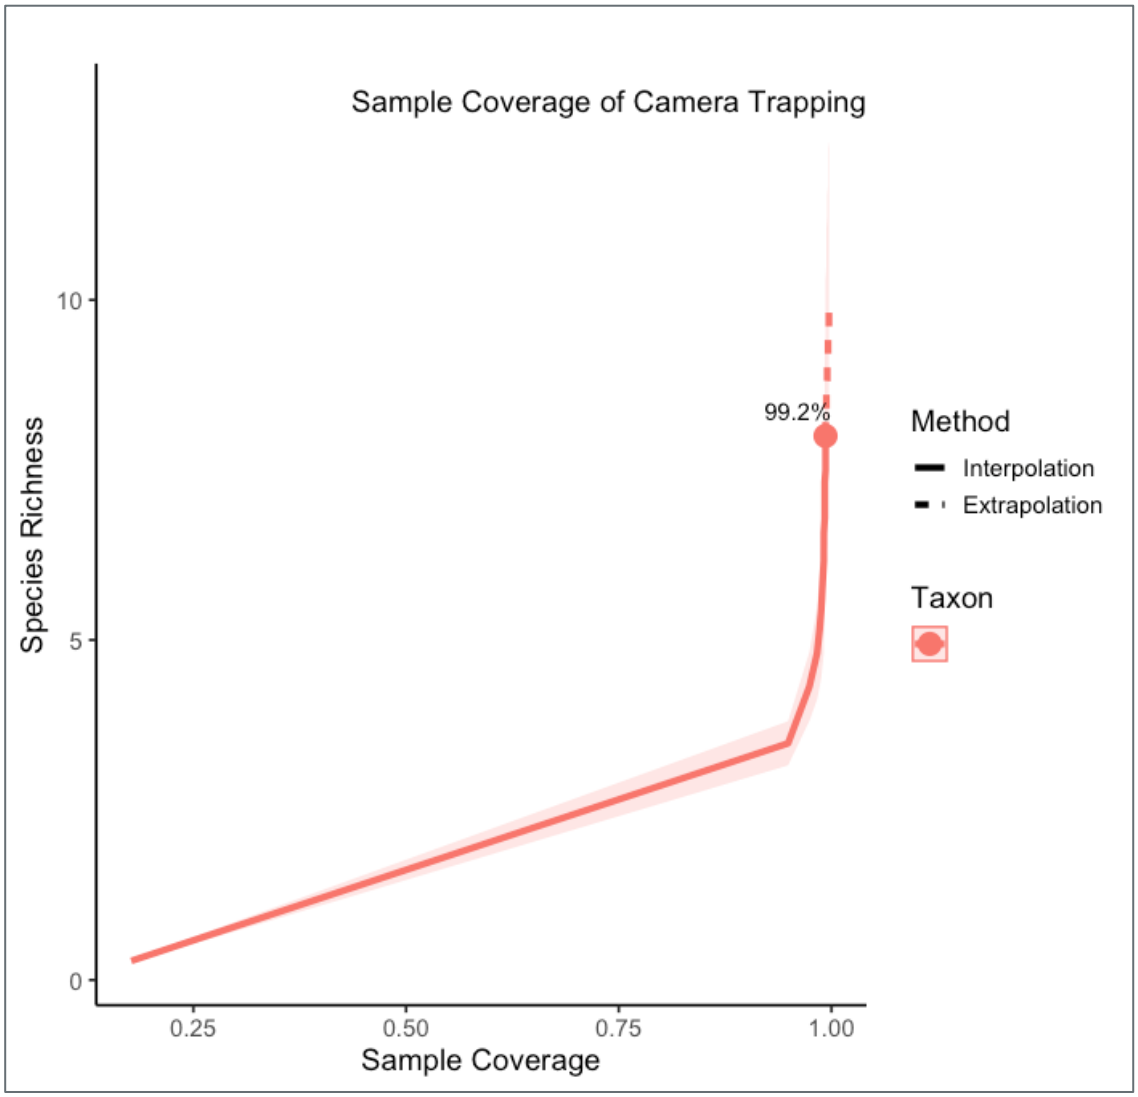

**Figure 3-20: Taxon Sampling Curve of Mammals from Camera Trapping**

### *3.4.1.2 Overview*

The field assessment recorded 404 faunal species within the BIA Study Area (*Table 3-6*). This includes 48 species of conservation significance (*Table 3-7*; *Appendix D* of this *Appendix 7.1*), of which all are of threatened status either nationally or globally. They comprise thirty-eight birds, one odonate, two butterflies, three reptiles, two mammal, one bat and one wasp species (*Table 3-7)*. This includes data from terrestrial and boat transect surveys, camera trap, vantage point surveys, stationary bat detection surveys, bat activity surveys and roost emergence surveys for bamboo bats. The faunal survey data and camera trap data are provided in *Appendix E1* and *Appendix F* of this *Appendix 7.1,* respectively.

**Table 3-6: Summary of Recorded Faunal Species**

| Faunal Group | Number of Recorded Species | |
|---|---|---|
| | All Species | Species of Conservation Significance |
| **Aculeate hymenopterans** | 52 | 1 |
| **Bees** | 17 | 0 |
| **Stinging wasps** | 35 | 1 |
| **Odonates** | 42 | 1 |
| **Dragonflies** | 35 | 1 |
| **Damselflies** | 7 | 0 |
| **Butterflies** | 91 | 2 |
| **Herpetofauna** | 46 | 3 |
| **Amphibians** | 13 | 0 |
| **Reptiles** | 33 | 3 |
| **Birds** | 155 | 38 |
| **Mammals** | 18 | 3 |
| **Non-volant Mammals** | 9 | 2 |
| **Bats** | 9 | 1 |
| **Total** | **404** | **48** |

Species of conservation significance were distributed across the BIA Study Area with no distinct pattern (*Figure 3-21; Figure 3-22*). Within the Kranji Marshes and along the Kranji bund, records were dominated by bird species of conservation significance which is not surprising given that it is a known spot for bird diversity. The Sungei Kadut forest is also habitat for birds, odonate and butterfly species of conservation significance. The Carpark B forest area, while small and receives disturbance from surrounding infrastructure, is a habitat for odonate and bird species of conservation significance.

The records of the species of conservation significance are further elaborated in the respective taxa section below. All maps of species of conservation significance provided in this section reflects the higher global or national conservation status of the species as explained in *Section 2.1.3.*

**Table 3-7: List of Faunal Species of Conservation Significance Recorded Along Terrestrial and Boat Sampling Routes and Camera Traps**

| Taxon | Scientific Name | Common Name | Global Status[b] | National Status [b] | Habitat observed | Location reference |
|---|---|---|---|---|---|---|
| Wasp | *Megascolia procer* | N.A. | NA | VU | Exotic-dominated secondary forest | T01 |
| Odonate | *Heliaeschna sp.*[a] | Nighthawker | LC | CR | Abandoned-land forest | T02 |
| Butterfly | *Pelopidas assamensis* | Great swift | NA | EN | Urban vegetation | T02 |
| | *Taractrocera ardonia lamia* | Spotted grass dart | NA | VU | Scrubland | T01 |
| Reptile | *Amyda cartilaginea* | Asian softshell turtle | VU | NT | Pond | T03 |
| | *Cuora amboinensis* | Malayan box terrapin | VU | NA | Abandoned-land forest, scrubland | T02–T04 |
| | *Cylindrophis ruffus* | Red-tailed pipe snake | LC | VU | Exotic-dominated secondary forest | CT08 |
| Bird | *Ardea sumatrana* | Great-billed heron | LC | CR | Urban vegetation/fresh water marsh | T02 |
| | *Nycticorax nycticorax* | Black-crowned night heron | LC | EN | Abandoned-land forest, scrubland, Exotic-dominated secondary forest | B01, B02 |
| | *Sternula albifrons* | Little tern | LC | EN | Reservoir | B01, B02 |
| | *Ardea purpurea* | Purple heron | LC | EN | Abandoned-land forest, mixed forest, urban vegetation, scrubland, reservoir | T01–T04, B01–B02 |
| | *Pycnonotus zeylanicus* | Straw-headed bulbul | CR | EN | All habitat types | T01–T04, B01–B02 |
| | *Dendrocygna javanica* | Lesser whistling duck | LC | EN | Urban vegetation | T02 |
| | *Gallinula chloropus* | Common moorhen | LC | EN | Freshwater marsh | T02 |
| | *Tringa glareola* | Wood sandpiper | LC | EN | Urban vegetation | T02 |
| | *Chlidonias leucopterus* | White-winged tern | LC | EN | Urban vegetation | T03 |
| | *Gallicrex cinerea* | Watercock | LC | EN | Urban vegetation | T03 |
| | *Psittacula longicauda* | Long-tailed parakeet | VU | NT | All habitat types, except mixed forest | T01–T04, B01–B02 |
| | *Apus nipalensis* | House swift | LC | VU | Urban vegetation | B01 |

| Taxon | Scientific Name | Common Name | Global Status[b] | National Status [b] | Habitat observed | Location reference |
|---|---|---|---|---|---|---|
| | *Ixobrychus cinnamomeus* | Cinnamon bittern | LC | VU | Scrubland | B01 |
| | *Motacilla tschutschensis* | Eastern yellow wagtail | LC | VU | Urban vegetation | B01 |
| | *Leptoptilos javanicus* | Lesser adjutant | VU | VU | Scrubland | B02 |
| | *Bubulcus coromandus* | Eastern cattle egret | LC | VU | Exotic-dominated secondary forest | T01 |
| | *Strix seloputo* | Spotted wood owl | LC | VU | Exotic-dominated secondary forest | T01 |
| | *Ketupa ketupu* | Buffy fish owl | LC | VU | Scrubland, Exotic-dominated secondary forest | T01–T02 |
| | *Acrocephalus orientalis* | Oriental reed warbler | LC | VU | Scrubland | T01–T03, B01 |
| | *Corvus macrorhynchos* | Large-billed crow | LC | VU | Abandoned-land forest, mixed forest, scrubland, urban vegetation | T01–T04 |
| | *Zosterops simplex* | Swinhoe's white-eye | LC | VU | All habitat types | T01–T04, B01–B02 |
| | *Nisaetus cirrhatus* | Changeable hawk-eagle | LC | VU | Abandoned-land forest, Exotic-dominated secondary forest, urban vegetation | T01–T04, B01–B02 |
| | *Copsychus saularis* | Oriental magpie-robin | LC | VU | All habitat types | T01–T04, B01–B02 |
| | *Haliaeetus ichthyaetus* | Grey-headed fish eagle | NT | VU | Abandoned-land forest, mixed forest, exotic-dominated secondary forest | T01–T04, B02 |
| | *Alcedo atthis* | Common kingfisher | LC | VU | Abandoned-land forest, exotic-dominated secondary forest/scrubland | T01, T04, B01–B02 |
| | *Halcyon pileata* | Black-capped kingfisher | LC | VU | Urban vegetation | T02 |
| | *Collocalia affinis* | Plume-toed swiftlet | NA | VU | Urban vegetation/fresh water marsh | T02 |
| | *Pluvialis fulva* | Pacific golden plover | LC | VU | Urban vegetation | T02 |
| | *Lanius cristatus* | Brown shrike | LC | VU | Urban vegetation | T02–T03, B01 |
| | *Poliolimnas cinereus* | White-browed crake | LC | VU | Urban vegetation, scrubland | T02–T03, B01 |

| Taxon | Scientific Name | Common Name | Global Status[(b)] | National Status [(b)] | Habitat observed | Location reference |
|---|---|---|---|---|---|---|
| | *Ploceus philippinus* | Baya weaver | LC | VU | Urban vegetation/fresh water marsh, scrubland | T02–T03, B01–B02 |
| | *Cisticola juncidis* | Zitting cisticola | LC | VU | Urban vegetation | T02–T03, B01–B02 |
| | *Ixobrychus sinensis* | Yellow bittern | LC | VU | Urban vegetation, exotic-dominated secondary forest/scrubland | T02–T03, B01–B02 |
| | *Elanus caeruleus* | Black-winged kite | LC | VU | Urban vegetation, exotic-dominated secondary forest, scrubland | T02–T03, B02 |
| | *Ardea alba* | Great egret | LC | VU | Urban vegetation, freshwater marsh, scruband | T02–T04, B02 |
| | *Lonchura atricapilla* | Chestnut munia | LC | VU | Freshwater marsh/abandoned-land forest, urban vegetation | T02, B01 |
| | *Actitis hypoleucos* | Common sandpiper | LC | VU | Urban vegetation | T03, B01 |
| | *Tringa totanus* | Common redshank | LC | VU | Mudflat | VP06 |
| Non-volant Mammal | *Lutrogale perspicillata* | Smooth-coated otter | VU | CR | Abandoned-land forest, urban vegetation, freshwater marsh, reservoir | CT04, T02, B02 |
| | *Macaca fascicularis* | Long-tailed macaque | VU | NA | Abandoned-land forest, exotic-dominated secondary forest, urban vegetation | T01, CT02, CT07, CT08 |
| Bat | *Tylonycteris* sp. | Bamboo bat | LC | VU | Mixed forest, native cluster | BAT5, BAT |

*Note:*

*(a) The Heliaeschna sp. recorded was not identified to species level but is likely to be either the Nighthawker (Heliaeschna crassa) which is nationally critically endangered, or Heliaeschna idae that is currently not in Singapore checklist.*

*(b) NE – Nationally Extinct, CR – Critically Endangered, EN – Endangered, VU – Vulnerable, NT – Near-threatened LC – Least Concern, NA – Not Assessed*

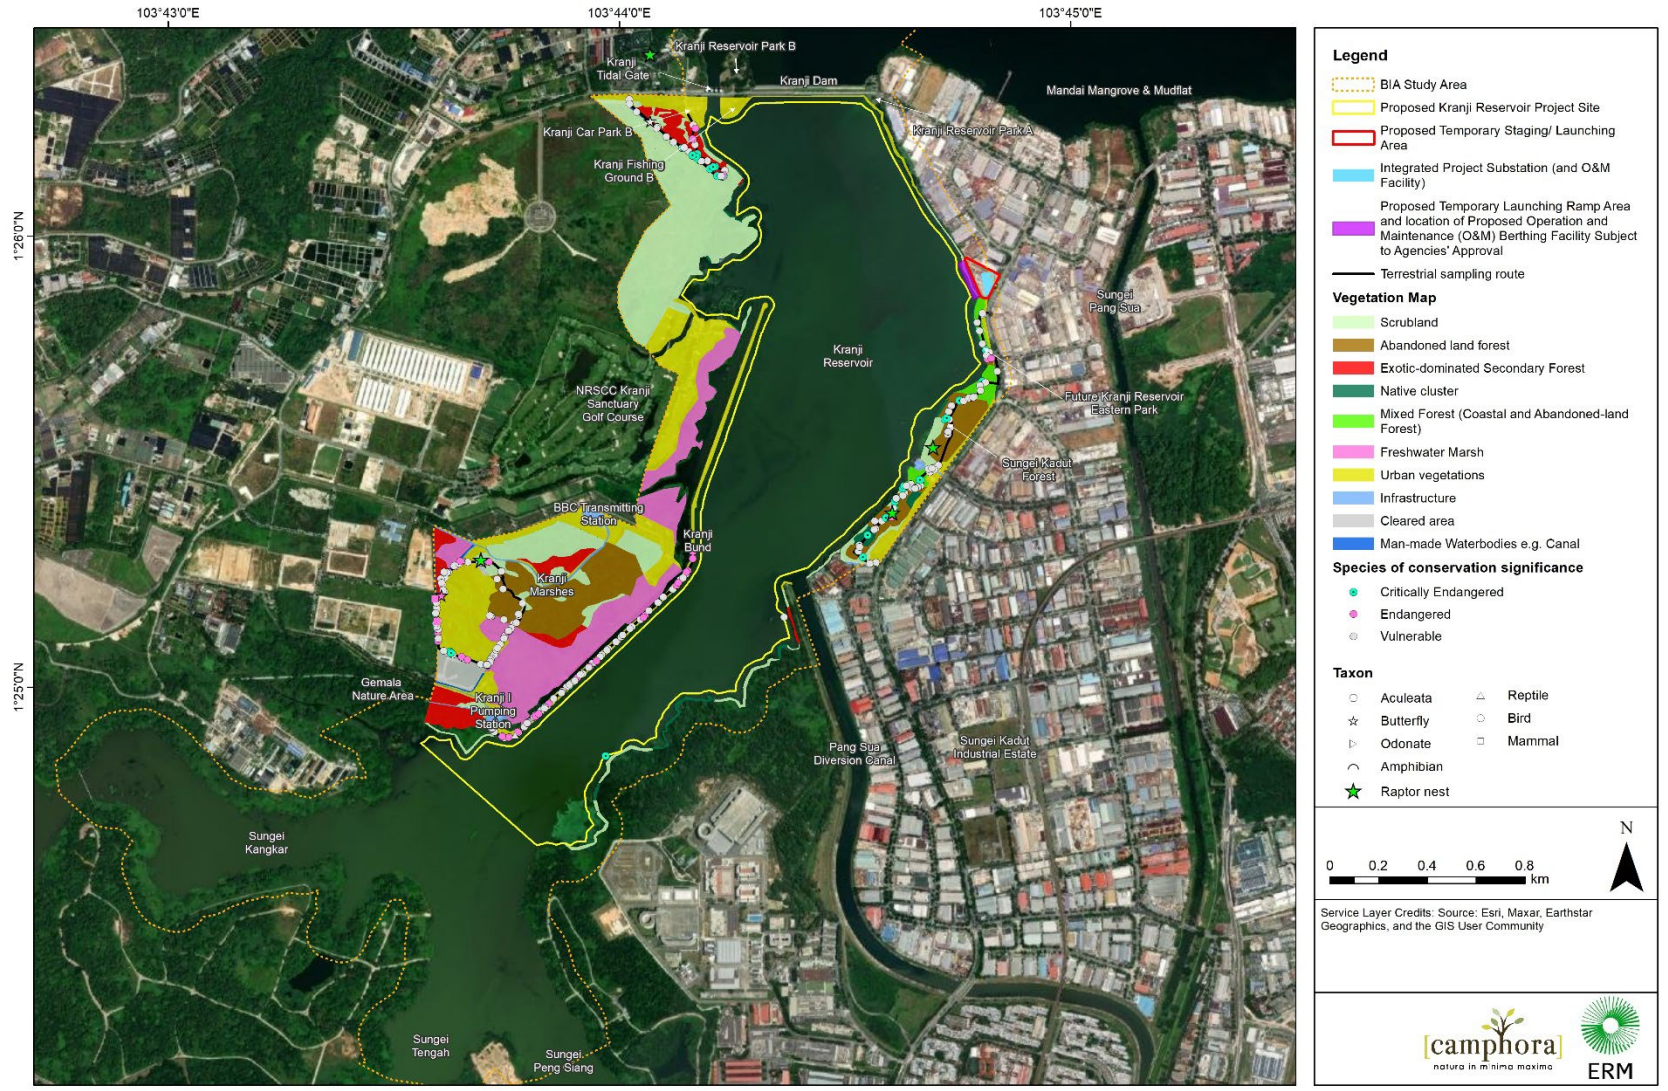

**Figure 3-21: Locations of All Faunal Species of Conservation Significance Along Terrestrial Sampling Routes**

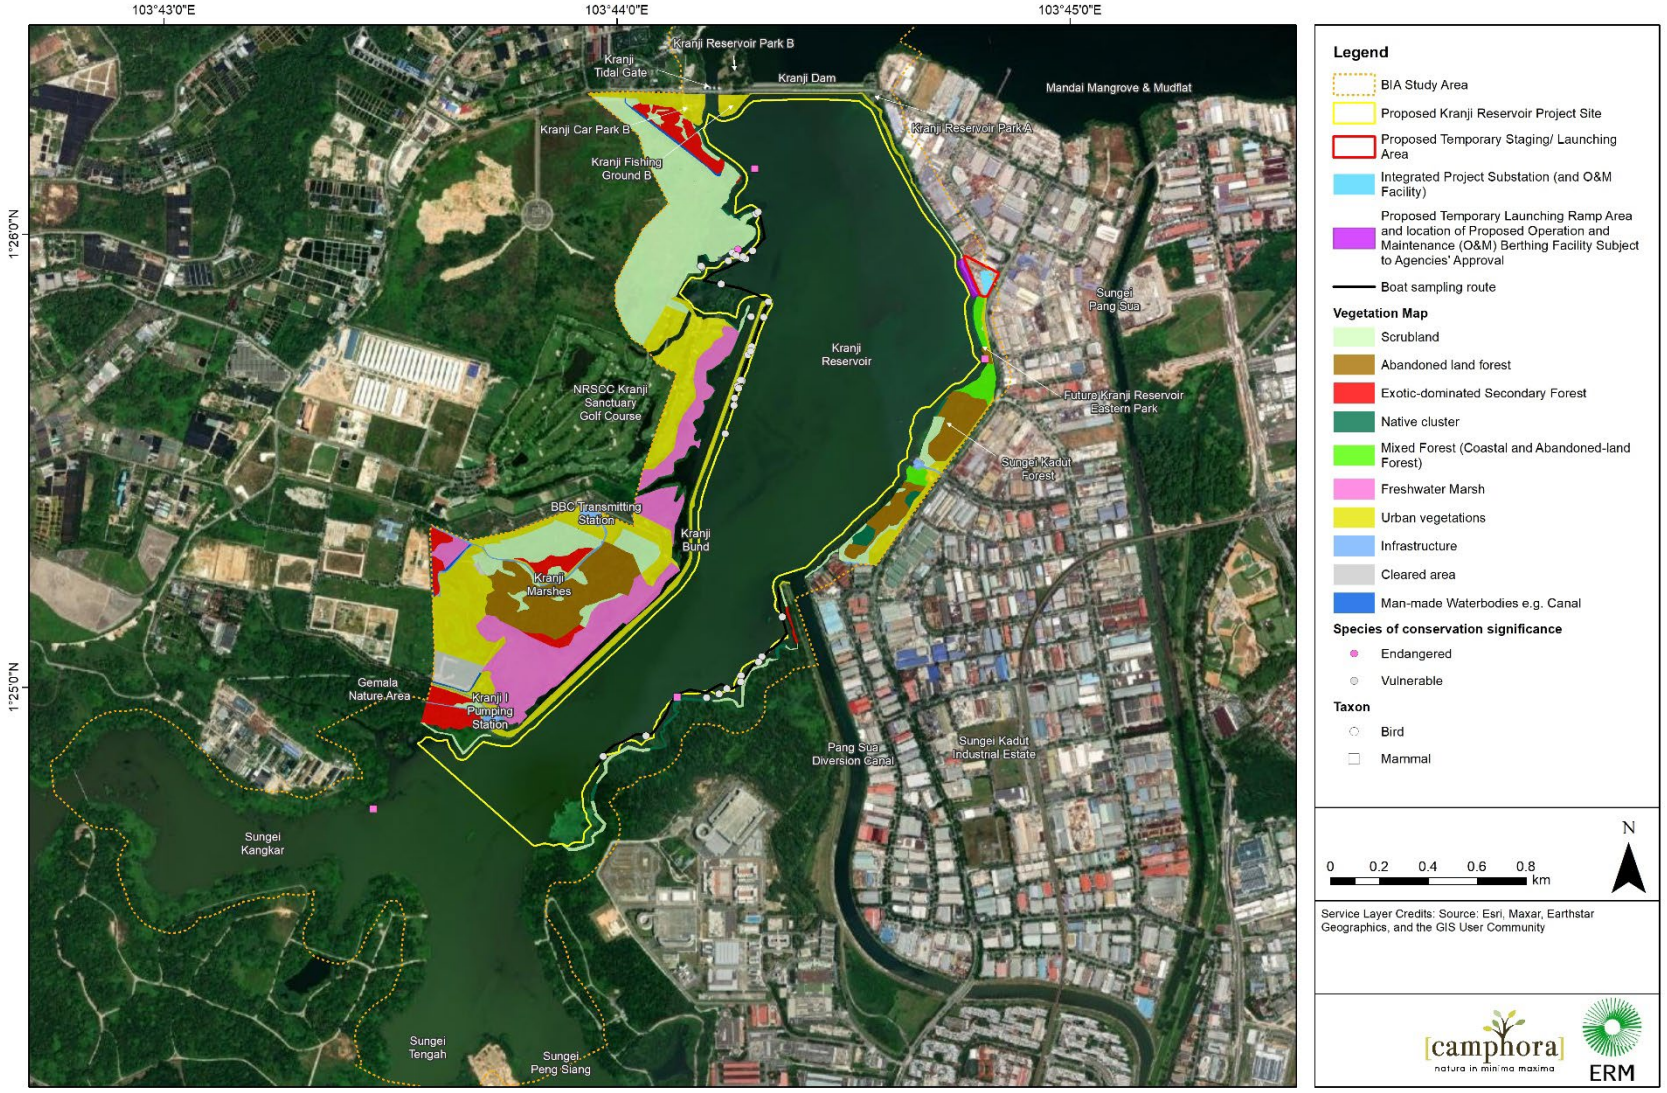

**Figure 3-22: Locations of All Faunal Species of Conservation Significance Along Boat Sampling Routes**

### 3.4.1.3 Aculeate Hymenopterans

The field assessment recorded 52 species and seven only identified to genus level. It comprised 17 bee and 35 wasp species (*Table 3-6; Appendix D* of this *Appendix 7.1*). The recorded species were dominated by native common species. One species *Megascolia procer* is of conservation significance as it is nationally Vulnerable. This species is rare and currently only known to from Sungei Buloh (Lee JXQ, pers comm.). It was sighted once in the Carpark B forest (T01; *Figure 3-23*).

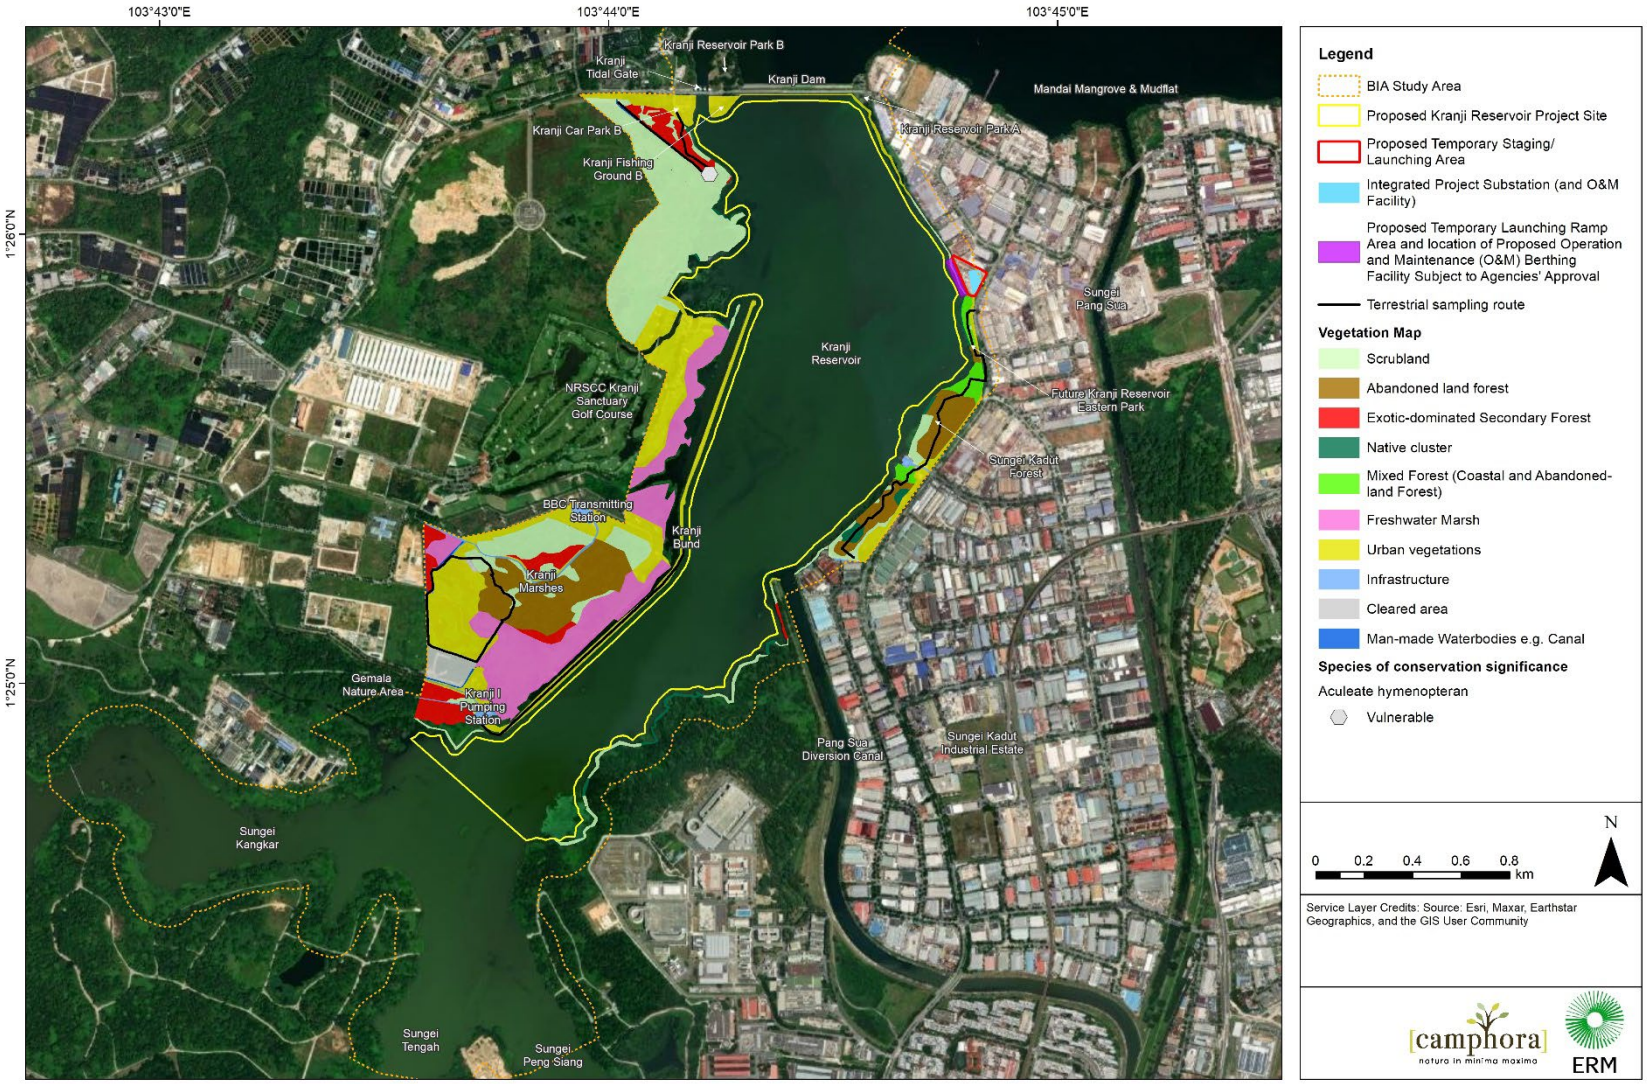

**Figure 3-23: Location of Aculeata Hymenopteran of Conservation Significance**

### 3.4.1.4 Odonates

The field assessment recorded 42 odonate species (*Table 3-6; Appendix D* of this *Appendix 7.1*), including sightings of one species of conservation significance, which is a nighthawker (*Heliaeschna* sp.). The *Heliaeschna* sp. recorded was not identified to species level as it was a female. A male specimen is required for the confirmation. However, the individual observed is likely to be either the nighthawker (*Heliaeschna crassa*) which is nationally critically endangered, or *Heliaeschna idae* that is currently not in Singapore checklist. Females of both species are very similar. In this regard, the individual is identified putatively as nighthawker species.

This species inhabits different habitats present in the BIA Study Area, such as well-vegetated open ponds, marshes and shady shallow forest pools (Tang et al., 2010). Records of the nationally critically endangered, restricted and very rare Nighthawker at the Kranji Marshes (T02; *Figure 3-24*) is a significant finding as all previous records are from Central Catchment Nature Reserve (Tang et al., 2010). Therefore, this finding represents a large distribution extension locally.

Surveys along the reservoir edge (T03, B01 and B02) yielded fewer species, likely owing to these areas being relatively homogenous open, sunny habitats that are generally dominated by species such as the blue sprite (*Pseudagrion microcephalum*), and common scarlet (*Crocothemis servilia*). In contrast, T01, T02 and T04 are located inland, comprising a forested patch with shrubs along a canal, a wetland, and a young secondary forest, respectively. The increased habitat heterogeneity and structural complexity are likely more conducive for both visiting and breeding odonates, encompassing open ponds and marsh species like the Uncommon blue adjutant (*Aethriamanta aethra*), as well as those that prefer shady forests such as the rare red-tailed sprite, striped grenadier and lesser nighthawker.

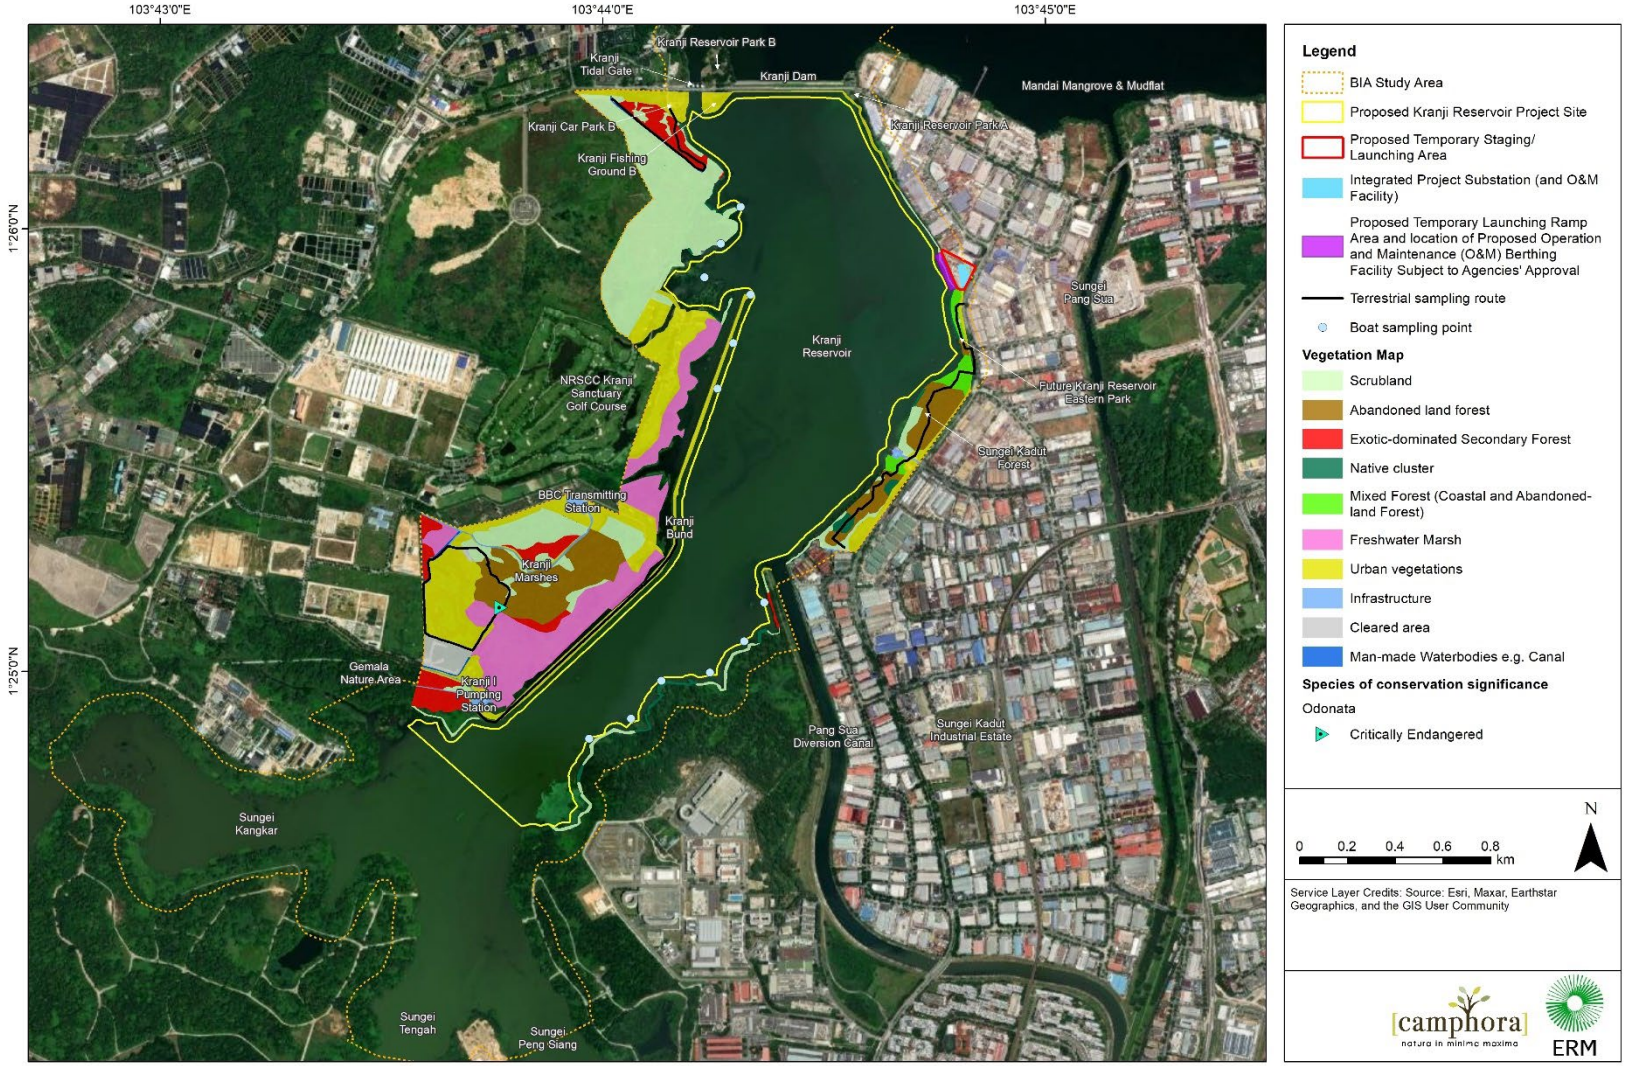

**Figure 3-24: Location of Odonate Species of Conservation Significance**

### 3.4.1.5 Butterflies

The field assessment recorded 91 species, of which two are of conservation significance. The nationally Endangered great swift (*Pelopidas assamensis*) was recorded once in the urban vegetation of the Kranji Marshes (T02; *Figure 3-25*). This species can be found in urban parks, gardens, forests and in coastal and mangrove habitats (Khew, 2015). The nationally Vulnerable spotted grass dart (*Taractrocera ardonia lamia*) was recorded once within the scrubland in the Carpark B forest (T01; *Figure 3-25*). It has been spotted along the fringes of nature reserves (Khew, 2020). The remaining recorded species are all common or moderately common except for 18 moderately rare species, such as the Full Stop Swift (*Caltoris cormasa*), Colonel (*Pandita sinope sinope*) and Common Redeye (*Matapa aria*).

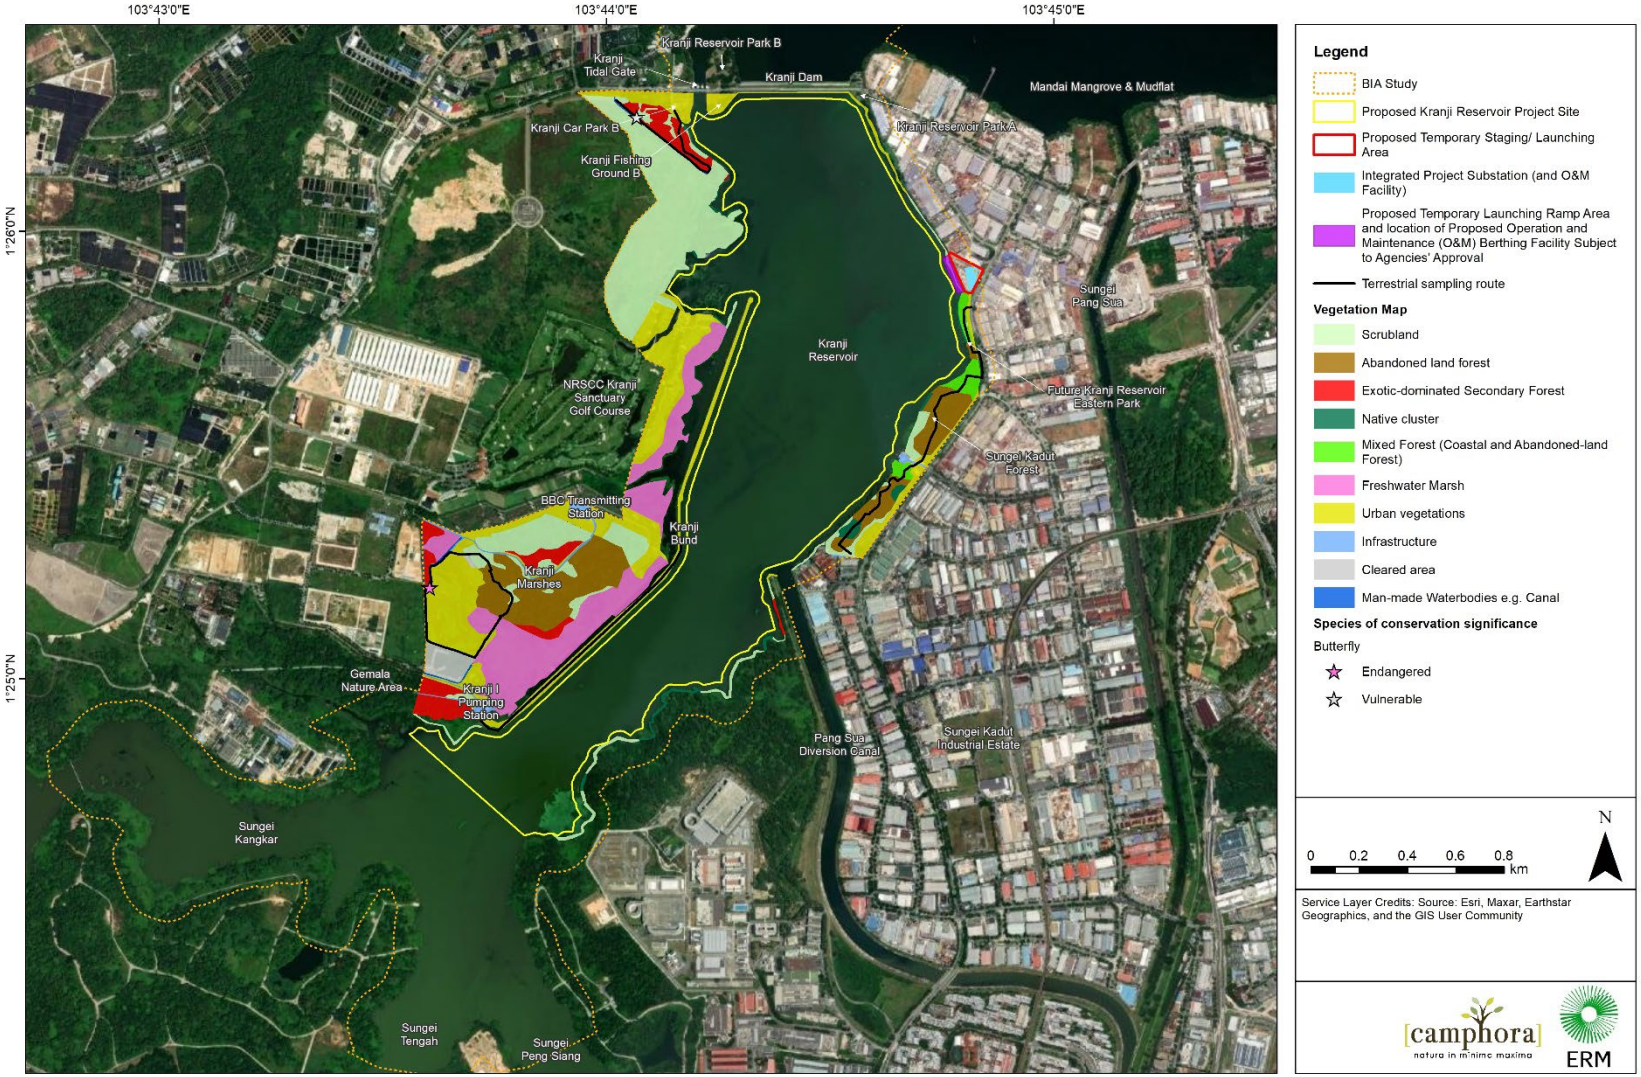

**Figure 3-25: Location of Butterfly Species of Conservation Significance**

### 3.4.1.6 Amphibians

The field assessment recorded 13 species, nine are native and the remaining four are non-native. All are locally widespread and common except the non-native East Asian ornate chorus frog (*Microhyla mukhlesuri*), non-native Guenther's frog (*Sylvirana guentheri*), and the native copper-cheeked Frog (*Chalcorana labialis*) which is restricted but common. The copper-cheeked frog that was observed at the Carpark B forest (T01) and Kranji Marshes (T02) is restricted to Central Catchment Nature Reserve, Western Catchment and Pulau Tekong where it inhabits streams and swamps in primary and secondary forests (Baker & Lim, 2012). No species of conservation significance were recorded.

Most of the recorded species are highly tolerant of disturbance and often found near or in human habitats, except for the copper-cheeked frog and Malayan Giant Frog (*Limnonectes blythii*) (recorded at T01, T02 and T04) which occur along streams in forests and scrubland (Baker & Lim, 2012) such as those present in the BIA Study Area.

Along the reservoir edge, only the Guenther's frog and green paddy frog (*Hylarana erythraea*) were observed.

### 3.4.1.7 Reptiles

The field assessment recorded 33 reptile species (*Table 3-6; Appendix D* of this *Appendix 7.1*), including three of conservation significance, the Asian softshell turtle (*Amyda cartilaginea*) which is globally Vulnerable and Nationally Endangered, recorded at T03. The nationally Vulnerable, red-tailed pipe snake (*Cylindrophis ruffus*) and globally Vulnerable Malayan box terrapin (*Cuora amboinensis)*. The Red-tailed Pipe Snake was recorded in Kranji Marshes near NSRCC (T02) and Malayan box terrapin within Carpark B forest (T01), Kranji Marshes (T02) and Kranji Bund (T03) as shown in *Figure 3-26*. The most significant finding is the red-tailed pipe snake whereby two agonistic individuals were observed (via camera trap). It is a widespread but rare species inhabiting swampy habitats, and is known from SBWR.

Of the recorded species, 24 are native and nine are non-native. The former comprises 17 species that are locally widespread and common. Two native species that are widespread but rare are the mourning gecko (*Lepidodactylus lugubris*) and red-tailed pipe snake. Additionally, there is the widespread but uncommon green-crested lizard (*Bronchocela cristatella*), restricted and rare lowland dwarf gecko, and the restricted and uncommon Asian softshell turtle. One individual of the Asian softshell turtle was recorded at the enclosed pond adjacent to the Kranji bund.

Within Kranji Reservoir, there appears to be higher sightings of the Malayan water monitor (*Varanus salvator*) within the Reservoir Project Site, as compared to the area south of the Project Site (*Figure 3-27*). However, this could be due to the lower visibility resulting from the extensive floating macrophytes in the southern reservoir areas when surveys were conducted.

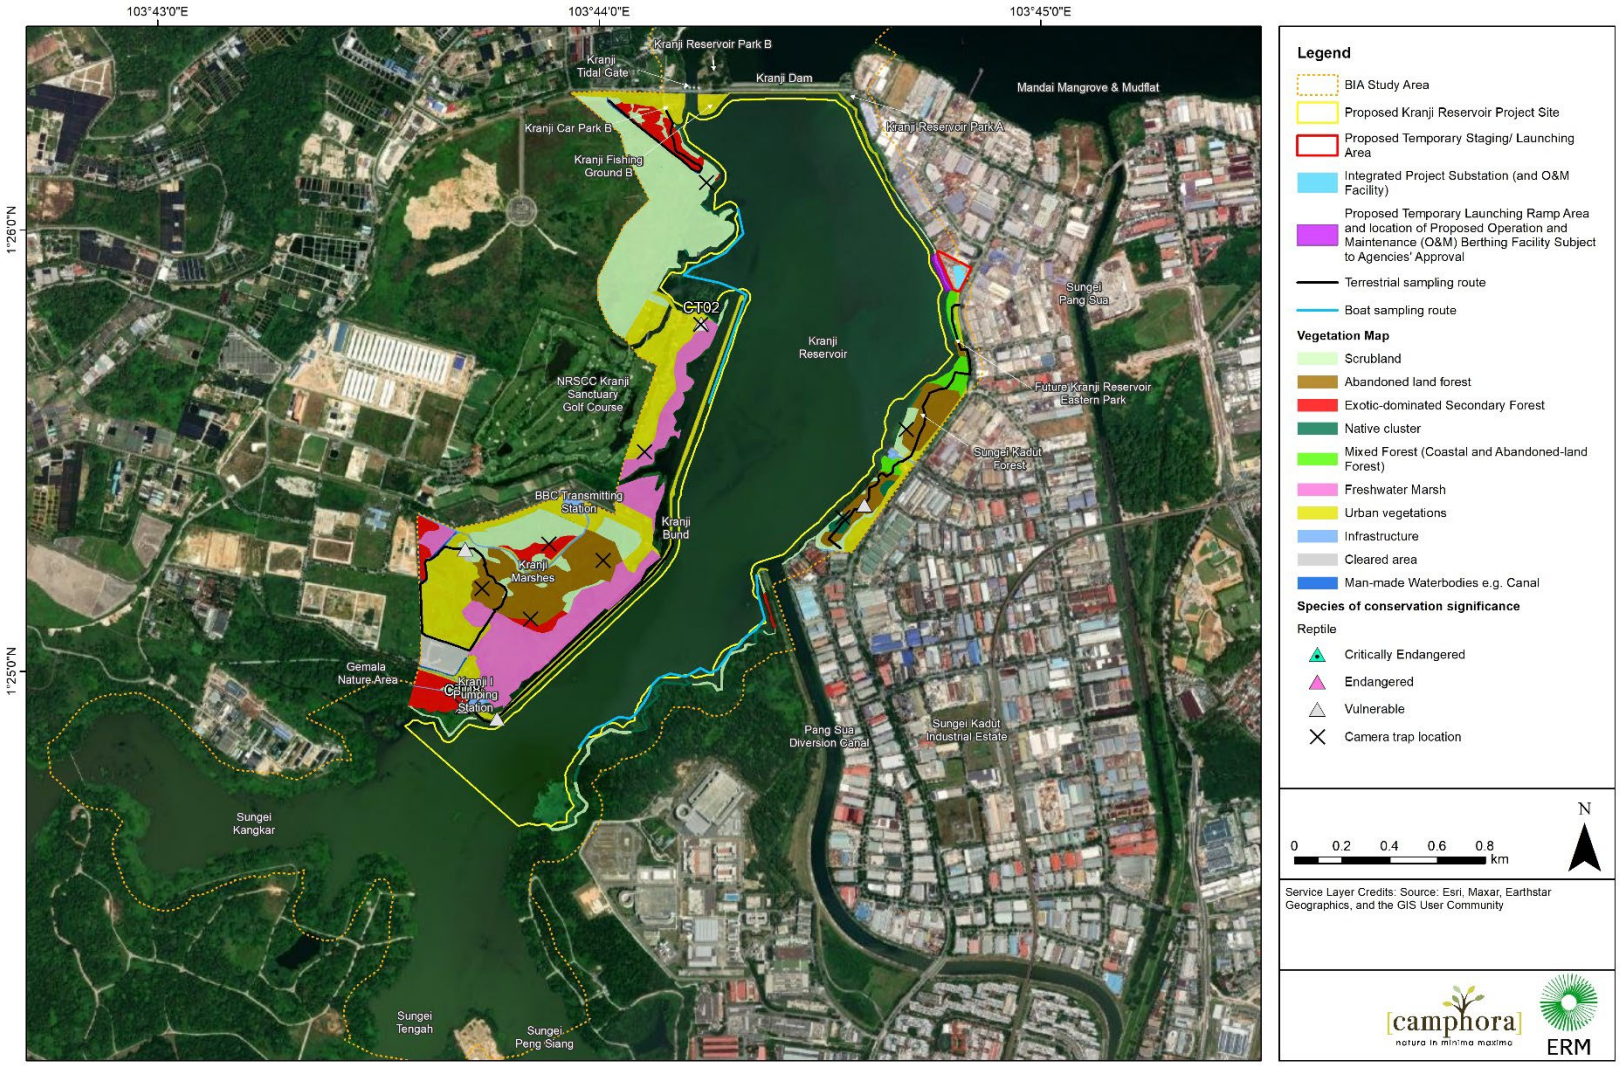

**Figure 3-26: Location of Reptilian Species of Conservation Significance**

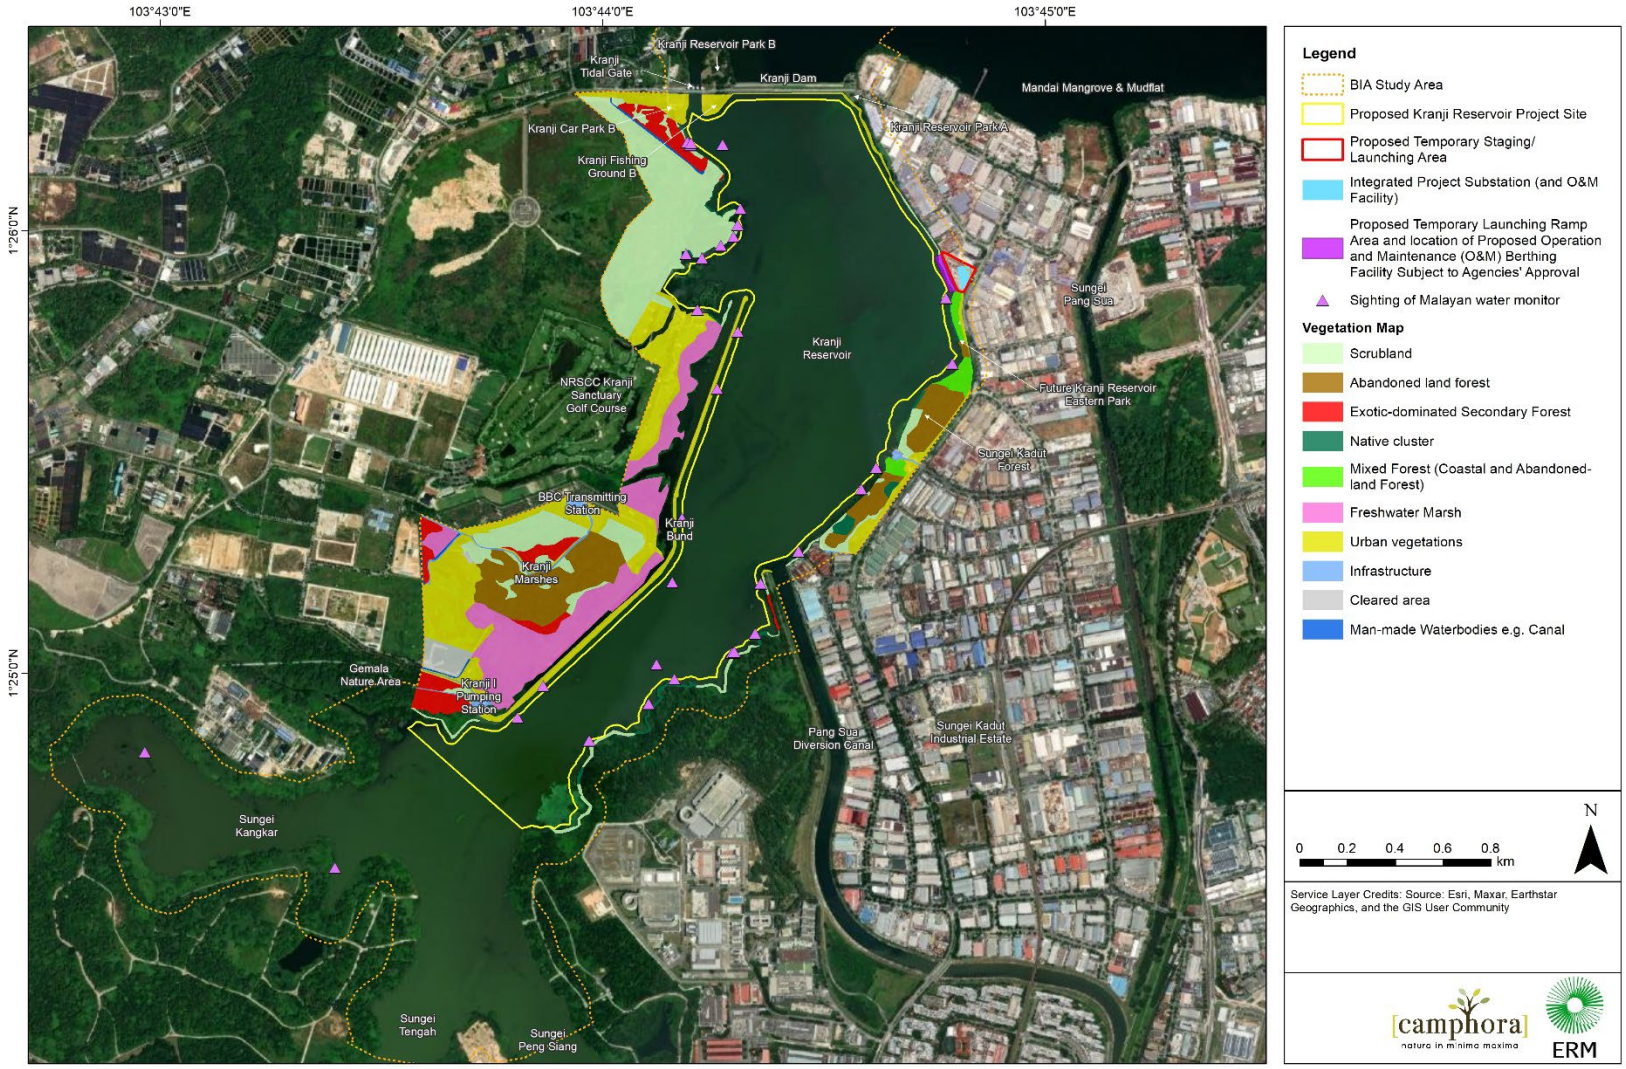

**Figure 3-27: Sighting of Malayan Water Monitor (*Varanus salvator*) in Kranji Reservoir**

### 3.4.1.8 Birds

The field assessment recorded 155 species, of which 86 are native resident breeders, 19 are introduced species, and 46 are migrants/visitors (*Table 3-6*; Appendix D of this *Appendix 7.1*). Four species are only identifiable to genus level and are thus not classified by its native status. They are: a swiftlet *Aerodramus* sp., a harrier *Circus* sp., a pratincole *Glareola* sp. and a Paradise Flycatcher *Terpsiphone* sp. Multiple roosts and nests are located along the reservoir edge and at SBWR. Most notable is a communal roost of Nationally Endangered black-crowned night heron. This is discussed further under Bird Density in *Section 3.4.2.2.*

Five rare and 15 rare and uncommon migrant/visitor species were recorded (*Table 3-8*). Rarity status of species are taken from checklist of the birds of Singapore (Nature Society Singapore, 2021).

**Table 3-8: Status of the Migrant Species Recorded**

| Common Name | Scientific Name | Global Conservation Status | Rarity Status |
|---|---|---|---|
| **Lesser adjutant** | *Leptoptilos javanicus* | Vulnerable | Rare |
| **Asian openbill** | *Anastomus oscitans* | Least Concern | Rare |
| **Large hawk-cuckoo** | *Hierococcyx sparverioides* | Least Concern | Rare |
| **Gull-billed tern** | *Gelochelidon nilotica* | Least Concern | Rare |
| **Yellow-browed warbler** | *Phylloscopus inornatus* | Least Concern | Rare |
| **Jerdon's baza** | *Aviceda jerdoni* | Least Concern | Uncommon |
| **Common buzzard** | *Buteo buteo* | Least Concern | Uncommon |
| **Black-browed reed warbler** | *Acrocephalus bistrigiceps* | Least Concern | Uncommon |
| **Black-capped kingfisher** | *Halcyon pileata* | Least Concern | Uncommon |
| **Intermediate egret** | *Ardea intermedia* | Least Concern | Uncommon |
| **Javan pond heron** | *Ardeola speciosa* | Least Concern | Uncommon |
| **Little ringed plover** | *Charadrius dubius* | Least Concern | Uncommon |
| **Peregrine falcon** | *Falco peregrinus* | Least Concern | Uncommon |
| **Whiskered tern** | *Chlidonias hybrida* | Least Concern | Uncommon |
| **Pallas's grasshopper warbler** | *Locustella certhiola* | Least Concern | Uncommon |
| **Yellow-rumped flycatcher** | *Ficedula zanthopygia* | Least Concern | Uncommon |
| **Red-rumped swallow** | *Cecropis daurica* | Least Concern | Uncommon |
| **Blue-winged pitta** | *Pitta moluccensis* | Least Concern | Uncommon |
| **Watercock** | *Gallicrex cinerea* | Least Concern | Uncommon |
| **Wood sandpiper** | *Tringa glareola* | Least Concern | Uncommon |

The breeding ranges of migratory birds lie at the northern latitudes, in countries such as India, China, and Japan. They migrate south during winter to the warmer latitudes. Singapore lies along a major migratory path known as the East Asian-Australasian Flyway, and Singapore receives a high number of migratory species shifting between northern breeding grounds and southern overwintering haunts (Yong et al., 2016). Species such as large hawk-cuckoo and yellow-rumped flycatcher depend on wooded areas in Singapore as wintering grounds. Some of the other species also depend on grassland and wetland habitats such as those present throughout the BIA Study Area.

Thirty-eight species of conservation significance were recorded across the BIA Study Area (*Figure 3-28*). The tall grasses and floating vegetation along the reservoir edge also serves as foraging and resting grounds for multiple waterbirds (*Figure 3-28*). As further elaborated under *Section 3.4.2.1*, raptors were often observed perching on the BBC radio transmission towers adjacent to the reservoir edge.

Of the 38 species of conservation significance recorded, one species is nationally Critically Endangered, 10 are Nationally Endangered and 27 are nationally Vulnerable. The long-tailed parakeet (*Psittacula longicauda*) is considered nationally Near Threatened but globally Vulnerable.

The nationally Critically Endangered Great-billed heron (*Ardea sumatrana*) was only recorded once along T02 that is within Kranji Marshes.

Eight Nationally Endangered species were recorded. The black-crowned night heron (*Nycticorax nycticorax*) was only recorded along the boat sampling routes (B01 and B02). It was also recorded from the vantage point surveys, see *Section 3.4.2.2*. The little tern (*Sternula albifrons*) and little-winged tern (*Chlidonias leucopterus*) was only observed flying in the Kranji Reservoir from the Kranji bund (T03). The watercock (*Gallicrex cinerea*) was only observed once from the Kranji bund (T03). The common moorhen (*Gallinula chloropus*), lesser whistling duck (*Dendrocygna javanica*) and wood sandpiper (*Tringa glareola*) were only observed from the Kranji Marshes (T02). The purple heron was observed frequently and along all terrestrial (T01–T04) and boat (B01–B02) sampling routes.

The straw-headed bulbul (*Pycnonotus zeylanicus*) is listed as Nationally Endangered although its population appears to be growing more stable in Singapore. However, it is regarded as a globally Critically Endangered species due to its melodious and attractive songs, making it highly sought-after for the songbird trade. This has resulted in its extirpation throughout much of its range and making it necessary to list it as a CITES-protected species. Furthermore, it is also threatened by loss of forest habitat. Its global conservation status was recently revised in 2018 from Endangered to Critically Endangered as populations have been declining extremely rapidly (BirdLife International, 2018). According to Yong et al. (2017), the estimated population size in Singapore is slightly over 200 birds, possibly making up one-third of the global population (Neo, 2016). However, in Singapore, habitat loss to development remains a primary threat to species. There were 54 records of the straw-headed bulbul during the field assessment, and they were recorded along all the terrestrial sampling routes. This species occurs in secondary forests and forest edge along water bodies such as reservoirs, hence the BIA Study Area is a suitable habitat. They were also seen and heard along both of the boat sampling routes.

Twenty-seven nationally Vulnerable species were recorded. Frequently observed along all, if not most of, terrestrial and boat sampling routes, include raptors such as the changeable hawk-eagle (*Nisaetus cirrhatus*), grey-headed fish eagle (*Haliaeetus ichthyaetus*) and black-winged kite (*Elanus caeruleus*); waterbirds such as the yellow bittern (*Ixobrychus sinensis*) and great egret (*Ardea alba*); as well as passerine birds such as the oriental reed warbler (*Acrocephalus orientalis*), large-billed crow (*Corvus macrorhynchos*), Swinhoe's white-eye (*Zosterops simplex*), oriental magpie-robin (*Copsychus saularis*), baya weaver (*Ploceus philippinus*), zitting cisticola (*Cisticola juncidis*) and brown shrike (*Lanius cristatus*). The house swift (*Apus nipalensis*) and plume-toed swiftlet (*Collocalia affinis*) is expected to utilise the entire site although it was only recorded along B01 and T02 transect respectively.

The Eastern cattle egret and spotted wood owl were only seen in the Carpark B forest (T01). The buffy fish owl (*Ketupa ketupu*) is a predator of mainly fish and frogs, therefore it is usually found near reservoirs or rivers. In this field assessment, it was recorded once within the Kranji Marshes (T02) and a possible resident pair twice in the Carpark B forest (T01).

The black-capped kingfisher (*Halcyon pileata*) was only seen once near the waterway within Kranji Marshes (T02), possibly foraging. Up to 200 pacific golden plover (*Pluvialis fulva*) were recorded at an open area within/adjacent to the Kranji Marshes (T02). The white-browed crake (*Poliolimnas cinereus*) was recorded within the Kranji Marshes (T02), Kranji bund (T03) and boat sampling route (B01). This species is associated with wetland habitat which is found along these sampling routes. The cinnamon bittern (*Ixobrychus cinnamomeus*) and lesser adjutant (*Leptoptilos javanicus*) are also wetland-associated species, but were only recorded along the boat sampling route (B01 and B02 respectively). The Eastern yellow wagtail (*Motacilla tschutschensis*) was only seen once perching on the grass within NSRCC golf course from boat sampling route (B01). The common kingfisher (*Alcedo atthis*) was observed along both boat sampling routes, as well as within the Carpark B forest (T01) and Sungei Kadut forest (T04).

The common sandpiper was observed along the Kranji bund (T03 and B01). The chestnut munia is associated with grassland habitat, and were recorded within Kranji Marshes (T02) and reservoir edge (B01). The common redshank (*Tringa totanus*) was only seen incidentally during vantage point surveys at VP06. This species is restricted to mudflats, hence not observed on the terrestrial or boat sampling routes.

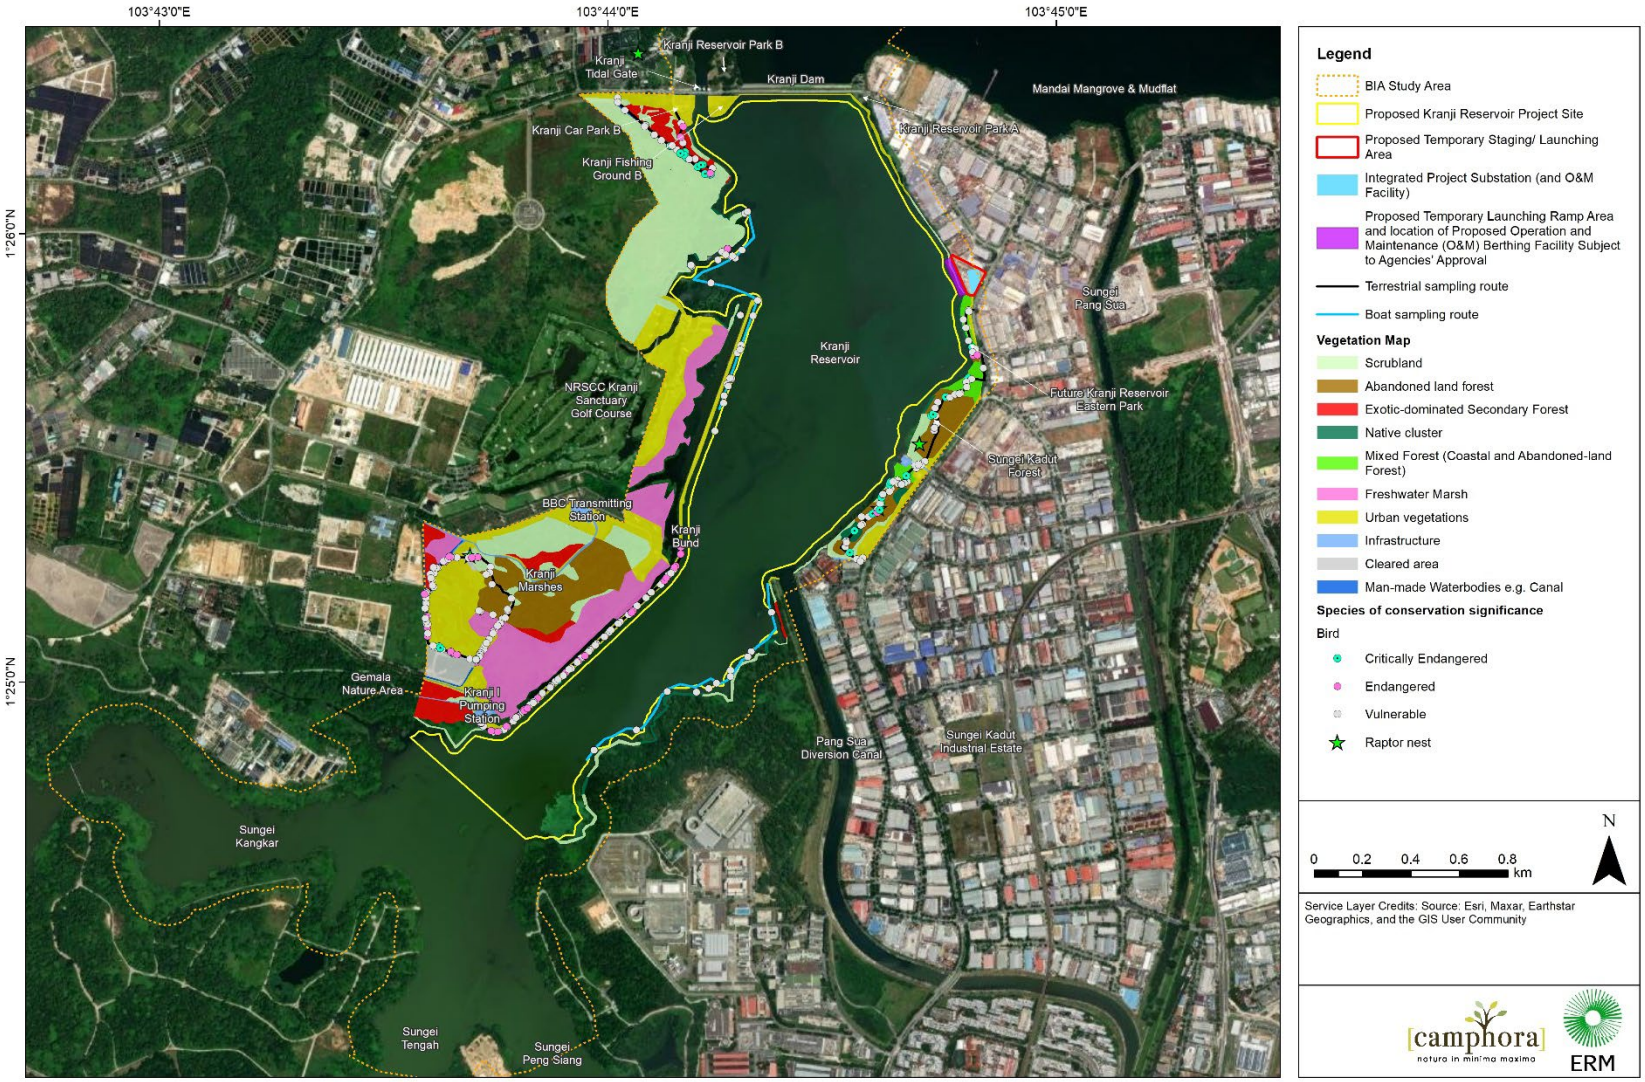

**Figure 3-28: Location of Bird Species of Conservation Significance**

### *3.4.1.9 Non-volant Mammals*

A total of nine species were recorded in the field assessment, of which two are of conservation significance, the Nationally Endangered smooth-coated otter (*Lutrogale perspicillata*) and globally Endangered long-tailed macaque (*Macaca fascicularis*) (*Table 3-6*; *Appendix D* of this *Appendix 7.1*). All species recorded are considered widespread and common in Singapore with the exception of the smooth-coated otter which is rare and the Common palm civet (*Paradoxurus musangus*) that is uncommon.

Besides being Nationally Endangered, the smooth-coated otter recorded is also globally Vulnerable. There were night records of otters within the BIA Study Area (*Figure 3-30*) from December 2020 to July 2021, including one record of an individual on camera trap CT04 that is located near Kranji Marshes (*Figure 3-29*). Seven to eight otters were seen once on the reservoirs western bank while six otters were observed once on the reservoirs eastern bank. The other records were of one or two individuals. No holts were found. Two families of otters are known in the environs of the BIA Study Area (Khoo & Sivasothi, 2018). This species is known to be urban-adaptable and tolerant of humans (Khoo & Lee, 2020). They are able to exploit a wide variety of habitats, including mangroves, coasts, reservoirs, rivers and canals (Khoo & Sivasothi, 2018). Two long-tailed macaques were recorded at the Carpark B forest (T01; *Figure 3-30*).

The common palm civet was sighted at the Carpark B forest (T01), Kranji Marshes (T02) and Sungei Kadut forest (T04). Its scat was also recorded throughout the BIA Study Area. This species can be found inhabiting forests and scrublands (Baker & Lim, 2012) which are prevalent throughout T02 and T04.

A total of 727 trap-nights was recorded for camera traps with each trap having at least 60 days of surveying. Nine mammalian species were documented on camera traps and are summarised in *Table 3-9* below. Wild pigs were recorded across all camera traps.

**Figure 3-29: Smooth-coated Otter Sighted on Camera Trap CT04**

**Table 3-9: List of Mammalian Species Recorded on Camera Traps**

| Common name | Species | Global conservation status | National conservation status | Habitat observed | Locations |
|---|---|---|---|---|---|
| Wild pig | *Sus scrofa* | LC | LC | Abandoned-land forest, scrubland, exotic-dominated secondary forest, freshwater marsh, urban vegetation | CT01–CT08 (all) |
| Plantain squirrel | *Callosciurus notatus* | LC | LC | Abandoned-land forest, scrubland, exotic-dominated secondary forest, freshwater marsh, urban vegetation, native cluster | CT01, CT03, CT04, CT05, CT07, CT08, CT10 |
| Rat | *Rattus* sp. | N.A | N.A | Urban vegetation, freshwater marsh, exotic-dominated secondary forest, abandoned-land forest, native cluster | CT02, CT03, CT05, CT07–CT10 |
| Common treeshrew | *Tupaia glis* | LC | LC | Urban vegetation, freshwater marsh, abandoned-land forest, exotic-dominated secondary forest, scrubland | CT02–CT04, CT06–CT09 |
| Long-tailed macaque | *Macaca fascicularis* | EN | LC | Urban vegetation, freshwater marsh, abandoned-land forest, exotic-dominated secondary forest | CT02, CT07, CT08 |
| Feral dog | *Canis lupus familiaris* | Not Assessed | Not Assessed | Abandoned-land forest, scrubland, native cluster | CT04, CT09, CT10 |
| Smooth-coated otter | *Lutrogale perspicillata* | VU | EN | Abandoned-land forest | CT04 |
| House shrew | *Suncus murinus* | LC | LC | Exotic-dominated secondary forest | CT08 |
| Common palm civet | *Paradoxurus musangus* | LC | LC | Urban vegetation, freshwater marsh | CT03 |

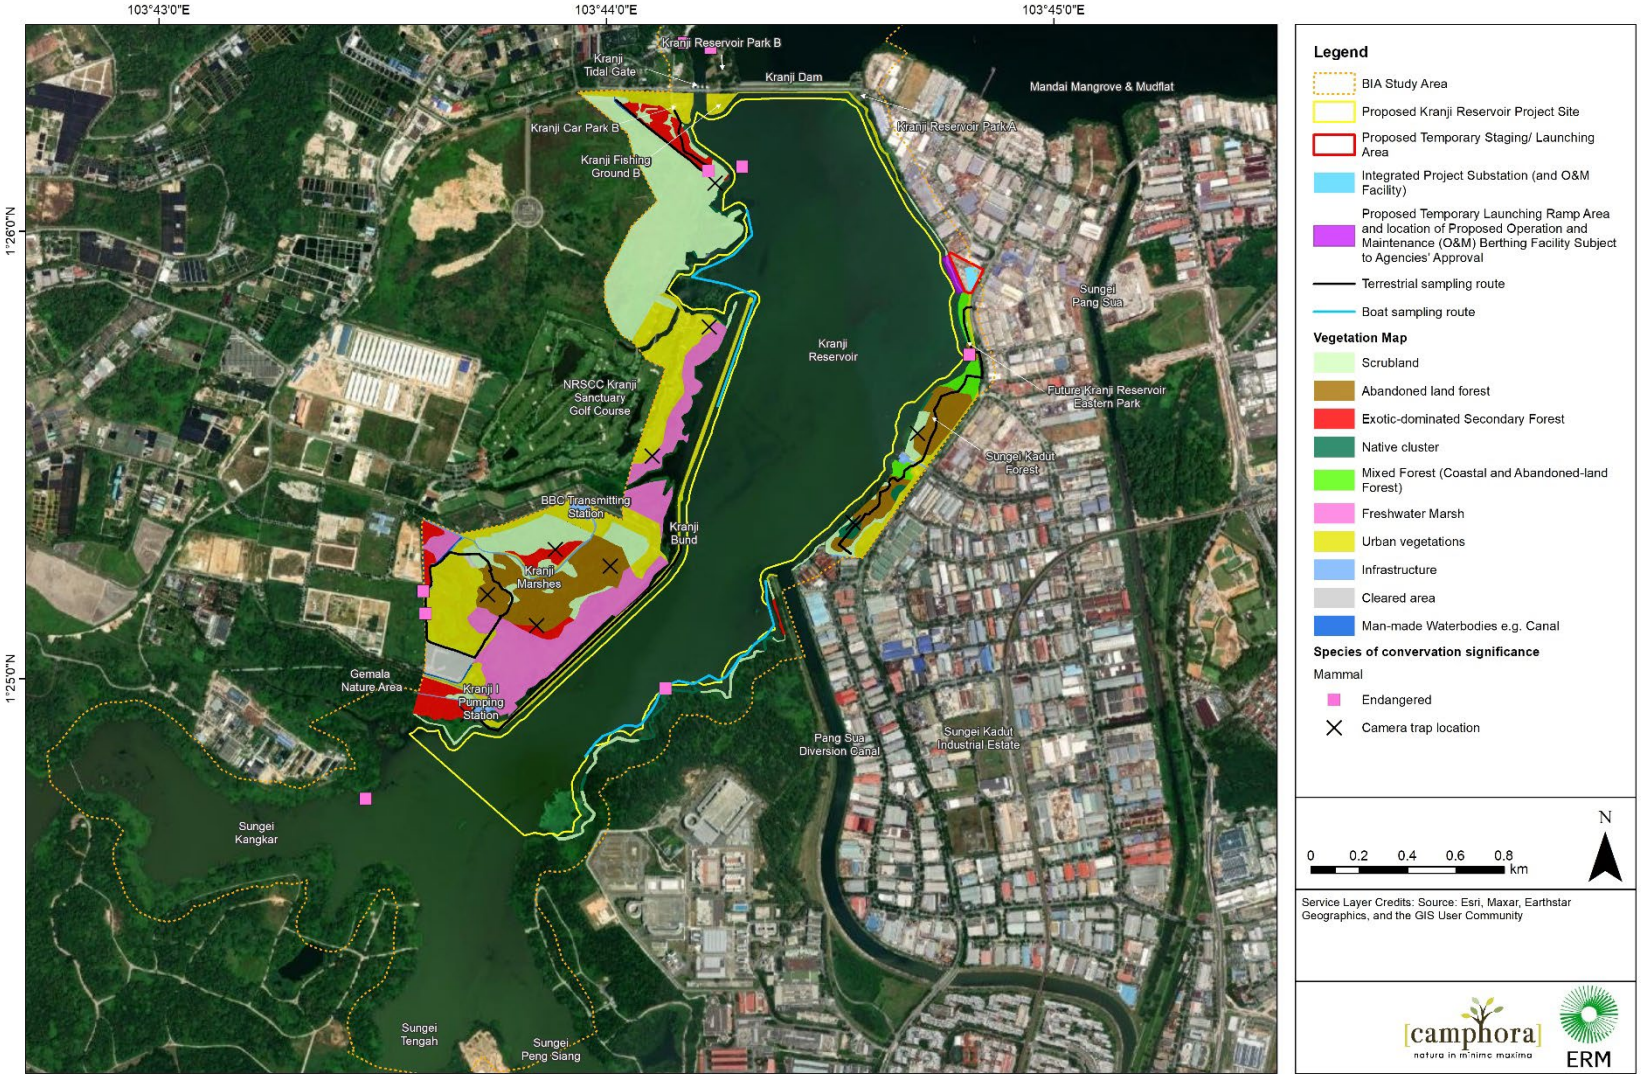

**Figure 3-30: Location of Mammalian Species of Conservation Significance**

#### 3.4.1.10 Bats

Overall, nine species were recorded in the land-based surveys within the BIA Study Area. One species of conservation significance, the Vulnerable bamboo bat (*Tylonycteris* sp.) was recorded on stationary bat detectors. All recorded species are native. The bat diversity was dominated by Asiatic lesser yellow house bat (*Scotophilus kuhlii*) which were recorded across all transects while the Black-bearded tomb bat had the least number of records. The water edge on the western side of the reservoir (T03) was dominated by Horsfield's bat and whiskered myotis (*Myotis muricola*), most likely due to their habitat preference of foraging for insects from surface of water bodies (Baker & Lim 2012). Most are widespread and common or uncommon species. Six bamboos were recorded in the BIA Study Area (*Section 3.3.4*). No bamboo bats were detected visually or acoustically from roost emergence surveys, i.e., roosting of bats in bamboos were not observed. However, its presence was detected acoustically on stationary bat detectors (BAT5 and BAT6) located in Sungei Kadut forest.

### 3.4.2 Reservoir

#### 3.4.2.1 Bird Usage

**Sampling Effort**

The total number of observation hours ranges from 48.25 to 54 hours across the six vantage points. The breakdown of hours between migratory and non-migratory season is presented in *Table 3-10*, and across the four sampling sessions in *Table 3-11*. The full data from vantage point surveys is presented in *Appendix G* of this *Appendix 7.1*.

**Table 3-10: Number of Observation Hours Across Migratory and Non-migratory Season**

| VP | Number of observation hours (Oct 2020 to Mar 2022) | | |
|---|---|---|---|
| | Total | Migratory season (Sep to Feb) | Non-migratory season (Mar to Aug) |
| **VP01** | 53 | 35 | 18 |
| **VP02** | 54 | 36 | 18 |
| **VP03** | 48.25 | 34.5 | 13.75 |
| **VP04** | 52.75 | 37 | 15.75 |
| **VP05** | 51.5 | 32 | 19.5 |
| **VP06** | 53.5 | 36 | 17.5 |
| **Total** | 313 | 210.5 | 102.5 |

**Table 3-11: Number of Observation Hours by Sampling Sessions**

| VP | Number of observation hours (Oct 2020 to Mar 2022) | | | | |
|---|---|---|---|---|---|
| | Total | Session A (0700–1000 h) | Session B (1000–1300 h) | Session C (1300–1600 h) | Session D (1600–1900 h) |
| VP01 | 53 | 15 | 12 | 12 | 14 |
| VP02 | 54 | 15 | 12 | 12 | 15 |
| VP03 | 48.25 | 12.5 | 9 | 12 | 14.75 |
| VP04 | 52.75 | 15 | 11.75 | 11 | 15 |

| VP | Number of observation hours (Oct 2020 to Mar 2022) | | | | |
|---|---|---|---|---|---|
| | Total | Session A (0700–1000 h) | Session B (1000–1300 h) | Session C (1300–1600 h) | Session D (1600–1900 h) |
| VP05 | 51.5 | 14.25 | 12 | 11.5 | 13.75 |
| VP06 | 53.5 | 14.5 | 12 | 11.5 | 15.5 |
| Total | 313 | 86.25 | 68.75 | 70 | 88 |

## Overall Usage

Overall, 2,282 foraging events were recorded across all 16 focal species. The highest number of foraging events was recorded for the little tern (*Sternula albifrons;* n=1,282*),* followed by the family Ardeidae (n=507) and other terns (*Chlidonias* spp. and unidentified Laridae; n=301). The number of foraging events for each focal species is presented in *Table 3-12*. Within the Reservoir Project Site, 793 foraging events were observed across VP01–VP03.

VP surveys recorded 35.4 foraging events per hour over the 332.7 ha of the VP survey area over the Kranji Reservoir for all focal species combined, equivalent to 0.1 foraging events per hectare per hour over this area. Within Reservoir Project Site, VP surveys recorded 12.8 foraging events, equivalent to 0.06 foraging events per hectare per hour. This is considered a very low level of foraging across the VP survey area. Further analysis indicates the majority of these foraging events were attributable to little tern (nationally EN) (23 foraging events per hour). Low foraging activity was recorded for white-bellied sea eagle, grey-headed fish eagle, purple heron, other ardeids and other terns in the VP survey area.

Three areas of high usage were identified – i) SBWR, ii) in front of the BBC radio transmission towers and Kranji bund and iii) the south-eastern part of the reservoir (*Figure 3-31*). At SBWR, the usage was contributed largely by little terns and other ardeids. Usage in front of the BBC radio transmission towers and south-eastern part of the reservoir were contributed by little terns. The southern part of the reservoir that lies outside of the Reservoir Project Site appears well used by focal birds.

Weather conditions were also examined. There were no significant changes in weather conditions during the survey period that may have influenced the data collected.

**Table 3-12: Total No. of Foraging Events for Focal Species**

| Species | National conservation status | Global conservation status | Breeding season | Number |
|---|---|---|---|---|
| Little tern (Sternula albifrons) | EN | LC | May–Sep | 1,282 |
| Other ardeids (Ardea alba, Ardea intermedia, Egretta garzetta, Ardeola spp., Butorides striata, Bubulcus coromandus[(a)], Ixobrychus sinensis[(a)], unidentified Ardeidae) | - | LC | NA | 507 |
| Other terns (Chlidonias hybrida, Chlidonias leucopterus[(b)], and unidentified Laridae) | - | LC | NA | 301 |
| Purple heron | EN | LC | Year-round | 80 |
| White-bellied sea eagle | LC | LC | Year-round | 52 |
| Brahminy kite | LC | LC | Sep–Mar | 10 |
| Western osprey | LC | LC | NA (winter visitor) | 11 |
| Grey heron | LC | LC | Feb–Nov | 4 |
| Grey-headed fish eagle | VU | NT | Jan–Feb, Jul–Oct | 1 |
| | | | **Total** | **2,282** |

*Note:*
*(a) Indicates nationally Vulnerable species; and*
*(b) Indicates Nationally Endangered species.*

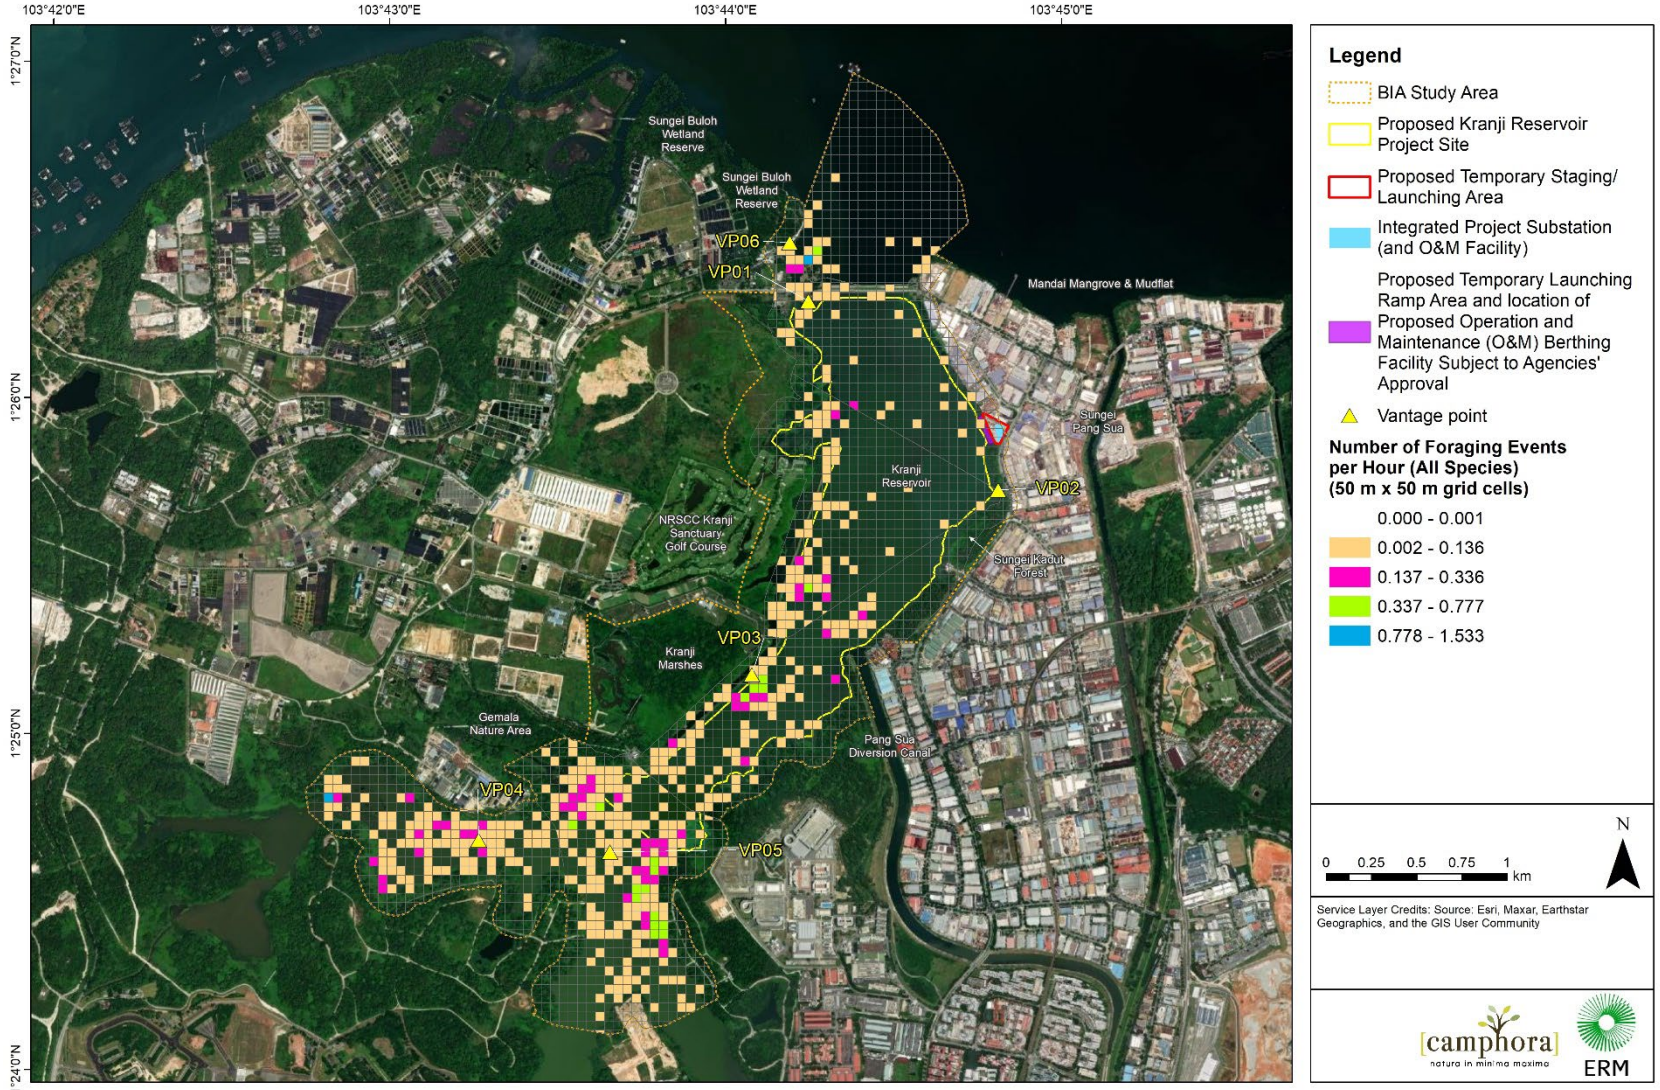

**Figure 3-31: Foraging Locations of All Focal Species**

## Overall Usage in Relation to Migratory and Non-migratory Period

The reservoir was heavily used as a foraging ground during migratory season with spatial usage similar between the migratory and non-migratory season (*Figure 3-32*). This also shows that both migratory and resident species are using similar areas. Usage during the migratory season was largely contributed by migratory species (*Figure 3-33*).

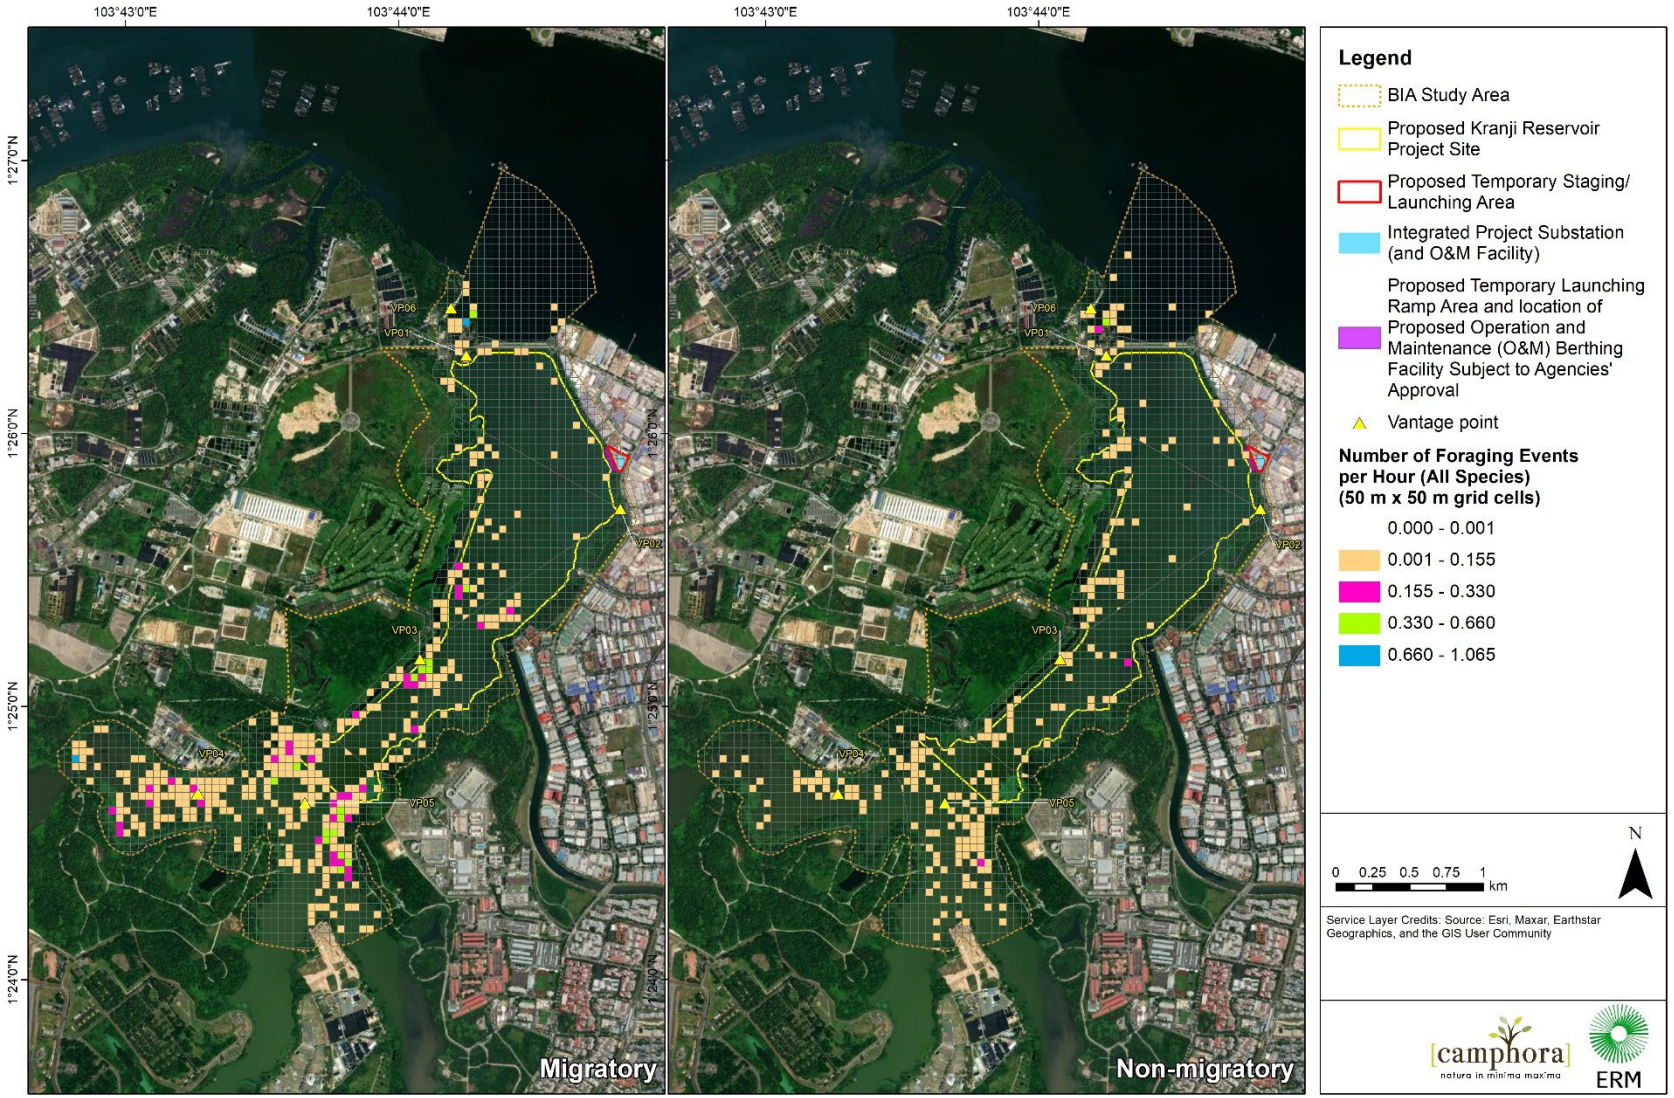

**Figure 3-32: Foraging Locations of All Focal Species During Migratory and Non-migratory Season**

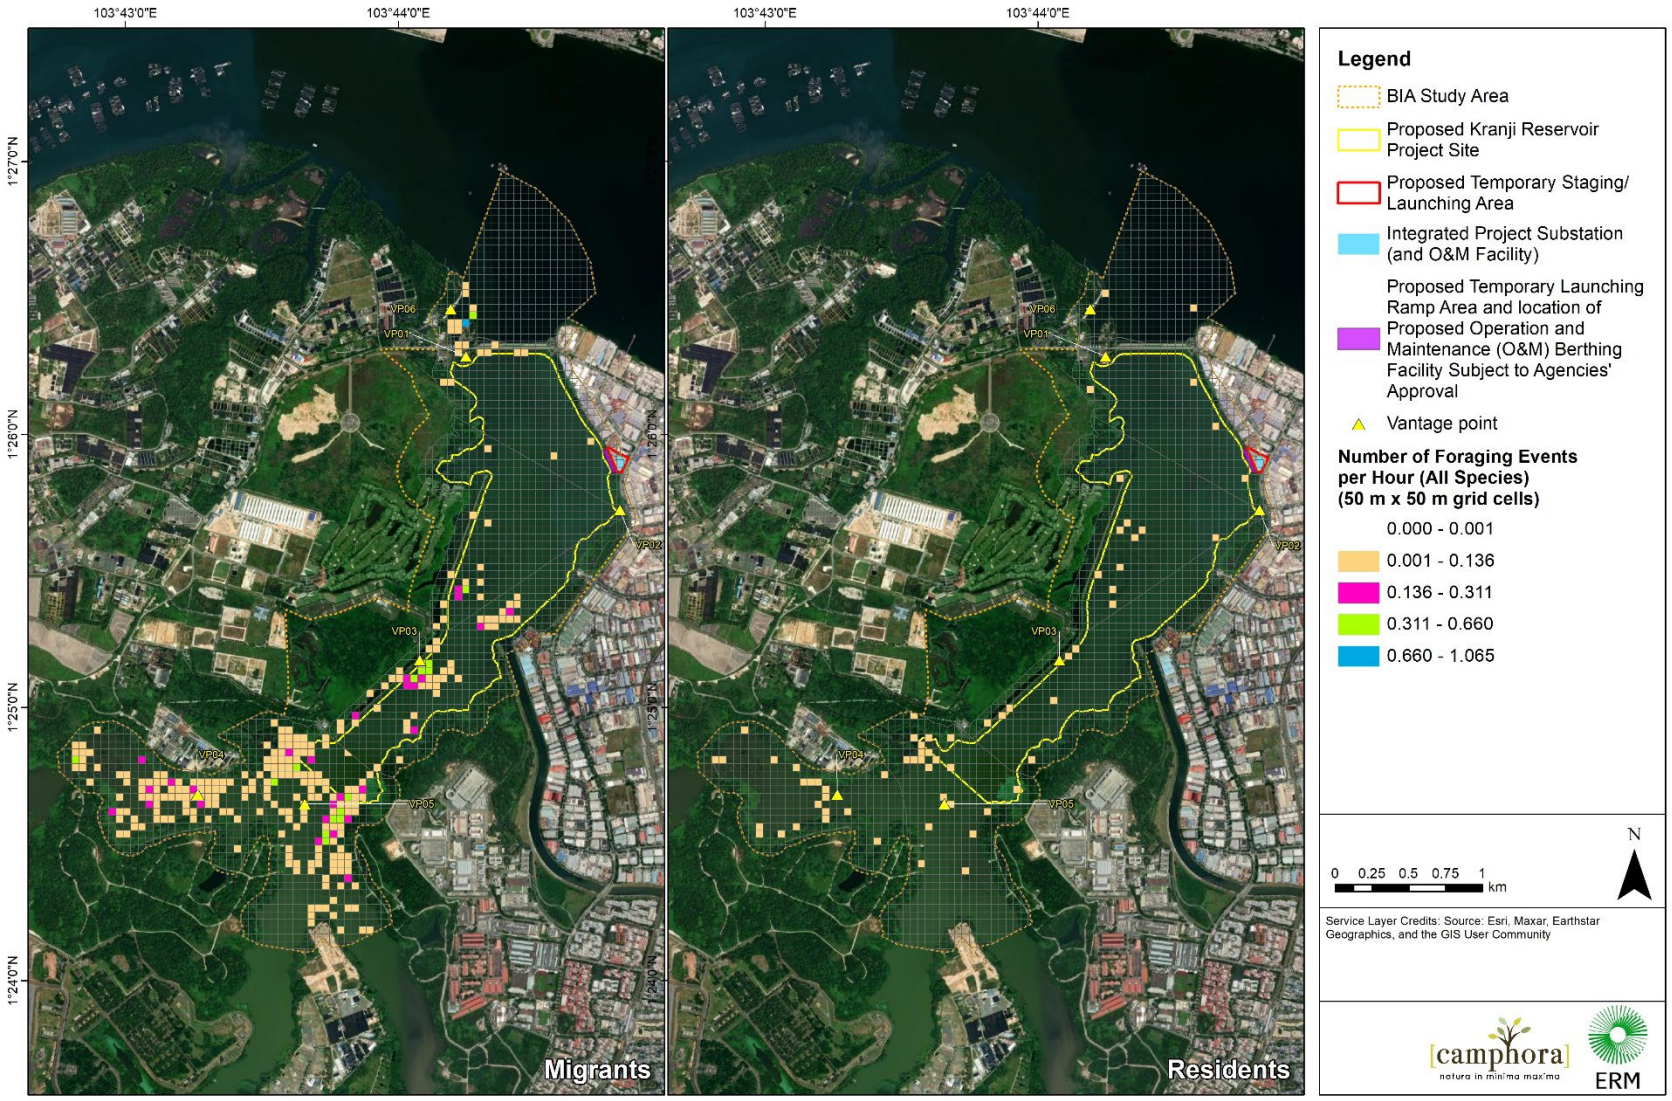

**Figure 3-33: Foraging Locations of Migrants and Residents During Migratory Season**

## Overall Usage in Relation to Tidal Conditions

During rising tides, areas with higher usage by focal species were observed in three areas – i) SBWR, ii) central part of the reservoir near Kranji bund, and iii) south-eastern part of the reservoir (outside of the Reservoir Project Site). A similar pattern was observed during falling tide, although higher usage was not observed in the central part of the reservoir. It is unclear how the tidal conditions are influencing the distribution patterns in the central part of the reservoir.

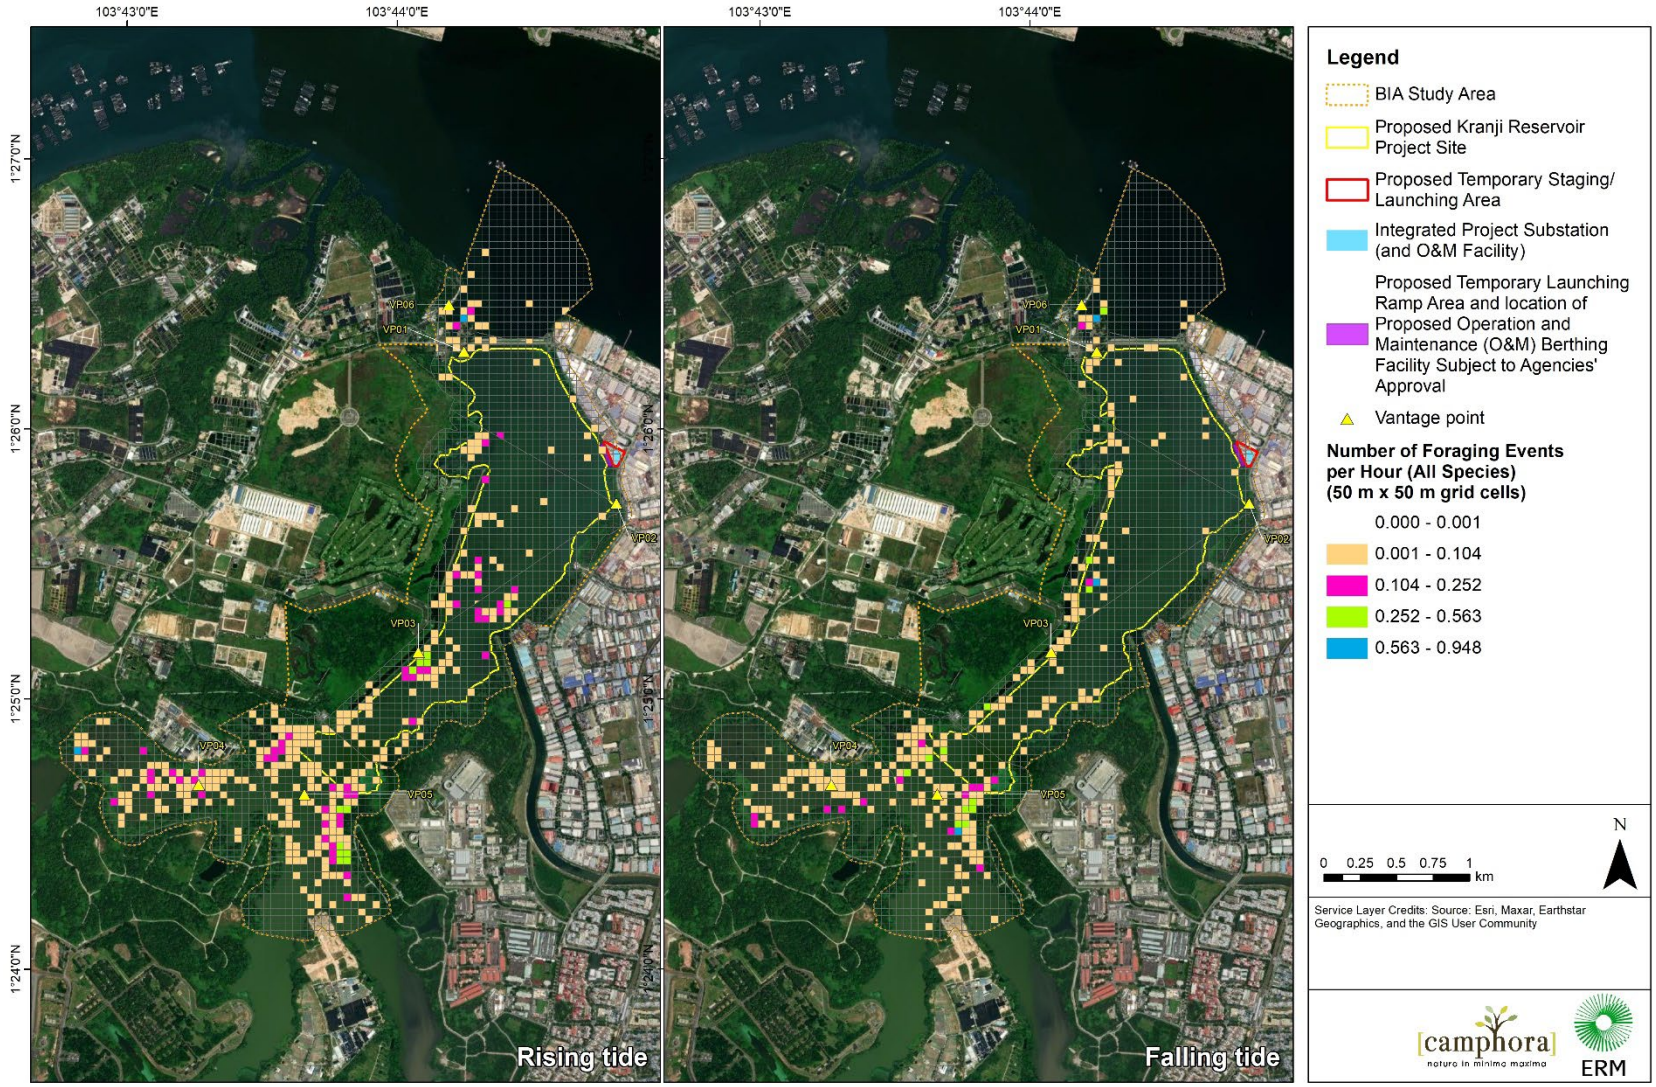

**Figure 3-34: Foraging Locations of All Focal Species During Rising Tide and Falling Tide**

## Overall Usage in Relation to Bathymetry

Areas with higher usage by focal species (i.e., number of foraging events per hour) appear to be related to where vegetation and reservoir interface in shallow waters. The pattern is mainly contributed by Ardeids and Little terns. Ardeids are able to stand and forage in shallower waters, hence this may explain their higher usage in shallower waters. Little terns may be able to fish in shallower waters if these areas provide them with greater visibility of fish for foraging.

## Overall Usage in Relation to Fish Distribution

The relationship between fish distribution and bird foraging was also assessed. There was a poor correlation between bird foraging events and fish biomass (*Figure 3-35)*. Parts of the reservoir could not be surveyed for fish due to dense macrophyte cover preventing boat access.

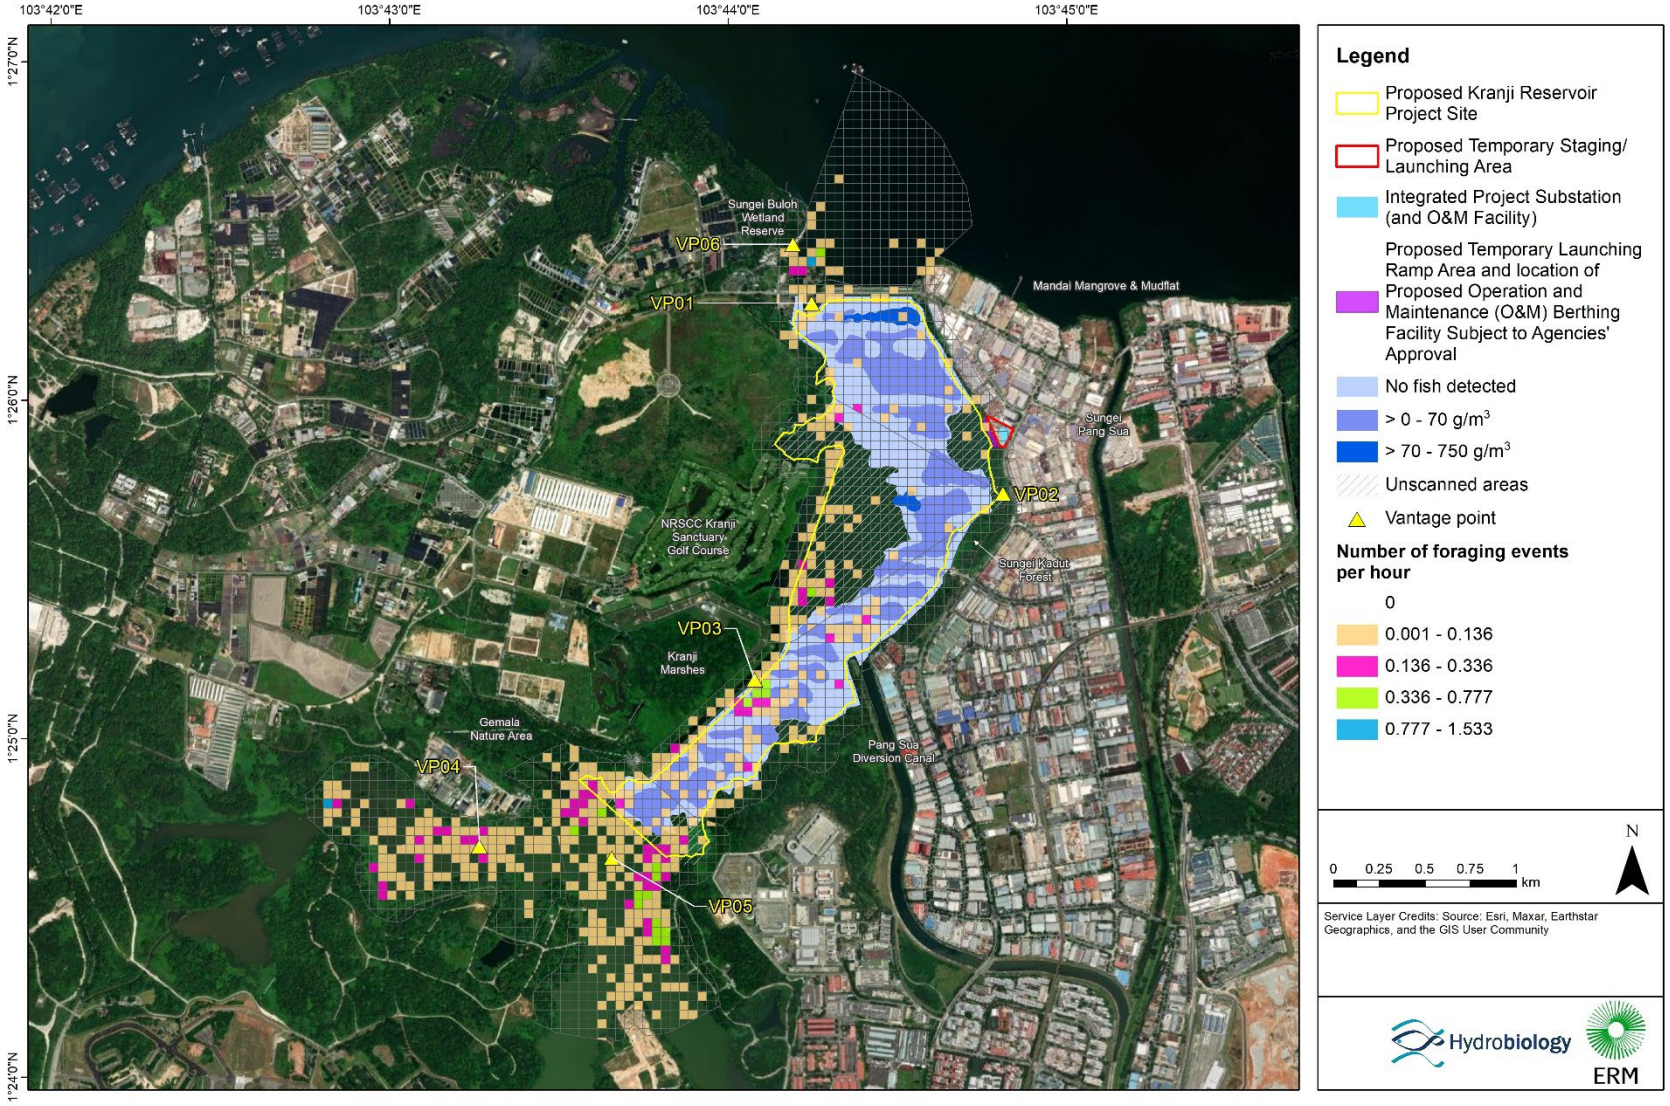

**Figure 3-35: Foraging Locations of All Focal Species in Relation to Fish Biomass Distribution**

## Focal Species

Based on data collected and advice from local and international bird experts, 16 focal species were selected for analysis (see definition of focal species under Vantage Point Surveys in *Section 2.2.2.2*). Aside from the focal species, where possible the activity of other species was documented and marked on a map. Foraging events as well as flight paths were recorded (see *Appendix H*).

### Little Terns (*Sternula albifrons*)

A total of 1,282 foraging events were recorded for the little terns. They mainly foraged in front of the BBC radio transmission towers and south-eastern part of reservoir (outside of the Reservoir Project Site) (*Figure 3-36*). All tern species were observed utilising man-made structures such as railings at the PUB Kranji I Pumping Station, small-scale solar panels on PUB monitoring assets and buoys as perching spots. VP survey area over Kranji Reservoir recorded 23 total foraging events, equivalent to an average of 0.07 foraging events per hectare per hour. Within Reservoir Project Site, VP surveys recorded 10 total foraging events, equivalent to an average of 0.05 foraging events per hectare per hour.

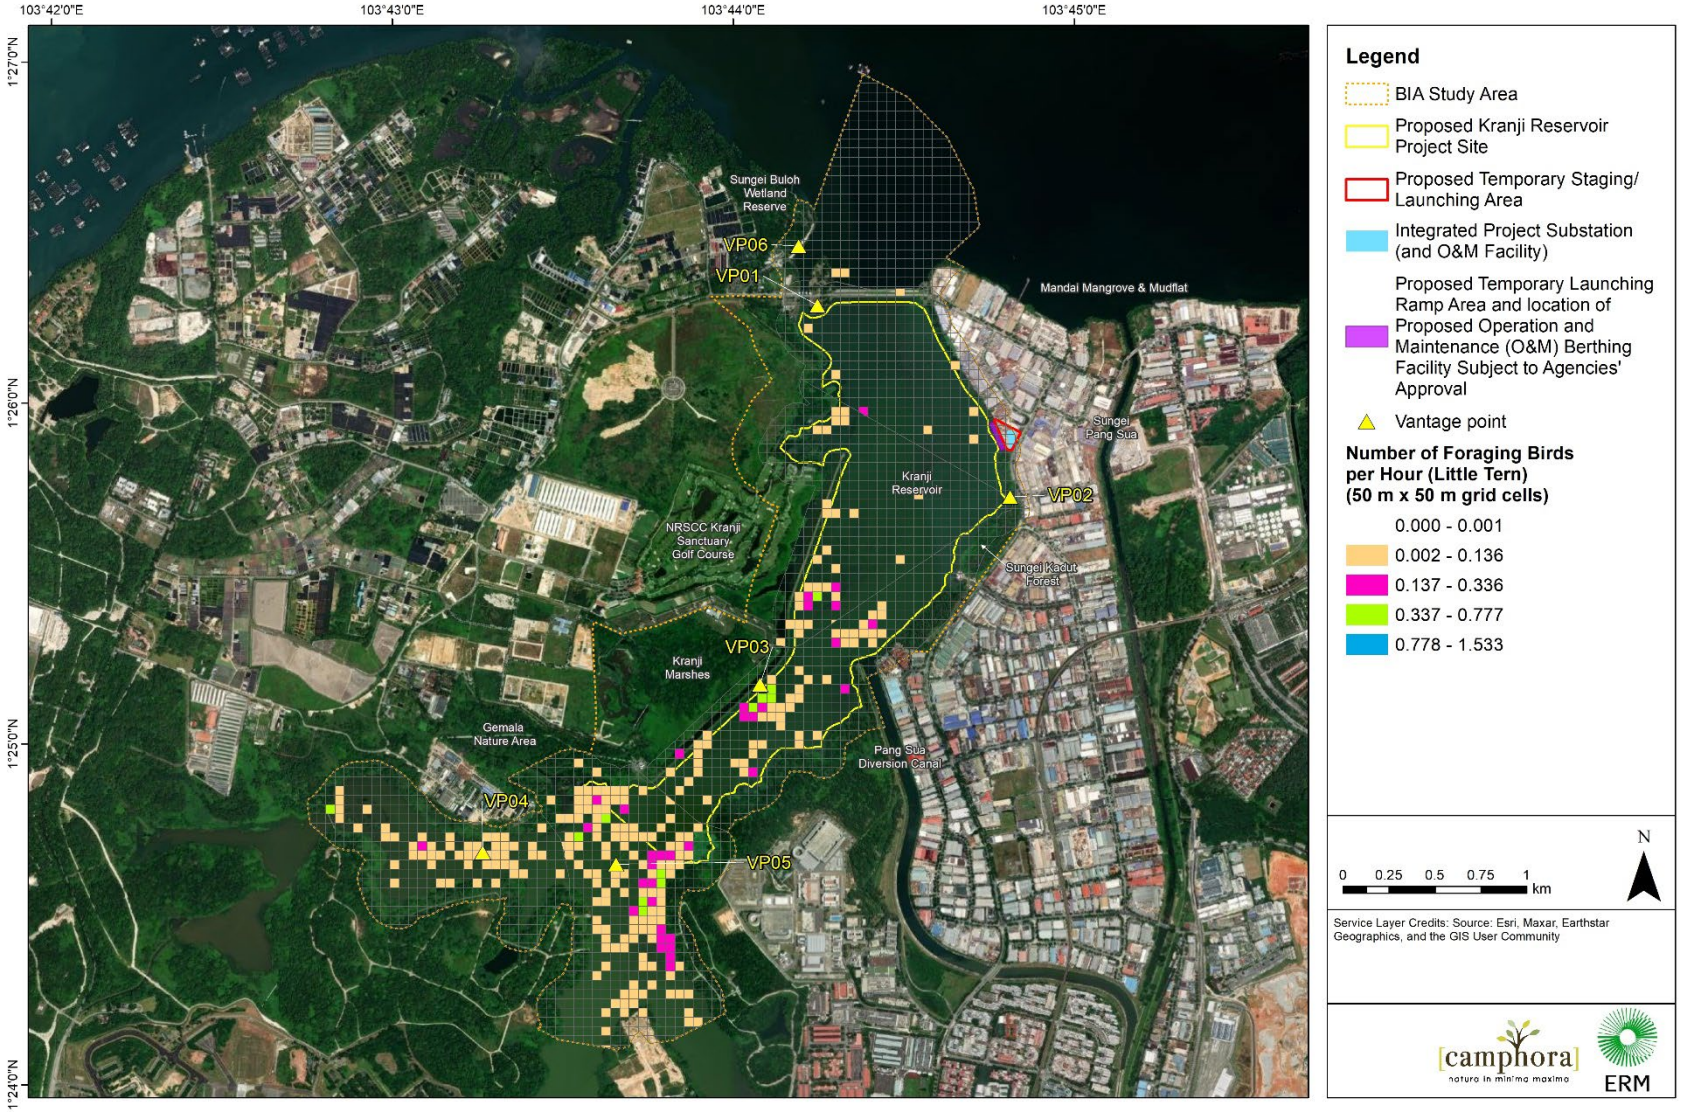

**Figure 3-36: Foraging Locations of Little Tern (*Sternula albifrons*)**

Higher usage was observed during migratory season (916 foraging events) as compared to non-migratory season (366 foraging events) due to usage by both residents and migrants (*Figure 3-37*). Little tern is both a resident breeder and migrant species. Individuals observed outside of the migratory season are considered to be residents. Individuals observed during the migratory season were considered to be made up of a mix of resident and migrant individuals. The spatial usage between migratory and non-migratory season was observed to be similar, suggesting that residents and migrants use similar areas. Additionally, Kranji Reservoir is highly used for foraging during the little tern's breeding season from May to September (*Figure 3-38*). Little terns are known to breed inland. No nesting sites were observed for this species.

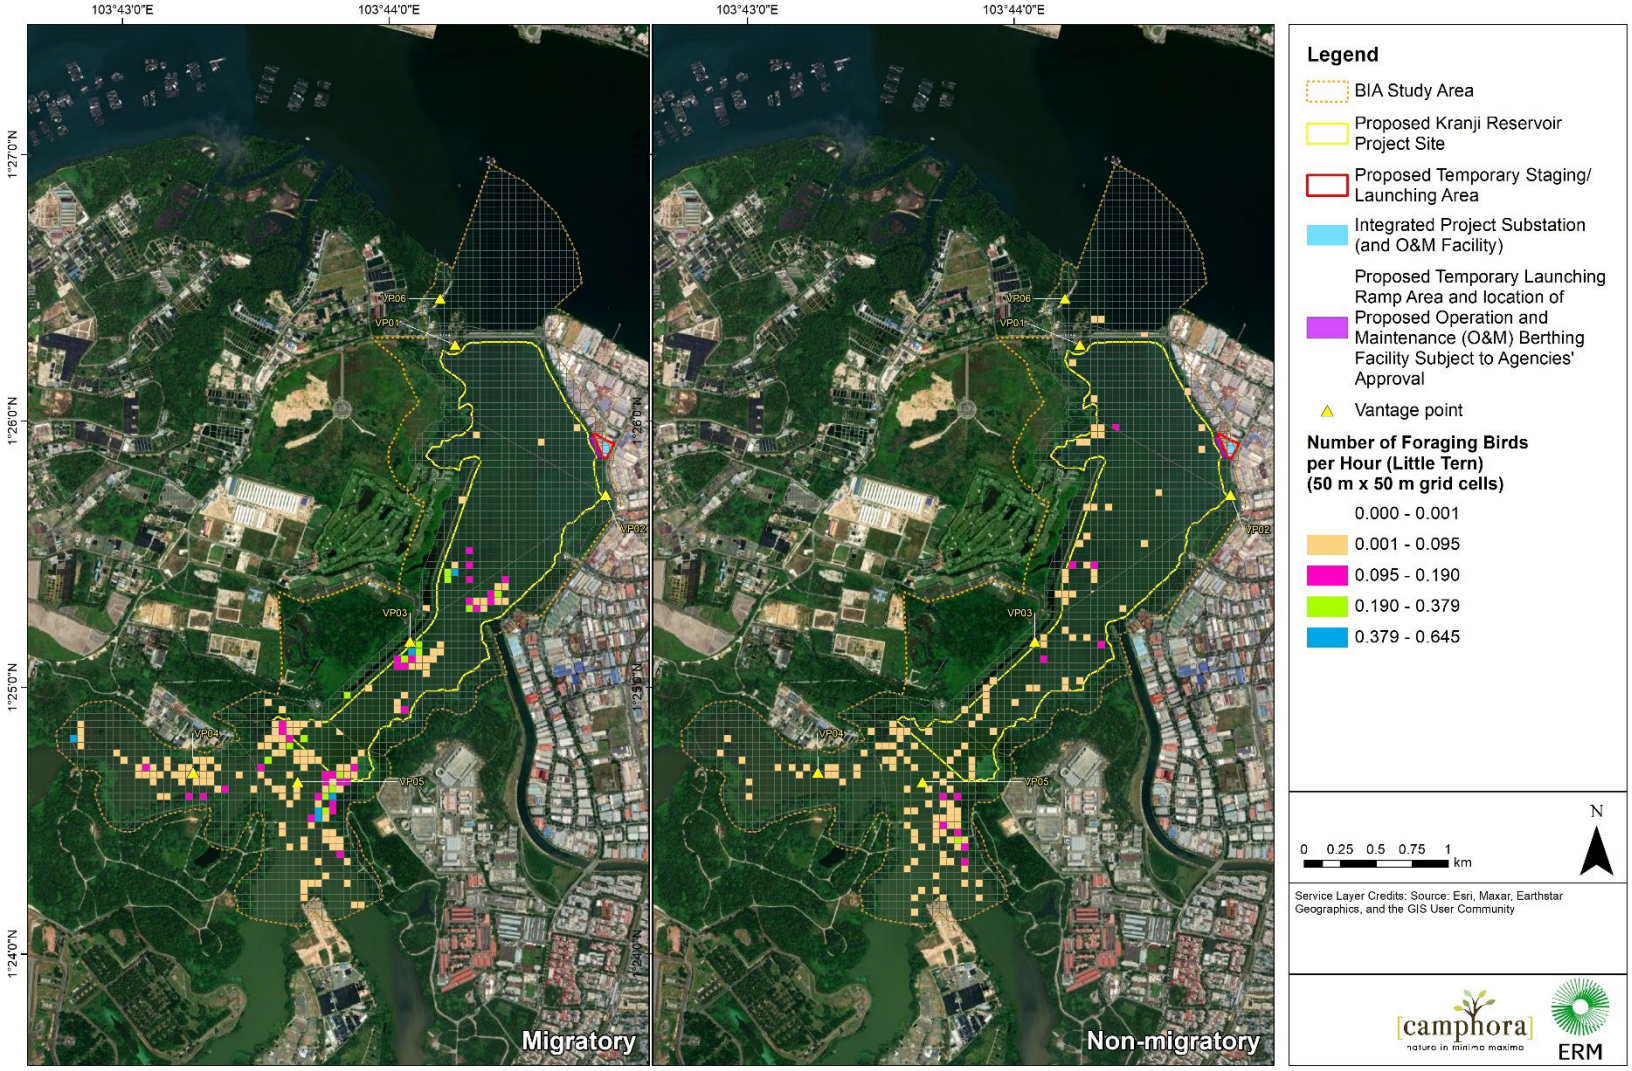

**Figure 3-37: Foraging Locations of Little Terns (*Sternula albifrons*) During Migratory and Non-migratory Seasons**

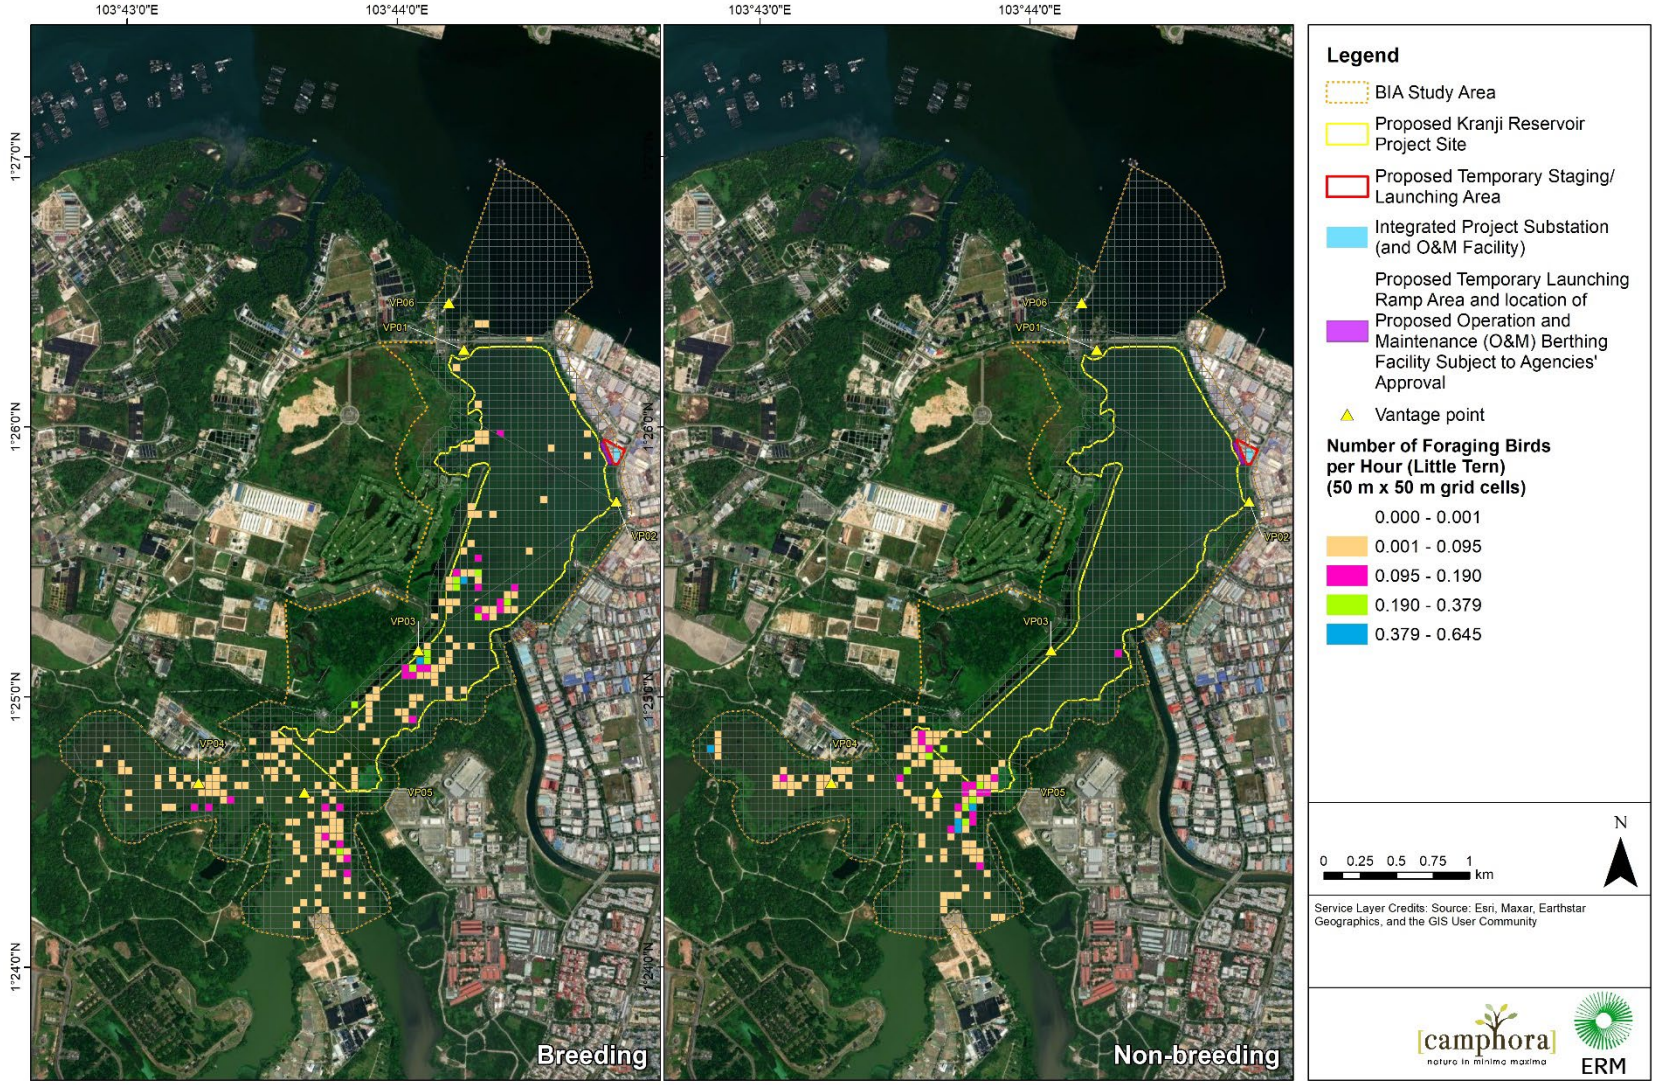

**Figure 3-38: Foraging Locations of Little Tern (*Sternula albifrons*) Between Breeding and Non-breeding Seasons**

The flight path analysis (*Figure 3-39*) shows that these birds flew mainly along the eastern and western edges of reservoir to their foraging sites, suggesting that the little terns are using these edges as a flyway or corridor for movement. 98.4% of their flights are below tree canopy height *(Figure 3-39*).

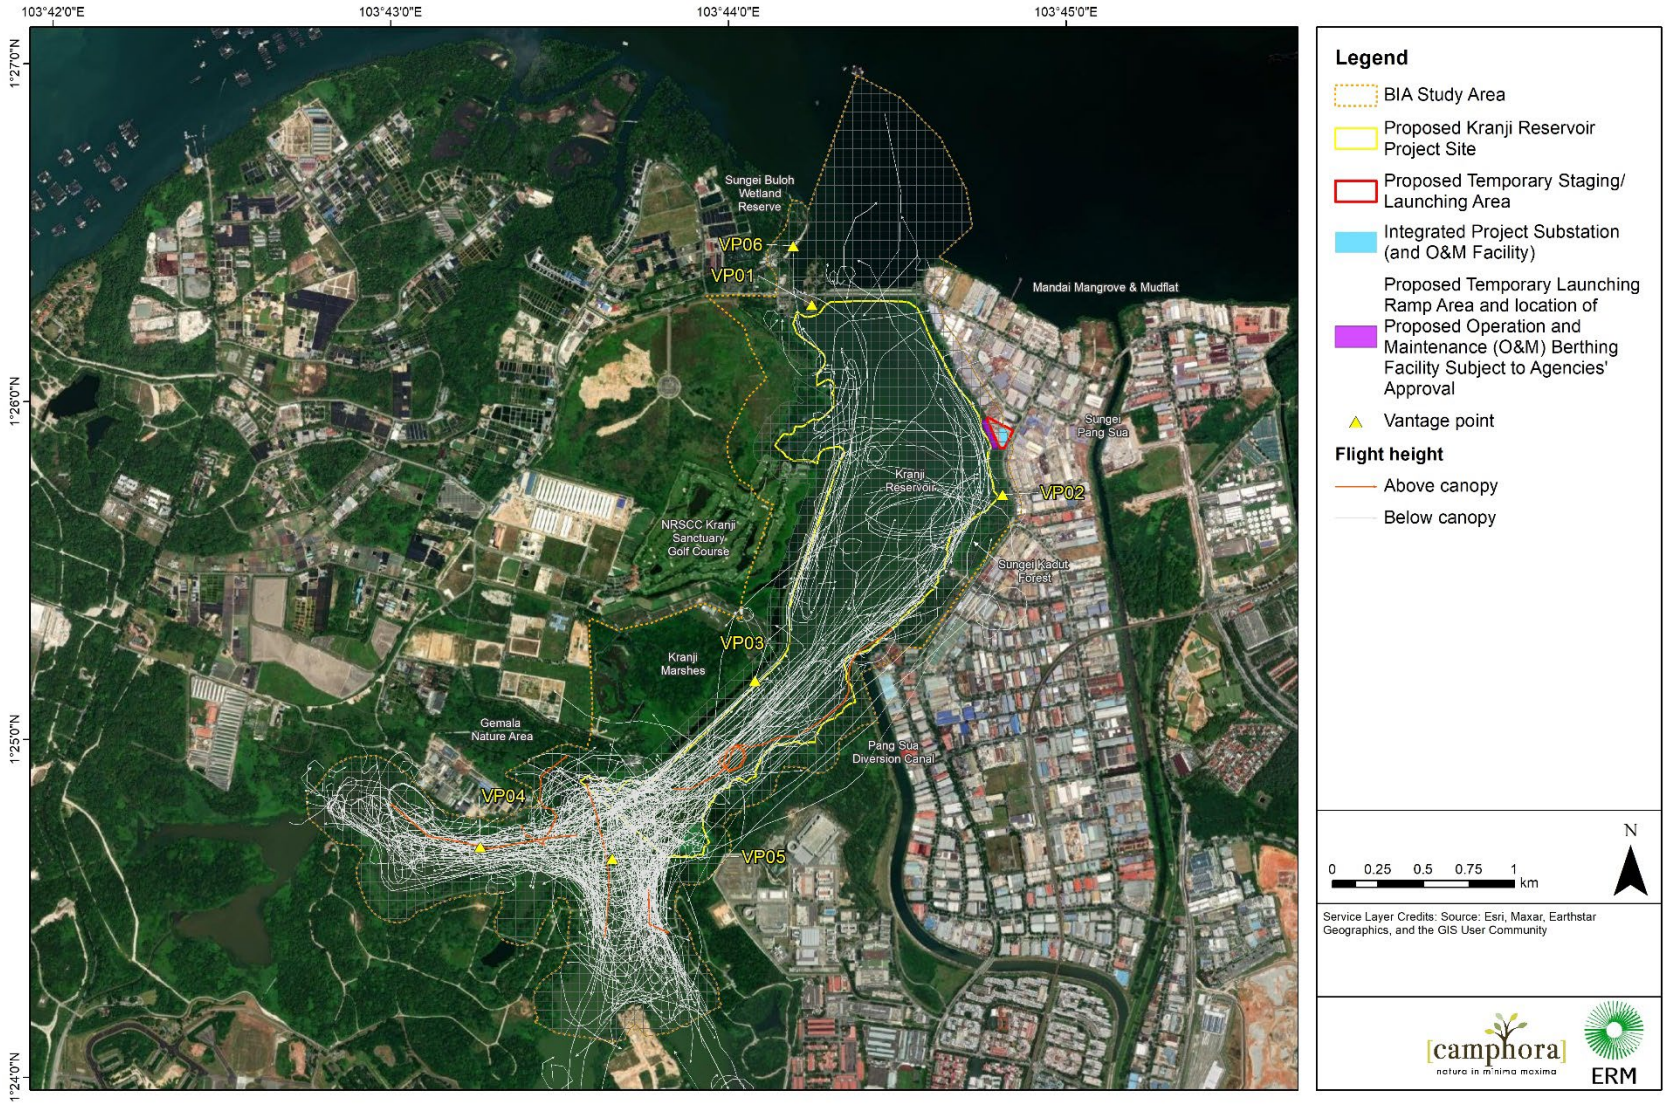

**Figure 3-39: Flight Paths of Little Terns (*Sternula albifrons*) Other Terns (*Chlidonias* species and *Laridae* species)**

A total of 313 foraging events were recorded for the other species of terns. They were mainly at the southern end of reservoir outside of the Reservoir Project Site (*Figure 3-40*), as with little terns. Additionally, the birds flew mainly along eastern and western edges of reservoir to their foraging sites (*Figure 3-41*), suggesting that the little terns are using these edges as a flyway or corridor for movement. Overall, 96.6% of recorded flight paths were below tree canopy height (*Figure 3-41*).

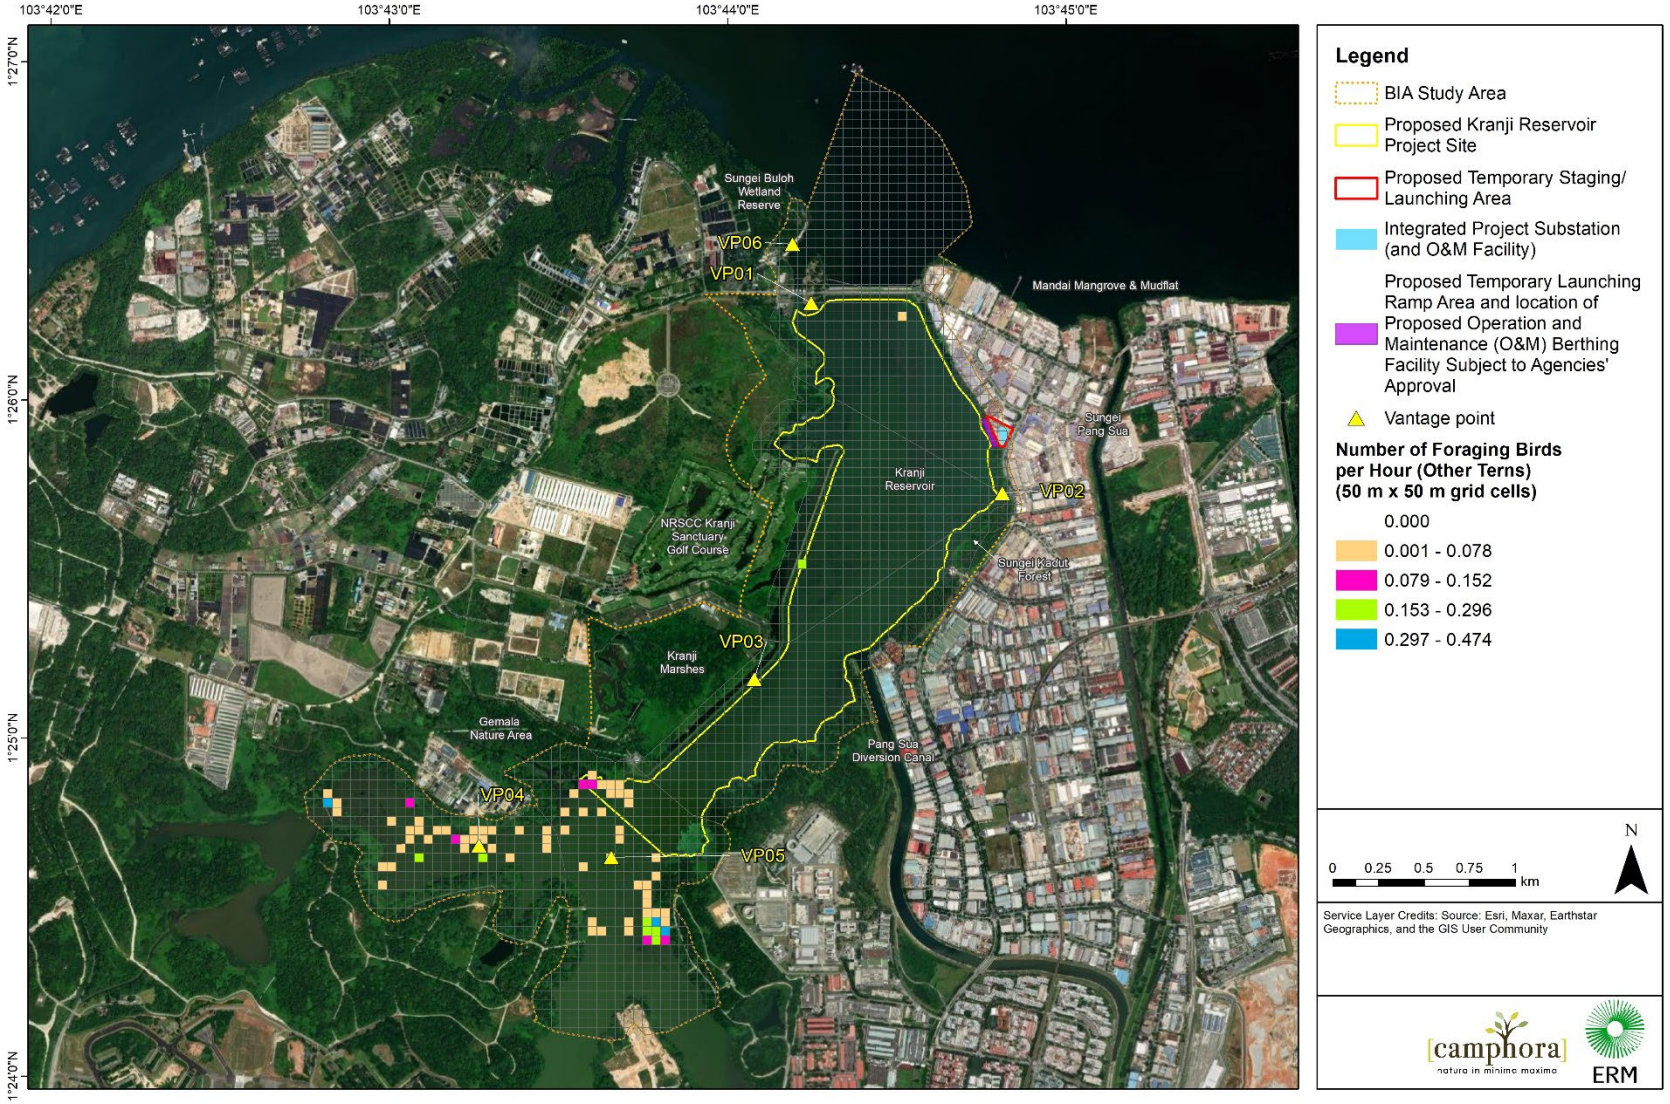

**Figure 3-40: Foraging Locations of Other Terns (*Chlidonias* species and *Laridae* species)**

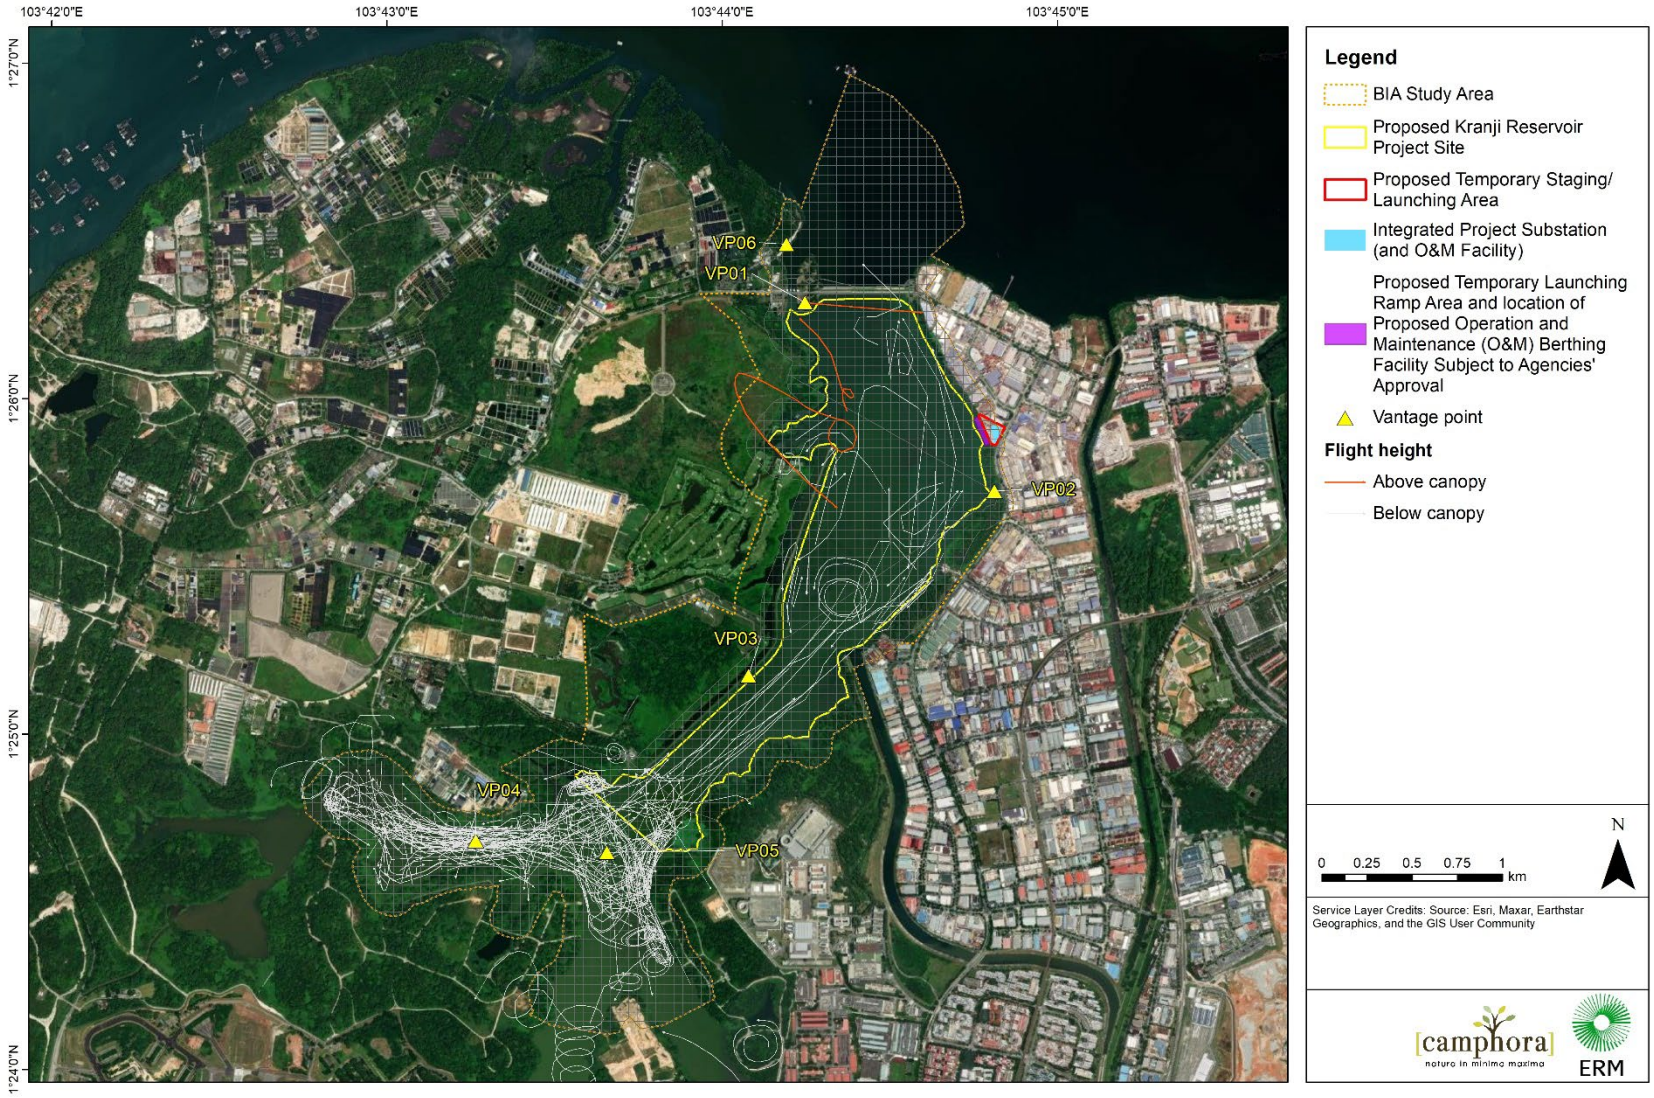

**Figure 3-41: Flight Paths of Other Terns (*Chlidonias* species and *Laridae* species)**

**Purple Heron (*Ardea purpurea*)**

A total of 80 foraging events was recorded, with the majority in the southern part of the reservoir (*Figure 3-42*). This may be due to their preference for freshwater wetlands, reedbeds and dense marshy vegetation, as they are shyer and prefer concealment in dense vegetation similar to that in the southern part of the reservoir outside of the Reservoir Project Site. This species is known to be sensitive to disturbance, and their feeding appears to depend heavily on cover (IUCN-SCC Heron Specialist Group, 2021). While some areas along the Kranji bund is also a suitable habitat, regular grass cutting may have reduced the frequency of the purple herons using this area. In total, 64.6% of flight paths were below tree canopy height (see *Figure 1* in *Appendix H* of this *Appendix 7.1*).

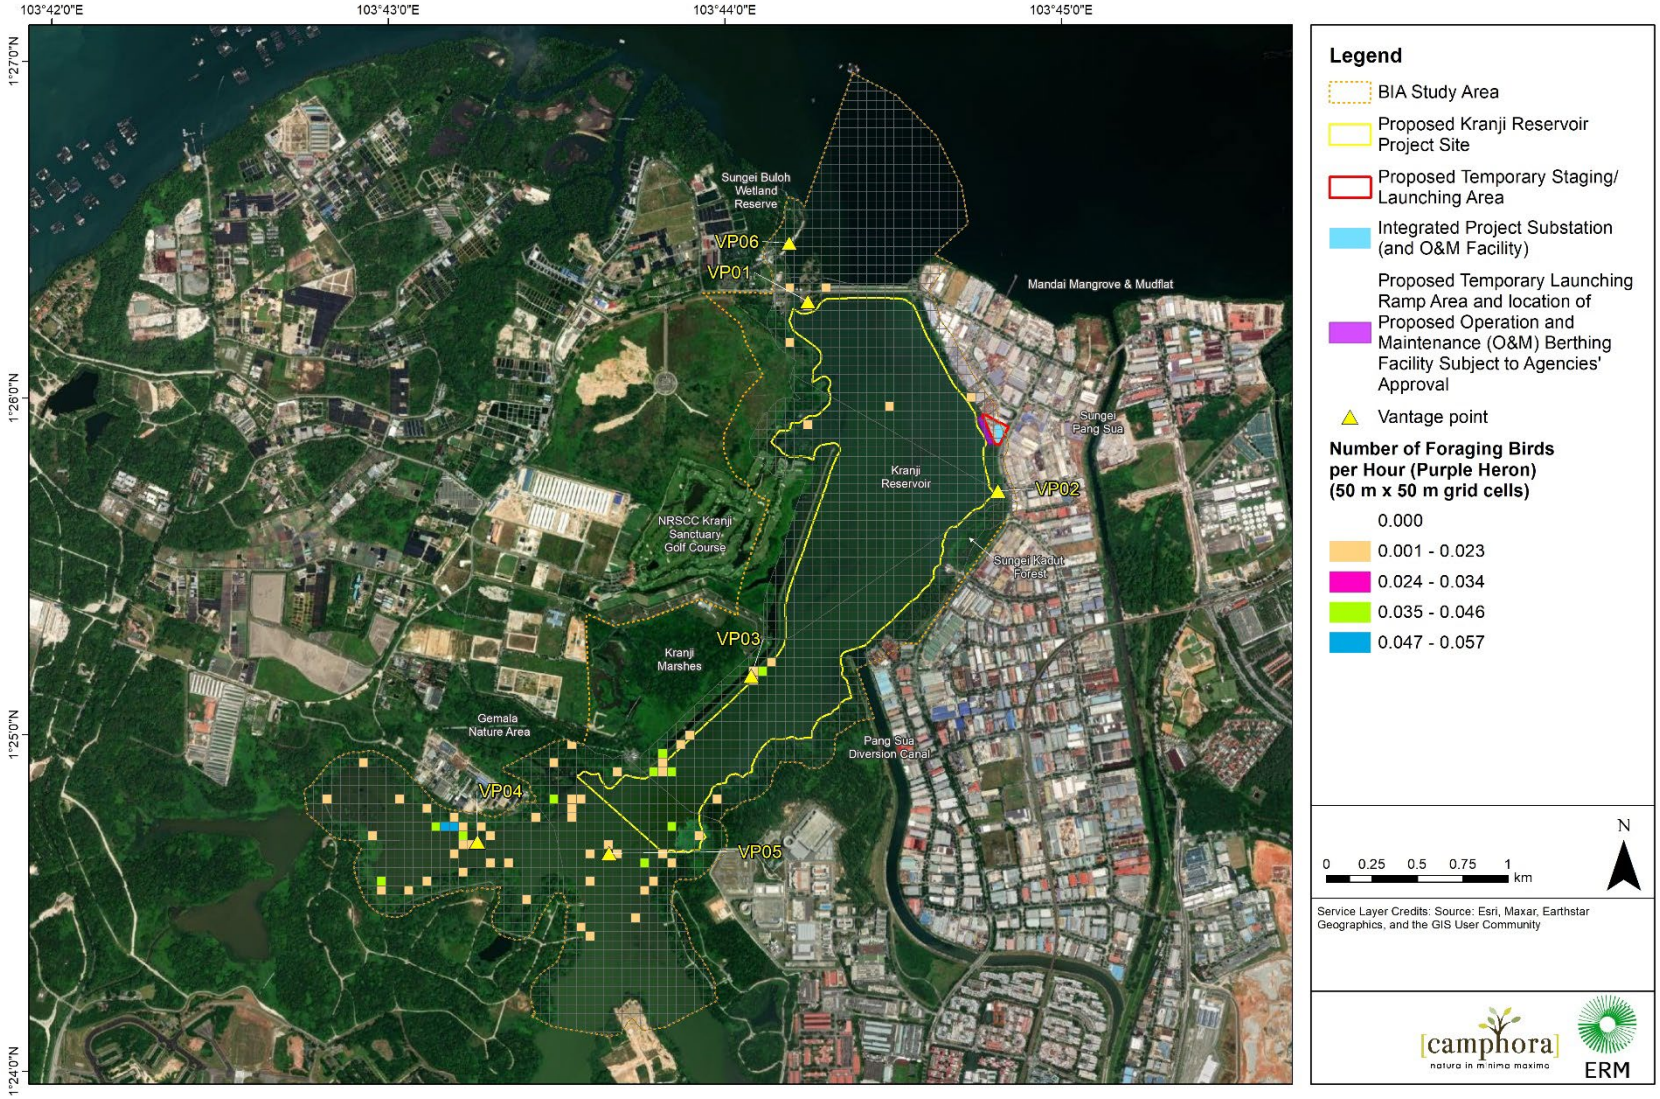

**Figure 3-42: Foraging Locations of the Purple Heron (*Ardea purpurea*)**

### Grey Heron (*Ardea cinerea*)

Four foraging events were observed for the grey heron. Records were scattered across the reservoir. This species typically prefers mangrove and coastal mudflats. 51.8% of recorded flight paths were below tree canopy height (see *Figure 2* in *Appendix H* of this *Appendix 7.1*). Due to the low number of observations made, there is no discernible difference between the usage by grey heron between breeding and non-breeding seasons (see *Figure 4* and *Table 1* in *Appendix H* of this *Appendix 7.1*).

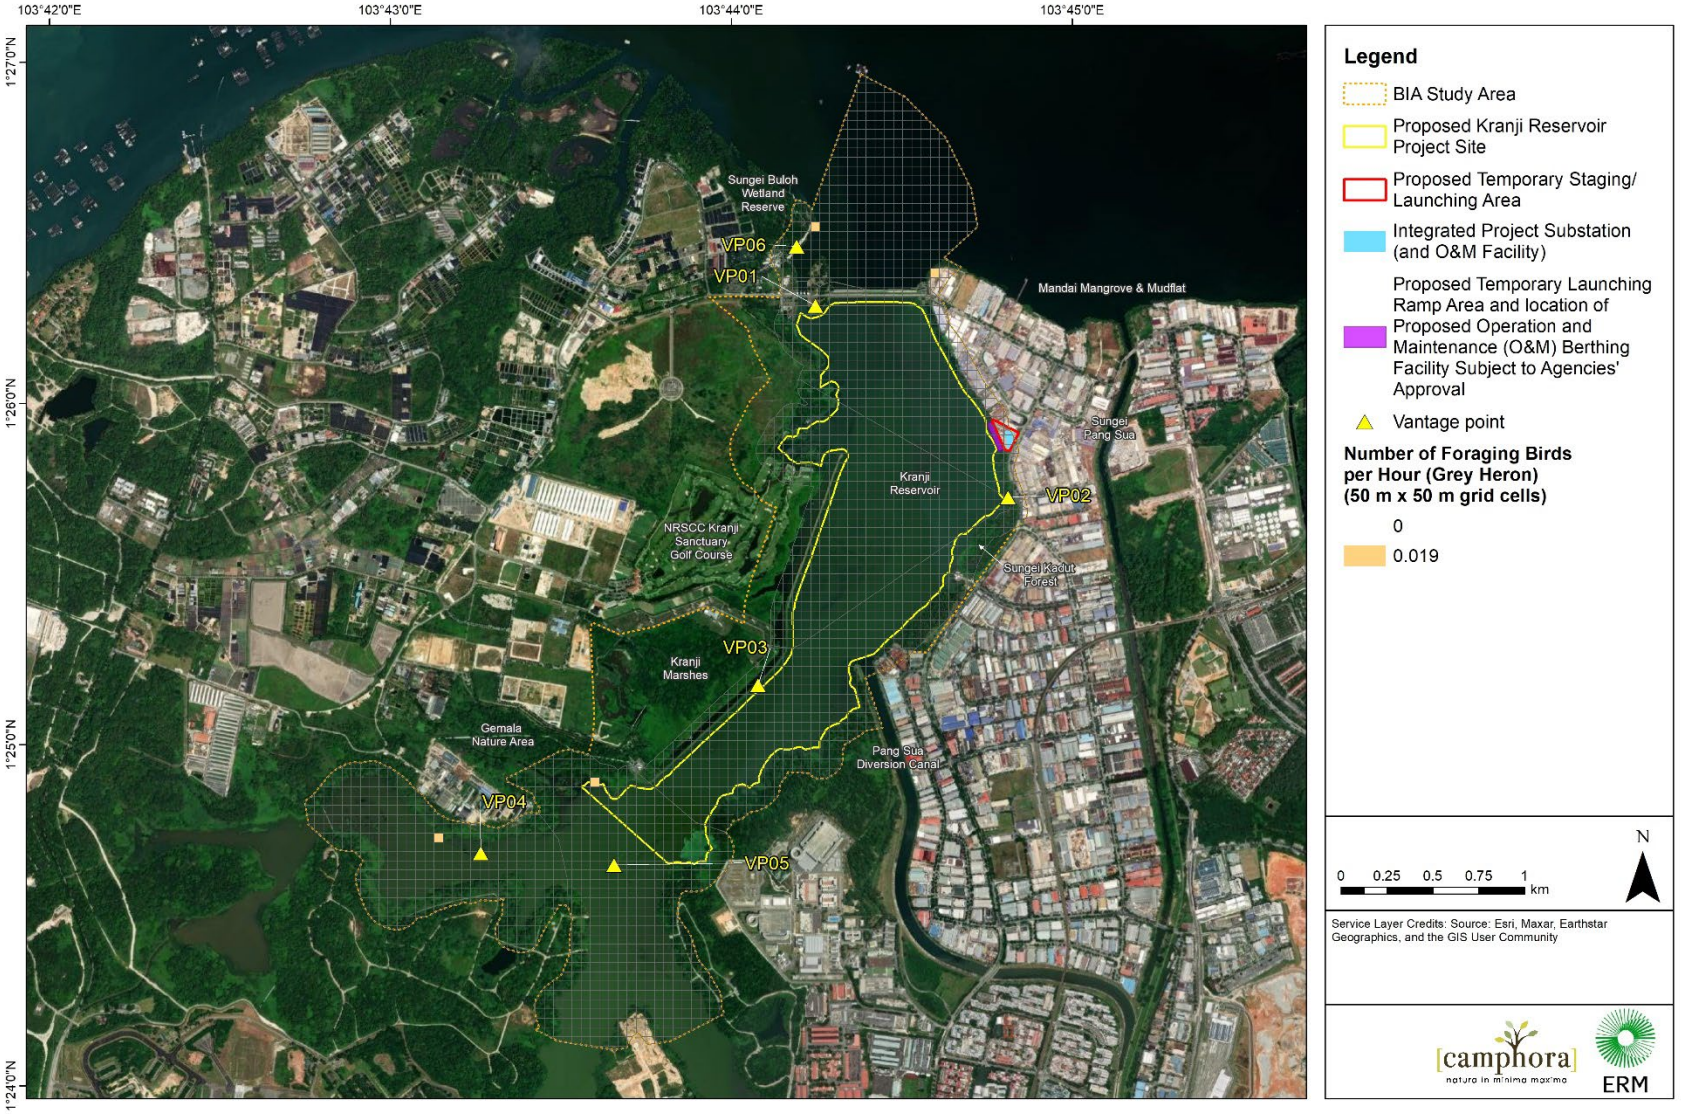

**Figure 3-43: Foraging Location of the Grey Heron (*Ardea cinerea*)**

### Other Ardeids (family *Ardeidae*)

A total of 507 foraging events were recorded for this group of water birds. Three areas of high usage were identified – i) Sungei Buloh Wetland Reserve, ii) in front of the BBC radio transmission towers along Kranji bund, and iii) southern part of the reservoir outside of the Reservoir Project Site (*Figure 3-44*). Periodic masses of floating macrophytes was observed to provide foraging opportunities within the reservoir. Foraging was also recorded on the mudflat off SBWR near VP06.

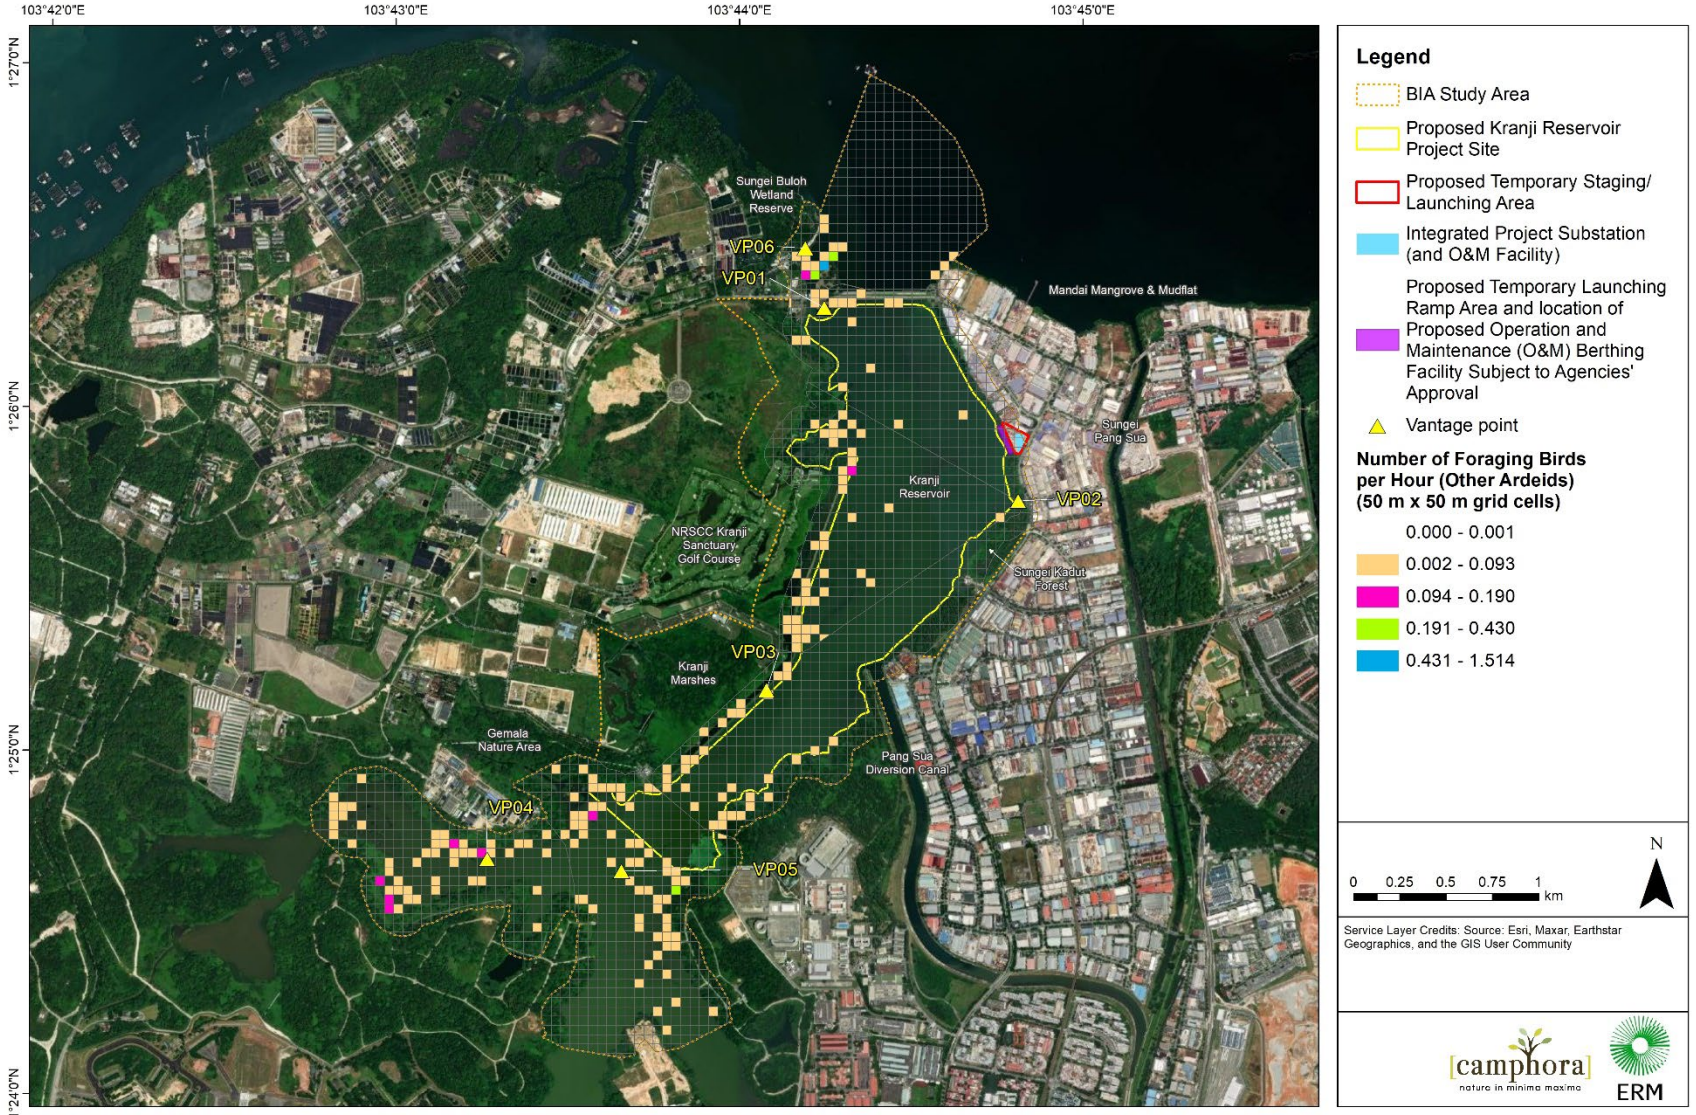

**Figure 3-44: Foraging Locations of Other Ardeids**

Temporally, the birds were seen flying in and out of the Kranji Reservoir at dawn and dusk. At dawn, there are activity both towards and away from Kranji Reservoir, suggesting possible foraging within and outside the reservoir (*Figure 3-45*). At dusk, there appears to be higher activity away from Kranji Reservoir, suggesting some of these birds roost outside of Kranji Reservoir (*Figure 3-45*). Evidence indicates the birds are foraging at the reservoir and roosting at SBWR. 85.2% of flight paths were below tree canopy height (see *Figure 3* in *Appendix H* of this *Appendix 7.1*).

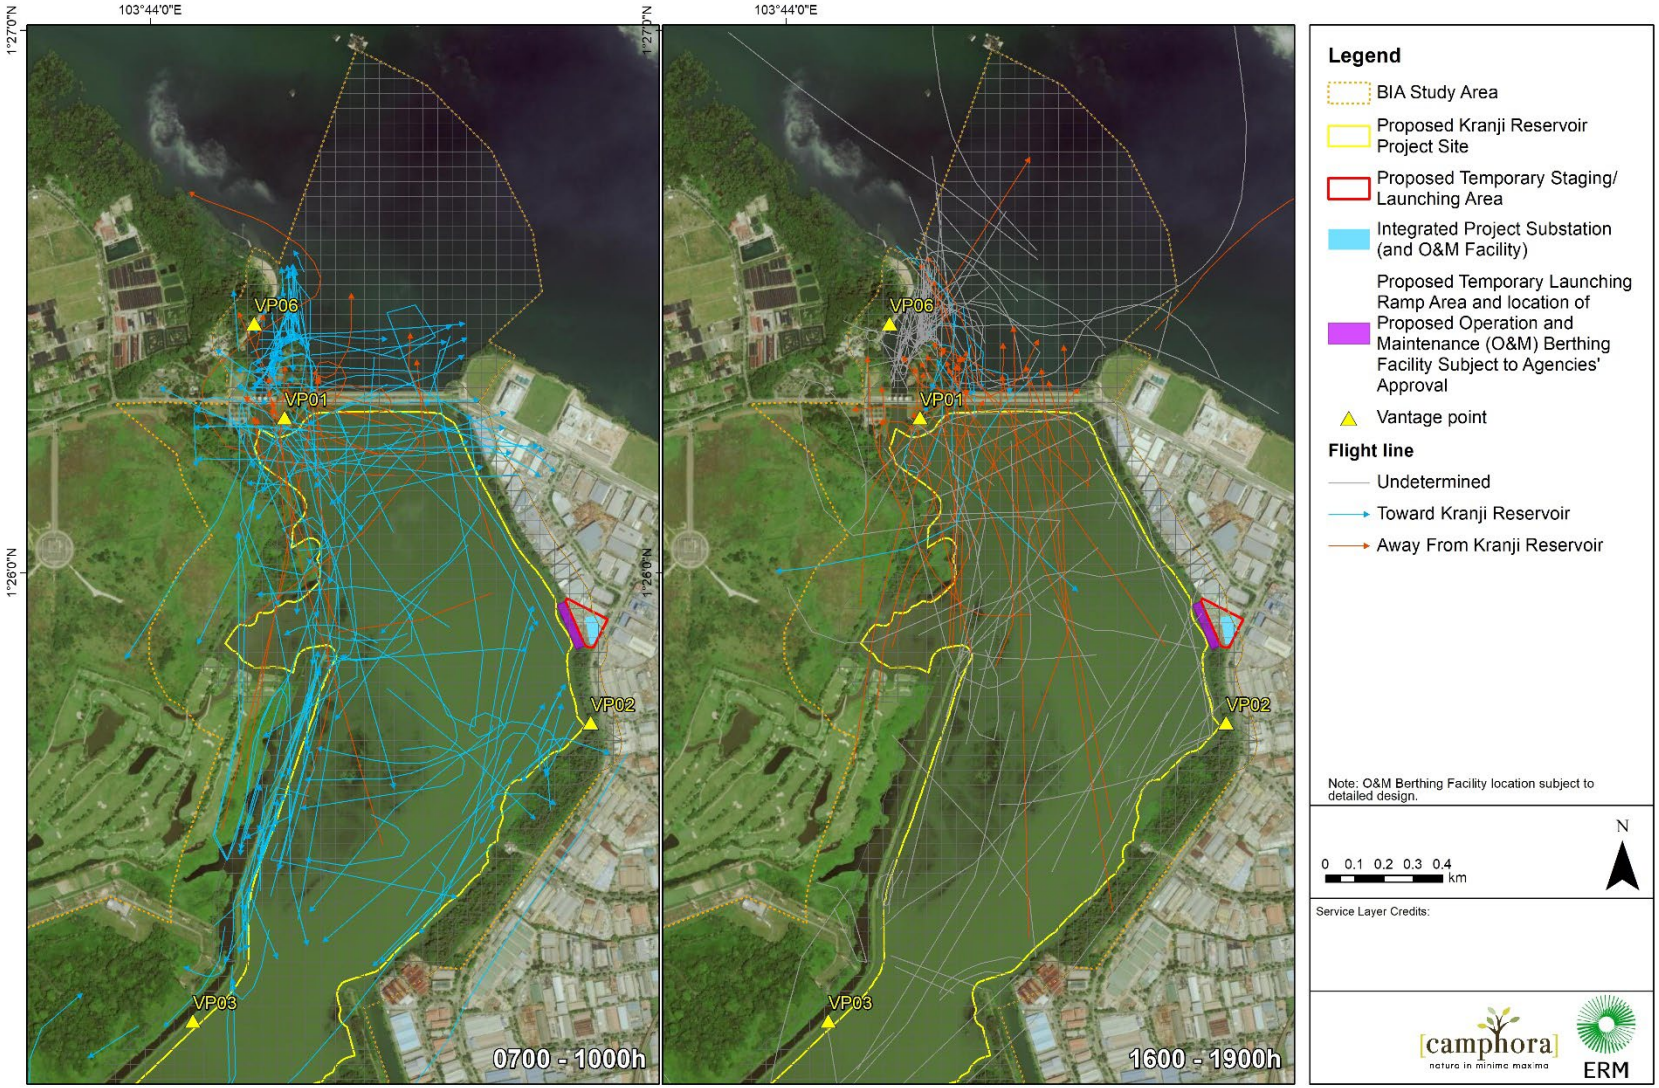

**Figure 3-45: Direction of Flight Paths of Other Ardeids**

**White-bellied Sea Eagle (*Haliaeetus leucogaster*)**

During the survey period, up to five individuals were observed perching on the BBC radio transmission towers. This suggests multiple individuals or pairs inhabit Kranji Reservoir or the nearby vicinity.

A total of 52 foraging events were recorded, in SBWR and the waters in front of the BBC radio transmission towers and Kranj bund, as well as the Gemala Nature Area to the south-west of the Reservoir Project Site (*Figure 3-46*). To a much lesser extent, birds were also recorded foraging at the eastern section of the reservoir (*Figure 3-47*).

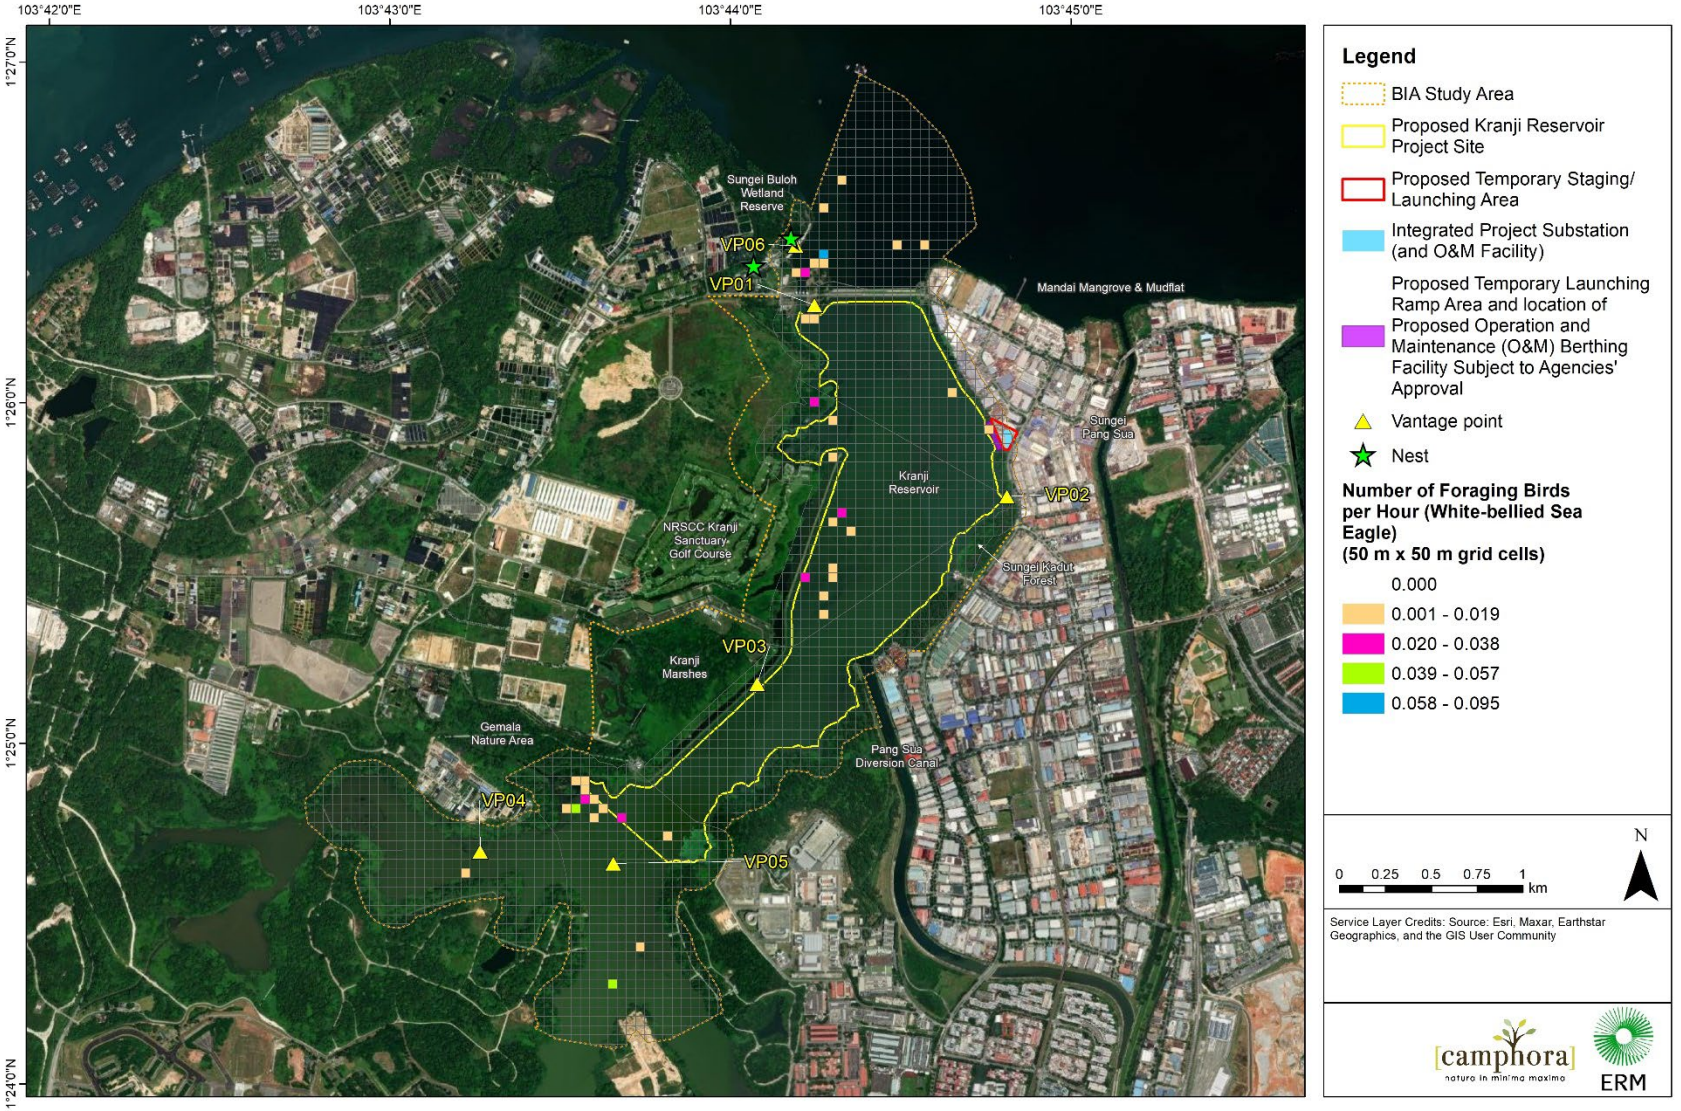

**Figure 3-46: Foraging Locations of the White-bellied Sea Eagle (*Haliaeetus leucogaster)***

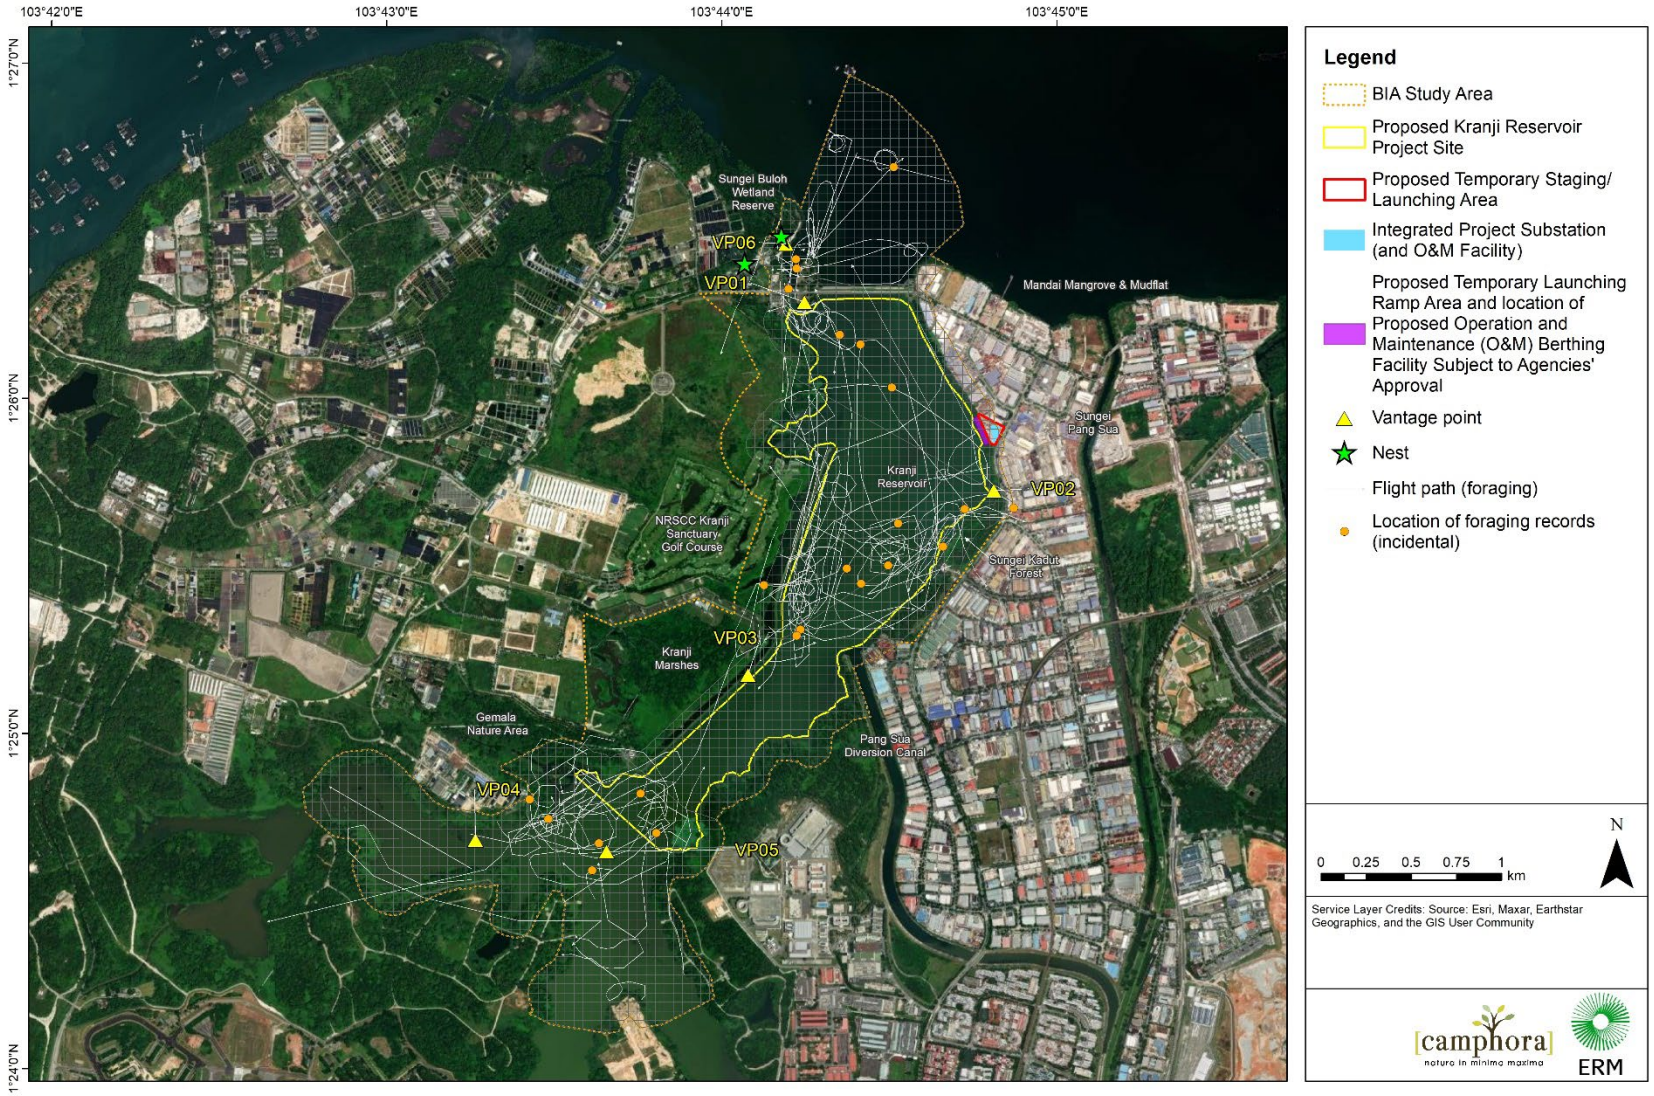

**Figure 3-47: Foraging Flight Paths and Locations of the White-bellied Sea Eagle (*Haliaeetus leucogaster)***

Long-stay perch-hunting is a foraging strategy of the White-Bellied Sea Eagle (Wiersma & Richardson, 2009). The birds were often seen resting on the BBC radio transmission towers which served as an important perching spot (*Figure 3-48*), hence it is evident the BBC radio transmission towers play an important role in their hunting success.

Correspondingly, *Figure 3-48* shows foraging flight paths were mainly associated with the BBC radio transmission towers and along the western edge of reservoir, suggesting the birds may employ transect hunting along the shoreline, or soaring and prospecting as a foraging strategy (Wiersma & Richardson, 2009). In total, 90.7% of recorded flights were above tree canopy height (*Figure 3-48)*. They were most frequently seen thermalling.

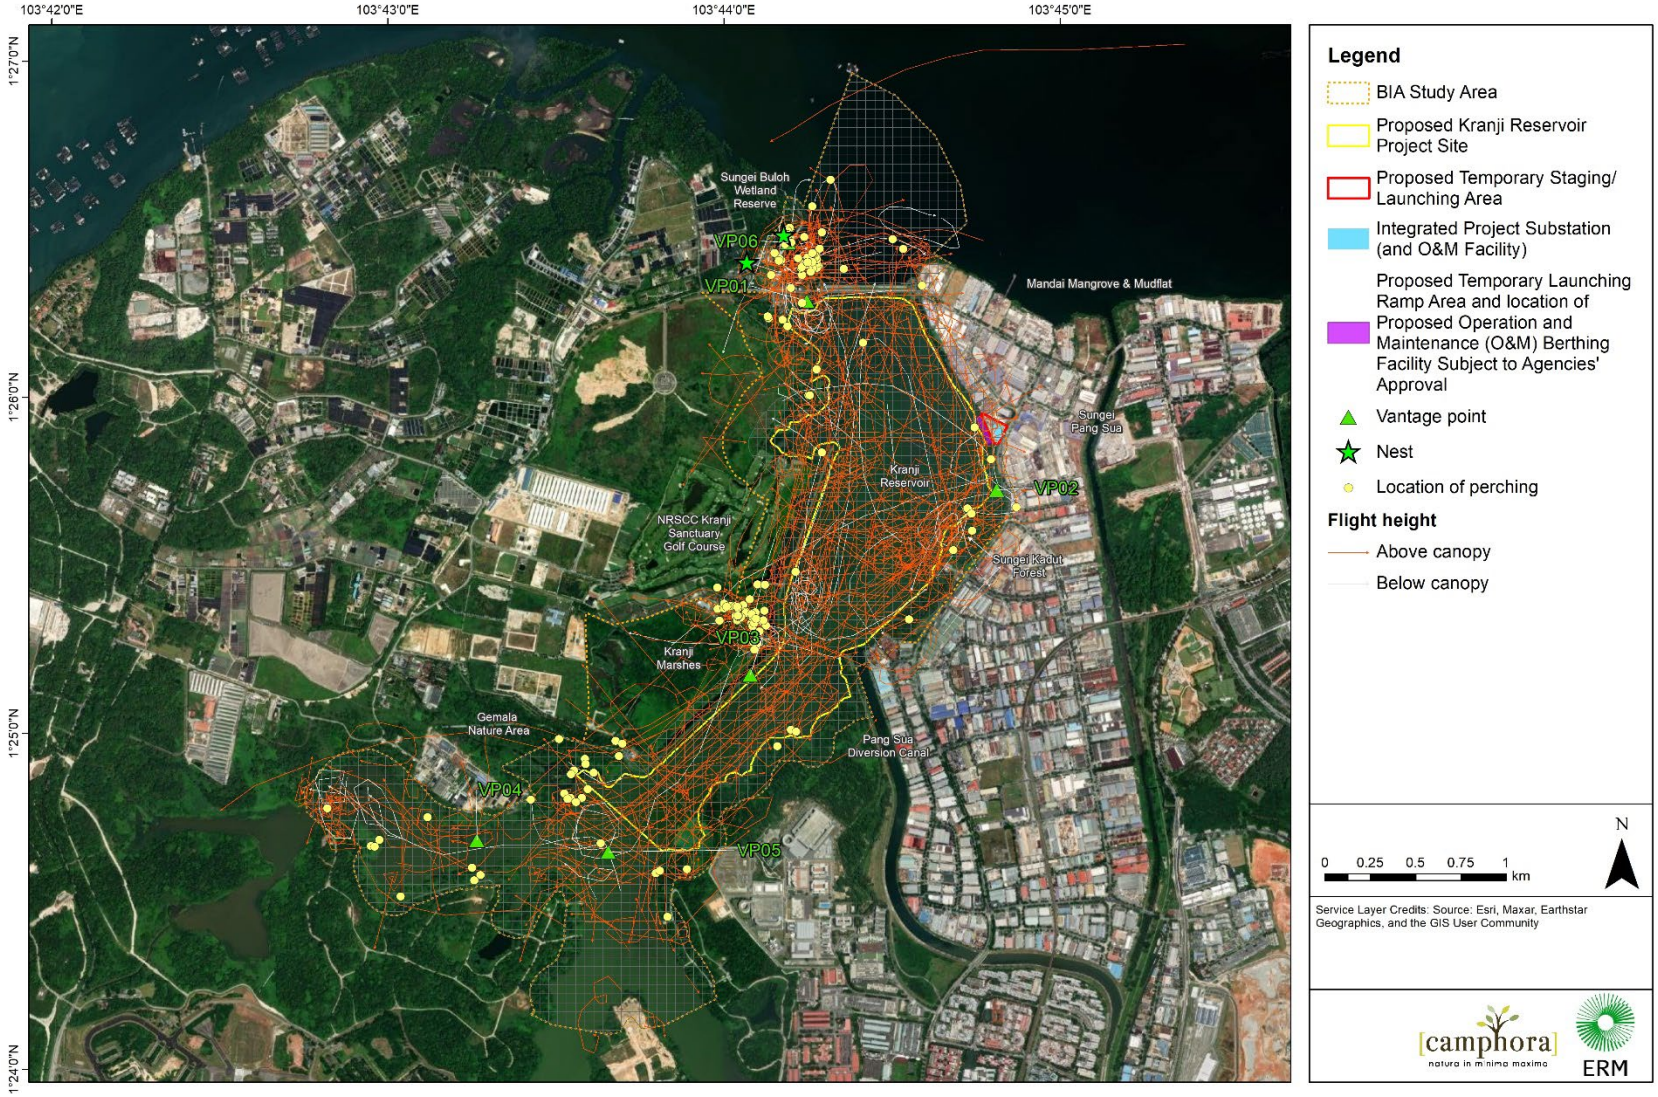

**Figure 3-48: Flight Paths and Perching Locations of the White-bellied Sea Eagle (*Haliaeetus leucogaster*)**

Two nests of the white-bellied sea eagle were observed at SBWR. At VP01 and VP06, a nesting pair was observed near the entrance of SBWR Visitor Centre (*Figure 3-49*). The pair were not observed to utilise the reservoir as a food resource. Instead, they were observed collecting nesting materials from trees lining the reservoir near Kranji Reservoir Park Carpark B. This was observed twice, once in November 2020, and once in April 2021. According to Lim (2009), breeding has been observed throughout the year for this species except in November. Chicks has previously been observed between 19 Jan and 19 May, with fledglings present at their nest between 11 May and 31 July (Lim, 2009). The nests at SBWR were observed from November 2020 to February 2022. Flight paths associated with the nests were mainly located at SBWR, suggesting that these white-bellied sea eagles appear to mainly use SBWR (*Figure 3-49*). The nests were used by different pairs of white-bellied sea eagles, suggesting that there are at least four individuals at SBWR.

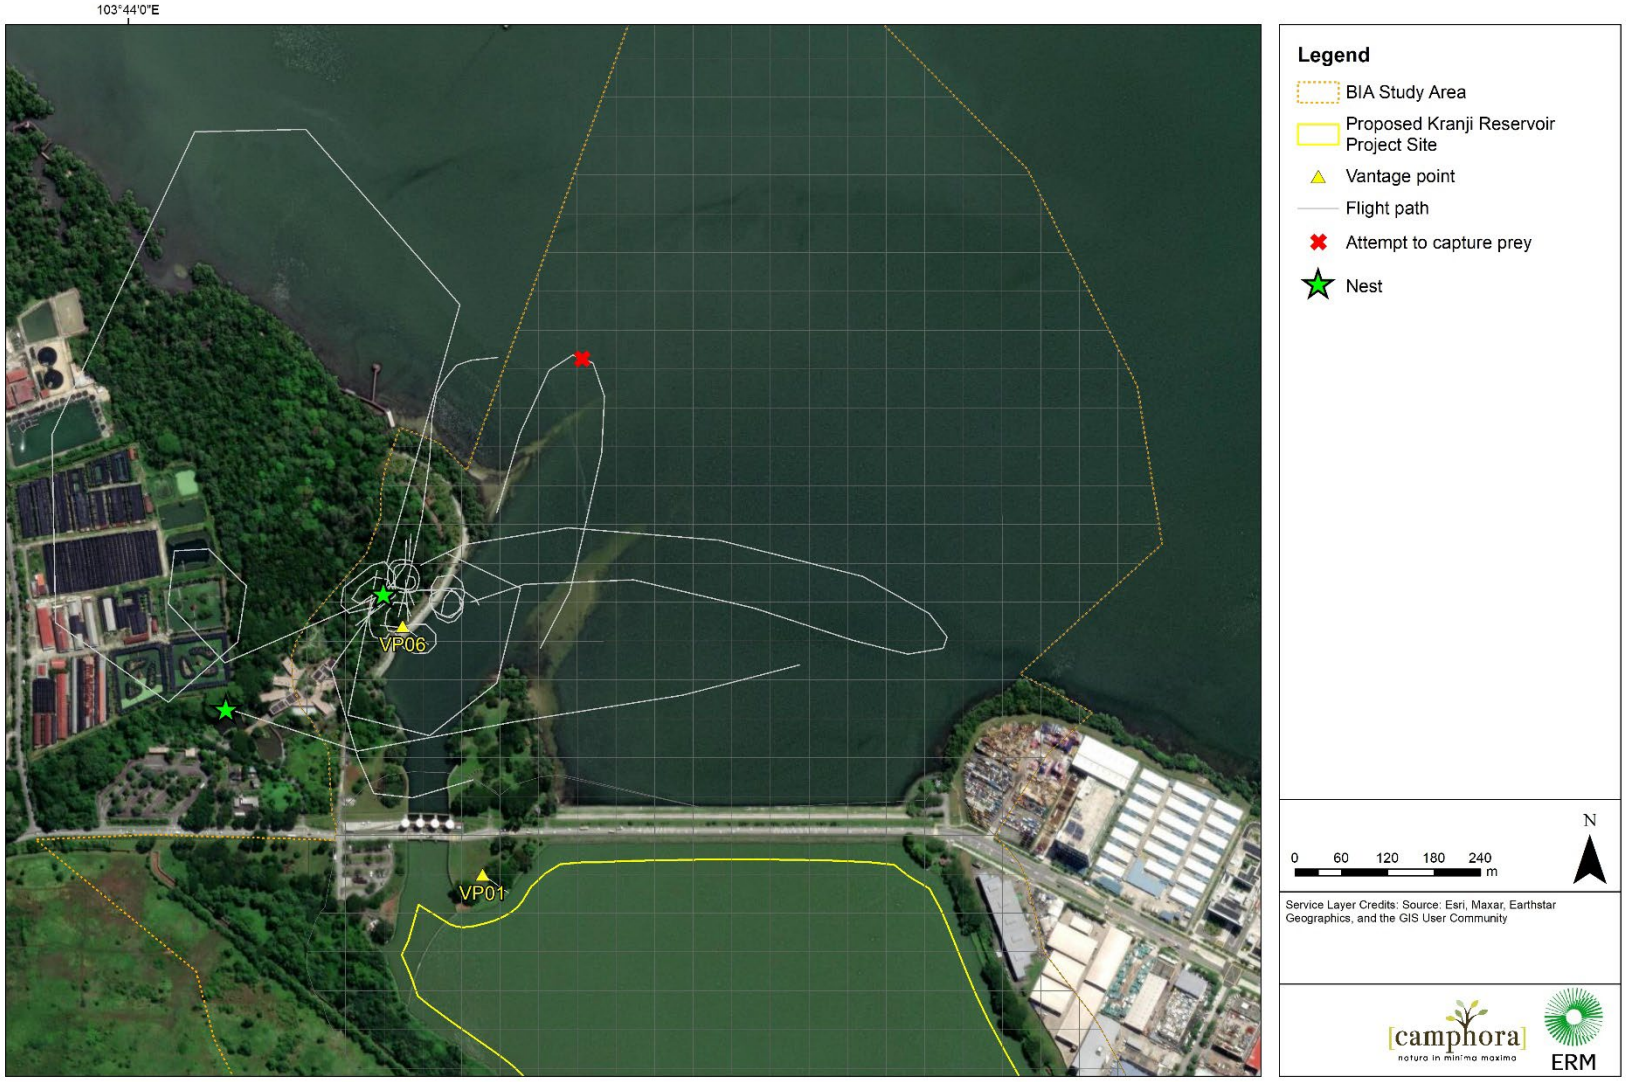

**Figure 3-49: Foraging Flight Paths and Nest Location of the White-bellied Sea Eagle (*Haliaeetus leucogaster)* Nesting Pairs at SBWR**

**Brahminy Kite (*Haliastur indus*)**

Based on the 10 foraging events observed, the brahminy kite appears to utilise the majority of Kranji Reservoir, as their foraging locations were scattered throughout the water body (*Figure 3-50*). A higher density of flight paths were observed in the eastern part (near a nest), and south-western part of the reservoir outside of the Reservoir Project Site, suggesting that these two areas are well used by the species (*Figure 3-51*).

Two active nests were observed – one in Kranji Marshes and another in the southern end of Sungei Kadut forest (*Figure 3-50*). According to Lim (2009), the breeding period of this species is from September to March and May to July. The nest at Kranji Marshes was observed in January 2021, and the nest in the Sungei Kadut forest, was observed February and March 2021.

Brahminy kite has a varied hunting technique to capture an assortment of prey such as fish, birds, amphibians, reptiles, small mammals and even carrion (Khaleghizadeh & Anuar 2019). In this regard, Kranji Reservoir may be less essential as a food resource to brahminy kite compared to other fish consuming raptors. This may explain why fewer foraging events were observed for this species, as compared to piscivorous (fish feeding) raptors, such as the white-bellied sea eagle. They were mostly observed thermalling hence overall, 92.3% of flights were above tree canopy height (*Figure 3-51*). Due to the low number of observations made, there is no discernible difference between the usage by brahminy kite during breeding and non-breeding seasons (see *Figure 5* and *Table 2* in *Appendix H* of this *Appendix 7.1*).

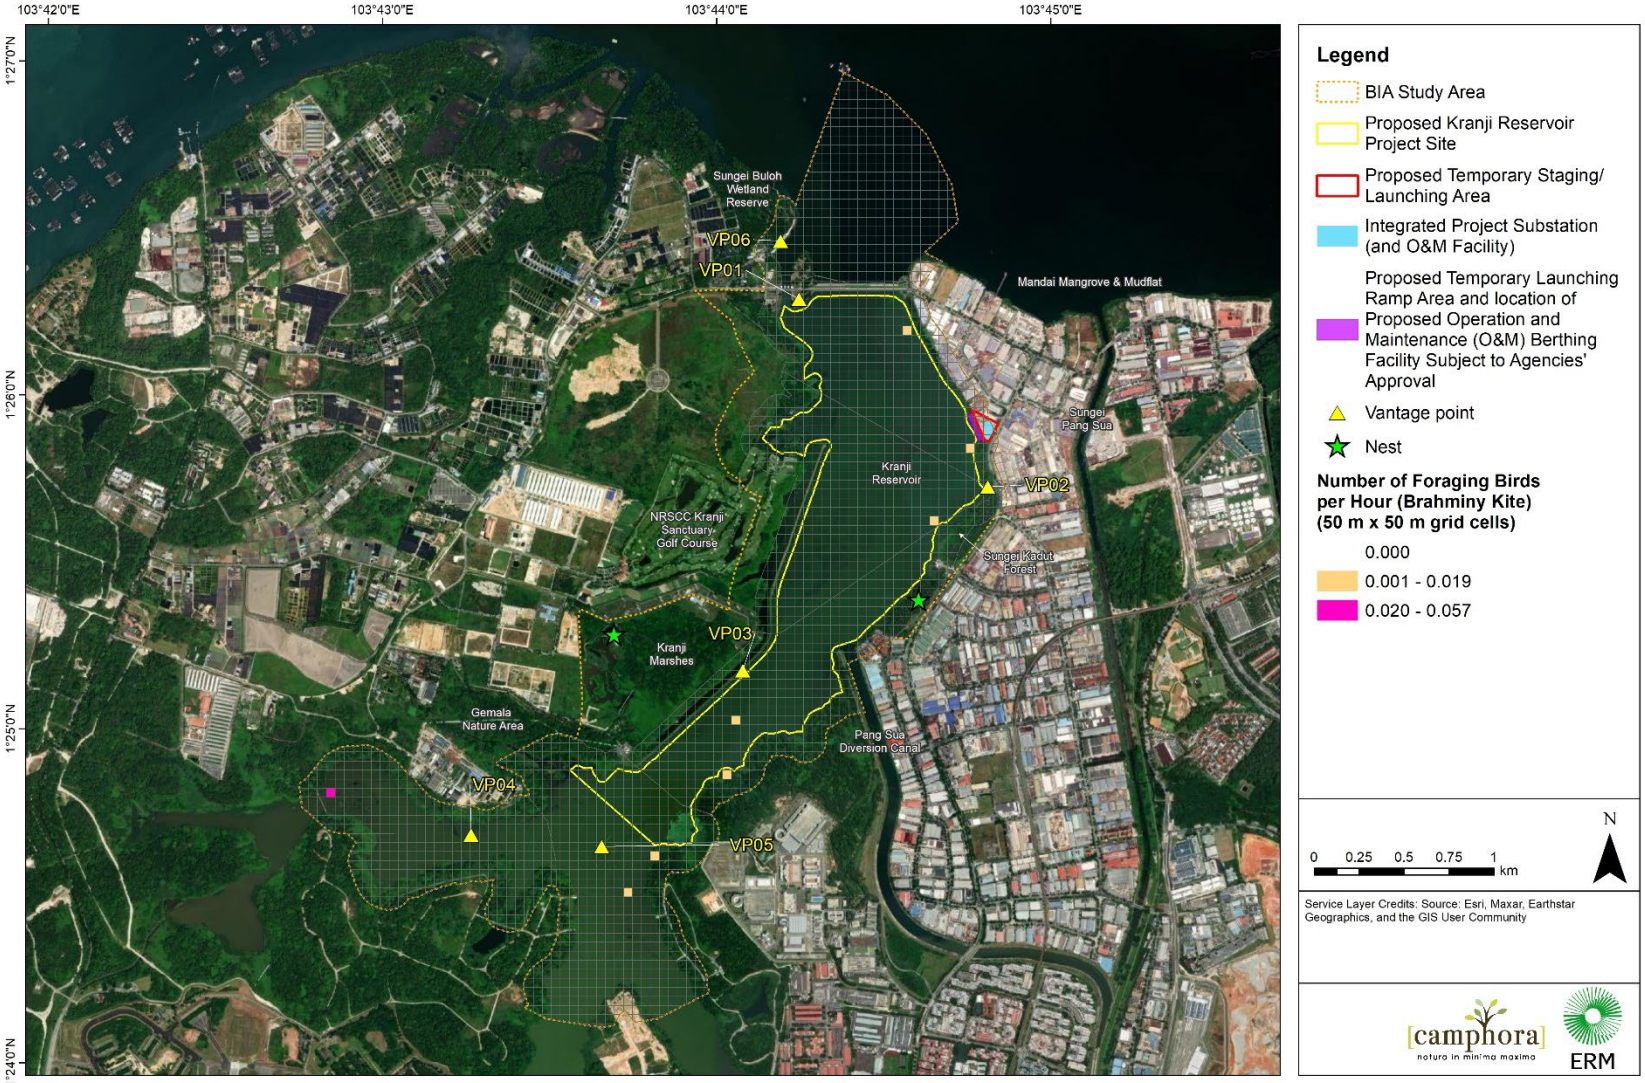

**Figure 3-50: Foraging and Nest Locations of the Brahminy Kite (*Haliastur indus*)**

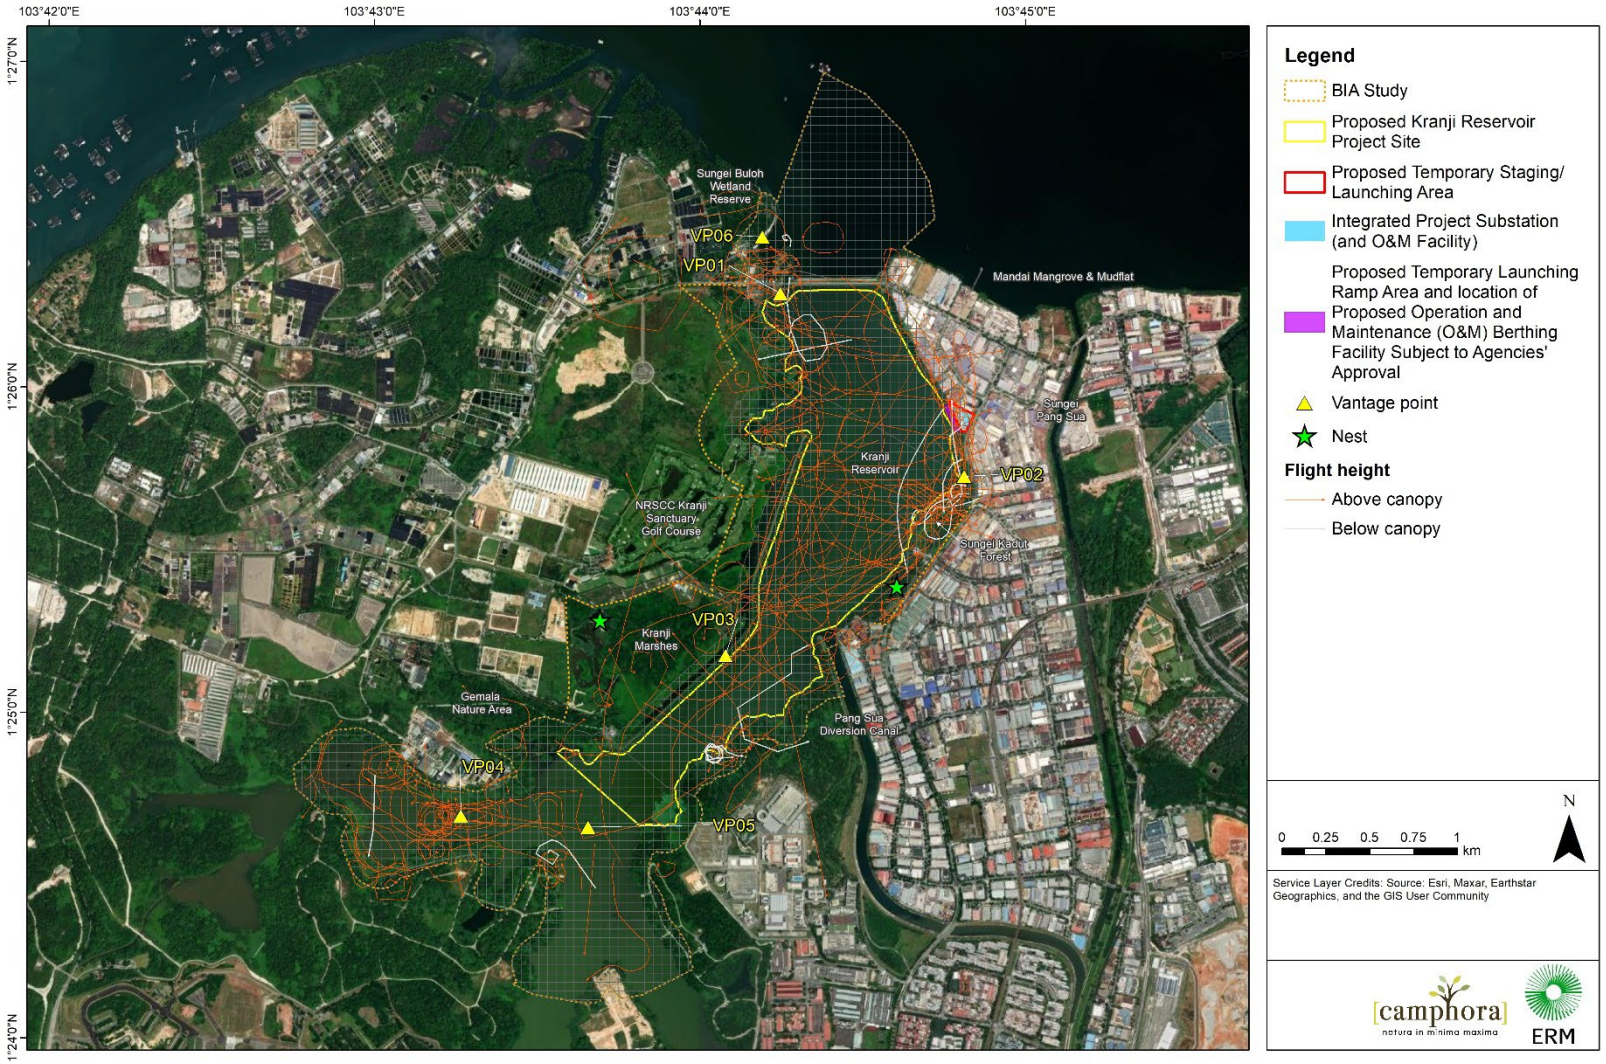

**Figure 3-51: Flight Paths of the Brahminy Kite (*Haliastur indus*)**

### Western Osprey (*Pandion haliaetus*)

Throughout the survey period, 11 foraging events were recorded for the western osprey. Foraging records were scattered across the reservoir, but foraging was observed mostly in the southern part of the reservoir outside of the Reservoir Project Site (*Figure 3-52*). Flight paths show usage across the whole reservoir (*Figure 3-53*). Unlike white-bellied sea eagles and grey-head fish eagles, this species hunts for fish on the wing, flapping and gliding 10 to 40m above the water surface, and less often from a perch (Poole et al., 2002). This hunting technique is reflected by its flight path where 64.3% were above tree canopy height (*Figure 3-53*). When a fish is spotted, the western osprey dives downwards plunging feet-first into the water to catch its prey. Due to its hunting technique, a relatively larger expanse of water surface may be more important for foraging compared to other raptors.

The western osprey is frequently observed to be perching on the BBC radio transmission towers along the western edge (*Figure 3-53*). It was also seen perched and feeding on prey in its talons in the forest on the south eastern shore of the Reservoir Project Site, located opposite VP03.

At least two individuals were observed from the surveys. Non-breeding individuals are known to travel as far as 10 km between daytime feeding grounds and roosts (Watkins, 2000). This as well as its ability to hunt along seacoast (i.e. outside of the Kranji Reservoir) may explain the low foraging observations.

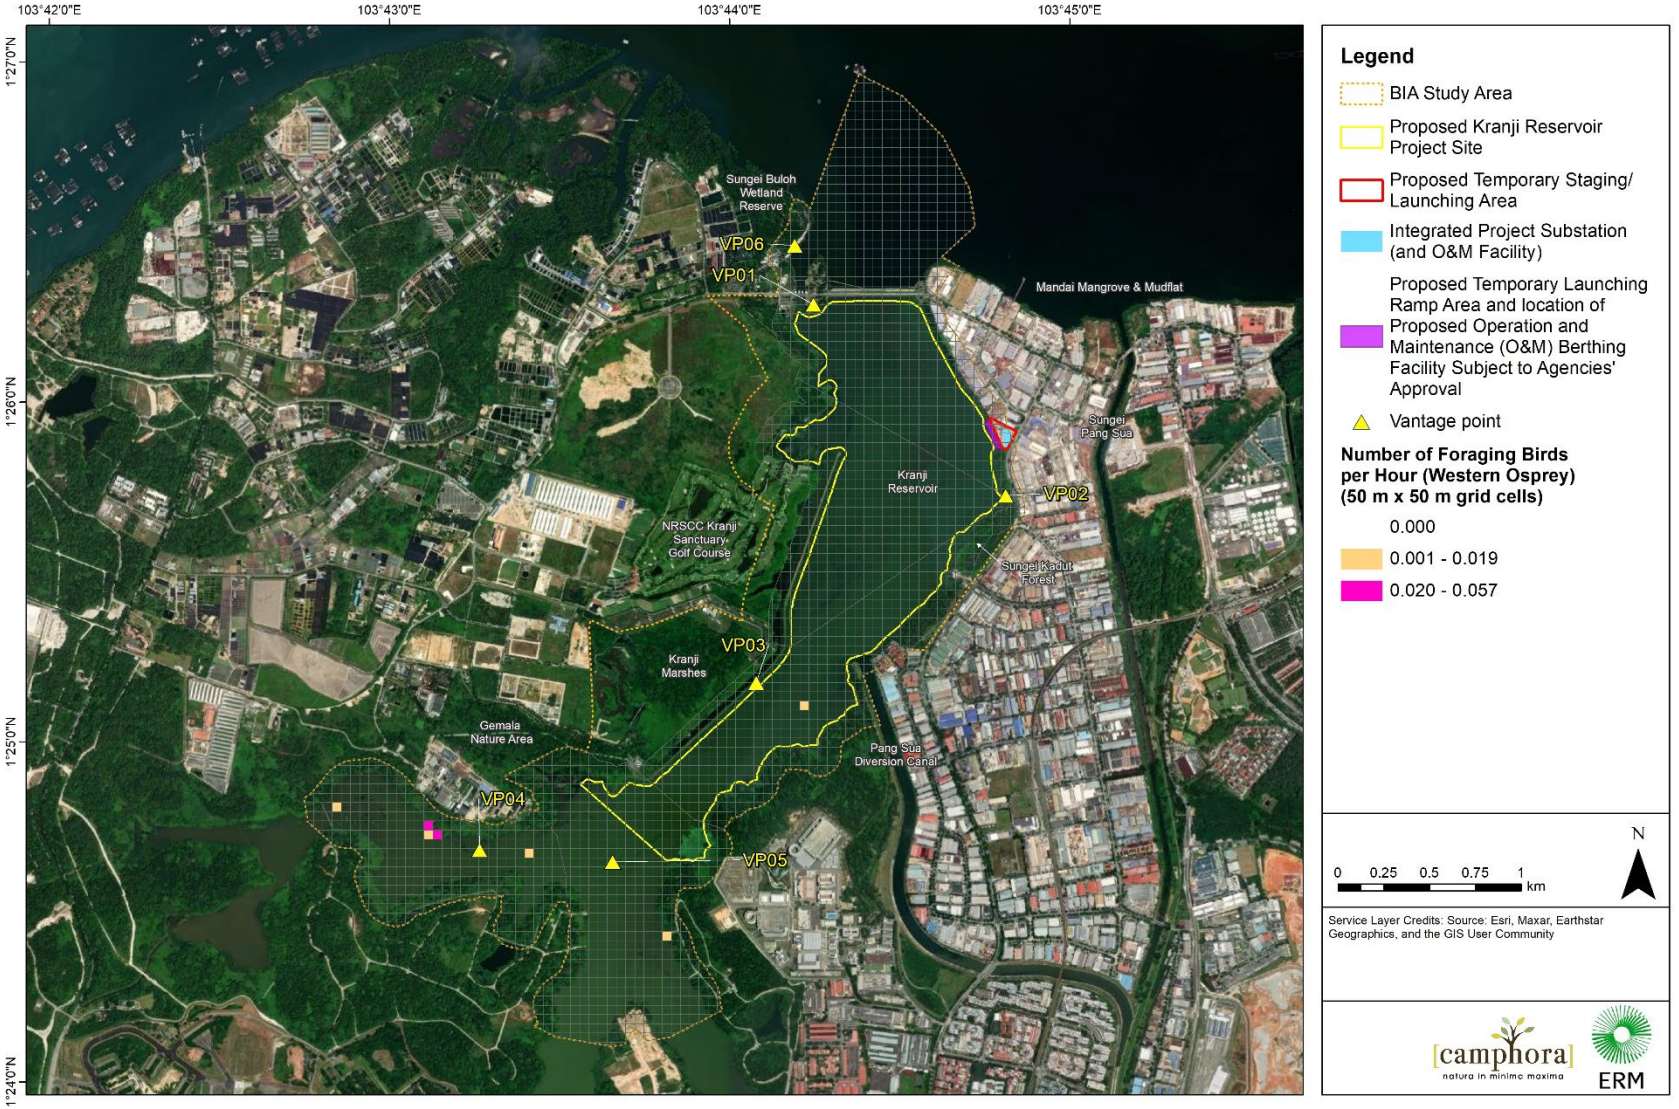

**Figure 3-52: Foraging Locations of the Western Osprey (*Pandion haliaetus*)**

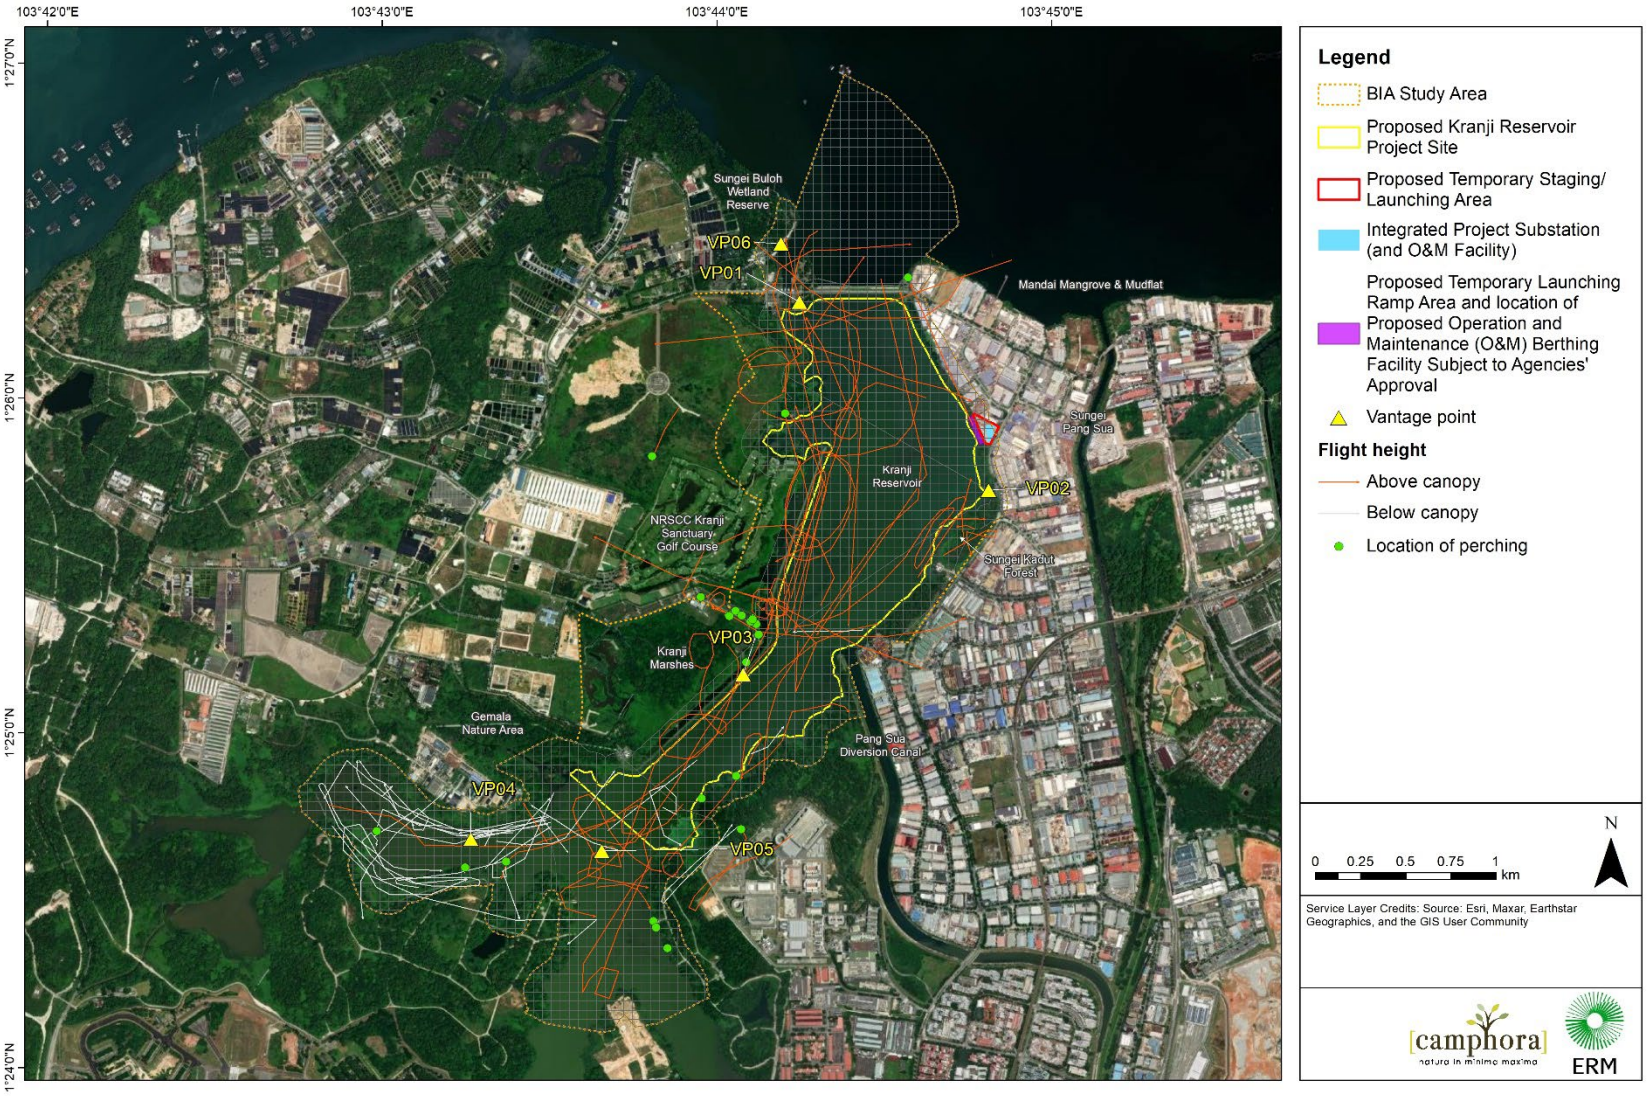

**Figure 3-53: Flight Paths of the Western Osprey (*Pandion haliaetus*)**

### Grey-headed Fish Eagle (*Haliaeetus ichthyaetus*)

Only one foraging event was recorded for the grey-headed fish eagle, and this was in the reservoir in front of Kranji bund (*Figure 3-54*).

However, this species was still observed actively using the site. It was observed perching or undertaking non-foraging flight paths around the southern part, and eastern part of the reservoir (near VP02) as shown in *Figure 3-55*. It was observed across all VPS locations, except for VP06 at SBWR. The bird preferred to perch on branches of dead trees around VP02, possibly for better visibility of aquatic prey fish such as Tilapias, Peacock bass and Snakeheads (Yong et al., 2016). On three occasions, prey was observed in the talons of the grey-headed fish eagle. There appears to be a higher usage of this species in the southern part of the reservoir outside of the Reservoir Project Site as shown in *Figure 3-55*.

Three birds, which includes two adults and one immature bird, were observed throughout the survey period, however, has not been possible to ascertain it they are the same individuals. Overall, 66.7% of flights were above tree canopy height (*Figure 3-55*).

An active nest was observed at the Sungei Kadut forest towards the end of the survey period in October 2021 (*Figure 3-55*).

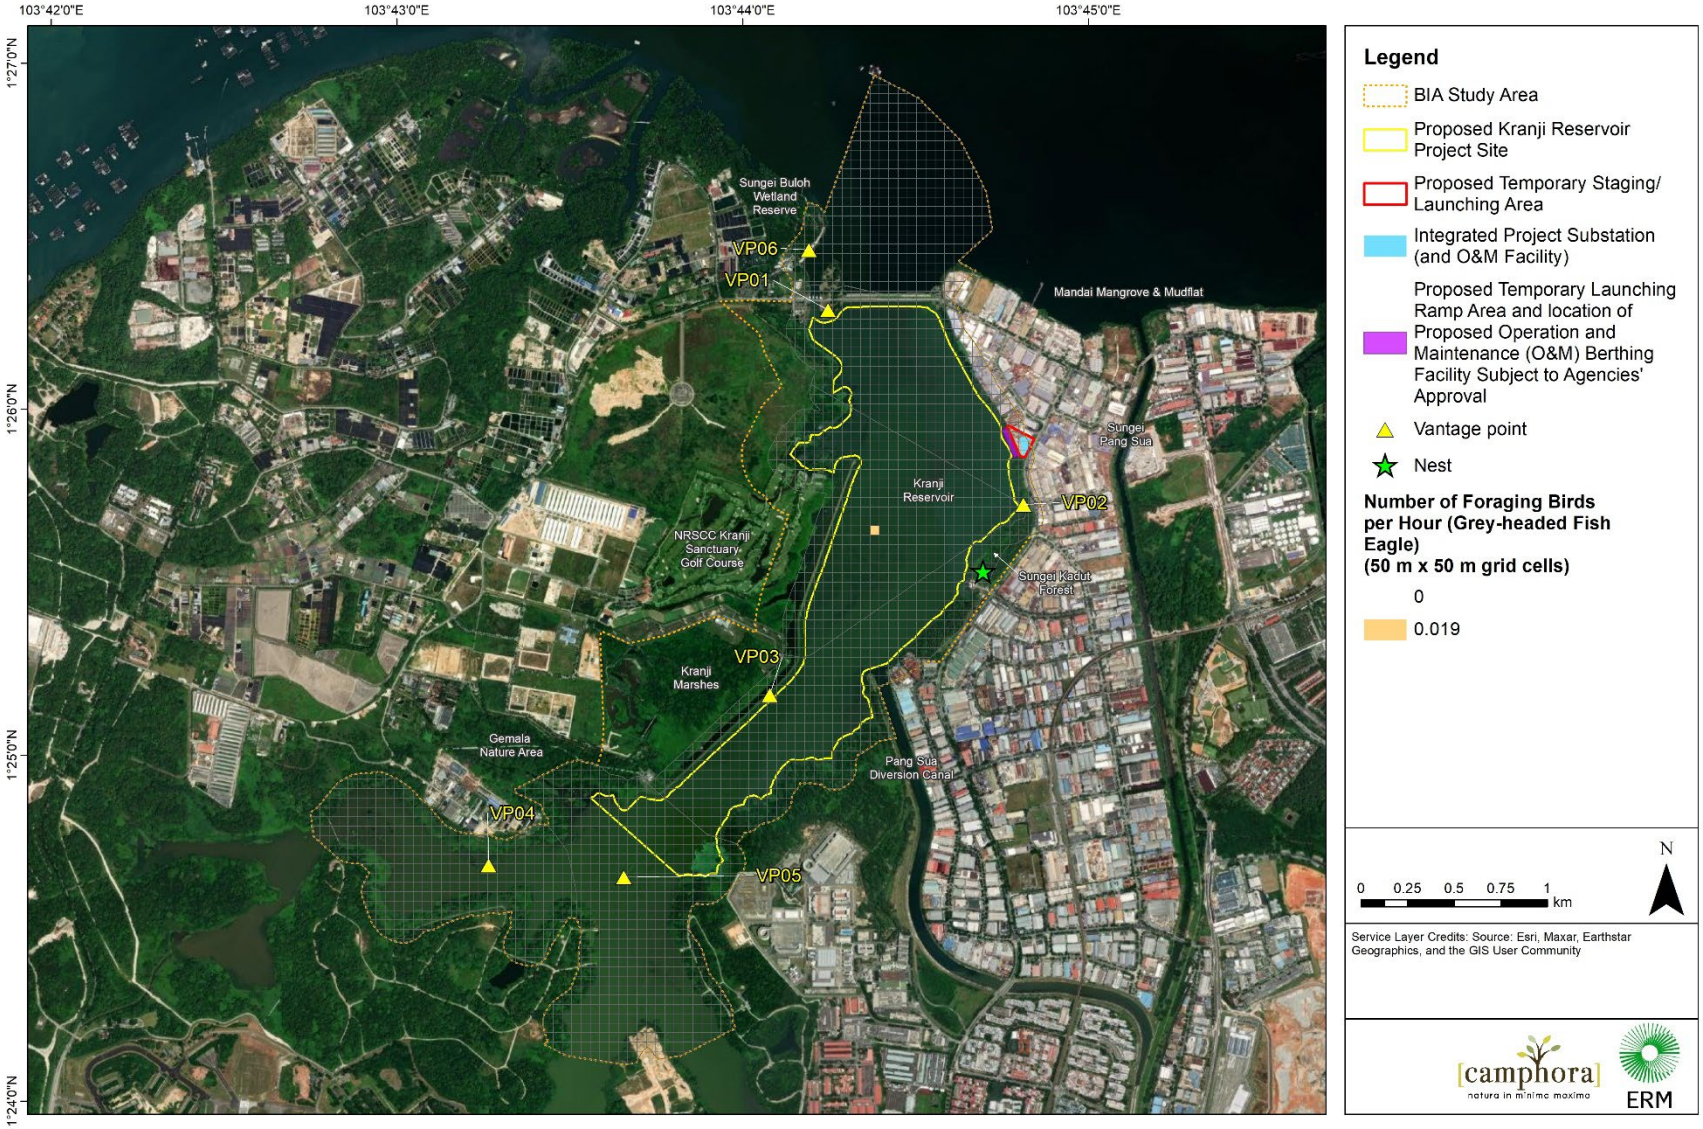

**Figure 3-54: Foraging and Nest Locations of the Grey-headed Fish Eagle (*Haliaeetus ichthyaetus*)**

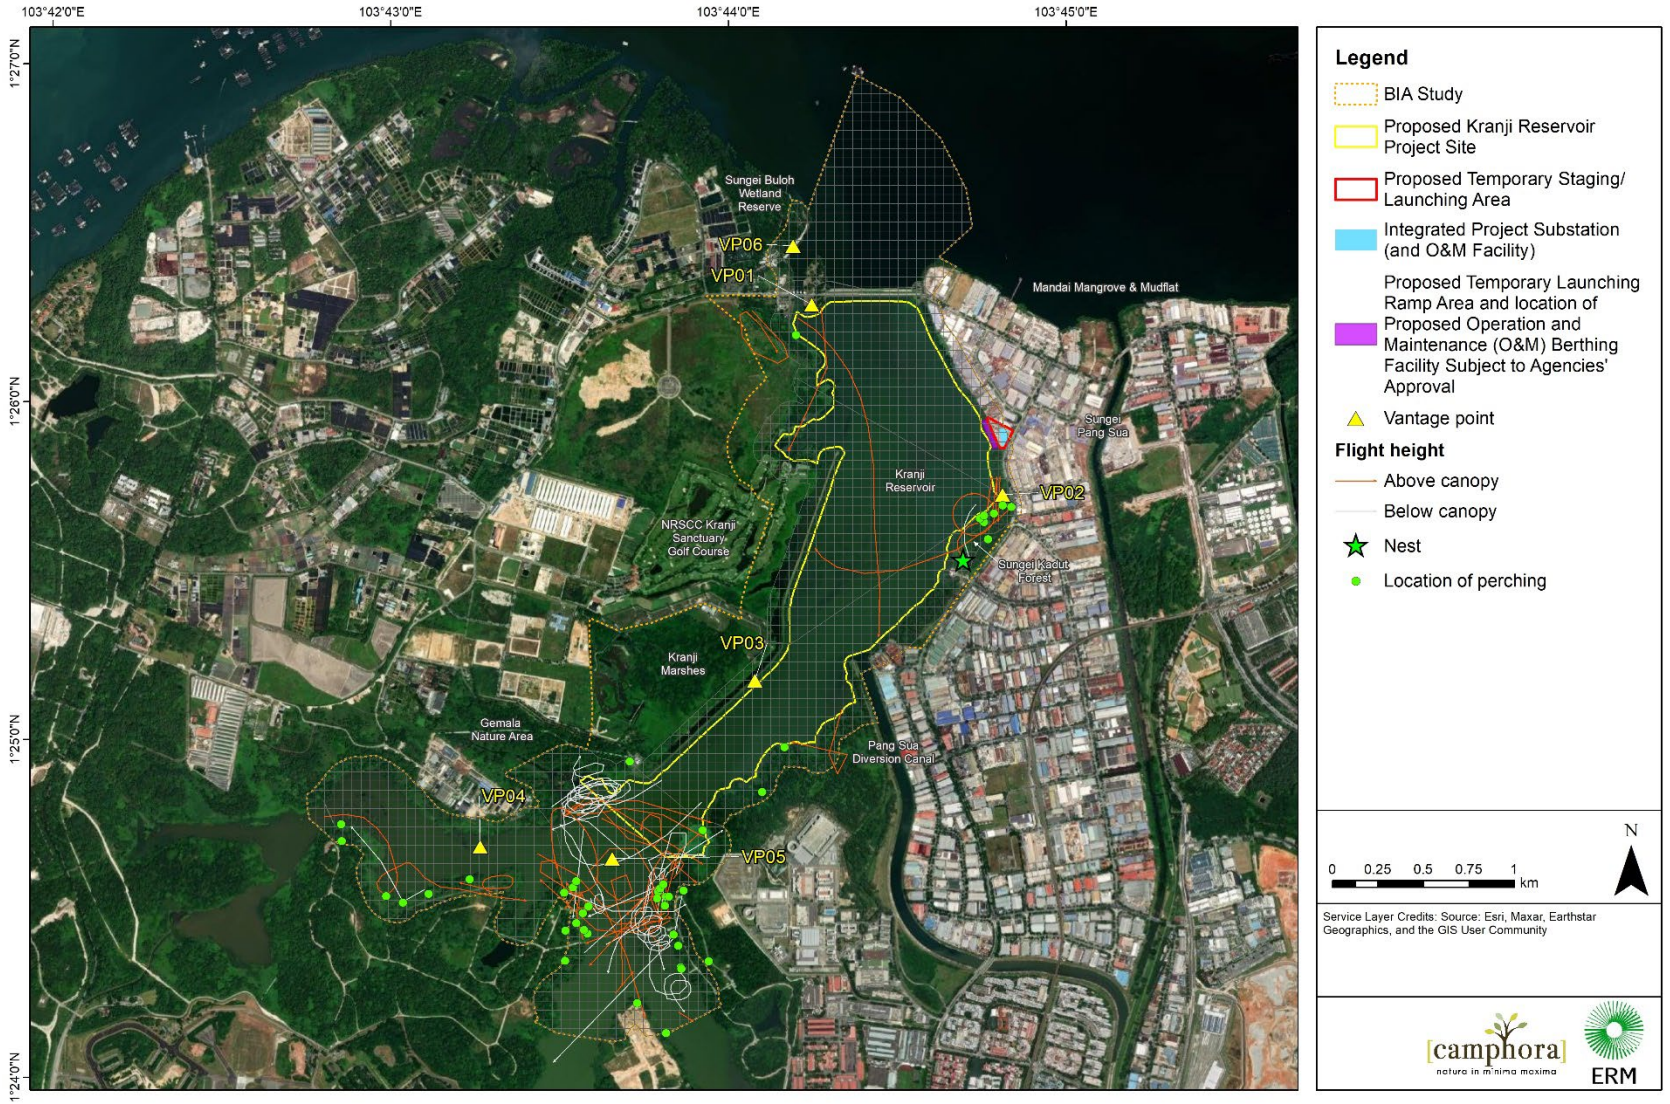

**Figure 3-55: Non-foraging Flight Paths and Perching Locations of the Grey-headed Fish Eagle (*Haliaeetus ichthyaetus*)**

### *3.4.2.2 Bird Density*

A total of 1,347 birds were recorded from the survey period of May 2021 to May 2022. The analysis only included records of birds that were in contact with the ground, vegetation, or water surface.

Higher bird density was observed in the southern reservoir area, outside of the Reservoir Project Site (*Figure 3-56*). Along the north-eastern reservoir edge, the higher bird density sites were attributed to communal roosts of the conservation significant black-crowned night heron (*Nycticorax nycticorax*), which is discussed further below. Along the southern-most reservoir edges, the higher bird density sites were attributed to common urban bird species that aggregate in flocks, such as the Asian glossy starling (*Aplonis panayensis*).

Along the reservoir edge, nests and roosts were present. The lower numbers observed in the southern reservoir area outside of the Reservoir Project Site is attributed to the lower number of night surveys conducted, for health and safety reasons.

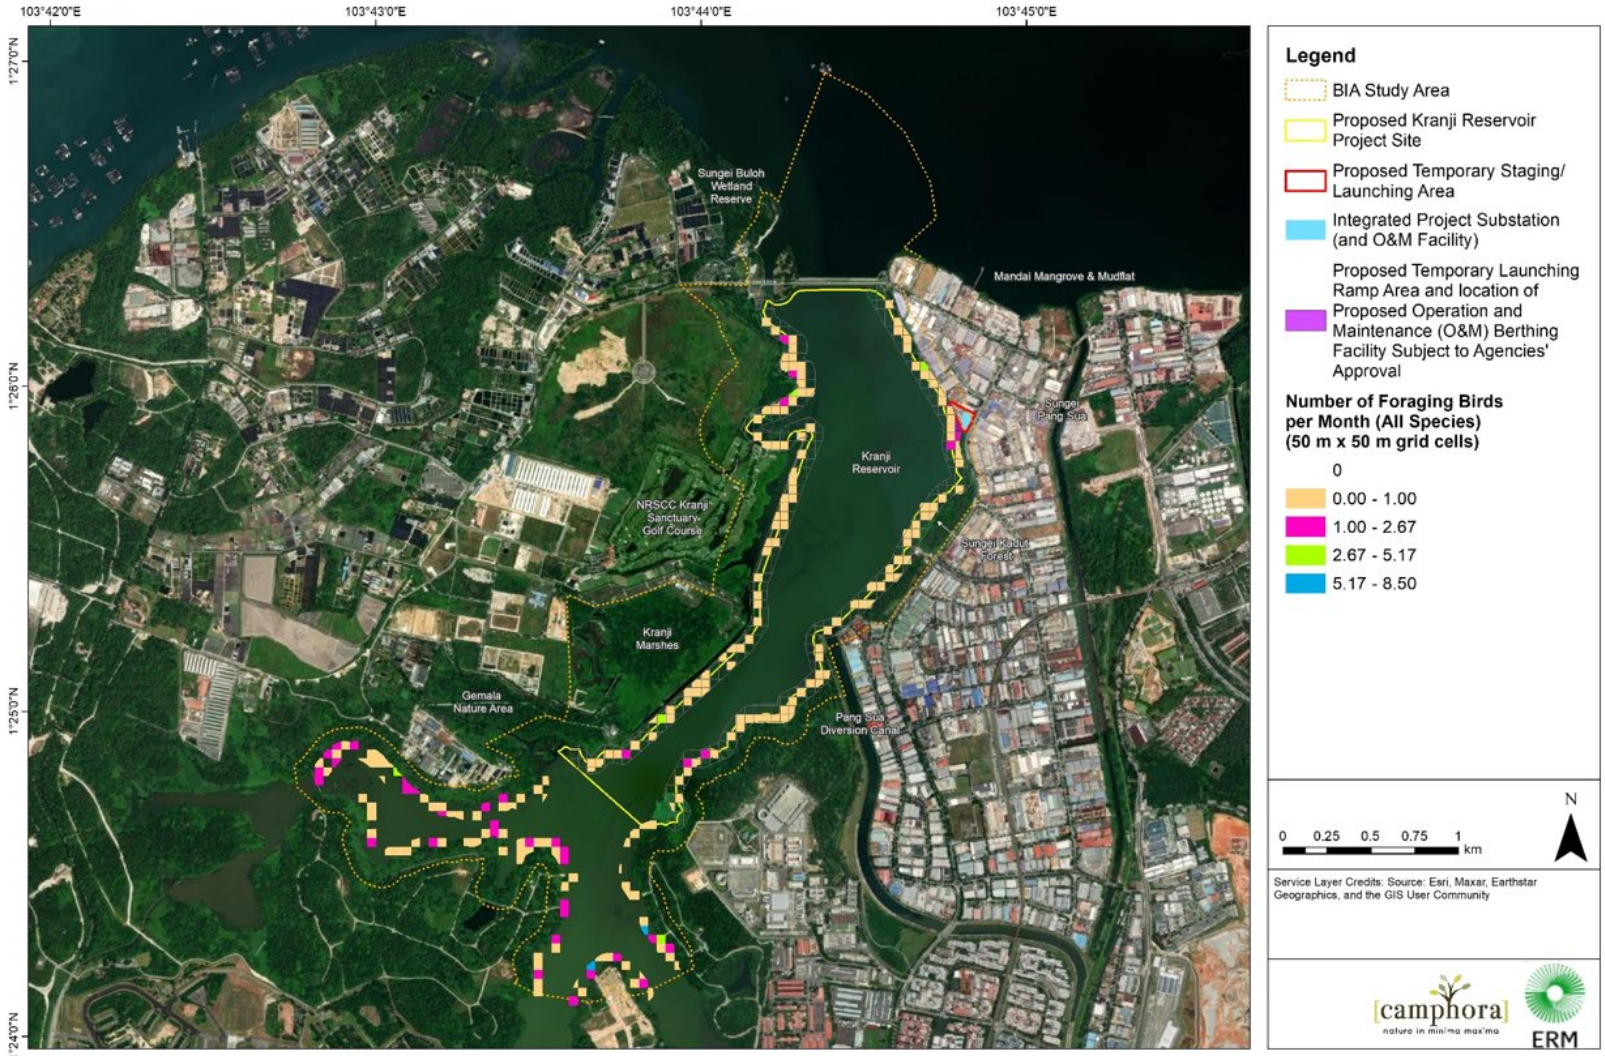

**Figure 3-56: All Recorded Bird Density along the Edge of Kranji Reservoir**

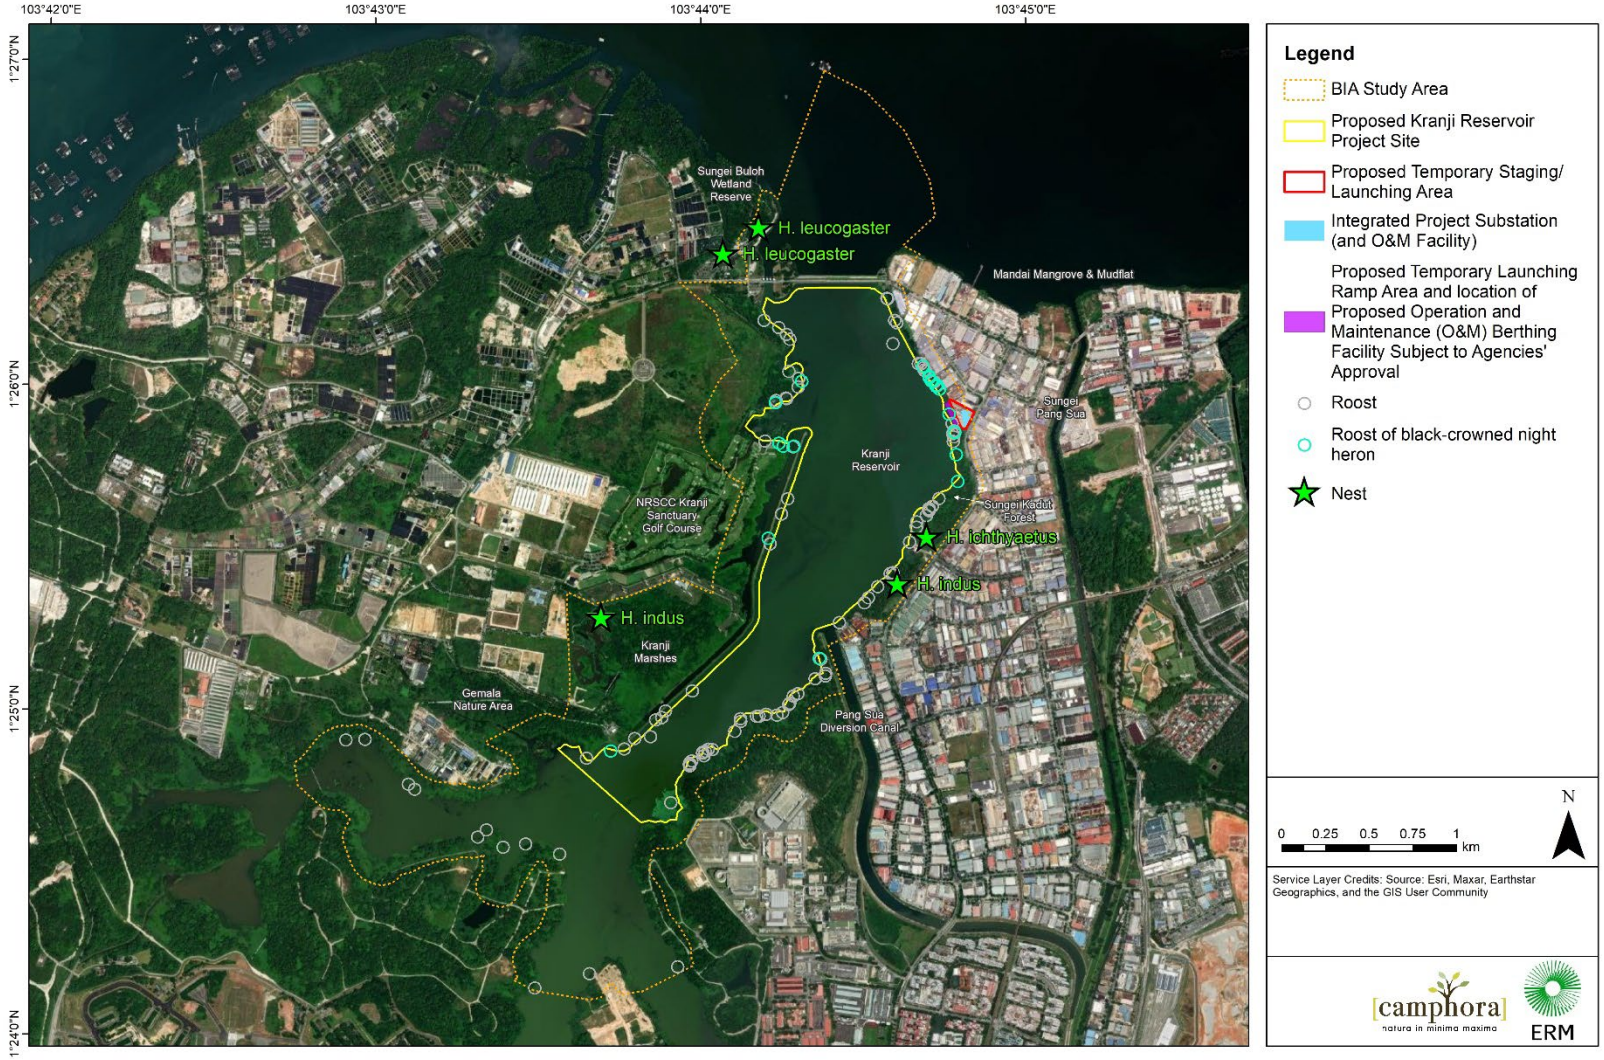

**Figure 3-57: All Nests and Roosts Observed at and along Kranji Reservoir**

The communal roosts of the black-crowned night heron were recorded along both edges in the northern part of the reservoir (*Figure 3-57*). In some observations up to 16 individuals were roosting together.

The black-crowned night heron is crepuscular (active in twilight) and has been observed to leave roost sites to forage in the evenings (Yong et al., 2013). However, it may also feed diurnally (del Hoyo et al., 1992). This species inhabits a wide range of aquatic environments, including mangroves, ponds, mudflats, canals and well-vegetated reservoir fringes (Yong et al., 2013). This species may feed on pastures, reservoirs, canals, aquaculture ponds (del Hoyo et al. 1992). It has been observed feeding in urban canals at night within Singapore (Yong et al., 2013).

In Singapore, the largest colony of black-crowned night heron known to exist was located at Khatib Bongsu, an area characterised by mangrove and mudflat habitats (Seng, 2021; Yong et al., 2013), located 10 km east of the BIA Study Area. The colony size had been estimated at over 1,000 individuals, however the colony was lost in July 1990 due to fogging activities (Yong et al., 2013). Fogging involves using aerosol pesticide spray to kill insects such as mosquitoes. Since then, only a few smaller colonies of approximately 20 pairs were observed at Pasir Ris Park mangrove, Lorong Halus wetland and Jurong Lake (Seng, 2021).

The observation of black-crowned night heron at freshwater wetlands, specifically Lorong Halus wetland and Jurong Lake, suggests that reservoir within the BIA Study Area is a suitable habitat for this species.

Additional verification surveys for this species in the vicinity of the proposed temporary Staging/ Launching Area and integrated Project Substation site were carried out. Two rounds of dawn (6.30am to 7.30am) and dusk (6.30pm to 7.30pm) surveys were conducted between 21st February and 7th April 2022. The black-crowned night herons were observed during one dawn survey and one dusk survey. On each occasion, two individuals were sighted at 7.07am and 7.43pm respectively (*Figure 3-58*). They were seen either flying out from the vegetation or flying back into the vegetation.

The findings suggest that:

1. Usage of the communal roost near the proposed temporary Staging/ Launching Area and integrated Project Substation site varies for the black-crowned night herons. The black-crowned night herons were not observed during every survey (i.e., only 2 out of the 4 occasions). Literature shows that the black-crowned night herons can have multiple roost sites (Endo et al., 2006), this may explain the irregular usage of the roost in this area.
2. The number of black-crowned night herons using the communal roost varies. During the baseline survey, up to 16 individuals were recorded. During the verification surveys, only 2 individuals were recorded each time.
3. This suggests the black-crowned night herons may using alternative roost sites within/around the BIA Study Area. Another roost location identified during the baseline survey, was the roost in front of the NSRCC golf course.
4. However, the continued presence of the black-crowned night herons indicates an active roost.
5. No black-crowned night herons were seen roosting along the ~150 m stretch of vegetation on the shoreline in front of the proposed temporary Staging/ Launching Area and integrated Project Substation site (*Figure 3-57*). This area is largely dominated by tall grasses with a few trees scattered. The lack of trees in this location may explain their absence here.

**Figure 3-58: Sightings of black-crowned night heron from baseline and verification surveys**

A total of 60 bird species were recorded to use the reservoir edge, dominated by native resident species. This includes 41 native resident, 6 introduced resident and 13 migrant species. The most abundantly recorded species differed for within the Reservoir Project Site, and outside of the Reservoir Project Site to the south.

Within the Reservoir Project Site, the most abundantly recorded species were the white-breasted waterhen (*Amaurornis phoenicurus*) with 54 individuals, striated heron (*Butorides striata*) with 46 individuals followed by the Nationally Endangered purple heron (*Ardea purpurea*) with 44 individuals. They make up 30% of the total observations. White-breasted waterhen is recorded along both reservoir edges, except the Kranji bund (*Figure 3-59*). Striated heron was observed more frequently along the eastern reservoir edge while the purple heron was observed more frequently along the western reservoir edge of the reservoir (*Figure 3-59*). Waterbirds, which includes the 16 focal species as well as the black-crowned night heron and cinnamon bittern (*Ixobrychus cinnamomeus*), made up approximately 45% of the observations (209 individuals).

To the south of the Reservoir Project Site, the most abundantly recorded species were the pink-necked green pigeon (*Treron vernans*) with 216 individuals, Javan myna (*Acridotheres javanicus*) with 197 individuals and Asian glossy starling (*Aplonis panayensis*) with 143 individuals (*Figure 3-59*). These species are commonly seen in urban areas and tend to aggregate in flocks, thus explaining their high numbers.

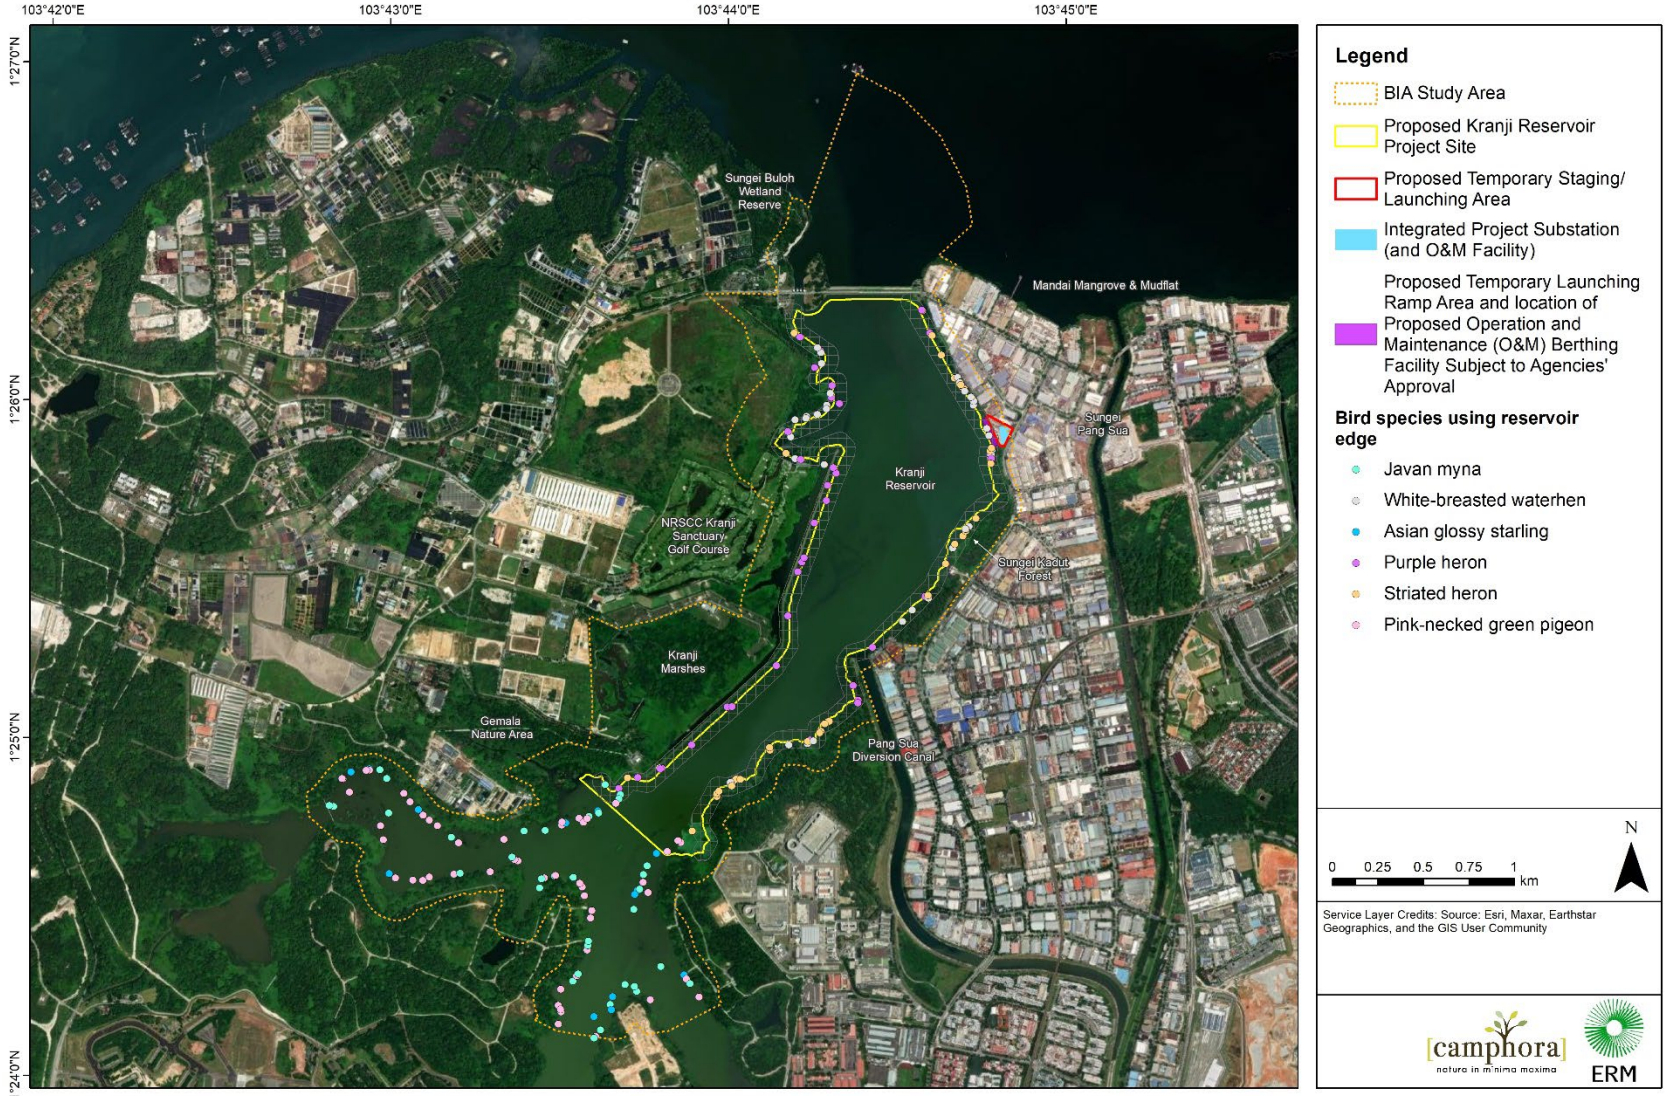

**Figure 3-59: Species Observed in Greatest Numbers along The Reservoir Edge**

Seventeen species of conservation significance were recorded using the reservoir edge, including waterbirds, raptors, and other birds that use reservoir edge.

The distribution of these species is described as below:

1. Purple heron: frequently recorded across western, eastern and southern reservoir edge;
2. Black-crowned night heron: multiple observations at the north-eastern reservoir edge (*Figure 3-60*); communal roost present (see discussion above; *Figure 3-57*);
3. Little tern: several observations along both western and eastern reservoir edges (*Figure 3-60*);
4. White-winged tern: one observation at Kranji bund along north-western reservoir edge;
5. Grey-headed fish eagle: four observations along the eastern reservoir edge (*Figure 3-60*);
6. Changeable hawk-eagle: one observation at the south-eastern reservoir edge (*Figure 3-60*);
7. Cinnamon bittern: one observation along the north-western part of reservoir edge (*Figure 3-60*);
8. Yellow bittern: mostly recorded along the southern reservoir edge (*Figure 3-60*);
9. White-browed crake: several observations along Kranji bund and south-eastern reservoir edge (*Figure 3-60*);
10. Common kingfisher: several observations along western and southern reservoir edge (*Figure 3-61*);
11. Black-capped kingfisher: one observation at Gemala Nature Area at north-western reservoir edge (*Figure 3-61*);
12. Common sandpiper: one observation along Kranji bund (*Figure 3-61*);
13. Oriental reed warbler: observations along north-western and southern reservoir edge (*Figure 3-61);*
14. Baya weaver: observation along north-eastern and south-western reservoir edge (*Figure 3-61*);
15. Large-billed crow: observations at Gemala Nature Area at north-western reservoir edge (*Figure 3-61*);
16. Oriental magpie-robin: several observations along eastern reservoir edge (*Figure 3-61);*
17. Long-tailed parakeet: one observation at south-western reservoir edge (*Figure 3-61*).

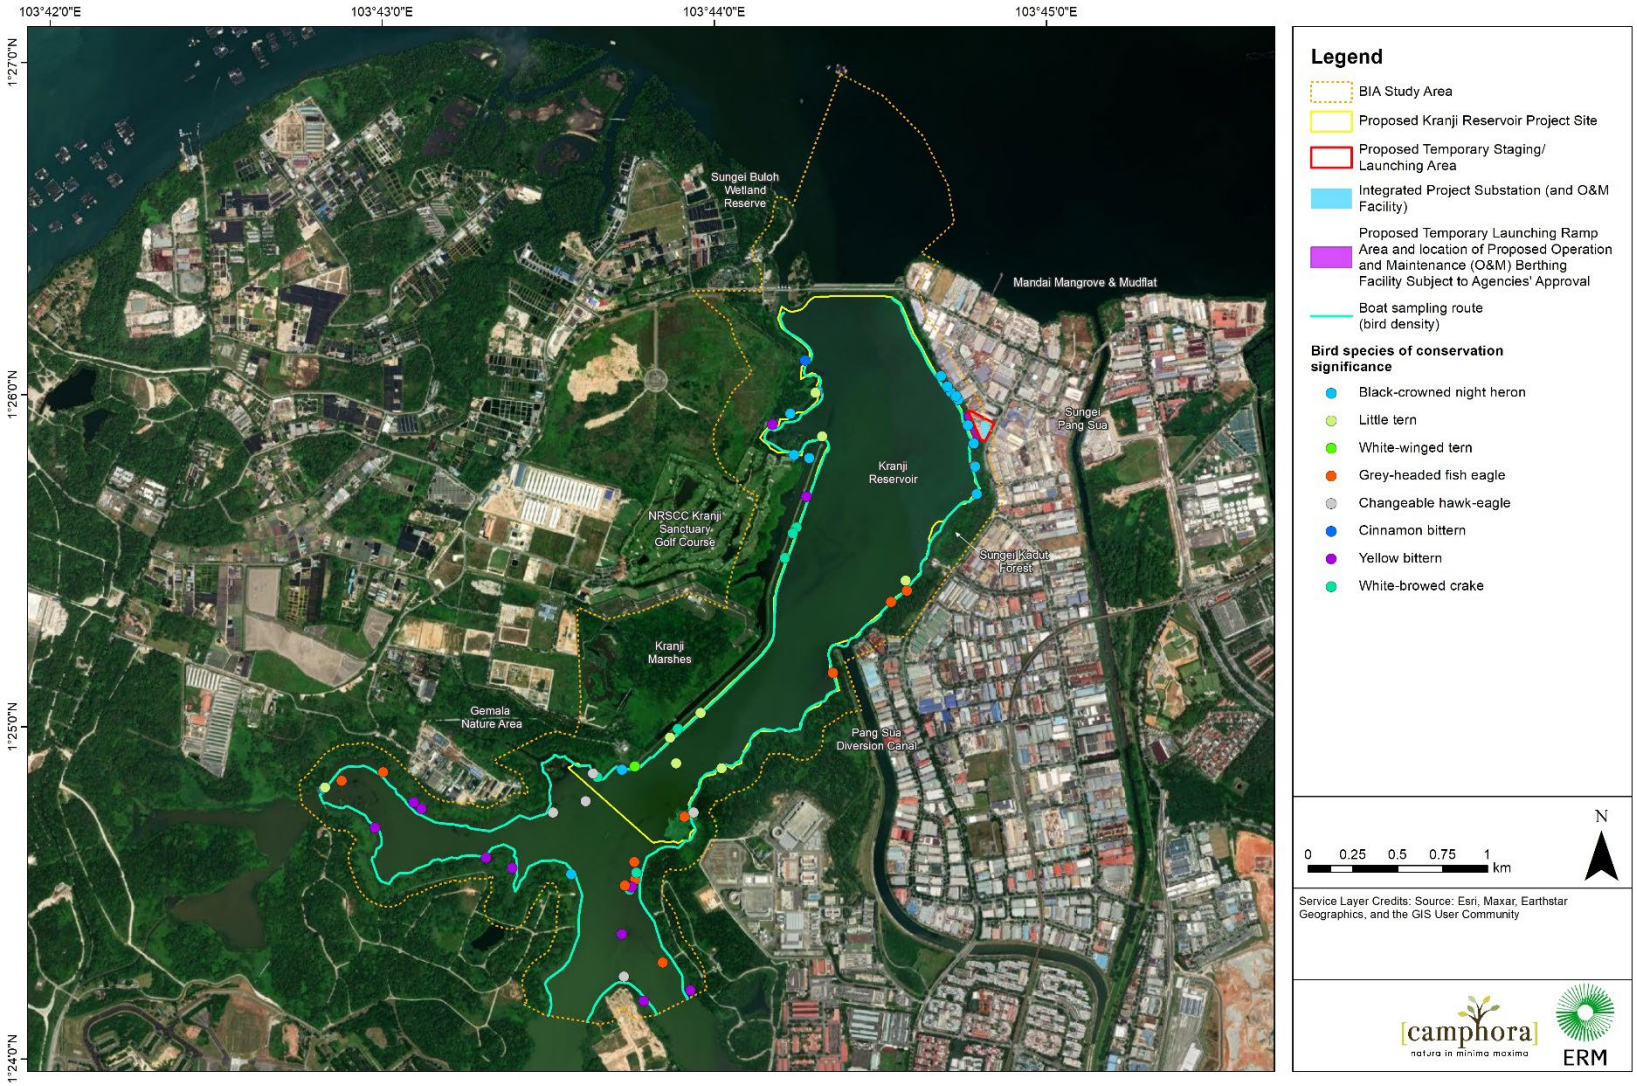

**Figure 3-60: Bird Species of Conservation Significance using Reservoir Edge for Selected Species (waterbirds and raptors)**

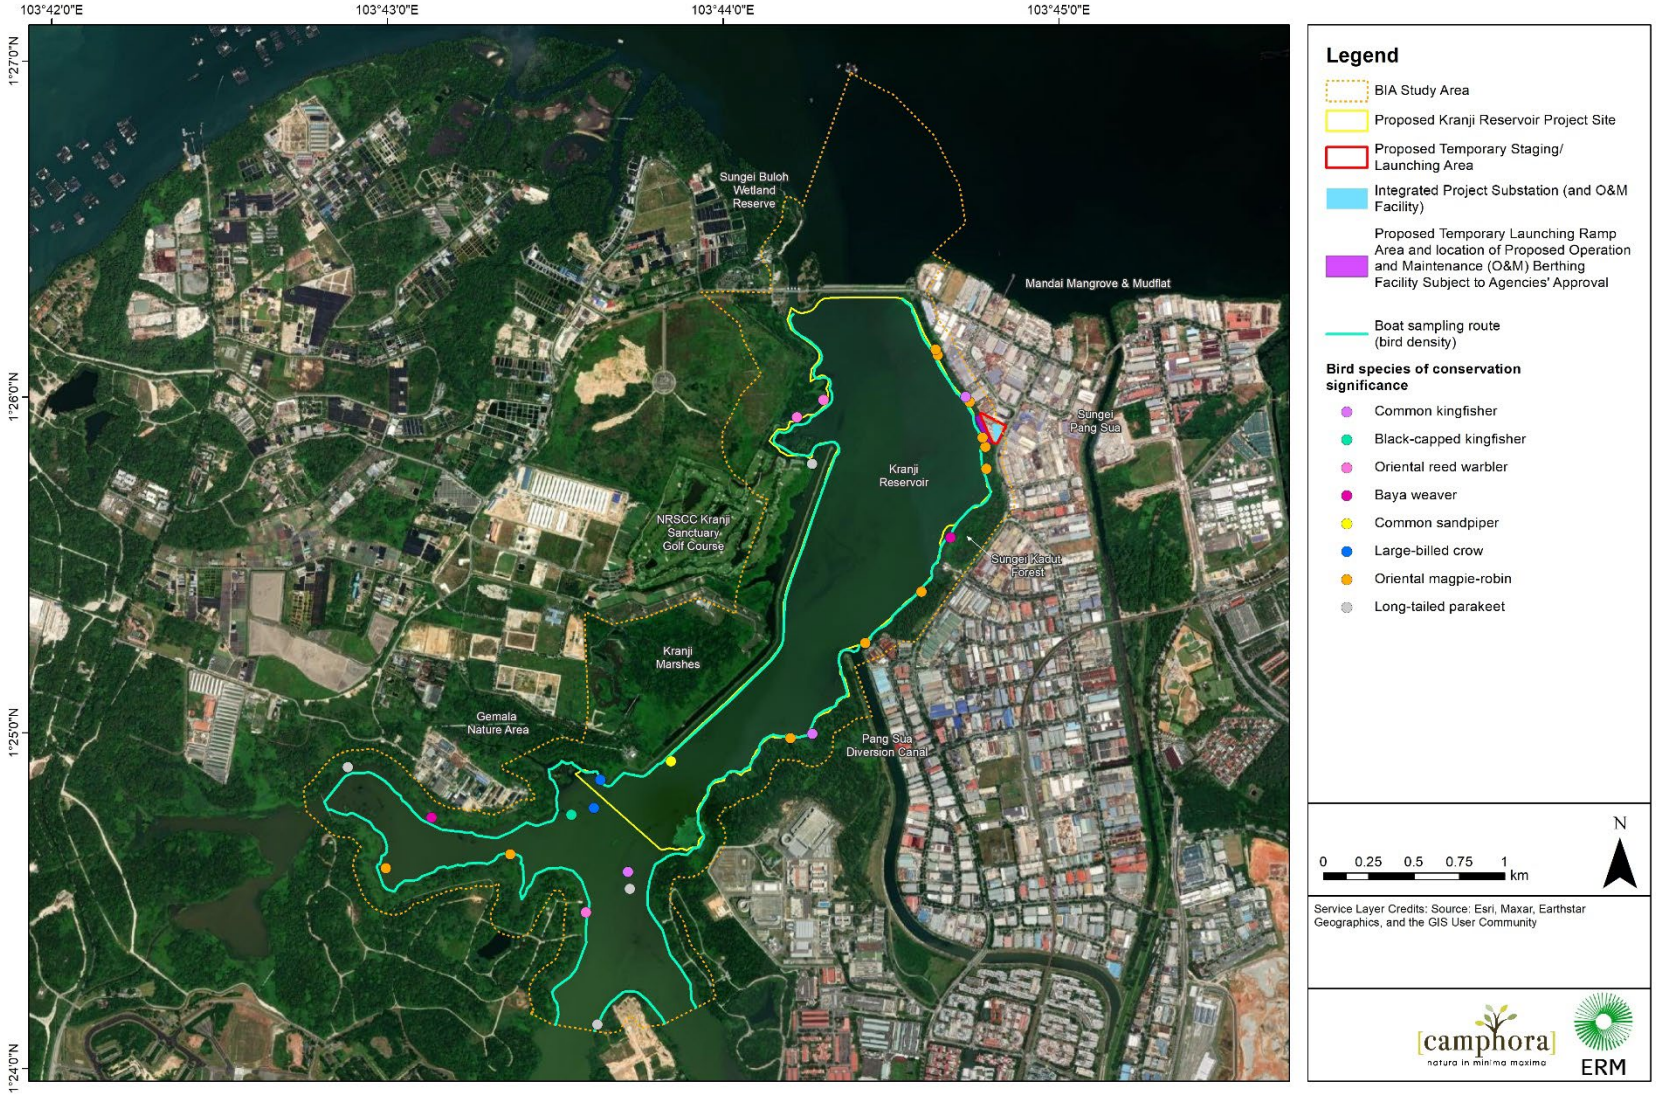

**Figure 3-61: Bird Species of Conservation Significance using Reservoir Edge (kingfisher, sandpiper and other passerine species)**

### 3.4.2.3 Flight Initiation Distance (FID)

During the surveys, flight initiation distance (FID) was recorded on 334 occasions for 24 species. The findings indicate a maximum and minimum average FID of 25 m and 5 m respectively (*Table 3-13*). Generally, species that have a longer FID are those that perched in a more exposed setting such as tree branches, treetops or reservoir banks. Examples are brahminy kite, white-bellied sea eagle, common sandpiper and grey-headed fish eagle. On the other hand, birds such as white-browed crake, oriental magpie-robin and Malaysian pied fantail which typically lay low among macrophytes or understory shrubs have lower FID. Their lower FID is a behavioural strategy to stay hidden from potential threats.

**Table 3-13: Average flight initiation distance (m) recorded for 24 species**

| Species | Average flight initiation distance (m) | Number of birds flushed |
|---|---|---|
| Olive-winged bulbul | 25.00 | 1 |
| Eastern barn owl | 25.00 | 1 |
| Brahminy kite | 20.00 | 2 |
| Common sandpiper | 20.00 | 5 |
| White-bellied sea eagle | 17.50 | 2 |
| Whiskered tern | 15.00 | 1 |
| Grey-headed fish eagle | 17.00 | 5 |
| Black-crowned night heron | 13.55 | 38 |
| Large-tailed nightjar | 13.86 | 7 |
| Intermediate egret | 16.38 | 53 |
| Purple heron | 12.04 | 68 |
| Common kingfisher | 12.50 | 2 |
| White-breasted waterhen | 6.27 | 30 |
| White-winged tern | 10.00 | 7 |
| Little tern | 10.00 | 15 |
| Yellow bittern | 6.50 | 8 |
| Red-wattled lapwing | 10.00 | 6 |
| White-throated kingfisher | 7.92 | 12 |
| Striated heron | 7.40 | 57 |
| White-browed crake | 6.00 | 3 |
| Collared kingfisher | 7.33 | 3 |
| Oriental magpie-robin | 6.00 | 3 |
| Malaysian pied fantail | 5.25 | 4 |
| Blue-throated bee-eater | 5.00 | 1 |

### 3.4.2.4 Bat Activity

A total of four species of insectivorous bats were detected, via their call structure and feeding buzz, feeding over the reservoir. Three of these species were recorded within the Reservoir Project Site. None of the four species are of conservation significance.

Overall, a higher number of feeding buzzes were recorded at the western reservoir edge near the Kranji bund followed by the southern-eastern part of the reservoir outside of the Reservoir Project Site. This is likely due to greater connectivity with surrounding vegetation.

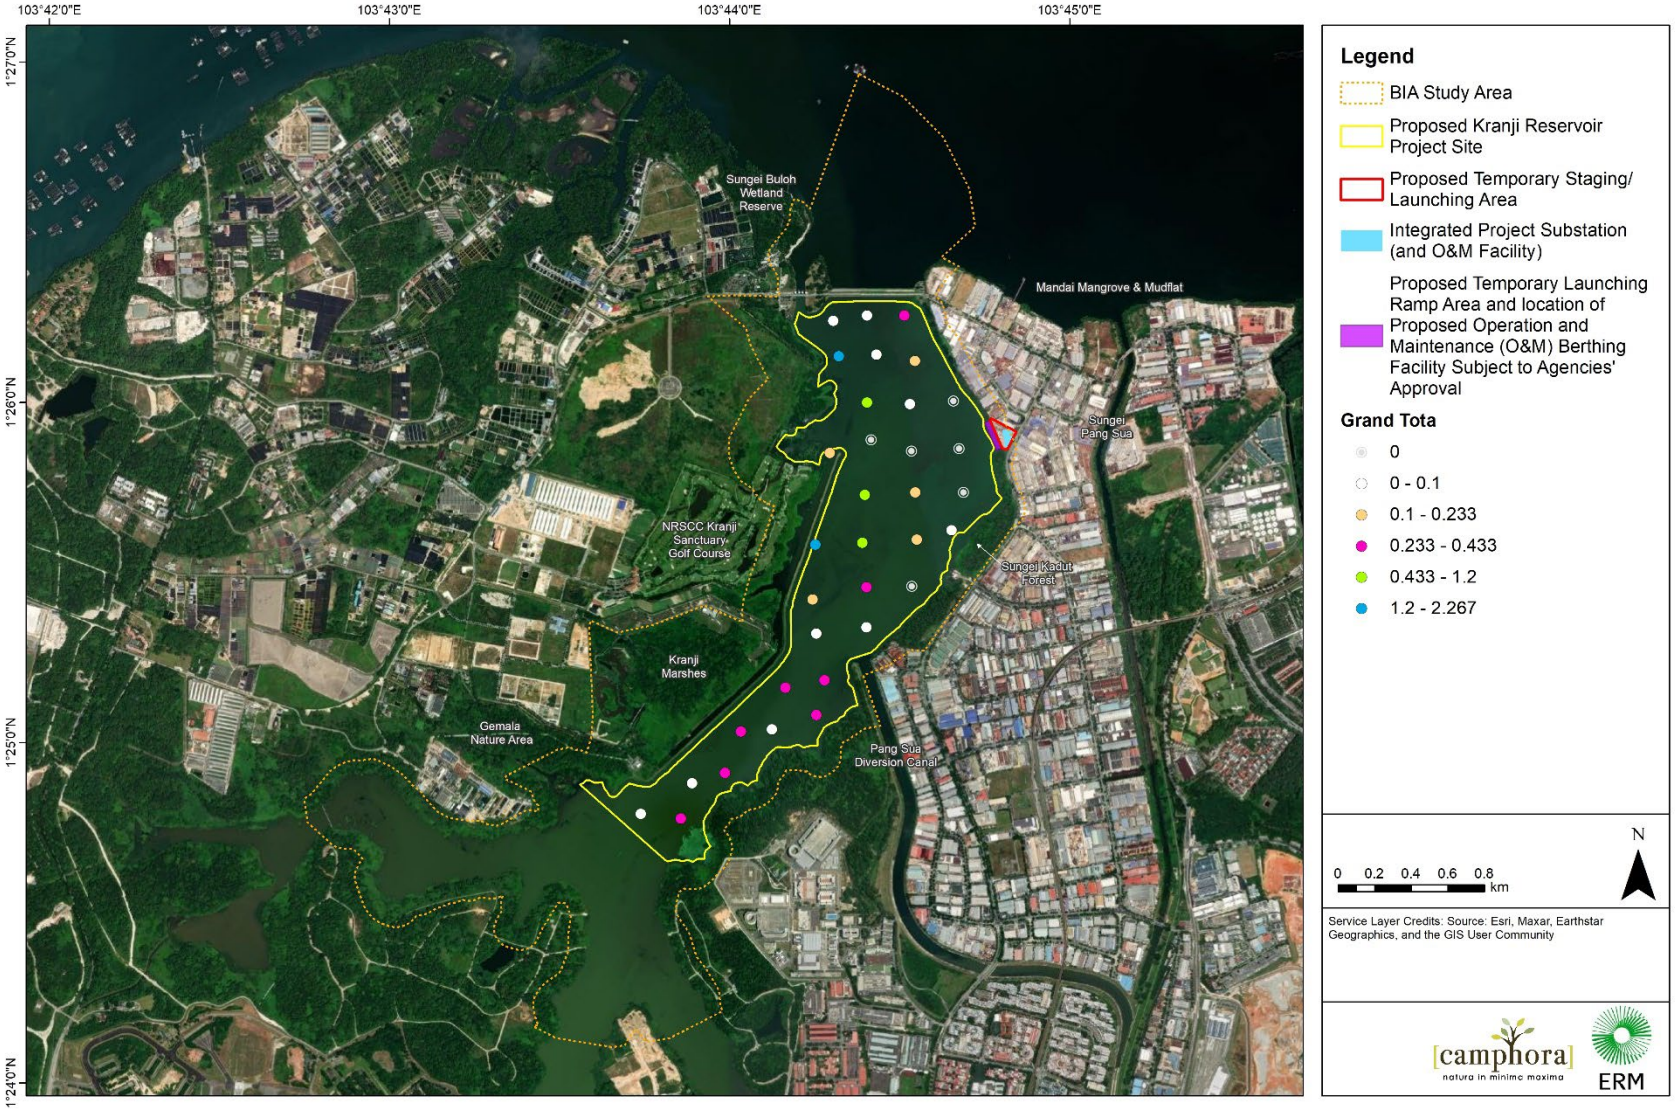

**Figure 3-62: Total Number of Feeding Buzzes Across All Bat Species**

Of the four species, Horsfield's bat showed the highest activity especially along Kranji bund with a maximum of 2.27 feeding buzz per minute[6]. Higher foraging activity was also observed in the southern area outside of the Reservoir Project Site. In South Asia, this species is found in forests and plantation estates near to water sources. Moreover, their roosts are typically located near the water's edge - in caves, rock crevices and possibly tree holes (Phelps et al., 2019). This explains the higher activity for this bat in the BIA Study Area. It is not surprising that the activity of the Horsfield's bat is higher along the western reservoir edge than the eastern reservoir edge, since it is more connected to the surrounding vegetation such as Kranji Marshes and the wider Lim Chu Kang area.

The feeding buzzes for pouch-bearing bat (*Saccolaimus saccolaimus*) is concentrated on the western reservoir edge. The highest feeding activity is 0.53 feeding buzz per minute. This species has adapted well to habitat disturbance and semi-urban environment, roosting in rock crevices, tree holes, as well as abandoned buildings (Baker and Lim, 2012).

For the Asiatic lesser yellow house bat (*Scotophilus kuhlii*), their feeding buzzes were mainly concentrated on the north-western end of the reservoir. Feeding buzzes were also detected in the southern area outside of the Reservoir Project Site, though to a lesser extent. The highest recorded feeding activity was 0.4 feeding buzz per minute. This bat is highly adapted to urban habitats, and is considered widespread throughout Singapore (Baker and Lim, 2012). Its feeding buzz was detected at almost every survey point.

The black-bearded tomb bat (*Taphozous melanopogon*) was only detected in the southern area outside of the Reservoir Project Site. This species is adaptable and widespread, and typically roosts in caves and rock crevices (Baker and Lim, 2012).

[6] Hügel et al (2017) established a natural feeding buzz rate of 1.3 passes per minute in wild *Myotis* species.

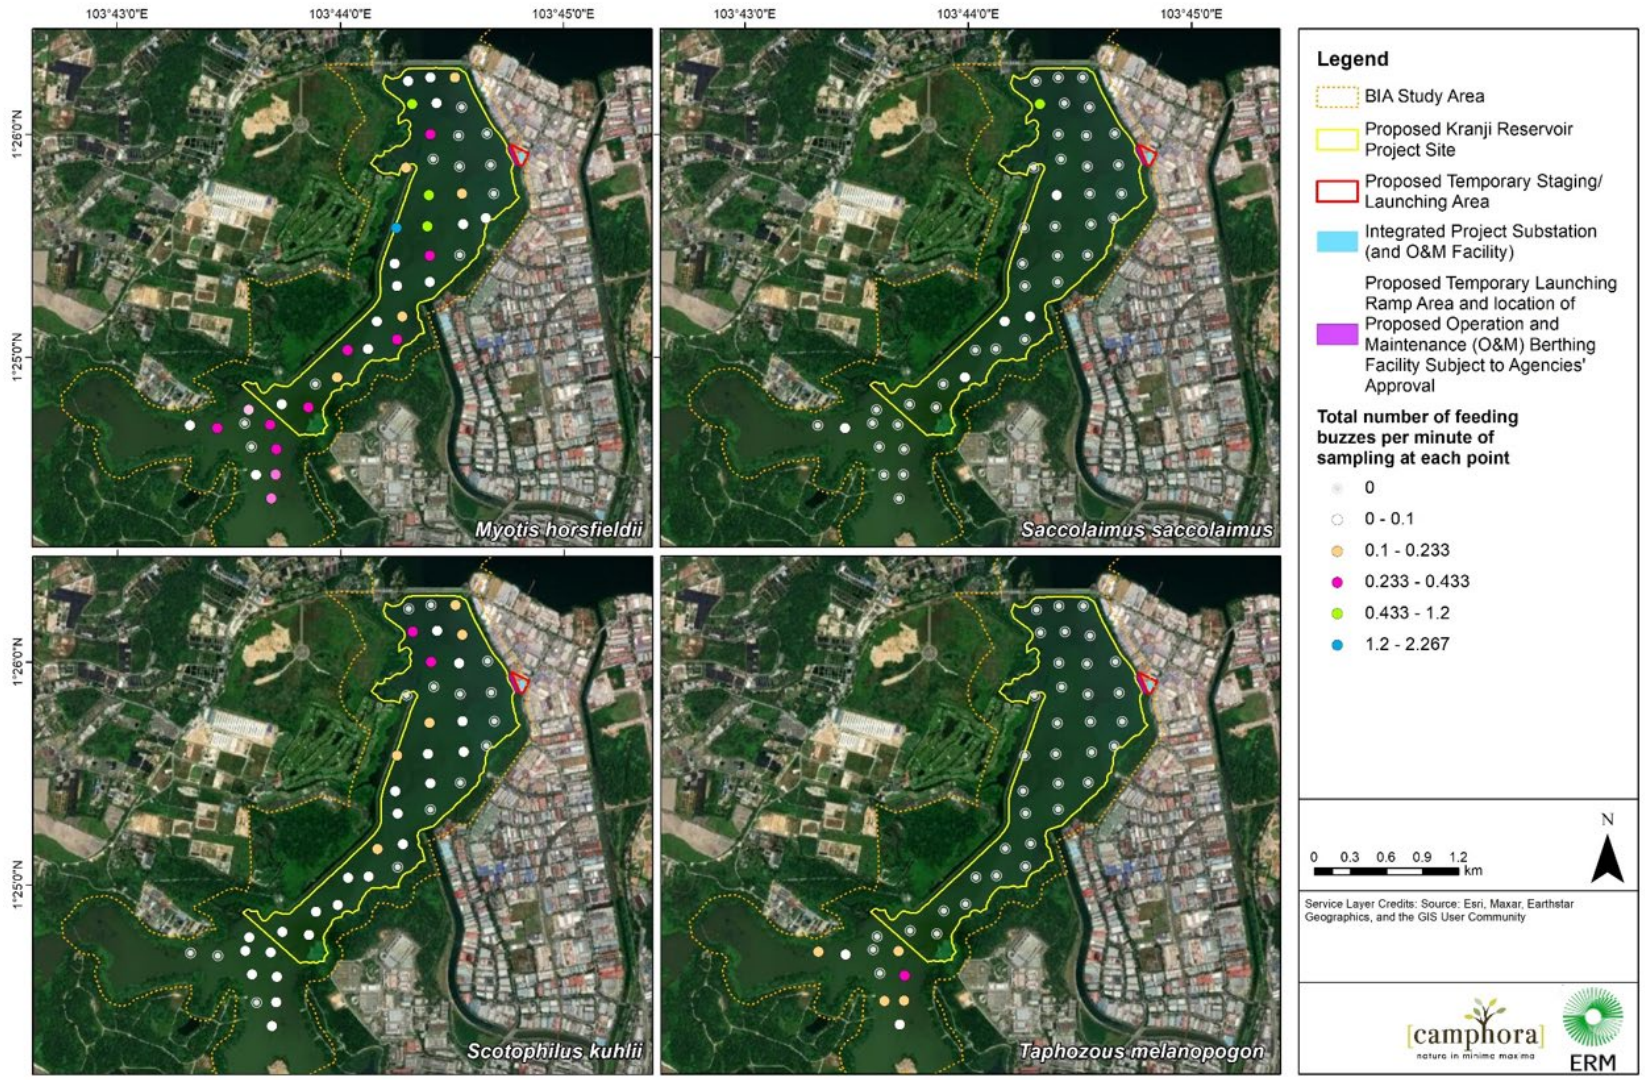

**Figure 3-63: Total Number of Feeding Buzzes of Bat Species Observed in Kranji Reservoir**

# 4. SUMMARY

The terrestrial biodiversity baseline survey findings indicate the terrestrial species using Kranji Reservoir include features which are of high ecological value. As the only large expanse of freshwater in north-western Singapore, the surveys indicate it is used as a foraging ground for a number of waterbird species, in particular little terns, herons and egrets, of which many of the latter appear to roost at nearby SBWR and forage in the reservoir during the day. In this respect, the shallower reservoir edges and periodic floating macrophytes are of particular importance as habitat to these species.

The reservoir edge was observed to be used by 60 bird species, dominated by native resident species (41 species). Nine species of conservation significance were recorded, including waterbirds such as the purple heron and black-crowned night heron, raptors such as the grey-headed fish eagle, and other passerine birds such as the oriental magpie-robin. Both reservoir edges appear to be well-used by these species, although certain species may have slightly different preference along the reservoir edges. This is discussed in *Section 3.4.2.2.*

Highest bird density was observed in the southern reservoir area, outside of the Reservoir Project Site (see *Figure 3-56*). Along the north-eastern reservoir edge, the communal roosts of 16 black-crowned night herons (nationally EN) was an important influence on bird density results, although later surveys recorded only 2 individuals and an additional roost at NSRCC.

VP surveys recorded a very low level of foraging across the VP survey area. Analysis indicates the majority of these foraging events were attributable to little tern (nationally EN) (23 foraging events per hour). Low foraging activity was recorded for white-bellied sea eagle, grey-headed fish eagle, purple heron, other ardeids and other terns in the VP survey area.

The open deeper water in the southern reservoir, outside the Reservoir Project Site, is a frequented foraging area for terns especially during the breeding season. To a lesser extent, the reservoir also serves as foraging ground for fish-eating raptors like white-bellied sea eagle and nationally Vulnerable grey-headed fish eagle, and Nationally Endangered smooth-coated otter (*Lutrogale perspicillata*). However, foraging by raptors was observed to be very low during the baseline surveys and active fishing by grey-headed fish eagle was recorded only once. In the evenings, four common bat species feed above the water surface for insects, mainly at the and north-western and southern reservoir areas outside the Reservoir Project Site. None of the bat species are considered of conservation significance.

The habitats abutting the reservoir harbours high biodiversity with up to 401 faunal species including 32 of conservation significance recorded in the Carpark B forest, Kranji Marshes, Kranji bund, and Sungei Kadut forest. This high diversity is considered to be mainly due to the mosaic of different habitat types available. They range from scrubland, exotic-dominated secondary forest, freshwater marsh to mixed forest of coastal and abandoned-land forest that also includes some native vegetation clusters. Floristically, 21 species were identified that are of conservation significance, the majority of which are within the Sungei Kadut forest area. An active grey-headed fish eagle nest was recorded in Sungei Kadut forest.

Today, Kranji Reservoir no longer resembles its original state of a mangrove-lined tidal river surrounded by lowland dipterocarp forest with small patches of freshwater swamp. Inevitably, decades of land-use change have altered the environment. However, the surveys indicate the current habitats today have a high ecological value for a diverse community of terrestrial flora and fauna that have adapted to the human-modified landscape. Furthermore, in the wider context, the Kranji Reservoir and its vicinity complements the nearby SBWR and Kranji Marshes as a habitat extension for some related species. The Kranji Reservoir is considered not to provide functional habitat for the migratory bird community for which SBWR was listed on the East Asian Australasian Flyway.

# APPENDIX A FLORA SPECIES LIST

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**

**Appendix A: Flora Species List**

**Table 1: Flora Species List**

| Species | Family | Tree | Origin | National Status | Global Status |
|---|---|---|---|---|---|
| *Acacia auriculiformis* | Fabaceae | Tree | Exotic | Naturalised | Least Concern |
| *Acalypha siamensis* | Euphorbiaceae | Shrub | Exotic | Naturalised | Not Assessed |
| *Adenanthera pavonina* | Fabaceae | Tree | Exotic | Naturalised | Least Concern |
| *Adiantum latifolium* | Adiantaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Adinobotrys atropurpureus* | Fabaceae | Tree | Exotic | Naturalised | Not Assessed |
| *Alocasia macrorrhizos* | Araceae | Herb | Exotic | Naturalised | Not Assessed |
| *Alsophila latebrosa* | Cyatheaceae | Tree | Native | Common | Not Assessed |
| *Alstonia scholaris* | Apocynaceae | Tree | Exotic | Naturalised | Least Concern |
| *Alternanthera sessilis* | Amaranthaceae | Herb | Cryptogenic | - | Least Concern |
| *Alysicarpus vaginalis* | Fabaceae | Herb | Native | Common | Not Assessed |
| *Amaranthus blitum* ssp. *oleraceus* | Amaranthaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Amblovenatum opulentum* | Thelypteridaceae | Climber | Native | Common | Not Assessed |
| *Andira inermis* | Fabaceae | Tree | Exotic | Casual | Least Concern |
| *Angelesia splendens* | Chrysobalanaceae | Tree | Native | Vulnerable | Least Concern |
| *Aphanamixis polystachya* | Meliaceae | Tree | Native | Common | Least Concern |
| *Aporosa benthamiana* | Phyllanthaceae | Tree | Native | Vulnerable | Not Assessed |
| *Ardisia elliptica* | Primulaceae | Tree | Native | Common | Not Assessed |
| *Areca catechu* | Arecaceae | Tree | Exotic | Casual | Not Assessed |
| *Arthrophyllum jackianum* | Araliaceae | Tree | Native | Common | Least Concern |
| *Artocarpus heterophyllus* | Moraceae | Tree | Exotic | Casual | Not Assessed |
| *Asplenium nidus* | Aspleniaceae | Epiphyte | Native | Common | Not Assessed |
| *Asystasia gangetica* ssp. *micrantha* | Acanthaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Axonopus compressus* | Poaceae | Herb | Exotic | Naturalised | Least Concern |
| *Bambusa vulgaris* | Poaceae | Shrub | Exotic | Casual | Not Assessed |
| *Baphia nitida* | Fabaceae | Shrub | Exotic | Casual | Least Concern |
| *Bauhinia × blakeana* | Fabaceae | Tree | Exotic | Cultivated only | Not Assessed |
| *Blechnopsis orientalis* | Blechnaceae | Herb | Native | Common | Not Assessed |
| *Bouea oppositifolia* | Anacardiaceae | Tree | Native | Critically endangered | Least Concern |
| *Caesalpinia crista* | Fabaceae | Climber | Native | Common | Not Assessed |
| *Calophyllum inophyllum* | Calophyllaceae | Tree | Native | Endangered | Least Concern |
| *Carallia brachiata* | Rhizophoraceae | Tree | Native | Vulnerable | Not Assessed |
| *Carallia brachiata "honiara'* | Rhizophoraceae | Tree | Exotic | Cultivated only | Not Assessed |
| *Carica papaya* | Caricaceae | Tree | Exotic | Casual | Data Deficient |
| *Caryota mitis* | Arecaceae | Tree | Native | Common | Least Concern |
| *Cassytha filiformis* | Lauraceae | Climber | Native | Common | Not Assessed |
| *Causonis trifolia* | Vitaceae | Climber | Native | Data Deficient | Not Assessed |
| *Cecropia pachystachya* | Urticaceae | Tree | Exotic | Naturalised | Not Assessed |
| *Cenchrus purpureus* | Poaceae | Herb | Exotic | Naturalised | Least Concern |
| *Centella asiatica* | Apiaceae | Herb | Native | Common | Least Concern |
| *Centotheca lappacea* | Poaceae | Herb | Native | Common | Not Assessed |
| *Centrosema molle* | Fabaceae | Climber | Exotic | Naturalised | Not Assessed |
| *Christella subpubescens* | Thelypteridaceae | Herb | Native | Common | Not Assessed |
| *Cinnamomum iners* | Lauraceae | Tree | Native | Common | Least Concern |
| *Cissus hastata* | Vitaceae | Climber | Native | Common | Not Assessed |
| *Claoxylon indicum* | Euphorbiaceae | Tree | Native | Common | Least Concern |
| *Clausena excavata* | Rutaceae | Shrub | Native | Common | Not Assessed |
| *Coccinia grandis* | Cucurbitaceae | Climber | Exotic | Naturalised | Not Assessed |
| *Colocasia esculenta* | Araceae | Herb | Exotic | Casual | Least Concern |
| *Combretum indicum* | Combretaceae | Climber | Exotic | Casual | Not Assessed |
| *Commelina diffusa* | Commelinaceae | Herb | Cryptogenic | - | Least Concern |
| *Connarus semidecandrus* | Connaraceae | Climber | Native | Critically endangered | Not Assessed |
| *Cordyline fruticosa* | Asparagaceae | Shrub | Exotic | Casual | Least Concern |
| *Cyclosorus interruptus* | Thelypteridaceae | Herb | Native | Common | Least Concern |
| *Cyperus aromaticus* | Cyperaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Cyperus brevifolius* | Cyperaceae | Herb | Native | Vulnerable | Least Concern |
| *Cyperus compactus* | Cyperaceae | Herb | Native | Common | Least Concern |
| *Cyperus mindorensis* | Cyperaceae | Herb | Native | Common | Least Concern |
| *Cyperus sphacelatus* | Cyperaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Cyrtophyllum fragrans* | Gentianaceae | Tree | Native | Common | Least Concern |
| *Davallia denticulata* | Davalliaceae | Epiphyte | Native | Common | Not Assessed |
| *Decalobanthus peltatus* | Convolvulaceae | Climber | Exotic | Naturalised | Not Assessed |
| *Dendrophthoe pentandra* | Loranthaceae | Epiphyte | Native | Common | Not Assessed |
| *Derris elliptica* | Fabaceae | Climber | Exotic | Naturalised | Not Assessed |
| *Derris trifoliata* | Fabaceae | Climber | Native | Common | Not Assessed |

| | | | | | |
|---|---|---|---|---|---|
| *Dicranopteris linearis* | Gleicheniaceae | Climber | Native | Common | Least Concern |
| *Digitaria bicornis* | Poaceae | Herb | Native | Critically endangered | Not Assessed |
| *Dillenia suffruticosa* | Dilleniaceae | Shrub | Native | Common | Not Assessed |
| *Dioscorea bulbifera* | Dioscoreaceae | Climber | Cryptogenic | - | Not Assessed |
| *Dioscorea sansibarensis* | Dioscoreaceae | Climber | Exotic | Naturalised | Not Assessed |
| *Dracaena aubryana* | Ruscaceae | Shrub | Exotic | Naturalised | Not Assessed |
| *Dracaena surculosa* | Ruscaceae | Shrub | Exotic | Naturalised | Not Assessed |
| *Eichhornia crassipes* | Pontederiaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Elaeis guineensis* | Arecaceae | Tree | Exotic | Casual | Least Concern |
| *Eleocharis dulcis* | Cyperaceae | Herb | Native | Vulnerable | Least Concern |
| *Eleocharis geniculata* | Cyperaceae | Herb | Native | Common | Least Concern |
| *Eleutheranthera ruderalis* | Asteraceae | Herb | Exotic | Naturalised | Not Assessed |
| *Emblica urinaria* | Phyllanthaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Epipremnum pinnatum* | Araceae | Epiphyte | Exotic | Naturalised | Not Assessed |
| *Falcataria falcata* | Fabaceae | Tree | Exotic | Naturalised | Least Concern |
| *Fibraurea tinctoria* | Menispermaceae | Climber | Native | Common | Not Assessed |
| *Ficus aurata* | Moraceae | Tree | Native | Common | Not Assessed |
| *Ficus benjamina* | Moraceae | Strangler | Cryptogenic | - | Least Concern |
| *Ficus fistulosa* | Moraceae | Tree | Native | Common | Least Concern |
| *Ficus grossularioides* var. *grossularioi* | Moraceae | Tree | Native | Common | Not Assessed |
| *Ficus heteropleura* | Moraceae | Climber | Native | Common | Not Assessed |
| *Ficus microcarpa* | Moraceae | Strangler | Native | Common | Least Concern |
| *Ficus religiosa* | Moraceae | Tree | Exotic | Naturalised | Not Assessed |
| *Ficus variegata* | Moraceae | Tree | Native | Common | Least Concern |
| *Fimbristylis dichotoma* | Cyperaceae | Herb | Native | Common | Least Concern |
| *Fimbristylis littoralis* | Cyperaceae | Herb | Native | Common | Least Concern |
| *Fimbristylis tetragona* | Cyperaceae | Herb | Native | Common | Least Concern |
| *Flagellaria indica* | Flagellariaceae | Climber | Native | Common | Not Assessed |
| *Garcinia celebica* | Clusiaceae | Tree | Native | Endangered | Least Concern |
| *Glochidion zeylanicum* var. *zeylanicur* | Phyllanthaceae | Tree | Native | Vulnerable | Least Concern |
| *Gnetum gnemon* var. *gnemon* | Gnetaceae | Tree | Native | Critically endangered | Least Concern |
| *Grona heterophylla* | Fabaceae | Herb | Native | Common | Not Assessed |
| *Grona triflora* | Fabaceae | Herb | Native | Common | Least Concern |
| *Grypothrix triphylla* | Thelypteridaceae | Herb | Native | Common | Not Assessed |
| *Guioa pleuropteris* | Sapindaceae | Tree | Native | Common | Not Assessed |
| *Gymnopetalum scabrum* | Cucurbitaceae | Shrub | Native | Common | Not Assessed |
| *Gynochthodes coriacea* | Rubiaceae | Herb | Native | Common | Not Assessed |
| *Haplopteris ensiformis* | Vittariaceae | Epiphyte | Native | Common | Not Assessed |
| *Hedyotis diffusa* | Rubiaceae | Herb | Native | Common | Least Concern |
| *Heptapleurum actinophyllum* | Araliaceae | Tree | Exotic | Casual | Least Concern |
| *Hibiscus tiliaceus* | Malvaceae | Tree | Native | Common | Least Concern |
| *Hydrilla verticillata* | Hydrocharitaceae | Herb | Cryptogenic | - | Least Concern |
| *Hyptis capitata* | Lamiaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Imperata cylindrica* | Poaceae | Herb | Native | Common | Not Assessed |
| *Indigofera hendecaphylla* | Fabaceae | Shrub | Exotic | Naturalised | Not Assessed |
| *Ipomoea aquatica* | Convolvulaceae | Climber | Native | Common | Least Concern |
| *Ipomoea cairica* | Convolvulaceae | Climber | Exotic | Naturalised | Least Concern |
| *Ipomoea grandifolia* | Convolvulaceae | Climber | Exotic | Naturalised | Least Concern |
| *Ipomoea indica* | Convolvulaceae | Climber | Exotic | Naturalised | Data Deficient |
| *Ipomoea obscura* | Convolvulaceae | Climber | Native | Common | Not Assessed |
| *Isachne globosa* | Poaceae | Herb | Native | Common | Least Concern |
| *Ischaemum ciliare* | Poaceae | Herb | Native | Common | Not Assessed |
| *Ischaemum muticum* | Poaceae | Herb | Native | Common | Least Concern |
| *Lantana camara* | Verbenaceae | Shrub | Exotic | Naturalised | Not Assessed |
| *Leea indica* | Vitaceae | Tree | Native | Common | Least Concern |
| *Legazpia polygonoides* | Linderniaceae | Herb | Cryptogenic | - | Not Assessed |
| *Leucaena leucocephala* | Fabaceae | Tree | Exotic | Naturalised | Not Assessed |
| *Limnocharis flava* | Alismataceae | Herb | Exotic | Naturalised | Not Assessed |
| *Lindernia crustacea* | Linderniaceae | Herb | Cryptogenic | - | Least Concern |
| *Lindsaea ensifolia* | Dennstaedtiaceae | Herb | Native | Common | Not Assessed |
| *Litsea elliptica* | Lauraceae | Tree | Native | Common | Least Concern |
| *Litsea umbellata* | Lauraceae | Tree | Native | Vulnerable | Least Concern |
| *Livistona* sp. | Arecaceae | Tree | Exotic | Cultivated only | Not Assessed |
| *Ludwigia hyssopifolia* | Onagraceae | Herb | Cryptogenic | - | Least Concern |
| *Ludwigia octovalvis* | Onagraceae | Herb | Cryptogenic | - | Least Concern |
| *Lygodium microphyllum* | Schizaeaceae | Climber | Native | Common | Least Concern |
| *Lygodium salicifolium* | Schizaeaceae | Climber | Native | Vulnerable | Not Assessed |
| *Macaranga bancana* | Euphorbiaceae | Tree | Native | Common | Not Assessed |
| *Macaranga conifera* | Euphorbiaceae | Tree | Native | Common | Not Assessed |

| | | | | | |
|---|---|---|---|---|---|
| *Macaranga gigantea* | Euphorbiaceae | Tree | Native | Common | Not Assessed |
| *Mallotus paniculatus* | Euphorbiaceae | Tree | Native | Common | Least Concern |
| *Mangifera indica* | Anacardiaceae | Tree | Exotic | Casual | Data Deficient |
| *Manihot carthagenensis* ssp. *glaziovii* | Euphorbiaceae | Tree | Exotic | Naturalised | Least Concern |
| *Melastoma malabathricum* | Melastomataceae | Shrub | Native | Common | Not Assessed |
| *Melicope lunu-ankenda* | Rutaceae | Tree | Native | Endangered | Least Concern |
| *Melothria pendula* | Cucurbitaceae | Climber | Exotic | Naturalised | Not Assessed |
| *Miconia crenata* | Melastomataceae | Shrub | Exotic | Naturalised | Not Assessed |
| *Mikania micrantha* | Asteraceae | Climber | Exotic | Naturalised | Not Assessed |
| *Mimosa diplotricha* | Fabaceae | Shrub | Exotic | Naturalised | Not Assessed |
| *Mimosa pudica* | Fabaceae | Shrub | Exotic | Naturalised | Least Concern |
| *Morinda citrifolia* | Rubiaceae | Tree | Native | Common | Not Assessed |
| *Mucuna pruriens* | Fabaceae | Climber | Exotic | Naturalised | Least Concern |
| *Muntingia calabura* | Malvaceae | Tree | Exotic | Naturalised | Not Assessed |
| *Murdannia nudiflora* | Commelinaceae | Herb | Cryptogenic | - | Not Assessed |
| *Musa cultivar* | Musaceae | Tree | Exotic | Cultivated only | Not Assessed |
| *Nelumbo nucifera* | Nelumbonaceae | Herb | Exotic | Casual | Data Deficient |
| *Nepenthes gracilis* | Nepenthaceae | Climber | Native | Common | Least Concern |
| *Nephelium lappaceum* | Sapindaceae | Tree | Cryptogenic | - | Least Concern |
| *Nephrolepis biserrata* | Oleandraceae | Herb | Native | Common | Not Assessed |
| *Neptunia oleracea* | Fabaceae | Herb | Exotic | Naturalised | Least Concern |
| *Neptunia plena* | Fabaceae | Shrub | Exotic | Naturalised | Least Concern |
| *Nypa fruticans* | Arecaceae | Shrub | Native | Vulnerable | Least Concern |
| *Ochna kirkii* | Ochnaceae | Shrub | Exotic | Naturalised | Least Concern |
| *Ottochloa nodosa* | Poaceae | Herb | Native | Common | Not Assessed |
| *Oxyceros longiflorus* | Rubiaceae | Climber | Native | Common | Not Assessed |
| *Paederia foetida* | Rubiaceae | Climber | Native | Common | Not Assessed |
| *Pandanus amaryllifolius* | Pandanaceae | Shrub | Exotic | Casual | Not Assessed |
| *Panicum repens* | Poaceae | Herb | Exotic | Naturalised | Least Concern |
| *Passiflora foetida* | Passifloraceae | Climber | Exotic | Naturalised | Not Assessed |
| *Passiflora laurifolia* | Passifloraceae | Climber | Exotic | Naturalised | Not Assessed |
| *Passiflora suberosa* | Passifloraceae | Climber | Exotic | Naturalised | Not Assessed |
| *Peltophorum pterocarpum* | Fabaceae | Tree | Native | Critically endangered | Not Assessed |
| *Pennisetum × advena 'Rubrum'* | Poaceae | Herb | Exotic | Cultivated only | Not Assessed |
| *Persicaria attenuata* | Polygonaceae | Herb | Exotic | Not assessed | Least Concern |
| *Persicaria barbata var. gracilis* | Polygonaceae | Herb | Cryptogenic | - | Least Concern |
| *Philydrum lanuginosum* | Philydraceae | Herb | Native | Critically endangered | Not Assessed |
| *Piper aduncum* | Piperaceae | Tree | Exotic | Naturalised | Least Concern |
| *Piper sarmentosum* | Piperaceae | Climber | Native | Common | Not Assessed |
| *Pipturus argenteus* | Urticaceae | Shrub | Cryptogenic | - | Least Concern |
| *Planchonella obovata* | Sapotaceae | Tree | Native | Common | Not Assessed |
| *Ploiarium elegans* | Bonnetiaceae | Tree | Native | Common | Least Concern |
| *Podocarpus rumphii* | Podocarpaceae | Tree | Exotic | Cultivated only | Near Threatened |
| *Polygala paniculata* | Polygalaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Pouzolzia zeylanica* | Urticaceae | Herb | Cryptogenic | - | Not Assessed |
| *Praxelis clematidea* | Asteraceae | Herb | Exotic | Naturalised | Not Assessed |
| *Premna serratifolia* | Lamiaceae | Climber | Native | Common | Least Concern |
| *Pteris vittata* | Pteridaceae | Herb | Cryptogenic | - | Least Concern |
| *Ptychosperma macarthurii* | Arecaceae | Tree | Exotic | Naturalised | Not Assessed |
| *Pyrrosia longifolia* | Polypodiaceae | Epiphyte | Native | Common | Not Assessed |
| *Pyrrosia piloselloides* | Polypodiaceae | Epiphyte | Native | Common | Not Assessed |
| *Ruellia repens* | Acanthaceae | Herb | Cryptogenic | - | Not Assessed |
| *Samanea saman* | Fabaceae | Tree | Exotic | Casual | Least Concern |
| *Sandoricum koetjape* | Meliaceae | Tree | Native | Vulnerable | Least Concern |
| *Scaevola albida* | Goodeniaceae | Shrub | Exotic | Cultivated only | Not Assessed |
| *Scleria ciliaris* | Cyperaceae | Herb | Native | Common | Least Concern |
| *Senna siamea* | Fabaceae | Tree | Exotic | Cultivated only | Least Concern |
| *Spathodea campanulata* | Bignoniaceae | Tree | Exotic | Naturalised | Least Concern |
| *Spermacoce exilis* | Rubiaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Spermacoce latifolia* | Rubiaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Spermacoce remota* | Rubiaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Sphagneticola trilobata* | Asteraceae | Herb | Exotic | Naturalised | Not Assessed |
| *Stenochlaena palustris* | Blechnaceae | Climber | Native | Common | Not Assessed |
| *Stenotaphrum secundatum* | Poaceae | Herb | Exotic | Naturalised | Least Concern |
| *Striga asiatica* | Orobanchaceae | Herb | Cryptogenic | - | Not Assessed |
| *Struchium sparganophorum* | Asteraceae | Herb | Exotic | Naturalised | Least Concern |
| *Swietenia macrophylla* | Meliaceae | Tree | Exotic | Casual | Vulnerable |
| *Symplocos fasciculata* | Symplocaceae | Tree | Native | Vulnerable | Not Assessed |
| *Syzygium borneense* | Myrtaceae | Tree | Native | Common | Not Assessed |

| | | | | | |
|---|---|---|---|---|---|
| *Syzygium cerasiforme* | Myrtaceae | Tree | Native | Common | Not Assessed |
| *Syzygium cumini* | Myrtaceae | Tree | Exotic | Naturalised | Least Concern |
| *Syzygium grande* | Myrtaceae | Tree | Native | Common | Not Assessed |
| *Syzygium myrtifolium* | Myrtaceae | Tree | Native | Critically endangered | Not Assessed |
| *Syzygium polyanthum* | Myrtaceae | Tree | Native | Common | Not Assessed |
| *Syzygium zeylanicum* | Myrtaceae | Shrub | Native | Common | Not Assessed |
| *Taenitis blechnoides* | Pteridaceae | Climber | Native | Common | Not Assessed |
| *Terminalia catappa* | Combretaceae | Tree | Native | Common | Least Concern |
| *Tetracera indica* | Dilleniaceae | Climber | Native | Common | Not Assessed |
| *Tetrastigma* sp. | Vitaceae | Climber | Native | Critically endangered | Not Assessed |
| *Thalia geniculata* | Marantaceae | Shrub | Exotic | Cultivated only | Least Concern |
| *Thunbergia erecta* | Acanthaceae | Shrub | Exotic | Cultivated only | Not Assessed |
| *Trema tomentosum* | Cannabaceae | Shrub | Native | Vulnerable | Least Concern |
| *Tridax procumbens* | Asteraceae | Herb | Exotic | Naturalised | Not Assessed |
| *Urochloa maxima* | Poaceae | Herb | Exotic | Naturalised | Not Assessed |
| *Urochloa mutica* | Poaceae | Herb | Exotic | Naturalised | Least Concern |
| *Utricularia bifida* | Lentibulariaceae | Herb | Cryptogenic | - | Least Concern |
| *Vernonia cinerea* | Asteraceae | Herb | Native | Common | Not Assessed |
| *Vitex pinnata* | Lamiaceae | Tree | Native | Common | Least Concern |
| *Volkameria inermis* | Lamiaceae | Shrub | Native | Common | Not Assessed |

# APPENDIX B LIST AND LOCATION OF SPECIES CONSERVATION SIGNIFICANCE

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix B: List and Location of Species of Conservation Significance**

**Table 1: List of Species of Conservation Significance**

| Species | Family | Tree | Origin | National Status |
|---|---|---|---|---|
| *Aporosa benthamiana* | Phyllanthaceae | Tree | Native | Vulnerable |
| *Connarus semidecandrus* | Connaraceae | Climber | Native | Critically endangered |
| *Garcinia celebica* | Clusiaceae | Tree | Native | Endangered |
| *Glochidion zeylanicum* var. *zeylanicum* | Phyllanthaceae | Tree | Native | Vulnerable |
| *Litsea umbellata* | Lauraceae | Tree | Native | Vulnerable |
| *Melicope lunu-ankenda* | Rutaceae | Tree | Native | Endangered |
| *Nypa fruticans* | Arecaceae | Shrub | Native | Vulnerable |
| *Philydrum lanuginosum* | Philydraceae | Herb | Native | Critically endangered |
| *Sandoricum koetjape* | Meliaceae | Tree | Native | Vulnerable |
| *Symplocos fasciculata* | Symplocaceae | Tree | Native | Vulnerable |
| *Tetrastigma* sp. | Vitaceae | Climber | Native | Critically endangered |
| *Digitaria bicornis** | Poaceae | Herb | Native | Critically endangered |
| *Cyperus brevifolius** | Cyperaceae | Herb | Native | Vulnerable |
| *Eleocharis dulcis** | Cyperaceae | Herb | Native | Vulnerable |
| *Lygodium salicifolium** | Schizaeaceae | Climber | Native | Vulnerable |
| *Trema tomentosum** | Cannabaceae | Shrub | Native | Vulnerable |

**Location of specimens are not provided. Refer to Section 3.3.2 'Species of Conservation Significance' of the Terrestrial Biodiversity Baseline Report*

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix B: List and Location of Species of Conservation Significance**

**Table 2: Location of Species of Conservation Significance Surveyed**

| Site | Species | Family | Origin | National Status | Habit | Northing | Easting |
|---|---|---|---|---|---|---|---|
| Sungei Kadut | *Aporosa benthamiana* | Phyllanthaceae/ Euphorbiaceae | Native | Vulnerable | Tree | 44898.52472 | 17873.40305 |
| Sungei Kadut | *Connarus semidecandrus* | Connaraceae | Native | Critically endangered | Climber | 45400.18806 | 18283.95448 |
| Sungei Kadut | *Garcinia celebica* | Clusiaceae | Native | Endangered | Tree | 44895.65051 | 17854.81824 |
| Sungei Kadut | *Glochidion zeylanicum var. zeylanicum* | Phyllanthaceae | Native | Vulnerable | Tree | 45383.93185 | 18328.02286 |
| Sungei Kadut | *Litsea umbellata* | Lauraceae | Native | Vulnerable | Tree | 44898.52472 | 17873.40305 |
| Kranji Reservoir Edge | *Melicope lunu-ankenda* | Rutaceae | Native | Endangered | Tree | 46027.7438 | 17236.11806 |
| Sungei Kadut | *Melicope lunu-ankenda* | Rutaceae | Native | Endangered | Tree | 45394.76777 | 18339.48565 |
| Sungei Kadut | *Melicope lunu-ankenda* | Rutaceae | Native | Endangered | Tree | 45310.51434 | 18213.39615 |
| Kranji Reservoir Edge | *Nypa fruticans* | Arecaceae | Native | Vulnerable | Tree | 43827.76134 | 16763.50527 |
| Kranji Reservoir Edge | *Nypa fruticans* | Arecaceae | Native | Vulnerable | Tree | 44259.86258 | 17385.61205 |
| Kranji Reservoir Edge | *Nypa fruticans* | Arecaceae | Native | Vulnerable | Tree | 44616.23943 | 17549.88442 |
| Sungei Kadut | *Sandoricum koetjape* | Meliaceae | Native | Vulnerable | Tree | 45558.6386 | 18378.21911 |
| Sungei Kadut | *Sandoricum koetjape* | Meliaceae | Native | Vulnerable | Tree | 44880.50214 | 17844.13423 |
| Sungei Kadut | *Symplocos fasciculata* | Symplocaceae | Native | Vulnerable | Tree | 45385.70263 | 18286.40221 |
| Sungei Kadut | *Tetrastigma sp.* | Vitaceae | Native | Critically endangered | Climber | 45545.25918 | 18373.87848 |
| Sungei Kadut | *Tetrastigma sp.* | Vitaceae | Native | Critically endangered | Climber | 45450.60795 | 18345.94231 |
| Sungei Kadut | *Tetrastigma sp.* | Vitaceae | Native | Critically endangered | Climber | 45450.60795 | 18345.94231 |
| Sungei Kadut | *Tetrastigma sp.* | Vitaceae | Native | Critically endangered | Climber | 45132.93549 | 18089.75123 |

# APPENDIX C LIST AND LOCATION OF LARGE SPECIMENS

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**

**Appendix C: List and Location of Large Specimens**

**Table 1: List and Location of Large Specimens**

| Site | Species | Family | Origin | Status | Habit | Girth/ spread (m) | Height (m) | Northing | Easting |
|---|---|---|---|---|---|---|---|---|---|
| Kranji Reservoir Edge | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 12 | 12 | 46198.24624 | 17341.06703 |
| Kranji Reservoir Edge | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 15 | Unassessed | 44790.05632 | 17728.17105 |
| Kranji Reservoir Edge | *Bambusa vulgaris* | Poaceae | Exotic | Casual | Shrub | 12 | 12 | 45421.08946 | 18212.73266 |
| Kranji Reservoir Edge | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 12 | 8 | 45665.67591 | 18361.75293 |
| Sungei Kadut Forest | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 9 | 15 | 45600.43551 | 18391.01849 |
| Sungei Kadut Forest | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 3 | 20 | 45497.16056 | 18332.8124 |
| Sungei Kadut Forest | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 4 | 10 | 44990.40945 | 17954.42253 |
| Sungei Kadut Forest | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 5 | 12 | 44897.08848 | 17842.13175 |
| Kranji Reservoir Carpark B | *Ficus microcarpa* | Moraceae | Native | Common | Strangler | 8 | 20 | 46505.98394 | 17172.7059 |

# APPENDIX D LIST OF PROBABLE AND RECORDED FAUNAL SPECIES

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**

**Appendix D: List of Probable and Recorded Faunal Species**

**Table 1: Species Summary Table**

| Faunal group | Total no. of probable species | | Total no. of recorded species | | Total no. of recorded species not on probable list (CS species) |
|---|---|---|---|---|---|
| | All species | CS species | All species | CS species | |
| Aculeate hymenopterans | 113 | 5 | 52 | 1 | 0 |
| Bees | 57 | 1 | 17 | 0 | 0 |
| Stinging wasps | 56 | 4 | 35 | 1 | 0 |
| Odonates | 55 | 1 | 42 | 1 | 3 (1) |
| Dragonflies | 46 | 1 | 35 | 2 | 3 (1) |
| Damselflies | 9 | 0 | 7 | 0 | 0 |
| Butterflies | 144 | 12 | 91 | 2 | 0 |
| Herpetofauna | 54 | 6 | 46 | 3 | 2 (1) |
| Amphibians | 14 | 0 | 13 | 0 | 1 (0) |
| Reptiles | 40 | 6 | 33 | 3 | 1 (1) |
| Birds | 249 | 72 | 155 | 38 | 0 |
| Mammals | 29 | 7 | 18 | 3 | 0 |
| Non-volant mammals | 17 | 4 | 9 | 2 | 0 |
| Bats | 12 | 3 | 9 | 1 | 0 |
| **Total** | **644** | **103** | **404** | **48** | **5 (2)** |

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix D: List of Probable and Recorded Faunal Species**

**Table 2: List of Probable and Recorded Aculeae Hymenopterans**

| No. | Type | Family | Scientific Name | Common Name | Global Status (IUCN/CITES) | National Status (Ascher et al., 2022; JXQ Lee, pers comm) | Species of Conservation Significance | Distribution/Abundance/Rarity | Native Status (The Biodiversity of Singapore, 2020; JXQ Lee, pers comm) | Probable Species | Recorded Species |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | Bee | Apidae | *Amegilla andrewsi* | Andrew's blue-banded digg | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 2 | Bee | Apidae | *Amegilla insularis* | N.A | Not Assessed | Vulnerable | Yes | N.A | N.A | Yes | No |
| 3 | Bee | Apidae | *Amegilla korotonensis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 4 | Bee | Apidae | *Apis andreniformis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 5 | Bee | Apidae | *Apis cerana* | Eastern honey bee | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 6 | Bee | Apidae | *Apis dorsata* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 7 | Bee | Apidae | *Apis florea* | N.A | Not Assessed | Not Assessed | No | N.A | Non-native | Yes | Yes |
| 8 | Bee | Apidae | *Braunsapis clarihirta* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 9 | Bee | Apidae | *Braunsapis cupulifera* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 10 | Bee | Apidae | *Braunsapis hewitti* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 11 | Bee | Apidae | *Braunsapis puangensis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 12 | Bee | Apidae | *Ceratina cognata* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | No |
| 13 | Bee | Apidae | *Ceratina collusor* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 14 | Bee | Apidae | *Ceratina dentipes* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 15 | Bee | Apidae | *Ceratina lieftincki* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 16 | Bee | Apidae | *Ceratina nigrolateralis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 17 | Bee | Apidae | *Ceratina perforatrix* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 18 | Bee | Apidae | *Ceratina smaragdula* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 19 | Bee | Apidae | *Ceratina unimaculata* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 20 | Bee | Apidae | *Tetragonula valdezi* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 21 | Bee | Apidae | *Thyreus ceylonicus* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | Yes |
| 22 | Bee | Apidae | *Thyreus himalayensis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 23 | Bee | Apidae | *Xylocopa aestuans* | White-cheeked carpenter b | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 24 | Bee | Apidae | *Xylocopa auripennis* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | No |
| 25 | Bee | Apidae | *Xylocopa caerulea* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 26 | Bee | Apidae | *Xylocopa flavonigrescens* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 27 | Bee | Apidae | *Xylocopa latipes* | Broad-handed carpenter be | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 28 | Bee | Apidae | *Xylocopa myops* | N.A | Not Assessed | Data Deficient | No | N.A | Native | Yes | No |
| 29 | Bee | Colletidae | *Hylaeus cf. transversalis* | NA | Not Assessed | Not Assessed | No | N.A | Native | Yes | No |
| 30 | Bee | Colletidae | *Hylaeus penangensis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 31 | Bee | Halictidae | *Lasioglossum adonidiae* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 32 | Bee | Halictidae | *Lasioglossum albescens* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 33 | Bee | Halictidae | *Lasioglossum deliense* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 34 | Bee | Halictidae | *Lasioglossum singapurellum* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 35 | Bee | Halictidae | *Lasioglossum vagans* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 36 | Bee | Halictidae | *Lipotriches ceratina* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 37 | Bee | Halictidae | *Nomia fuscipennis* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | No |
| 38 | Bee | Halictidae | *Nomia incerta* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 39 | Bee | Halictidae | *Nomia iridescens* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 40 | Bee | Halictidae | *Nomia sp. aff. apicalis* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | Yes |
| 41 | Bee | Halictidae | *Nomia strigata* | Pearly-banded bee | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 42 | Bee | Halictidae | *Nomia thoracica* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | No |
| 43 | Bee | Halictidae | *Patellapis murbanus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 44 | Bee | Halictidae | *Pseudapis siamensis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 45 | Bee | Megachilidae | *Coelioxys confusus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 46 | Bee | Megachilidae | *Euaspis n. sp. 1* | N.A | N.A | Not Assessed | No | N.A | Native | | Yes |
| 47 | Bee | Megachilidae | *Euaspis polynesia* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 48 | Bee | Megachilidae | *Heriades othonis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 49 | Bee | Megachilidae | *Lithurgus sp. 1* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | No |
| 50 | Bee | Megachilidae | *Lithurgus sp. 2 (cf. collaris)* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | No |
| 51 | Bee | Megachilidae | *Megachile atrata* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | No |
| 52 | Bee | Megachilidae | *Megachile conjuncta* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 53 | Bee | Megachilidae | *Megachile disjuncta* | N.A | Not Assessed | Least Concern | No | N.A | Non-native | Yes | Yes |
| 54 | Bee | Megachilidae | *Megachile fulvipennis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 55 | Bee | Megachilidae | *Megachile laticeps* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 56 | Bee | Megachilidae | *Megachile subrixator* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 57 | Bee | Megachilidae | *Megachile tricincta* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 58 | Bee | Megachilidae | *Megachile umbripennis* | N.A | Not Assessed | Least Concern | No | N.A | Non-native | Yes | No |
| 59 | Wasp | Ampulicidae | *Ampulex compressa* | Emerald cockroach wasp/J | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 60 | Wasp | Crabronidae | *Ectemnius sp.* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | Yes |
| 61 | Wasp | Crabronidae | *Liris subtessellatus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 62 | Wasp | Crabronidae | *Tachytes cf. modestus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 63 | Wasp | Crabronidae | *Tachytes cf. trigonalis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 64 | Wasp | Crabronidae | *Trypoxylon bicolor* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | Yes |
| 65 | Wasp | Pompilidae | *Auplopus sp.* | N.A | N.A | Not Assessed | No | N.A | Native | Yes | Yes |
| 66 | Wasp | Pompilidae | *Macromeris sp. (cf. violacea)* | N.A | N.A | Not Assessed | No | N.A | Native | Yes | No |
| 67 | Wasp | Pompilidae | *Paragenia argentifrons* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 68 | Wasp | Pompilidae | *Tachypompilus analis* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 69 | Wasp | Scoliidae | *Campsomeriella collaris* | N.A | Not Assessed | Least Concern | No | N.A | N.A | Yes | Yes |
| 70 | Wasp | Scoliidae | *Megascolia azurea* | N.A | Not Assessed | Vulnerable | Yes | N.A | Native | Yes | No |
| 71 | Wasp | Scoliidae | *Megascolia capitata* | N.A | Not Assessed | Vulnerable | Yes | N.A | Native | Yes | No |
| 72 | Wasp | Scoliidae | *Megascolia procer* | N.A | Not Assessed | Vulnerable | Yes | N.A | Native | Yes | Yes |
| 73 | Wasp | Scoliidae | *Phalerimeris phalerata* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 74 | Wasp | Scoliidae | *Scolia sp.* | N.A | Not Assessed | Not Assessed | No | N.A | N.A | Yes | Yes |
| 75 | Wasp | Sphecidae | *Chalybion bengalense* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 76 | Wasp | Sphecidae | *Hemichalybion sp.* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 77 | Wasp | Sphecidae | *Isodontia diodon* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 78 | Wasp | Sphecidae | *Sceliphron javanum* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 79 | Wasp | Sphecidae | *Sceliphron madraspatanum* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 80 | Wasp | Sphecidae | *Sphex diabolicus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 81 | Wasp | Sphecidae | *Sphex sericeus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 82 | Wasp | Sphecidae | *Sphex subtruncatus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 83 | Wasp | Vespidae | *Allorhynchium argentatum* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 84 | Wasp | Vespidae | *Antepipona sp. nr. bipustulata* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 85 | Wasp | Vespidae | *Delta campaniforme* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 86 | Wasp | Vespidae | *Delta esuriens* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 87 | Wasp | Vespidae | *Delta pyriforme* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 88 | Wasp | Vespidae | *Eumenes sp.* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 89 | Wasp | Vespidae | *Eustenogaster hauxwelli* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | No |
| 90 | Wasp | Vespidae | *Eustenogaster micans* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | No |
| 91 | Wasp | Vespidae | *Eustenogaster sp.* | N.A | Not Assessed | N.A | No | N.A | N.A | | Yes |
| 92 | Wasp | Vespidae | *Liostenogaster nitidipennis* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | Yes |
| 93 | Wasp | Vespidae | *Liostenogaster varipicta* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | Yes |
| 94 | Wasp | Vespidae | *Paraleptomenes miniatus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 95 | Wasp | Vespidae | *Parapolybia varia* | Lesser paper wasp | Not Assessed | Near Threatened | No | N.A | Native | Yes | No |
| 96 | Wasp | Vespidae | *Parischnogaster mellyi* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 97 | Wasp | Vespidae | *Parischnogaster nigricans* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 98 | Wasp | Vespidae | *Phimenes flavopictus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 99 | Wasp | Vespidae | *Polistes sagittarius* | Banded paper wasp | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 100 | Wasp | Vespidae | *Polistes stigma* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 101 | Wasp | Vespidae | *Polistes tenebricosus* | N.A | Not Assessed | Vulnerable | Yes | N.A | Native | Yes | No |
| 102 | Wasp | Vespidae | *Polistes tenebris* | N.A | Not Assessed | Data Deficient | No | N.A | Native | Yes | No |
| 103 | Wasp | Vespidae | *Rhynchium haemorrhoidale* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 104 | Wasp | Vespidae | *Ropalidia erythrospila* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 105 | Wasp | Vespidae | *Ropalidia fasciata* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | Yes |
| 106 | Wasp | Vespidae | *Ropalidia jacobsoni* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 107 | Wasp | Vespidae | *Ropalidia marginata* | N.A | Not Assessed | Near Threatened | No | N.A | Native | Yes | Yes |
| 108 | Wasp | Vespidae | *Ropalidia stigma* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 109 | Wasp | Vespidae | *Ropalidia timida* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 110 | Wasp | Vespidae | *Stenodyneriellus guttulatus* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 111 | Wasp | Vespidae | *Subancistrocerus sichelii* | N.A | Not Assessed | Least Concern | No | N.A | Native | Yes | No |
| 112 | Wasp | Vespidae | *Subancistrocerus sp.* | N.A | Not Assessed | Not Assessed | No | N.A | Native | Yes | Yes |
| 113 | Wasp | Vespidae | *Vespa affinis* | Lesser banded hornet | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 114 | Wasp | Vespidae | *Vespa analis* | Yellow vented hornet | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |
| 115 | Wasp | Vespidae | *Vespa tropica* | Greater banded hornet | Not Assessed | Least Concern | No | N.A | Native | Yes | Yes |

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix D: List of Probable and Recorded Faunal Species**

**Table 3: List of Probable and Recorded Odonates**

| No. | Type | Family | Scientific Name | Common Name | Global Status (IUCN/CITES) | National Status (NParks, 2022) | Species of Conservation Significance | Distribution/Abundance/Rarity (Soh et al., 2019) | Probable Species | Recorded Species | Remarks |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | Damselfly | Coenagrionidae | *Agriocnemis femina* | Variable wisp | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 2 | Damselfly | Coenagrionidae | *Agriocnemis rubescens* | Variable sprite | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 3 | Damselfly | Coenagrionidae | *Archibasis viola* | Violet sprite | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 4 | Damselfly | Coenagrionidae | *Ceriagrion cerinorubellum* | Ornate coraltail | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 5 | Damselfly | Coenagrionidae | *Ischnura senegalensis* | Common bluetail | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 6 | Damselfly | Coenagrionidae | *Pseudagrion microcephalum* | Blue sprite | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 7 | Damselfly | Coenagrionidae | *Teinobasis ruficollis* | Red-tailed sprite | Not Assessed | Near Threatened | No | Widespread but Rare | Yes | Yes | |
| 8 | Damselfly | Platycnemididae | *Copera marginipes* | Yellow featherlegs | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 9 | Damselfly | Platycnemididae | *Onychargia atrocyana* | Shorttail | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 10 | Dragonfly | Aeshnidae | *Anax guttatus* | Emperor | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 11 | Dragonfly | Aeshnidae | *Gynacantha bayadera* | Small duskhawker | Least Concern | Least Concern | No | Restricted and Rare | No | Yes | |
| 12 | Dragonfly | Aeshnidae | *Gynacantha dohrni* | Spear-tail duskhawker | Not Assessed | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 13 | Dragonfly | Aeshnidae | *Gynacantha subinterrupta* | Dingy duskhawker | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 14 | Dragonfly | Aeshnidae | *Heliaeschna crassa* | Nighthawker | Least Concern | Critically Endangered | Yes | Restricted and Very Rare | No | Yes* | |
| 15 | Dragonfly | Aeshnidae | *Heliaeschna uninervulata* | Lesser nighthawker | Least Concern | Near Threatened | No | Restricted and Rare | No | Yes | |
| 16 | Dragonfly | Gomphidae | *Ictinogomphus decoratus* | Common flangetail | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 17 | Dragonfly | Libellulidae | *Acisoma panorpoides* | Trumpet tail | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 18 | Dragonfly | Libellulidae | *Aethriamanta aethra* | Blue adjudant | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 19 | Dragonfly | Libellulidae | *Aethriamanta brevipennis* | Scarlet adjudant | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 20 | Dragonfly | Libellulidae | *Aethriamanta gracilis* | Pond adjudant | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 21 | Dragonfly | Libellulidae | *Agrionoptera insignis* | Grenadier | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 22 | Dragonfly | Libellulidae | *Brachydiplax chalybea* | Blue dasher | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 23 | Dragonfly | Libellulidae | *Brachythemis contaminata* | Common amberwing | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 24 | Dragonfly | Libellulidae | *Camacinia gigantea* | Sultan | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | No | |
| 25 | Dragonfly | Libellulidae | *Cratilla lineata* | Lined forest skimmer | Least Concern | Near Threatened | No | Widespread but Rare | Yes | No | |
| 26 | Dragonfly | Libellulidae | *Cratilla metallica* | Dark-tipped forest skimmer | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 27 | Dragonfly | Libellulidae | *Crocothemis servilia* | Common scarlet | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 28 | Dragonfly | Libellulidae | *Diplacodes nebulosa* | Black-tipped percher | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 29 | Dragonfly | Libellulidae | *Diplacodes trivialis* | Blue percher | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 30 | Dragonfly | Libellulidae | *Hydrobasileus croceus* | Water monarch | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 31 | Dragonfly | Libellulidae | *Lathrecista asiatica* | Scarlet grenadier | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 32 | Dragonfly | Libellulidae | *Lyriothemis cleis* | Bombardier | Least Concern | Endangered | Yes | Restricted and Rare | Yes | No | Recorded in Ng et al. (2010) |
| 33 | Dragonfly | Libellulidae | *Macrodiplax cora* | Coastal glider | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 34 | Dragonfly | Libellulidae | *Nannophya pygmaea* | Scarlet pygmy | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 35 | Dragonfly | Libellulidae | *Nesoxenia lineata* | Striped grenadier | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 36 | Dragonfly | Libellulidae | *Neurothemis fluctuans* | Common parasol | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 37 | Dragonfly | Libellulidae | *Orchithemis pulcherrima* | Variable sentinel | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 38 | Dragonfly | Libellulidae | *Orthetrum chrysis* | Spine-tufted skimmer | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 39 | Dragonfly | Libellulidae | *Orthetrum glaucum* | Common blue skimmer | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 40 | Dragonfly | Libellulidae | *Orthetrum luzonicum* | Slender blue skimmer | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 41 | Dragonfly | Libellulidae | *Orthetrum sabina* | Variegated green skimmer | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 42 | Dragonfly | Libellulidae | *Orthetrum testaceum* | Scarlet skimmer | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 43 | Dragonfly | Libellulidae | *Pantala flavescens* | Wandering glider | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 44 | Dragonfly | Libellulidae | *Potamarcha congener* | Common chaser | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 45 | Dragonfly | Libellulidae | *Pseudothemis jorina* | Banded skimmer | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | Yes | |
| 46 | Dragonfly | Libellulidae | *Rhodothemis rufa* | Common redbolt | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 47 | Dragonfly | Libellulidae | *Rhyothemis obsolescens* | Bronze flutterer | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | No | |
| 48 | Dragonfly | Libellulidae | *Rhyothemis phyllis* | Yellow-barred flutterer | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 49 | Dragonfly | Libellulidae | *Rhyothemis triangularis* | Sapphire flutterer | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | No | |
| 50 | Dragonfly | Libellulidae | *Tholymis tillarga* | White-barred duskhawk | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 51 | Dragonfly | Libellulidae | *Tramea transmarina* | Saddlebag glider | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 52 | Dragonfly | Libellulidae | *Trithemis aurora* | Crimson dropwing | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 53 | Dragonfly | Libellulidae | *Trithemis festiva* | Indigo dropwing | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 54 | Dragonfly | Libellulidae | *Trithemis pallidinervis* | Dancing dropwing | Least Concern | Least Concern | No | Widespread but Uncommon | Yes | No | |
| 55 | Dragonfly | Libellulidae | *Urothemis signata* | Scarlet basker | Not Assessed | Least Concern | No | Widespread and Common | Yes | Yes | |
| 56 | Dragonfly | Libellulidae | *Zyxomma petiolatum* | Slender duskdarter | Least Concern | Least Concern | No | Widespread and Common | Yes | Yes | |
| 57 | Dragonfly | Macromiidae | *Epophthalmia vittigera* | Pond cruiser | Least Concern | Least Concern | No | Widespread and Common | Yes | No | |
| 58 | Dragonfly | Synthemistidae | *Idionyx yolanda* | Shadowdancer | Not Assessed | Least Concern | No | Widespread but Uncommon | Yes | No | |

*The individual observed was deemed either to the *H. crassa* or *H. idea*. The latter is not listed in SG checklist.

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix D: List of Probable and Recorded Faunal Species**

**Table 4: List of Probable and Recorded Butterflies**

| No. | Family | Scientific Name | Common Name | Global Status (IUCN/CITES) | National Status (NParks, 2022) | Species of Conservation Significance | Distribution/Abundance/Rarity (Khew, 2015) | Probable Species | Recorded Species |
|---|---|---|---|---|---|---|---|---|---|
| 1 | Hesperiidae | *Ampittia dioscorides camertes* | Bush hopper | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 2 | Hesperiidae | *Ancistroides nigrita maura* | Chocolate demon | Not Assessed | Least Concern | No | Common | Yes | No |
| 3 | Hesperiidae | *Astictopterus jama jama* | Forest hopper | Not Assessed | Endangered | Yes | Moderately rare | Yes | No |
| 4 | Hesperiidae | *Baoris farri farri* | Bamboo paintbrush swift | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 5 | Hesperiidae | *Baoris oceia* | Paintbrush swift | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 6 | Hesperiidae | *Baoris sp.* | Swift | N.A | N.A | N.A | N.A | N.A | Yes |
| 7 | Hesperiidae | *Borbo cinnara* | Formosan swift | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 8 | Hesperiidae | *Caltoris cormasa* | Full stop swift | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 9 | Hesperiidae | *Cephrenes acalle niasicus* | Plain palm dart | Not Assessed | Vulnerable | Yes | Moderately rare | Yes | No |
| 10 | Hesperiidae | *Cephrenes trichopepla* | Yellow palm dart | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 11 | Hesperiidae | *Erionota hiraca apicalis* | White tipped skipper | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 12 | Hesperiidae | *Erionota sp.* | Skipper | N.A | N.A | N.A | N.A | N.A | Yes |
| 13 | Hesperiidae | *Erionota thrax thrax* | Banana skipper | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 14 | Hesperiidae | *Erionota torus* | Torus skipper | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 15 | Hesperiidae | *Hasora badra badra* | Common awl | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 16 | Hesperiidae | *Hasora chromus chromus* | Common banded awl | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 17 | Hesperiidae | *Hasora vitta vitta* | Plain banded awl | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 18 | Hesperiidae | *Hidari irava* | Coconut skipper | Not Assessed | Near Threatened | No | Common | Yes | No |
| 19 | Hesperiidae | *Iambrix salsala salsala* | Chestnut bob | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 20 | Hesperiidae | *Matapa aria* | Common redeye | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 21 | Hesperiidae | *Notocrypta paralysos varians* | Banded demon | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 22 | Hesperiidae | *Oriens gola pseudolus* | Common dartlet | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 23 | Hesperiidae | *Pelopidas agna agna* | Bengal swift | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 24 | Hesperiidae | *Pelopidas assamensis* | Great swift | Not Assessed | Endangered | Yes | Moderately rare | Yes | Yes |
| 25 | Hesperiidae | *Pelopidas conjunctus conjunctus* | Conjoined swift | Not Assessed | Endangered | Yes | Moderately rare | Yes | No |
| 26 | Hesperiidae | *Pelopidas mathias mathias* | Small branded swift | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 27 | Hesperiidae | *Plastingia naga* | Chequered lancer | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 28 | Hesperiidae | *Polytremis lubricans lubricans* | Contiguous swift | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 29 | Hesperiidae | *Potanthus omaha omaha* | Lesser dart | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 30 | Hesperiidae | *Potanthus serina* | Large dart | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 31 | Hesperiidae | *Potanthus trachala tytleri* | Detached dart | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 32 | Hesperiidae | *Suastus gremius gremius* | Palm bob | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 33 | Hesperiidae | *Taractrocera archias quinta* | Yellow grass dart | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 34 | Hesperiidae | *Taractrocera ardonia lamia* | Spotted grass dart | Not Assessed | Vulnerable | Yes | Moderately rare | Yes | Yes |
| 35 | Hesperiidae | *Telicota augias augias* | Pale palm dart | Not Assessed | Vulnerable | Yes | Moderately common | Yes | No |
| 36 | Hesperiidae | *Telicota besta bina* | Besta palm dart | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 37 | Hesperiidae | *Telicota colon stinga* | Common palm dart | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 38 | Hesperiidae | *Udaspes folus* | Grass demon | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 39 | Hesperiidae | *Unkana ambasa batara* | Hoary palmer | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 40 | Lycaenidae | *Acytolepis puspa lambi* | Common hedge blue | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 41 | Lycaenidae | *Allotinus unicolor unicolor* | Lesser darkwing | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 42 | Lycaenidae | *Anthene emolus goberus* | Ciliate blue | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 43 | Lycaenidae | *Anthene lycaenina miya* | Pointed ciliate blue | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 44 | Lycaenidae | *Arhopala amphimuta amphimuta* | NA | Not Assessed | Near Threatened | No | Moderately common | Yes | Yes |
| 45 | Lycaenidae | *Arhopala centaurus nakula* | Centaur oakblue | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 46 | Lycaenidae | *Arhopala major major* | NA | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 47 | Lycaenidae | *Catochrysops panormus exiguus* | Silver forget-me-not | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 48 | Lycaenidae | *Catochrysops strabo strabo* | Forget-me-not | Not Assessed | Vulnerable | Yes | Moderately rare | Yes | No |
| 49 | Lycaenidae | *Catopyrops ancyra* | Ancyra blue | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 50 | Lycaenidae | *Chilades pandava pandava* | Cycad blue | Not Assessed | Least Concern | No | Common | Yes | No |
| 51 | Lycaenidae | *Curetis santana malayica* | Malayan sunbeam | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 52 | Lycaenidae | *Curetis saronis sumatrana* | Sumatran sunbeam | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 53 | Lycaenidae | *Curetis sp.* | Sunbeam | N.A | N.A | N.A | N.A | N.A | Yes |
| 54 | Lycaenidae | *Euchrysops cnejus cnejus* | Gram blue | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 55 | Lycaenidae | *Everes lacturnus rileyi* | Indian cupid | Not Assessed | Endangered | Yes | Rare | Yes | No |
| 56 | Lycaenidae | *Flos apidanus saturatus* | Plain plushblue | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 57 | Lycaenidae | *Horaga syrinx maenala* | Ambon onyx | Not Assessed | Vulnerable | Yes | Moderately common | Yes | No |
| 58 | Lycaenidae | *Hypolycaena erylus teatus* | Common tit | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 59 | Lycaenidae | *Hypolycaena thecloides thecloides* | Dark tit | Not Assessed | Least Concern | No | Moderately rare | Yes<br>Yes | |
| 60 | Lycaenidae | *Ionolyce helicon merguiana* | Pointed line blue | Not Assessed | Least Concern | No | Common | Yes | No |
| 61 | Lycaenidae | *Iraota rochana boswelliana* | Scarce silverstreak | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 62 | Lycaenidae | *Jamides bochus nabonassar* | Dark caerulean | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 63 | Lycaenidae | *Jamides celeno aelianus* | Common caerulean | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 64 | Lycaenidae | *Lampides boeticus* | Pea blue | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 65 | Lycaenidae | *Logania marmorata damis* | Pale mottle | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 66 | Lycaenidae | *Loxura atymnus fuconius* | Yamfly | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 67 | Lycaenidae | *Megisba malaya sikkima* | Malayan | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 68 | Lycaenidae | *Miletus biggsii biggsii* | Bigg's brownwing | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 69 | Lycaenidae | *Miletus symethus petronius* | Blue brownwing/great brownie | Not Assessed | Near Threatened | No | Moderately common | Yes | No |
| 70 | Lycaenidae | *Nacaduba berenice icena* | Rounded sixline blue | Not Assessed | Least Concern | No | Common | Yes | No |
| 71 | Lycaenidae | *Nacaduba beroe neon* | Opaque sixline blue | Not Assessed | Least Concern | No | Common | Yes | No |
| 72 | Lycaenidae | *Nacaduba biocellata* | Two spotted line blue | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 73 | Lycaenidae | *Nacaduba kurava nemana* | Transparent sixline blue | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 74 | Lycaenidae | *Nacaduba pavana singapura* | Singapore fourline blue | Not Assessed | Endangered | Yes | Moderately rare | Yes | No |
| 75 | Lycaenidae | *Petrelaea dana* | Dingy line blue | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 76 | Lycaenidae | *Pratapa deva relata* | White royal | Not Assessed | Endangered | Yes | Moderately rare | Yes | No |
| 77 | Lycaenidae | *Prosotas dubiosa lumpura* | Tailless line blue | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 78 | Lycaenidae | *Prosotas nora superdates* | Common line blue | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 79 | Lycaenidae | *Rapala iarbus iarbus* | Common red flash | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 80 | Lycaenidae | *Rapala manea chozeba* | Slate flash | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 81 | Lycaenidae | *Rapala pheretima sequeira* | Copper flash | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 82 | Lycaenidae | *Rapala suffusa barthema* | Suffused flash | Not Assessed | Near Threatened | No | Moderately common | Yes | No |
| 83 | Lycaenidae | *Rapala varuna orseis* | Indigo flash | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 84 | Lycaenidae | *Semanga superba deliciosa* | NA | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 85 | Lycaenidae | *Spalgis epius epius* | Apefly | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 86 | Lycaenidae | *Spindasis lohita senama* | Long banded silverline | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 87 | Lycaenidae | *Spindasis syama terana* | Club silverline | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 88 | Lycaenidae | *Surendra vivarna amisena* | Acacia blue | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 89 | Lycaenidae | *Tajuria cippus maxentius* | Peacock royal | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 90 | Lycaenidae | *Zizeeria maha serica* | Pale grass blue | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 91 | Lycaenidae | *Zizina otis lampa* | Lesser grass blue | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 92 | Lycaenidae | *Zizula hylax pygmaea* | Pygmy grass blue | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 93 | Nymphalidae | *Acraea terpsicore* | Tawny coster | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 94 | Nymphalidae | *Amathusia phidippus phidippus* | Palm king | Not Assessed | Near Threatened | No | Moderately rare | Yes | Yes |
| 95 | Nymphalidae | *Cethosia cyane* | Leopard lacewing | Not Assessed | Least Concern | No | Common | Yes | No |
| 96 | Nymphalidae | *Danaus chrysippus chrysippus* | Plain tiger | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 97 | Nymphalidae | *Doleschallia bisaltide bisaltide* | Autumn leaf | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 99 | Nymphalidae | *Elymnias hypermnestra agina* | Common palmfly | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 100 | Nymphalidae | *Elymnias panthera panthera* | Tawny palmfly | Not Assessed | Near Threatened | No | Moderately common | Yes | Yes |
| 101 | Nymphalidae | *Euploea mulciber mulciber* | Striped blue crow | Not Assessed | Least Concern | No | Common | Yes | No |
| 102 | Nymphalidae | *Euploea sp.* | Crow | N.A | N.A | N.A | N.A | N.A | Yes |
| 103 | Nymphalidae | *Euthalia aconthea gurda* | Baron | Not Assessed | Least Concern | No | Common | Yes | No |
| 104 | Nymphalidae | *Euthalia adonia pinwilli* | Green baron | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 105 | Nymphalidae | *Euthalia monina monina* | Malay baron | Not Assessed | Least Concern | No | Common | Yes | No |
| 106 | Nymphalidae | *Hypolimnas anomala anomala* | Malayan eggfly | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 107 | Nymphalidae | *Hypolimnas bolina bolina* | Great eggfly | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 108 | Nymphalidae | *Hypolimnas bolina jacintha* | Jacintha eggfly | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 109 | Nymphalidae | *Ideopsis vulgaris macrina* | Blue glassy tiger | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 110 | Nymphalidae | *Junonia almana javana* | Peacock pansy | Least Concern | Least Concern | No | Common | Yes | Yes |
| 111 | Nymphalidae | *Junonia atlites atlites* | Grey pansy | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 112 | Nymphalidae | *Junonia hedonia ida* | Chocolate pansy | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 113 | Nymphalidae | *Junonia orithya wallacei* | Blue pansy | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 114 | Nymphalidae | *Lasippa tiga siaka* | Malayan lascar | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 115 | Nymphalidae | *Melanitis leda leda* | Common evening brown | Not Assessed | Least Concern | No | Moderately rare | Yes | Yes |
| 116 | Nymphalidae | *Moduza procris milonia* | Commander | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 117 | Nymphalidae | *Mycalesis mineus macromalayana* | Dark brand bush brown | Not Assessed | Least Concern | No | Common | Yes | Yes |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 118 | Nymphalidae | *Mycalesis perseoides perseoides* | Burmese bush brown | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 119 | Nymphalidae | *Mycalesis perseus cepheus* | Dingy bush brown | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 120 | Nymphalidae | *Mycalesis visala phamis* | Long brand bush brown | Not Assessed | Near Threatened | No | Moderately common | Yes | Yes |
| 121 | Nymphalidae | *Neptis hylas papaja* | Common sailor | Not Assessed | Least Concern | No | Moderately common | Yes | Yes |
| 122 | Nymphalidae | *Orsotriaena medus cinerea* | Dark grass brown | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 123 | Nymphalidae | *Pandita sinope sinope* | Colonel | Not Assessed | Near Threatened | No | Moderately rare | Yes | Yes |
| 124 | Nymphalidae | *Parantica agleoides agleoides* | Dark glassy tiger | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 125 | Nymphalidae | *Phaedyma columella singa* | Short banded sailor | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 126 | Nymphalidae | *Phalanta phalantha phalantha* | Leopard | Not Assessed | Least Concern | No | Common | Yes | No |
| 127 | Nymphalidae | *Polyura hebe plautus* | Plain nawab | Not Assessed | Least Concern | No | Common | Yes | No |
| 128 | Nymphalidae | *Polyura schreiber tisamenus* | Blue nawab | Not Assessed | Least Concern | No | Moderately rare | Yes | No |
| 129 | Nymphalidae | *Tanaecia iapis puseda* | Horsfield's baron | Not Assessed | Least Concern | No | Common | Yes | No |
| 130 | Nymphalidae | *Ypthima baldus newboldi* | Common five-ring | Not Assessed | Least Concern | No | Common | Yes | No |
| 131 | Nymphalidae | *Ypthima horsfieldii humei* | Malayan five-ring | Not Assessed | Least Concern | No | Common | Yes | No |
| 132 | Nymphalidae | *Ypthima huebneri* | Common four-ring | Not Assessed | Least Concern | No | Moderately common | Yes | No |
| 133 | Nymphalidae | *Ypthima pandocus corticaria* | Common three-ring | Not Assessed | Vulnerable | Yes | Common | Yes | No |
| 134 | Papilionidae | *Chilasa clytia clytia* | Common mime | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 135 | Papilionidae | *Graphium agamemnon agamemnon* | Tailed jay | Not Assessed | Least Concern | No | Common | Yes | No |
| 137 | Papilionidae | *Graphium evemon eventus* | Lesser jay (blue jay) | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 138 | Papilionidae | *Graphium sarpedon luctatius* | Common bluebottle | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 139 | Papilionidae | *Pachliopta aristolochiae asteris* | Common rose | Not Assessed | Near Threatened | No | Moderately common | Yes | Yes |
| 140 | Papilionidae | *Papilio demoleus malayanus* | Lime butterfly | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 141 | Papilionidae | *Papilio polytes romulus* | Common mormon | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 142 | Pieridae | *Appias libythea olferna* | Striped albatross | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 143 | Pieridae | *Catopsilia pomona pomona* | Lemon emigrant | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 144 | Pieridae | *Catopsilia pyranthe pyranthe* | Mottled emigrant | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 145 | Pieridae | *Catopsilia scylla cornelia* | Orange emigrant | Not Assessed | Least Concern | No | Common | Yes | No |
| 146 | Pieridae | *Delias hyparete metarete* | Painted jezebel | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 147 | Pieridae | *Eurema andersonii andersonii* | Anderson's grass yellow | Not Assessed | Near Threatened | No | Moderately common | Yes | Yes |
| 148 | Pieridae | *Eurema blanda snelleni* | Three spot grass yellow | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 149 | Pieridae | *Eurema hecabe contubernalis* | Common grass yellow | Not Assessed | Least Concern | No | Common | Yes | Yes |
| 150 | Pieridae | *Eurema sari sodalis* | Chocolate grass yellow | Not Assessed | Least Concern | No | Moderately common | No | Yes |
| 151 | Pieridae | *Leptosia nina malayana* | Psyche | Not Assessed | Least Concern | No | Common | Yes | Yes |

(2010) |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | Agamidae | *Bronchocela cristatella* | Green crested lizard | Not Assessed | Least Concern | No | Widespread but Uncommon | Native | Yes | Yes | No |
| 2 | Agamidae | *Calotes versicolor* | Changeable lizard | Not Assessed | Not Assessed | No | Widespread and Common | Non-native | Yes | Yes | Yes |
| 3 | Agamidae | *Draco sumatranus* | Sumatran flying dragon | Not Assessed | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 4 | Colubridae | *Ahaetulla prasina* | Oriental whip snake | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 5 | Colubridae | *Boiga melanota* | Gold-ringed cat snake | Least Concern | Vulnerable | Yes | Widespread but Rare | Native | Yes | No | No |
| 6 | Colubridae | *Chrysopelea paradisi* | Paradise gliding snake | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 7 | Colubridae | *Coelognathus flavolineat* | Common Malayan racer | Least Concern | Least Concern | No | Widespread but Rare | Native | Yes | No | No |
| 8 | Colubridae | *Dendrelaphis caudolinea* | Striped bronzeback | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 9 | Colubridae | *Dendrelaphis pictus* | Painted bronzeback | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 10 | Colubridae | *Lycodon capucinus* | House wolf snake | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 11 | Colubridae | *Oligodon octolineatus* | Striped kukri snake | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 12 | Colubridae | *Ptyas korros* | Indochinese rat snake | Least Concern | Least Concern | No | Widespread but Uncommon | Native | Yes | No | No |
| 13 | Colubridae | *Xenochrophis vittatus* | Striped keelback | Least Concern | Not Assessed | No | Widespread and Common | Non-native | Yes | Yes | No |
| 14 | Crocodylidae | *Crocodylus porosus* | Estuarine crocodile | Least Concern | Critically Endangered | Yes | Widespread but Rare | Native | Yes | No | No |
| 15 | Cylindrophiidae | *Cylindrophis ruffus* | Red-tailed pipe snake | Least Concern | Vulnerable | Yes | Widespread but Rare | Native | Yes | Yes | No |
| 16 | Elapidae | *Calliophis intestinalis* | Banded Malayan coral sna | Least Concern | Near Threatened | No | Widespread but Rare | Native | Yes | No | No |
| 17 | Elapidae | *Naja sumatrana* | Equatorial spitting cobra | Least Concern | Not Assessed | No | Widespread and Common | Native | Yes | Yes | No |
| 18 | Elapidae | *Ophiophagus hannah* | King cobra | Vulnerable | Vulnerable | Yes | Restricted and Rare | Native | Yes | No | No |
| 19 | Emydidae | *Trachemys decussata* | Cuban slider | Not Assessed | Not Assessed | No | N.A | N.A | Yes | No | No |
| 20 | Emydidae | *Trachemys scripta* | Red-eared slider | Least Concern | Not Assessed | No | Widespread and Common | Non-native | Yes | Yes | No |
| 21 | Gekkonidae | *Gehyra mutilata* | Four-clawed gecko | Not Assessed | Not Assessed | No | Widespread and Common | Native | Yes | Yes | No |
| 22 | Gekkonidae | *Gekko monarchus* | Spotted house gecko | Not Assessed | Not Assessed | No | Widespread and Common | Native | Yes | Yes | Yes |
| 23 | Gekkonidae | *Hemidactylus brookii* | Brooke's house gecko | Not Assessed | Not Assessed | No | Restricted and Rare | Non-native | Yes | Yes | No |
| 24 | Gekkonidae | *Hemidactylus frenatus* | Spiny-tailed house gecko | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | Yes |
| 25 | Gekkonidae | *Hemidactylus platyurus* | Flat-tailed gecko | Not Assessed | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 26 | Gekkonidae | *Hemiphyllodactylus typu* | Lowland dwarf gecko | Least Concern | Near Threatened | No | Restricted and Rare | Native | No | Yes | No |
| 27 | Gekkonidae | *Lepidodactylus lugubris* | Mourning gecko | Not Assessed | Not Assessed | No | Widespread but Rare | Native | Yes | Yes | No |
| 28 | Geomydidae | *Cuora amboinensis* | Malayan box terrapin | Vulnerable; CITES protected (Appendix II) | Near Threatened | Yes | Restricted but Common | Native | Yes | Yes | No |
| 29 | Geomydidae | *Heosemys grandis* | Giant asian pond turtle | Vulnerable; CITES protected (App | Not Assessed | No | N.A | Non-native | Yes | Yes | No |
| 30 | Geomydidae | *Siebenrockiella crassicol* | Black marsh terrapin | Vulnerable | Not Assessed | No | Widespread and Common | Non-native | Yes | Yes | No |
| 31 | Homalopsidae | *Enhydris enhydris* | Rainbow water snake | Least Concern | Not Assessed | No | Restricted and Uncommon | Non-native | Yes | Yes | No |
| 32 | Homalopsidae | *Homalopsis buccata* | Puff-faced water snake | Least Concern | Vulnerable | Yes | Widespread but Uncommon | Native | Yes | No | No |
| 33 | Pareidae | *Pareas margaritophorus* | White-spotted slug snake | Least Concern | Not Assessed | No | Widespread and Common | Non-native | Yes | Yes | No |
| 34 | Pythonidae | *Malayopython reticulatus* | Reticulated python | Least Concern | Not Assessed | No | Widespread and Common | Native | Yes | Yes | No |
| 35 | Scincidae | *Eutropis longicaudata* | Long-tailed sun skink | Least Concern | Data Deficient | No | NA | Indeterminat | No | Yes | No |
| 36 | Scincidae | *Eutropis multifasciata* | Many-lined sun skink | Not Assessed | Least Concern | No | Widespread and Common | Native | Yes | Yes | Yes |
| 37 | Scincidae | *Lygosoma bowringii* | Garden supple skink | Not Assessed | Least Concern | No | Widespread and Common | Native | Yes | Yes | No |
| 38 | Trionychidae | *Amyda cartilaginea* | Asian softshell turtle | Vulnerable | Vulnerable | Yes | Restricted and Uncommon | Native | Yes | Yes | No |
| 39 | Trionychidae | *Pelodiscus sinensis* | Chinese softshell turtle | Vulnerable | Not Assessed | No | Widespread and Common | Non-native | Yes | No | No |
| 40 | Typhlopidae | *Indotyphlops braminus* | Brahminy blind snake | Least Concern | Not Assessed | No | Widespread and Common | Native | Yes | Yes | No |
| 41 | Varanidae | *Varanus nebulosus* | Clouded monitor | Not Assessed | Least Concern | No | Restricted but Common | Native | Yes | Yes | No |
| 42 | Varanidae | *Varanus salvator* | Malayan water monitor | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes | Yes |
| 43 | Xenopeltidae | *Xenopeltis unicolor* | Iridescent earth snake | Least Concern | Least Concern | No | Widespread but Uncommon | Native | Yes | No | No |

| No. | Family | Scientific Name | Common Name | Global Status (IUCN/CITES) | National Status (NParks, 2022) | Species of Conservation Significance | Distribution/Abundance/Rarity (NSS, 2020; Singapore Birds Project, 2020) | Primary Native Status (NSS, 2020; Singapre Birds Project, 2020) | Other Native Status (NSS, 2020; Singapre Birds Project, 2020) | Waterbird/piscivore | Focal Bird | Diet (Singapore Birds Project; NParks; etc) | Probable Species | Recorded Species | Recorded in Ng et al. (2010) |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | Acanthizidae | *Gerygone sulphurea* | Golden-bellied gerygone | Least Concern | Near Threatened | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 2 | Accipitridae | *Accipiter gularis* | Japanese sparrowhawk | Least Concern | Least Concern | No | Common | Winter visitor | Passage migrant | No | | | Yes | Yes | No |
| 3 | Accipitridae | *Accipiter soloensis* | Chinese sparrowhawk | Least Concern | Least Concern | No | Uncommon | Winter visitor | Passage migrant | No | | | Yes | No | No |
| 4 | Accipitridae | *Accipiter trivirgatus* | Crested goshawk | Least Concern | Near Threatened | No | Uncommon | Resident breeder | | No | | | Yes | No | No |
| 5 | Accipitridae | *Aquila heliaca* | Eastern imperial eagle | Vulnerable | Not Evaluated | Yes | Rare | Accidental visitor | | No | | | Yes | No | No |
| 6 | Accipitridae | *Aviceda jerdoni* | Jerdon's baza | Least Concern | Least Concern | No | Uncommon | Winter visitor | | No | | | Yes | Yes | No |
| 7 | Accipitridae | *Aviceda leuphotes* | Black baza | Least Concern | Least Concern | No | Common | Winter visitor | Passage migrant | No | | | Yes | Yes | Yes |
| 8 | Accipitridae | *Butastur indicus* | Grey-faced buzzard | Least Concern | Near Threatened | No | Uncommon | Winter visitor | | No | | | Yes | No | No |
| 9 | Accipitridae | *Buteo buteo* | Common buzzard | Least Concern | Least Concern | No | Uncommon | Winter visitor | | No | | | Yes | Yes | No |
| 10 | Accipitridae | *Circus melanoleucos* | Pied harrier | Least Concern | Least Concern | No | Rare | Winter visitor | | No | | | Yes | No | No |
| 11 | Accipitridae | *Circus sp.* | Marsh harrier | N.A | N.A | No | N.A | N.A | | N.A | | | N.A | Yes | No |
| 12 | Accipitridae | *Circus spilonotus* | Eastern marsh harrier | Least Concern | Endangered | Yes | Uncommon | Winter visitor | | No | | | Yes | No | No |
| 13 | Accipitridae | *Clanga clanga* | Greater spotted eagle | Vulnerable | Vulnerable | Yes | Rare | Winter visitor | | Yes | | Frogs, snakes and lizards, waterfowl, fish, insects, carrion, and small mammals | Yes | No | No |
| 14 | Accipitridae | *Elanus caeruleus* | Black-winged kite | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | No | | | Yes | Yes | Yes |
| 15 | Accipitridae | *Haliaeetus ichthyaetus* | Grey-headed fish eagle | Near Threatened | Vulnerable | Yes | Uncommon | Resident breeder | | Yes | Yes | Fish, waterbirds, Geophagus altifrons, Cichla orinocensis, Pangasius nasutus | Yes | Yes | Yes |
| 16 | Accipitridae | *Haliaeetus leucogaster* | White-bellied sea eagle | Least Concern | Least Concern | No | Common | Resident breeder | | Yes | Yes | Fish, crustaceans (crabs), reptiles (snakes, turtles) | Yes | Yes | Yes |
| 17 | Accipitridae | *Haliastur indus* | Brahminy kite | Least Concern | Least Concern | No | Common | Resident breeder | | No | Yes | | Yes | Yes | Yes |
| 18 | Accipitridae | *Hieraaetus pennatus* | Booted eagle | Least Concern | Least Concern | No | Uncommon | Winter visitor | | No | | | Yes | No | No |
| 19 | Accipitridae | *Milvus migrans* | Black kite | Least Concern | Endangered | Yes | Rare | Winter visitor | | No | | | Yes | No | No |
| 20 | Accipitridae | *Nisaetus cirrhatus* | Changeable hawk-eagle | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | No | | | Yes | Yes | Yes |
| 21 | Accipitridae | *Pernis ptilorhynchus* | Crested honey-buzzard | Least Concern | Least Concern | No | Common | Winter visitor | Passage migrant/non-breeding visitor | No | | | Yes | Yes | No |
| 22 | Accipitridae | *Spilornis cheela* | Crested serpent eagle | Least Concern | Critically Endangered | Yes | Rare | Resident, breeding not proven | | No | | | Yes | No | No |
| 23 | Acrocephalidae | *Acrocephalus bistrigiceps* | Black-browed reed warbler | Least Concern | Near Threatened | No | Uncommon | Winter visitor | | No | | | Yes | Yes | No |
| 24 | Acrocephalidae | *Acrocephalus orientalis* | Oriental reed warbler | Least Concern | Vulnerable | Yes | Common | Winter visitor | | No | | | Yes | Yes | Yes |
| 25 | Acrocephalidae | *Iduna caligata* | Booted warbler | Least Concern | Not Evaluated | No | Rare | Accidental visitor | | No | | | Yes | No | No |
| 26 | Aegithinidae | *Aegithina tiphia* | Common iora | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | Yes |
| 27 | Alcedinidae | *Alcedo atthis* | Common kingfisher | Least Concern | Vulnerable | Yes | Common | Winter visitor | | No | | | Yes | Yes | Yes |
| 28 | Alcedinidae | *Alcedo meninting* | Blue-eared kingfisher | Least Concern | Endangered | Yes | Rare | Resident breeder | | Yes | | Small fish, crustaceans, dragonfly larvae | Yes | No | No |
| 29 | Alcedinidae | *Ceyx erithaca* | Oriental dwarf kingfisher | Least Concern | Near Threatened | No | Uncommon | Winter visitor | Passage migrant | No | | | Yes | No | No |

| | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 30 | Alcedinidae | *Halcyon coromanda* | Ruddy kingfisher | Least Concern | Critically Endangered | Yes | Uncommon | Resident breeder | Winter visitor | Yes | | Fish, crustaceans, large insects, frogs, snails | Yes | No | No |
| 31 | Alcedinidae | *Halcyon pileata* | Black-capped kingfisher | Least Concern | Vulnerable | Yes | Uncommon | Winter visitor | Passage migrant | Yes | | Fish, lizard, frog, large insects | Yes | Yes | Yes |
| 32 | Alcedinidae | *Halcyon smyrnensis* | White-throated kingfisher | Least Concern | Least Concern | No | Common | Resident breeder | | Yes | | Fishs, lizards, snakes, insects, frogs, rodents | Yes | Yes | Yes |
| 33 | Alcedinidae | *Pelargopsis capensis* | Stork-billed kingfisher | Least Concern | Least Concern | No | Uncommon | Resident breeder | | Yes | | Fish, lizard, frog, rodent, crab | Yes | Yes | Yes |
| 34 | Alcedinidae | *Todiramphus chloris* | Collared kingfisher | Least Concern | Least Concern | No | Abundant | Introduced resident breeder | | No | | | Yes | Yes | Yes |
| 35 | Anatidae | *Spatula clypeata* | Northern shoveler | Least Concern | Not Evaluated | No | Rare | Winter visitor | | Yes | | Minute aquatic animals, plants and seeds | Yes | No | No |
| 36 | Anatidae | *Mareca penelope* | Eurasian wigeon | Least Concern | Not Evaluated | No | Rare | Accidental visitor | | Yes | | small aquatic plants | Yes | No | No |
| 37 | Anatidae | *Dendrocygna javanica* | Lesser whistling duck | Least Concern | Endangered | Yes | Uncommon | Resident breeder | | Yes | | Water plants, insects, aquatic invertebrates | Yes | Yes | No |
| 38 | Anatidae | *Nettapus coromandelianus* | Cotton pygmy goose | Least Concern | Critically Endangered | Yes | Rare | Resident, breeding not proven | | Yes | | Seeds, grass, aquatic plants, insects | Yes | No | Yes |
| 39 | Anhingidae | *Anhinga melanogaster* | Oriental darter | Near Threatened | Near Threatened | No | Rare | Non-breeding visitor | | Yes | | Fish | Yes | No | No |
| 40 | Apodidae | *Aerodramus fuciphagus* | Edible-nest swiftlet | Least Concern | Not Assessed | No | Common | Resident breeder | | No | | | Yes | No | No |
| 41 | Apodidae | *Aerodramus maximus* | Black-nest swiftlet | Least Concern | Near Threatened | No | Common | Resident breeder | | No | | | Yes | No | No |
| 42 | Apodidae | *Aerodramus sp.* | Swiftlet | N.A | N.A | No | N.A | N.A | N.A | N.A | | | N.A | Yes | No |
| 43 | Apodidae | *Apus nipalensis* | House swift | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 44 | Apodidae | *Apus pacificus* | Pacific swift | Least Concern | Least Concern | No | Uncommon | Winter visitor | Passage migrant | No | | | Yes | No | No |
| 45 | Apodidae | *Collocalia affinis* | Plume-toed swiftlet | Not Assessed | Vulnerable | Yes | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 46 | Apodidae | *Cypsiurus balasiensis* | Asian palm swift | Least Concern | Near Threatened | No | Uncommon | Resident breeder | | No | | | Yes | No | No |
| 47 | Ardeidae | *Ardea alba* | Great egret | Least Concern | Vulnerable | Yes | Common | Winter visitor | | Yes | Yes | Fish, amphibians (frogs), aquatic invertebrates (insects, crayfish), reptiles (snakes) | Yes | Yes | Yes |
| 48 | Ardeidae | *Ardea cinerea* | Grey heron | Least Concern | Least Concern | No | Uncommon | Resident breeder | | Yes | Yes | Blue-eared kingfisher, large fish, amphibian, reptiles, birds, rodents, crabs, insects, small mammals | Yes | Yes | Yes |
| 49 | Ardeidae | *Ardea intermedia* | Intermediate egret | Least Concern | Least Concern | No | Uncommon | Winter visitor | | Yes | Yes | Fish, frog, insect, crustacean | Yes | Yes | Yes |
| 50 | Ardeidae | *Ardea purpurea* | Purple heron | Least Concern | Endangered | Yes | Uncommon | Resident breeder | | Yes | Yes | Needllefish, other fish, frogs | Yes | Yes | Yes |
| 51 | Ardeidae | *Ardea sumatrana* | Great-billed heron | Least Concern | Critically Endangered | Yes | Uncommon | Resident breeder | | Yes | | fishes, amphibians, reptiles, insects, crustaceans, small mammals and birds. | Yes | Yes | No |
| 52 | Ardeidae | *Ardeola bacchus* | Chinese pond heron | Least Concern | Least Concern | No | Common | Winter visitor | | Yes | Yes | fish, frogs, crustaceans and insects | Yes | Yes | No |
| 53 | Ardeidae | *Ardeola speciosa* | Javan pond heron | Least Concern | Least Concern | No | Uncommon | Winter visitor | | Yes | Yes | | Yes | Yes | No |
| 54 | Ardeidae | *Bubulcus coromandus* | Eastern cattle egret | Least Concern | Vulnerable | Yes | Common | Winter visitor | Introduced resident, breeding not proven | Yes | Yes | Ferjervarya sp.. Frogs, small animals | Yes | Yes | No |
| 55 | Ardeidae | *Butorides striata* | Striated heron | Least Concern | Near Threatened | No | Common | Resident breeder | Winter visitor | Yes | Yes | crustaceans, frogs, insects, small fish | Yes | Yes | Yes |
| 56 | Ardeidae | *Egretta eulophotes* | Chinese egret | Vulnerable | Endangered | Yes | Rare | Winter visitor | | Yes | | fish, shrimps, small crustaceans | Yes | No | No |
| 57 | Ardeidae | *Egretta garzetta* | Little egret | Least Concern | Least Concern | No | Common | Winter visitor | | Yes | Yes | Fish, amphibian, reptile, bird, small mammal, insect, crustacean, mollusc | Yes | Yes | Yes |
| 58 | Ardeidae | *Egretta sacra* | Pacific reef heron | Least Concern | Endangered | Yes | Uncommon | Resident, breeding not proven | | Yes | | Fish, crustacean, mollusc | Yes | No | No |
| 59 | Ardeidae | *Gorsachius melanolophus* | Malayan night heron | Least Concern | Near Threatened | No | Rare | Winter visitor | Passage migrant | No | | | Yes | No | No |
| 60 | Ardeidae | *Ixobrychus cinnamomeus* | Cinnamon bittern | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | Winter visitor | Yes | | Fish, amphibian, insect | Yes | Yes | No |
| 61 | Ardeidae | *Ixobrychus eurhythmus* | Von Schrenck's bittern | Least Concern | Near Threatened | No | Uncommon | Winter visitor | | Yes | | Limnonectes blythii, frogs | Yes | No | Yes |
| 62 | Ardeidae | *Ixobrychus flavicollis* | Black bittern | Least Concern | Least Concern | No | Uncommon | Winter visitor | Passage migrant | Yes | | Fish, amphibian, insect | Yes | No | No |
| 63 | Ardeidae | *Ixobrychus sinensis* | Yellow bittern | Least Concern | Vulnerable | Yes | Common | Resident breeder | Winter visitor | Yes | Yes | Blue gourami, aquatic insects and their larvae, small fish, crustaceans, frogs, molluscs, dragonfly | Yes | Yes | Yes |

| | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 64 | Ardeidae | *Nycticorax nycticorax* | Black-crowned night heron | Least Concern | Endangered | Yes | Uncommon | Resident breeder | | Yes | | small animals, such as fishes, amphibians, reptiles, insects, crustaceans and even small mammals and birds | Yes | Yes | No |
| 65 | Bucerotidae | *Anthracoceros albirostris* | Oriental pied hornbill | Least Concern | Near Threatened | No | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 66 | Cacatuidae | *Cacatua goffiniana* | Tanimbar corella | Near Threatened | Not Applicable | No | Common | Introduced resident breeder | | No | | | Yes | No | No |
| 67 | Campephagidae | *Lalage nigra* | Pied triller | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | Yes |
| 68 | Campephagidae | *Pericrocotus divaricatus* | Ashy minivet | Least Concern | Least Concern | No | Common | Winter visitor | Passage migrant | No | | | Yes | Yes | No |
| 69 | Caprimulgidae | *Caprimulgus affinis* | Savanna nightjar | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | Yes |
| 70 | Caprimulgidae | *Caprimulgus jotaka* | Grey nightjar | Least Concern | Least Concern | No | Uncommon | Winter visitor | Passage migrant | No | | | Yes | No | No |
| 71 | Caprimulgidae | *Caprimulgus macrurus* | Large-tailed nightjar | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 72 | Charadriidae | *Charadrius dubius* | Little ringed plover | Least Concern | Endangered | No | Uncommon | Winter visitor | Passage migrant | Yes | | - | Yes | Yes | No |
| 73 | Charadriidae | *Charadrius leschenaultii* | Greater sand plover | Least Concern | Near Threatened | No | Uncommon | Winter visitor | Passage migrant | Yes | | - | Yes | No | No |
| 74 | Charadriidae | *Charadrius mongolus* | Lesser sand plover | Least Concern | Near Threatened | No | Common | Winter visitor | Passage migrant | Yes | | - | Yes | Yes | No |
| 75 | Charadriidae | *Pluvialis fulva* | Pacific golden plover | Least Concern | Vulnerable | Yes | Common | Winter visitor | Passage migrant | Yes | | - | Yes | Yes | No |
| 76 | Charadriidae | *Pluvialis squatarola* | Grey plover | Least Concern | Near Threatened | No | Uncommon | Winter visitor | Passage migrant | Yes | | - | Yes | No | No |
| 77 | Charadriidae | *Vanellus cinereus* | Grey-headed lapwing | Least Concern | Not Evaluated | No | Rare | Accidental visitor | | No | | | Yes | No | No |
| 78 | Charadriidae | *Vanellus indicus* | Red-wattled lapwing | Least Concern | Near Threatened | No | Uncommon | Resident breeder | | No | | | Yes | Yes | Yes |
| 79 | Ciconiidae | *Anastomus oscitans* | Asian openbill | Least Concern | Least Concern | No | Rare | Non-breeding visitor | | Yes | | Large molluscs (Pila sp.), Golden apple snails (Pomacea canaliculata), | Yes | Yes | No |
| 80 | Ciconiidae | *Leptoptilos javanicus* | Lesser adjutant | Vulnerable | Vulnerable | Yes | Rare | Non-breeding visitor | | Yes | | Fish, especially on mudskippers from the genus Periophthalmus, frogs, reptiles, crustatceans, locust, rats, and carrion | Yes | Yes | No |
| 81 | Ciconiidae | *Mycteria cinerea* | Milky stork | Least Concern | Not Assessed | No | NA | Introduced | | Yes | | Snails | Yes | Yes | No |
| 82 | Ciconiidae | *Mycteria leucocephala* | Painted stork | Least Concern | Not Assessed | No | NA | Introduced | | Yes | | - | Yes | Yes | No |
| 83 | Cisticolidae | *Cisticola juncidis* | Zitting cisticola | Least Concern | Vulnerable | Yes | Common | Resident breeder | | No | | | Yes | Yes | No |
| 84 | Cisticolidae | *Orthotomus atrogularis* | Dark-necked tailorbird | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 85 | Cisticolidae | *Orthotomus ruficeps* | Ashy tailorbird | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 86 | Cisticolidae | *Orthotomus sericeus* | Rufous-tailed tailorbird | Least Concern | Near Threatened | No | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 87 | Cisticolidae | *Orthotomus sutorius* | Common tailorbird | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | Yes |
| 88 | Cisticolidae | *Prinia flaviventris* | Yellow-bellied prinia | Least Concern | Near Threatened | No | Common | Resident breeder | | No | | | Yes | Yes | Yes |
| 89 | Columbidae | *Chalcophaps indica* | Common emerald dove | Least Concern | Least Concern | No | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 90 | Columbidae | *Columba livia* | Rock dove | Least Concern | Not Applicable | No | Abundant | Introduced resident breeder | | No | | | Yes | Yes | Yes |
| 91 | Columbidae | *Ducula bicolor* | Pied imperial pigeon | Least Concern | Data Deficient | No | Uncommon | Resident breeder | Non-breeding visitor/introduced | No | | | Yes | Yes | No |
| 92 | Columbidae | *Geopelia striata* | Zebra dove | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 93 | Columbidae | *Ptilinopus jambu* | Jambu fruit dove | Near Threatened | Vulnerable | Yes | Uncommon | Non-breeding visitor | | No | | | Yes | No | No |
| 94 | Columbidae | *Spilopelia chinensis* | Spotted dove | Least Concern | Least Concern | No | Abundant | Introduced resident breeder | | No | | | Yes | Yes | Yes |
| 95 | Columbidae | *Streptopelia tranquebarica* | Red turtle dove | Least Concern | Not Applicable | No | Uncommon | Introduced resident breeder | | No | | | Yes | Yes | No |
| 96 | Columbidae | *Treron curvirostra* | Thick-billed green pigeon | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | No | | | Yes | No | No |
| 97 | Columbidae | *Treron vernans* | Pink-necked green pigeon | Least Concern | Least Concern | No | Abundant | Resident breeder | | No | | | Yes | Yes | Yes |
| 98 | Coraciidae | *Eurystomus orientalis* | Oriental dollarbird | Least Concern | Least Concern | No | Common | Resident breeder | Winter visitor | No | | | Yes | Yes | No |
| 99 | Corvidae | *Corvus macrorhynchos* | Large-billed crow | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | No | | | Yes | Yes | Yes |

| | | | | | | | | | | | | | | | |

| 201 | Ploceidae | *Ploceus vitellinus* | Vitelline masked weaver | Least Concern | Not Assessed | No | N.A | Introduced | | No | | | Yes | Yes | No |
| 202 | Ploceidae | *Quelea erythrops* | Red-headed quelea | Least Concern | Not Assessed | No | NA | Introduced | | No | | | Yes | No | No |
| 203 | Podicipedidae | *Tachybaptus ruficollis* | Little grebe | Least Concern | Critically Endangered | Yes | Rare | Resident breeder | | Yes | | insects, molluscs, crustaceans, amphibians, fish | Yes | No | No |
| 204 | Psittaculidae | *Loriculus galgulus* | Blue-crowned hanging-parrot | Least Concern | Least Concern | No | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 205 | Psittaculidae | *Psittacula alexandri* | Red-breasted parakeet | Near Threatened | Not Applicable | No | Common | Introduced resident breeder | | No | | | Yes | Yes | No |
| 206 | Psittaculidae | *Psittacula krameri* | Rose-ringed parakeet | Least Concern | Not Applicable | No | Uncommon | Introduced resident breeder | | No | | | Yes | Yes | No |
| 207 | Psittaculidae | *Psittacula longicauda* | Long-tailed parakeet | Vulnerable | Near Threatened | Yes | Common | Resident breeder | | No | | | Yes | Yes | Yes |
| 208 | Psittaculidae | *Trichoglossus haematodus* | Coconut lorikeet | Least Concern | Not Applicable | No | Uncommon | Introduced resident breeder | | No | | | Yes | No | No |
| 209 | Pycnonotidae | *Pycnonotus aurigaster* | Sooty-headed bulbul | Least Concern | Not Applicable | No | Uncommon | Introduced resident breeder | | No | | | Yes | No | No |
| 210 | Pycnonotidae | *Pycnonotus goiavier* | Yellow-vented bulbul | Least Concern | Least Concern | No | Abundant | Introduced resident breeder | | No | | | Yes | Yes | Yes |
| 211 | Pycnonotidae | *Pycnonotus jocosus* | Red-whiskered bulbul | Least Concern | Not Applicable | No | Uncommon | Introduced resident breeder | | No | | | Yes | Yes | No |
| 212 | Pycnonotidae | *Pycnonotus plumosus* | Olive-winged bulbul | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 213 | Pycnonotidae | *Pycnonotus zeylanicus* | Straw-headed bulbul | Critically Endangered | Endangered | Yes | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 214 | Rallidae | *Amaurornis phoenicurus* | White-breasted waterhen | Least Concern | Least Concern | No | Common | Resident breeder | Winter visitor | No | | | Yes | Yes | Yes |
| 215 | Rallidae | *Gallicrex cinerea* | Watercock | Least Concern | Endangered | Yes | Uncommon | Winter visitor | | Yes | | Freshwater mollusc | Yes | Yes | Yes |
| 216 | Rallidae | *Gallinula chloropus* | Common moorhen | Least Concern | Endangered | Yes | Uncommon | Resident breeder | | Yes | | Small live prey including the eggs of other water birds, as well as algae, vegetation, seeds and fruit | Yes | Yes | Yes |
| 217 | Rallidae | *Gallirallus striatus* | Slaty-breasted rail | Least Concern | Least Concern | No | Uncommon | Resident breeder | | Yes | | Insects, seeds, crustaceans | Yes | Yes | No |
| 218 | Rallidae | *Poliolimnas cinereus* | White-browed crake | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | Yes | | - | Yes | Yes | Yes |

| | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 219 | Rallidae | *Porphyrio poliocephalus* | Grey-headed swamphen | Least Concern | Critically Endangered | Yes | Uncommon | Resident breeder | | Yes | | - | Yes | No | Yes |
| 220 | Rallidae | *Rallina fasciata* | Red-legged crake | Least Concern | Near Threatened | No | Uncommon | Resident breeder | Winter visitor | No | | | Yes | Yes | No |
| 221 | Rallidae | *Zapornia fusca* | Ruddy-breasted crake | Least Concern | Near Threatened | No | Uncommon | Resident breeder | Winter visitor | Yes | | Insects, large snails | Yes | Yes | Yes |
| 222 | Rallidae | *Zapornia paykullii* | Band-bellied crake | Near Threatened | Near Threatened | No | Rare | Accidental visitor | | Yes | | Fish, worms | Yes | No | No |
| 223 | Rallidae | *Zapornia pusilla* | Baillon's crake | Least Concern | Vulnerable | Yes | Uncommon | Winter visitor | Passage migrant | Yes | | Insect, aquatic animal | Yes | No | No |
| 224 | Recurvirostridae | *Himantopus himantopus* | Black-winged stilt | Least Concern | Data Deficient | No | Rare | Resident breeder | Winter visitor/passage migrant | Yes | | aquatic prey especially beetles, mayflies and spiders, although mollusks, crustaceans, earthworms and small fish, as well as water plants and their seeds | Yes | No | No |
| 225 | Rhipiduridae | *Rhipidura javanica* | Malaysian pied fantail | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | Yes |
| 226 | Scolopacidae | *Actitis hypoleucos* | Common sandpiper | Least Concern | Vulnerable | Yes | Common | Winter visitor | Passage migrant | Yes | | Crustaceans (crab), Insect, invertebrate | Yes | Yes | Yes |
| 227 | Scolopacidae | *Calidris subminuta* | Long-toed stint | Least Concern | Endangered | Yes | Uncommon | Winter visitor | Passage migrant | Yes | | Worms, red mud worm (Notomastus tenuis) | Yes | No | No |
| 228 | Scolopacidae | *Gallinago gallinago* | Common snipe | Least Concern | Vulnerable | Yes | Common | Winter visitor | | Yes | | Insect, earthworm, plant | Yes | No | No |
| 229 | Scolopacidae | *Gallinago megala* | Swinhoe's snipe | Least Concern | Vulnerable | Yes | Rare | Winter visitor | | Yes | | - | Yes | No | No |
| 230 | Scolopacidae | *Gallinago stenura* | Pin-tailed snipe | Least Concern | Vulnerable | Yes | Common | Winter visitor | | Yes | | Insect, earthworm, plant | Yes | No | No |
| 231 | Scolopacidae | *Numenius phaeopus* | Eurasian whimbrel | Least Concern | Near Threatened | No | Common | Winter visitor | Passage migrant | Yes | | - | Yes | Yes | No |
| 232 | Scolopacidae | *Rostratula benghalensis* | Greater painted-snipe | Least Concern | Critically Endangered | Yes | Rare | Resident breeder | | Yes | | - | Yes | No | No |
| 233 | Scolopacidae | *Tringa glareola* | Wood sandpiper | Least Concern | Endangered | Yes | Uncommon | Winter visitor | Passage migrant | Yes | | Aquatic insects, worms, spiders, shellfish, small fish | Yes | Yes | No |
| 234 | Scolopacidae | *Tringa nebularia* | Common greenshank | Least Concern | Vulnerable | Yes | Common | Winter visitor | | Yes | | - | Yes | No | No |
| 235 | Scolopacidae | *Tringa stagnatilis* | Marsh sandpiper | Least Concern | Endangered | Yes | Common | Winter visitor | Passage migrant | Yes | | Insect, invertebrate | Yes | No | No |
| 236 | Scolopacidae | *Tringa totanus* | Common redshank | Least Concern | Vulnerable | Yes | Common | Winter visitor | Passage migrant | Yes | | - | Yes | Yes | No |
| 237 | Strigidae | *Ketupa ketupu* | Buffy fish owl | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | Yes | | fish, frogs, crustaceans, reptiles (lizards) and insects, Small mammals (rats, mice); Small birds; Large insects (beetles), bats, carrion or carcass | Yes | Yes | No |
| 238 | Strigidae | *Ninox scutulata* | Brown hawk-owl | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 239 | Strigidae | *Otus lempiji* | Sunda scops owl | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 240 | Strigidae | *Otus sunia* | Oriental scops owl | Least Concern | Near Threatened | No | Rare | Winter visitor | Passage migrant | No | | | Yes | No | No |
| 241 | Strigidae | *Strix seloputo* | Spotted wood owl | Least Concern | Vulnerable | Yes | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 242 | Sturnidae | *Acridotheres javanicus* | Javan myna | Least Concern | Not Applicable | No | Abundant | Introduced resident breeder | | No | | | Yes | Yes | Yes |
| 243 | Sturnidae | *Acridotheres tristis* | Common myna | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | No | Yes |
| 244 | Sturnidae | *Agropsar sturninus* | Daurian starling | Least Concern | Least Concern | No | Common | Winter visitor | Passage migrant | No | | | Yes | Yes | No |
| 245 | Sturnidae | *Aplonis panayensis* | Asian glossy starling | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 246 | Sturnidae | *Gracula religiosa* | Common hill myna | Least Concern | Near Threatened | No | Uncommon | Resident breeder | | No | | | Yes | No | No |
| 247 | Sturnidae | *Gracupica contra* | Asian pied starling | Least Concern | Not Assessed | No | NA | Introduced | | No | | | Yes | No | No |
| 248 | Sturnidae | *Sturnia sinensis* | White-shouldered starling | Least Concern | Least Concern | No | Uncommon | Winter visitor | Passage migrant | No | | | Yes | No | No |
| 249 | Threskiornithidae | *Plegadis falcinellus* | Glossy ibis | Least Concern | Not Evaluated | No | Rare | Accidental visitor | | Yes | | Fish, frog, crustacean, water snake, insect | Yes | No | No |
| 250 | Timaliidae | *Mixornis gularis* | Pin-striped tit-babbler | Least Concern | Least Concern | No | Common | Resident breeder | | No | | | Yes | Yes | No |
| 251 | Turnicidae | *Turnix suscitator* | Barred buttonquail | Least Concern | Least Concern | No | Uncommon | Resident breeder | | No | | | Yes | No | No |
| 252 | Tytonidae | *Tyto javanica* | Eastern barn owl | Least Concern | Least Concern | No | Uncommon | Resident breeder | | No | | | Yes | Yes | No |
| 253 | Zosteropidae | *Zosterops simplex* | Swinhoe's white-eye | Least Concern | Vulnerable | Yes | Common | Resident breeder | | No | | | Yes | Yes | No |

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix D: List of Probable and Recorded Faunal Species**

**Table 9: List of Probable and Recorded Non-volant Mammals**

| No. | Family | Scientific Name | Common Name | Global Status (IUCN/CITES) | National Status (NParks, 2022) | Species of Conservation Significance | Distribution/Abundance/Rarity (Baker & Lim, 2012) | Native Status (Baker & Lim, 2012) | Probable Species | Recorded Species |
|---|---|---|---|---|---|---|---|---|---|---|
| 1 | Canidae | *Canis lupus familiaris* | Feral dog | Not Assessed | Not Assessed | No | NA | Non-native | Yes | Yes |
| 2 | Cercopithecidae | *Macaca fascicularis* | Long-tailed macaque | Endangered | Least Concern | Yes | Widespread and Common | Native | Yes | Yes |
| 3 | Felidae | *Felis catus* | Feral cat | Not Assessed | Least Concern | No | NA | Non-native | Yes | No |
| 4 | Felidae | *Prionailurus bengalensis* | Mainland leopard cat | Least Concern | Critically Endangered | Yes | Restricted and Rare | Native | Yes | No |
| 5 | Manidae | *Manis javanica* | Sunda pangolin | Critically Endangered | Critically Endangered | Yes | Widespread but Rare | Native | Yes | No |
| 6 | Muridae | *Mus musculus* | House mouse | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | No |
| 7 | Muridae | *Sundamys annandalei* | Annandale's rat | Least Concern | Least Concern | No | Restricted but Common | Native | Yes | No |
| 8 | Muridae | *Rattus norvegicus* | Brown rat | Least Concern | Not Applicable | No | Widespread and Common | Non-native | Yes | No |
| 9 | Muridae | *Rattus tanezumi* | Oriental house rat | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | No |
| 10 | Muridae | *Rattus tiomanicus* | Malaysian wood rat | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 11 | Mustelidae | *Lutrogale perspicillata* | Smooth-coated otter | Vulnerable | Endangered | Yes | Widespread but Rare | Native | Yes | Yes |
| 12 | Sciuridae | *Callosciurus notatus* | Plantain squirrel | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 13 | Soricidae | *Suncus murinus* | House shrew | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 14 | Suidae | *Sus scrofa* | Wild pig | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 15 | Tupaiidae | *Tupaia glis* | Common treeshrew | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 16 | Viverridae | *Paradoxurus musangus* | Common palm civet | Least Concern | Least Concern | No | Widespread but Uncommon | Native | Yes | Yes |
| 17 | Sciuridae | *Sundasciurus tenuis* | Slender squirrel | Least Concern | Least Concern | No | Restricted but Common | Native | Yes | No |

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix D: List of Probable and Recorded Faunal Species**

**Table 10: List of Probable and Recorded Bats**

| No. | Family | Scientific Name | Common Name | Global Status (IUCN/CITES) | National Status (NParks, 2022) | Species of Conservation Significance | Distribution/Abundance/Rarity (Baker & Lim, 2012) | Native Status (Baker & Lim, 2012) | Probable Species | Recorded Species |
|---|---|---|---|---|---|---|---|---|---|---|
| 1 | Emballonuridae | *Saccolaimus saccolaimus* | Pouch-bearing bat | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 2 | Emballonuridae | *Taphozous melanopogon* | Black-bearded tomb bat | Least Concern | Least Concern | No | Widespread but Rare | Native | Yes | Yes |
| 3 | Pteropodidae | *Cynopterus brachyotis* | Lesser dog-faced fruit bat | Least Concern | Not Assessed | No | Widespread and Common | Native | Yes | Yes |
| 4 | Pteropodidae | *Eonycteris spelaea* | Cave nectar bat | Least Concern | Vulnerable | Yes | Widespread but Uncommon | Native | Yes | No |
| 5 | Rhinolophidae | *Rhinolophus refulgens* | Glossy horseshoe bat | Least Concern | Not Assessed | No | Restricted but Common | Native | Yes | Yes |
| 6 | Vespertilionidae | *Myotis horsfieldii* | Horsfield's large-footed myotis | Least Concern | Least Concern | No | N.A | Native | Yes | Yes |
| 7 | Vespertilionidae | *Myotis muricola* | Whiskered myotis | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 8 | Vespertilionidae | *Pipistrellus javanicus* | Javan pipistrelle | Least Concern | Not Assessed | No | Widespread but Uncommon | Native | Yes | Yes |
| 9 | Vespertilionidae | *Scotophilus kuhlii* | Asiatic lesser yellow house bat | Least Concern | Least Concern | No | Widespread and Common | Native | Yes | Yes |
| 10 | Vespertilionidae | *Tylonycteris fulvida* | Lesser bamboo bat | Least Concern | Vulnerable | Yes | Restricted and Rare | Native | Yes | No |
| 11 | Vespertilionidae | *Tylonycteris malayana* | Greater bamboo bat | Least Concern | Vulnerable | Yes | Widespread and Common | Native | Yes | No |
| 12 | Vespertilionidae | *Tylonycteris sp.* | Bamboo bat | N.A | N.A | N.A | N.A | Native | N.A | Yes |

**Appendix 7.1 Terrestrial Biodiversity Baseline Report**
**Appendix E1: Faunal Survey Data**

**Table 4: Survey Log**

| Date | Activity | Cycle | Transect | Direction | Time In | Time Out | Weather |
|---|---|---|---|---|---|---|---|
| 22-Oct-20 | Birds, herps, mammals | 1 | T04 | Forward | 2010 | 2320 | Clear |
| | Birds, herps, mammals | 1 | T01 + T02 | Forward | 1930 | 2230 | Clear |
| 30-Oct-20 | Birds, mammals, hymenoptera | 1 | T03 | Forward | 735 | 930 | Sunny |
| 30-Oct-20 | Butterfly, odonate | 1 | T03 | Reverse | 930 | 1130 | Sunny |
| 3-Nov-20 | Butterfly, odonate, hymenoptera | 1 | T01 + T02 | Reverse | 903 | 1312 | Cloudy |
| 5-Nov-20 | Birds, herps, mammals | 1 | T04 | Forward | 721 | 930 | Partly cloudy |
| 5-Nov-20 | Butterfly, odonate, hymenoptera | 1 | T04 | Reverse | 1006 | 1221 | Partly cloudy |
| 11-Nov-20 | Birds | 1 | T01 | Reverse | 715 | 830 | Fair |
| 12-Nov-20 | Herps, mammals | 1 | T01 + T02 | Reverse | 705 | 916 | Fair |
| 14-Nov-20 | Butterfly, odonate, hymenoptera | 2 | T03 | Reverse | 855 | 1015 | Sunny |
| 14-Nov-20 | Herps | 1 | T03 | Forward | 815 | 855 | Sunny |
| 19-Nov-20 | Birds, herps, mammals | 2 | T01 + T02 | Reverse | 1955 | 2323 | Cloudy after rain |
| 20-Nov-20 | Herps, mammals | 2 | T01 + T02 | Forward | 715 | 915 | Fair |
| 20-Nov-20 | Bee, odonate | 2 | T04 | Forward | 911 | 1140 | Fair |
| 22-Nov-20 | Butterfly | 2 | T04 | Forward | 911 | 1100 | Fair |
| 23-Nov-20 | Herps, mammals | 2 | T04 | Reverse | 715 | 905 | Fair |
| 24-Nov-20 | Birds | 2 | T01 | Forward | 714 | 800 | Cloudy |
| 24-Nov-20 | Odonates | 2 | T01 | Reverse | 850 | 945 | Partly cloudy |
| 25-Nov-20 | Birds | 2 | T03 | Forward | 715 | 915 | Fair |
| 26-Nov-20 | Birds, herps, mammals | 2 | T04 | Reverse | 1945 | 2235 | Cloudy |
| 27-Nov-20 | Herps, mammals | 2 | T03 | Reverse | 730 | 930 | Fair |
| 28-Nov-20 | Butterfly, hymenoptera | 2 | T01 + T02 | Reverse | 900 | 1215 | Fair; post-rain |
| 30-Nov-20 | Birds | 2 | T02 | Forward | 706 | 859 | Cloudy |
| 30-Nov-20 | Odonates | 2 | T02 | Reverse | 900 | 1045 | Sunny |
| 2-Dec-20 | Odonates | 3 | T01+T02 | Forward | 1155 | 1450 | Post-rain; partly cloudy |
| 2-Dec-20 | Birds, herps | 2 | T04 | Reverse | 700 | 845 | Fair |
| 3-Dec-20 | Birds, herps, mammals | 3 | T03 | Forward | 726 | 828 | Fair |
| 3-Dec-20 | Butterfly, odonate, hymenoptera | 3 | T03 | Reverse | 830 | 935 | Sunny |
| 5-Dec-20 | Herps, mammals | 3 | T01+T02 | Reverse | 645 | 845 | Fair |
| 5-Dec-20 | Bee, butterfly | 3 | T01+T02 | Forward | 937 | 1220 | Fair |
| 7-Dec-20 | Birds | 3 | T04 | Forward | 659 | 835 | Fair |
| 7-Dec-20 | Birds, herps, mammals | 3 | T01 + T02 | Forward | 1930 | 2204 | Cloudy |
| 7-Dec-20 | Birds, herps, mammals | 1 | B01 (old) + B02 (old) | Forward | 700 | 1042 | Fair |
| 8-Dec-20 | Birds | 3 | T02 | Reverse | 715 | 900 | Fair |
| 9-Dec-20 | Birds | 3 | T01 | Reverse | 716 | 826 | Fair |
| 10-Dec-20 | Birds, herps | 1 | B01+B02 | Forward | 2040 | 2130 | Drizzling towards the end |
| 10-Dec-20 | Herps, mammals | 3 | T04 | Forward | 705 | 847 | Fair |
| 11-Dec-20 | Birds, mammals | 2 | B01+B02 | Forward | 700 | 1030 | Sunny |
| 12-Dec-20 | Butterfly, odonate | 1 | B01+B02 | Forward | 900 | 1300 | Partly cloudy turned sunny |
| 13-Dec-20 | Butterfly | 3 | T04 | Reverse | 910 | 1145 | Sunny |
| 14-Dec-20 | Odonates | 2 | B01+B02 | Forward | 905 | 1200 | Cloudy |
| 16-Dec-20 | Birds | 1 | T02 | Reverse | 715 | 930 | |
| 17-Dec-20 | Birds, herps, mammals | 3 | T04 | Forward | 2003 | 2315 | Cloudy, after rain |
| 19-Dec-20 | Birds, herps, mammals | 2 | B01+B02 | Forward | 1940 | 2200 | Fair |
| 19-Dec-20 | Mammals | 1 | B01+B02 | Forward | 1940 | 2200 | Fair |
| 21-Dec-20 | Bee, odonate | 3 | T04 | Reverse | 900 | 1130 | Fair |
| 21-Dec-20 | Birds, mammals | 2 | B01+B02 | Forward | 2000 | 2152 | Fair |
| 6-Jan-21 | Birds, herps, mammals | 4 | T01 + T02 | Forward? | 1940 | 2240 | Fair, slight droplets of rain in between T01 |
| 13-Jan-21 | Birds | 4 | T01 | Forward | 720 | 830 | Cloudy |
| 14-Jan-21 | Birds, herps, mammals | 4 | T04 | Reverse | 705 | 926 | Partly cloudy |
| 15-Jan-21 | Odonates | 3 | B01+B02 | Reverse | 900 | 1125 | Sunny, windy |
| 18-Jan-21 | Birds | 4 | T02 | Forward | 715 | 900 | Fair |
| 18-Jan-21 | Birds, mammals | 3 | B01+B02 | Reverse | 708 | 930 | Partly cloudy, windy |
| 21-Jan-21 | Birds | 4 | T03 | Forward | 736 | 854 | Partly cloudy |
| 21-Jan-21 | Herps, mammals | 4 | T03 | Reverse | 855 | 1015 | Fair |
| 21-Jan-21 | Butterfly, odonate, hymenoptera | 4 | T03 | Reverse | 855 | 1015 | Fair |
| 21-Jan-21 | Birds, herps, mammals | 4 | T04 | Reverse | 2010 | 2234 | Just rained, cloudy |
| 22-Jan-21 | Birds, herps, mammals | 3 | B01+B02 | Reverse | 2000 | 2145 | Fair |

| Date | Activity | Cycle | Transect | Direction | Time In | Time Out | Weather |
|---|---|---|---|---|---|---|---|
| 24-Jan-21 | Birds, mammals | 4 | T01+T02 | Forward | 720 | 1040 | Fair |
| 28-Jan-21 | Butterfly, odonate, hymenoptera | 4 | T04 | Forward | 855 | 1145 | Fair |
| 30-Jan-21 | Buttefly, odonate, hymenoptera | 4 | T02 | Reverse | 923 | 1120 | Fair |
| 1-Feb-21 | Birds, herps, mammals | 5 | T01 + T02 | Reverse | 718 | 1022 | Fair |
| 3-Feb-21 | Buttefly, odonate, hymenoptera | 5 | T01 + T02 | Forward | 909 | 1303 | Partly cloudy |
| 4-Feb-21 | Birds, herps, mammals | 5 | T04 | Forward | 2000 | 2307 | Fair |
| 6-Feb-21 | Buttefly, odonate, hymenoptera | 5 | T03 | Forward | 830 | 1100 | Sunny, windy |
| 6-Feb-21 | Buttefly, odonate, hymenoptera | 5 | T01 | Reverse | 1100 | 1200 | Sunny, windy |
| 8-Feb-21 | Herps, mammals | 4 | B01+B02 | Reverse | 2010 | 2150 | Fine |
